12th Annual
CATTLEMEN'S
Bull Sale

Welcome to the Cattlemen's Bull Sale. We would like to take the time to thank everyone who has supported us in the past. For us sale day is not only about offering our current crop for sale, it is also a chance to reconnect and visit with our past customers. Even if you are not in the market for another bull please join us on sale day for lunch and some fellowship. It is just one of the ways we say thank you!

The Wheelers and Fleurys are two families actively involved in the cattle business, who are working together to provide a quality product and superior service for our customers. For several decades our families have played an active role in the production and marketing of commercial and purebred cattle.

Box 284 RR#9 Saskatoon, SK S7K 1P3
email: wheelers_stock_farm@hotmail.com
www.wheelersstockfarm.com

We are extremely excited about the direction in which the cattle industry is headed. 2015 has brought much excitement to the cattle industry; cattle have been sold throughout Canada hitting record highs. The cattle producers are very deserving of this and we feel this is the start of a new chapter in the cattle business.

Michael, Rhea, Ty & Tate Wheeler
(306) 382-9324
(306) 260-7336 Michael Cell

Over time, cow herds have grown at a rapid pace, and family farms have expanded. With this growth of cow herd size, some changes have had to occur in order to become more efficient. The demand for two-year-old bulls has been amplified and it is our job as seed stock producers to fill those needs. In this year's sale we are excited to offer 30 rugged red and black two-year-old Angus bulls. This group will impress you and have been held back for this particular reason.

Harvey & Frances Wheeler
(306) 931-8471
(306) 230-3582 Harvey Cell

Please stop by sale day and introduce yourself. We are extremely proud of the set of bulls coming to this year's sale and look forward to showing you around the pens. If we can answer any questions prior to the sale or you would like to come out to the farms and view our breeding programs we encourage you to contact us. If for any reason you are unable to make it sale day feel free to contact us or any of our capable sale staff. We have a great sight unseen purchase program that has proven to work very well for our customers.

The Cattlemen’s Service Program:

Term: 50% sale day and a post dated cheque for the balance dated May 31.

Delivery: Bulls will be delivered as soon as possible following the sale. Bulls may be returned to the farm until delivery can be made or you pick up your bull.

All two-year olds sold in the sale will be delivered shortly after the sale.

Wintering: We are willing to winter all sale bulls free of charge until April 1st. After that date all buyers will be contacted and arrangements will be made for delivery or pick-up . All bulls sent back to the farm MUST be insured for full mortality.

Insurance: Larry Toner from Larry Toner Agencies will be selling insurance sale day. Remember all bulls going back to the farm must be insured for full mortality.

Cattlemen’s Common Sense Breeding Guarantee: All bulls will be semen tested and vet inspected. We fully guarantee all bulls sold 100%. In the event of a problem we guarantee to provide you with a quality bull to get your cows bred. We understand that when your livelihood depends on your cow herd’s production you need service and not hassles.

Sight Unseen Purchase Program: For those who cannot attend, we offer a sight unseen purchase program. Call us with your needs and we will recommend suitable bulls. All bulls sold through this program do so with a satisfaction guarantee.

Buyer Incentive Program: Any animals shown by a buyer that are sired by a bull purchased at the Cattlemen’s Bull Sale are eligible for a credit towards the next sale. Grand Champion \$500, Reserve Grand Champion \$250. Winners must provide a photo to claim their award.

SIGHT UNSEEN PURCHASE PROGRAM GUARANTEE

Call us with your needs and we will recommend suitable bulls. We know our bulls better than anyone and can help you source the best bulls for your program. We have professional and knowledgeable cattlemen that can provide you with a second opinion as well. All orders are handled in strict confidence!

All bulls sold through this program do so with a satisfaction guarantee. When we unload him, if you don't like him, you don't own him. Plain and simple.

Let us help you find your ideal bulls.

★ **Canadian Pedigree:** Animals with a standard 3-generation pedigree made up of all Canadian genetics will receive a designation of "Canadian" and a maple leaf will adorn the registration certificate.

◆◆ **Straight Canadian Pedigree:** Animals with a 5-generation pedigree made up of all Canadian genetics will receive a designation of "Straight Canadian" and a Canadian flag will adorn the registration certificate.

WHAT DO THE NUMBERS MEAN?

Calving Ease Rating System:

Power Plus ★: Bulls marked with this symbol have more punch and will have larger calves at birth and more performance at weaning time. They are recommended for cows only.

Curve Bender ★★: Bulls marked with this symbol have more moderate birth weights while maintaining performance. They can be used on cows with no problems or large, well developed heifers preferably of British breeds. A few assisted births may be expected out of heifers.

Sleep Easy ★★★: As the name implies a Sleep Easy sire is a calving ease bull that lets you sleep easy knowing you should have very little calving difficulty. These are the bulls we recommend to use on heifers.

Actual Weights & Data:

BW: Birth weight is the actual weight of a calf taken in pounds within 24 hours after birth.

Adj. WW: This is the weaning weight of a calf adjusted to a common age of 205 days and is adjusted for the age of the dam, for accurate comparison reasons.

Adj. YW: This is the yearling weight of a calf adjusted to a common age of 365 days to allow for easier comparison between bulls.

Notes About EPD's:

EPD's between Black and Red Angus are not comparable.

BW EPD: The birth weight EPD is a figure expressed in pounds and is a predictor of an individual's contribution to its progeny at birth.

WW EPD: The weaning weight EPD is expressed in pounds as the average weight of his progeny compared to an average bull of the breed for weaning weight.

YW EPD: The yearling weight EPD is expressed in pounds as the average weight of his progeny compared to an average bull of the breed for yearling weight. It is the best indicator of overall growth.

Milk EPD: The Milk EPD is a predictor of a sire's genetic merit for milk as expressed in his daughters, or in other words that part of weaning weight attributed to milk genes.

TM EPD: The TM EPD is a combination of an animal's Milk EPD added to 50% of its Weaning Weight EPD. It is an indicator of the growth potential of progeny based on performance and milking ability. The TM EPD is a better indicator of a cow's production potential than just Milk.

CE EPD: The Calving Ease EPD is a percentage of probability that a bull's calves will be born without any assistance. Therefore animals with a higher positive number will have greater probability of having no calving problems.

MCE EPD: The Maternal Calving Ease EPD is a percentage of probability that a bull's daughter's calves will be born without any assistance. Therefore daughters of an animal with a higher positive number will have a greater probability of having no calving problems.

so you think you know cattle

The snow's coming down soft and warm
If this keeps on it may well storm
We feel a murmur of a breeze
Gently nudging our evergreen trees

New calves are coming all over the place
In the holding pen they play and race
The mothers checking here and there
Those new born babies take extra care

Now how does a cow that just eats hay
Know her baby from a stray
How does she know the care it needs
What makes her available for the baby to feed?

What knowledge has she that we know not
To protect her baby if it gets caught
Who told her on a sunny day
That her baby would wander and buck and play

Who told her to babysit the calves in a bunch?
While all their mothers take an extended lunch
What is the knowledge that we know not
When a mother will fight to the death if her baby got caught

Calving is such an interesting time
When you check the cows all in a line
As they file by to get a drink
You cut out the ones that you may think

Need to go into the calving pen
A very short time they'll have to spend
Before they'll have a baby by their side
If they're in that pen their babies can't hide

Out in the bush or deep in the snow
And where they are only their mothers will know
You search and look, spend a lot of time
Sometimes you're unlucky, other times the baby is fine

If it was summer, out is where they should be
To wander the hillsides, happy and free
Babies born on hillsides or in wooded draws
If a coyote comes by, the mother bellows and paws

The rest of the herd come on the run
To fight the coyote with the herd is fun
The mother keeps her baby very near
For his life, the coyote starts to fear

Forty mad cows on the run
To stamp this coyote, would be fun
The coyote leaps and runs for his life
Hunting grasshoppers and mice, there's a lot less strife

As the cows wonder by with their babies at side
The rancher looks and tries to decide
Which cows to keep, which cows to sell
He won't have to make up his mind for quite a spell

The cows tell you what they really need
If you watch your cows, you'll know what to feed
When the cows are full, laying in the sun
Then raising them is so much fun

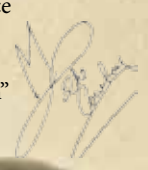

If your cows are in a dire need
They will tell you if they need more feed
If they come in thin in the fall
Then your pasture is just too darn small

If they stand and look before they drink
The water is bad, so what do you think?
If they root around their feed and seem to play
The feed is moldy, that's how they say

To raise cattle you need to be
Out amongst them so you can see
The signs they give you every day
It's interesting what they have to say

If you don't know the language very well
Sit with them quietly for a spell
Put yourself in her hide and sit on the fence
The time you do this would be well spent

Written by "The Cowboy - Bill Dillabaugh"

BULL POWER

Wheel N Deal has proven to be a breed leading herd sire. He is sound footed, great haired and offers the muscle that is sometimes hard to find. He has proven to be a very consistent sire of both sexes keeping birth weights moderate (84 lbs average), adding muscle and keeping frame score in check. His dam is a premier female and has been a very successful donor cow for us. His full sister sports an ideal udder and his first daughters calving now have excellent milk flow and udder quality. We are very excited about Wheel N Deal because of the balanced package he offers.

Big Deal is one of our home raised herd bulls. Big Deal has bred on very similar to his sire Real Deal. He was used to add depth of rib, fleshing ability, growth and more hair in everyone's favorite dark red colour. Big Deal's dam, Heather 84S, has been a great producer and comes from one of the original cow families our herd is built around. His grand-sire Jack Daniels 18M and the Heather cow family make good uddered, big bodied cows that always wean calves at the top of the herd. Owned with Grass Roots Ranch.

Jack sires tremendous dimension to his progeny with added capacity, bone, a great big foot and lots of hair. If you study the catalogue you will find his daughters have went on to produce some of the feature bulls in the sale as well. His pedigree is a little different for some programs and he has left a strong influence on our program. He is now deceased and this will be the last offering of direct sons.

After fully realizing how much the Jack line of cattle had to offer our herd we wanted to quickly introduce more of it into our genetics. We retained this son from the highly maternal Anne cow family. Jack 115Y is a replica of his sire offering the same depth, hair and great foot in a smaller BW package. With just a 72 lbs BW and WW of 802 lbs, Jack 115Y offers the ideal growth curve. He is now deceased. Owned with Grass Roots Ranch.

When the chance to buy Creed came along he was a good fit as a walking bull that would add exceptional feet (probably the best we have ever seen on an Angus bull), length, style, and extra growth. He also brought to the table the exciting outcross pedigree from the highly proven Freedom line of Black Angus cattle. In addition to being a power sire his daughters have calved sporting beautiful udders. Owned with Miller Wilson Angus.

Dodge City 61Y offers tremendous growth in a deep sided, loose hidied, correct package. He is one of those "size XXL" bulls weighing in at 1510 lbs with 42 cm testicles two weeks past his first birthday. The cow family backing this powerhouse only adds to the equation being big bodied, highly productive females. Dodge City 61Y sired an exceptional calf crop here as well as Brylor Ranch. He has a tremendous disposition and converts rough-age like no other bull we have seen before. This bull can convert and gain.

NEW HERD SIRES TO WATCH FOR

MAGIC MIKE

Magic Mike is our newest herd sire added for his exceptional maternal strength. After seeing his dam Meg 85N and maternal sisters we knew we had to incorporate his genetics. His sire Indeed is one of the legendary maternal sires in the breed. Fertility, udder quality and longevity are traits where he excels. We have used him successfully on heifers as he sires moderate birth weights while not giving up muscle shape or capacity. Every daughter made the replacement pen, and we wish we had got more sons from his first calf crop. He will have the largest sire group in our 2015 calf crop. Owned with Bar-E-L Angus.

Game Plan is an AI sire we used in our heifer pen with very good results. His calves were all born easily and with great vigour at birth. Throughout the summer and fall we were impressed how these small calves grew into thick made, eye appealing bulls and females that stand in with the rest of the group. We added two sons to our herd and plan to continue using his genetics in our program. We have been very impressed with his progeny here as well as his progeny at Six Mile Ranch.

GAME PLAN

GAME ON

We retained Game On as our pick of our Game Plan sons from our 2013 calf crop. He was used as a calving ease sire in our heifer pen. Right from a calf he was always catching your eye with his correct look and style. We were very impressed with his first calf mother, and when you see her second calf selling as the feature Lot 4 bull you will be impressed. His grand-dam Bridget 16R is also the dam of the Creed bull we retained to use in our herd.

Fast Lane was added to our herd sire line up to add more of the moderate birth weight genetics of Game Plan in a heavy muscled package. He was the talk of the 2014 Six Mile bull sale for his added muscle shape and substance in a moderate, easy fleshing package. His dam Ruby 16P is also a leading donor in the Six Mile program. He is working double duty breeding here as well as at our partners Breed Creek Angus.

FAST LANE

MONOPOLY

We added Monopoly to our AI program to add some outcross calving ease genetics. Monopoly is a son of Ter-Ron Park Place who is a son of the famous HF Tiger 5T. We wanted to add the short gestation genetics of Tiger into our red cattle. Monopoly's first calves are all arriving early and without any assistance. In addition to calving ease, Monopoly also has an exceptional hair coat, and is deep sided.

What a chunk! Maybe the biggest hiped and widest topped bull we have raised in 18 years. He packs as much muscle on a moderate frame as you will find anywhere. He is great haired and good footed like all the Wheel N Deal sons and could be the bull to carry on this sire line. His dam Dawn 17Y is a moderate framed, big topped, low maintenance cow that has great udder quality. He can add muscle shape, character and early maturity to his sons while leaving easy fleshing, tanky daughters that raise big calves. Casanova is a very unique individual. Let him sweet talk his way into your breeding program and take your cows to a whole other level. *Terms to be announced.*

Romeo carries the same stamp as all the Wheel N Deal sons being dark red, hairy, and good footed while having that extra shape to their muscle. His dam Becky 1N has been one of our top producing cows with her sons always standing at the top of the bull pen. Three sons have sold to Hillcrest Colony. Here may be the sleeper of the sale.

It is sometimes hard to find a bull that has the growth and frame this guy has in such a moderate birth weight package. He is long and smooth made and would be a good choice to cover a group of cows and breed a couple heifers if needed. An ideal bull for someone with a smaller herd and needs one bull to cover everything.

A real stud with herd bull potential. Great footed, extra hairy with that herd bull look. His dam Bridget 101Y is what completes the package, she is a rising star in our program that raised a bull we retained as her first calf and now this bull. She is moderate, with an ideal udder and huge rib shape. It is pretty tough to find a hole in this bull, he is a complete package.

The Jack 115Y bull left a very balanced group of calves like Jack 101B. This deep sided bull is very typical of the Jack line. He stems from a cow family that keeps birth weights moderate. Notice the influence of Atlantic City again which is prevalent throughout our herd. If you need a bull to breed cows and a few heifers here might be the bull for you.

RANCH READY

March 14th 2015 will mark the start of a new chapter for Fleury Cattle Co. I am extremely proud to bring to you our first offering of all two-year-old Angus bulls. As agriculture evolves, we notice farms and ranches expanding. With this growth, operations need to be more efficient and economical to sustain a profitable operation. Due to ranchers expanding their cowherds, cattle are run in larger groups and the demand for two-year-old bulls has never been greater. In 2014 Fleury Cattle Company bred every female on the ranch for April and May calving, which has resulted in more efficient management of our herd. With cows calving later, we were able to implement swath grazing for the majority of the winter, which reduced manure removal, fuel, and equipment costs as well as additional labour. Swath grazing also allows our cattle to acclimatize to western Canada's climate and environment; we have found that calving on grass permits the cow to manage her calf in this natural setting.

We manage these bulls the first year as yearlings on a TMR ration, not exceeding 1% of body weight of grain per day, maintaining a 2.5 lbs daily gain. They are then turned out on grass where these bulls grow frame and are developed in a natural environment. We bring these bulls home from grass early fall and put them on a TMR ration designed for a 3-3.5lbs daily gain. These bulls are developed with longevity in mind; they need to be athletic and have the ability to service a large group of cows. On sale day, these bulls will have reached 75% of their mature weight as a two-year-old. Running two-year-old bulls gives a better idea of what that bull is going to mature into. Two-year-olds are capable of covering more cows and require less development. We believe a two-year-old is past the calf stage, knows that he is a breeding bull, and is ready to go out and breed cows.

We would like to invite you to come analyze our sale offering of the industry's finest, ranch-ready set of Angus two-year-old bulls.

Matt Fleury

**TWO-YEAR
OLDS**

BULL POWER

Here is a straight Canadian-bred bull that has heavily influenced Fleury Cattle Company's program. Double AA 50'08 carries excellent bone, lots of mass and muscle, and has a picture perfect foot. RCE 50'08 is a bull that has been admired by many commercial bull buyers, breeders, and international guests. Double AA Bardolene 50'08's progeny are very stylish and he continuously stamps his calves. Sons, daughters, and semen have been sold throughout Canada and the USA and have been a big influence on these programs. The ANNIE K cow family are highly regarded within the Angus industry, excelling in numerous purebred operations; 50'08's pedigree has some of the most influential ANNIE K cow's that have ever existed. 50U's dam, DOUBLE AA ANNIE K 280'96, is a well recognized cow in the Angus business. This cow has produced many successful herd bulls for Double AA Angus and is the grandmother to the well known Double AA Old Post bull. We really feel we have something special and unique. We are excited about the progeny off of 50U and feel they are the type of cattle that the industry demands.

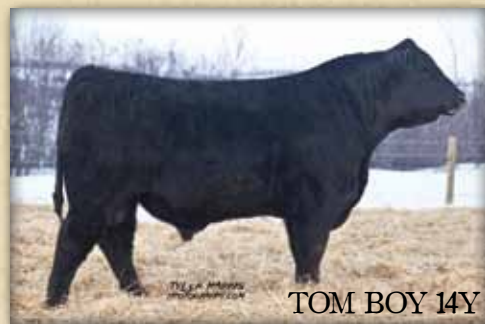

BARDOLENE 50'08

BANDOLIER 805Y

RNRF Bandolier 805Y is an extremely long-bodied, heavy-boned bull who is out of a top cow, Double AA Annie K 813'06. This bull was discovered at the Flicek's bull sale in 2012 and was a standout. RNRF Bandolier 805Y is sired by the well-known Double AA Bardolier 47'06: a sire that has had a large impact on many breeding programs. We feel RNRF 805Y is the type of bull the industry requires and are extremely excited about what he has to offer for our breeding program. RNRF Bandolier 805Y has bred very well for our program with sons and daughters rising to the top of their pens. RNRF Bandolier 805Y is co-owned with Saskalta Farms and Double AA Angus.

In the spring of 2012, we toured the Sealin Creek cow herd from Monte Lake, BC. While touring their herd we were impressed by the udders, feet, and the breeding program behind the cow herd. When Sealin Creek Tom Boy 14Y was spotted we were immediately sold on the bull. Sealin Creek Eline 64N, PAK 14Y's dam, is a top producing cow with lots of length of body, power, and a gorgeous udder. Sealin Creek Tom Boy 14Y was the champion Angus bull at the Williams Lake Bull sale, and caught the attention of many cattlemen. He left his mark on the Williams Lake Bull Sale by setting sale records, which generated a lot of interest. PAK 14Y comes from a program where structurally sound, good-footed cattle are emphasized; these cattle are expected to cover a lot of distance grazing the mountain pastures. This bull's progeny are moderate, easy fleshing cattle and his females are tremendous. The PAK 14Y calves are very correct, easy-fleshing, and full of style. Sealin Creek Tom Boy 14Y is co-owned with Saskalta Farms.

TOM BOY 14Y

Double AA Bardolene 285'06 was purchased from D.R. Land & Cattle Ltd. RCE 285S was appreciated for his length of body, overall smoothness, and picture perfect foot. Double AA Bardolene 285'06 has a great disposition and offers calving ease.

Lookout Pacesetter 258M is a well-known bull who has contributed many tremendous females to various programs. In 2012 we selected LSF 258M semen to use on all of our replacement females and a few select top cows in our breeding program. This bull's offspring are moderately-framed and extremely easy-fleshing. Our 2013 heifer calves were bred to LSF 258M because we were impressed with the cross on our 2012 heifer pen. In 2014 we took Fleury Pacesetter 9A and Fleury Pacesetter 36A and exposed these two Lookout Pacesetter 258M sons on our heifers. Lookout Pacesetter 258M calves will add that moderate, easy-fleshing ability to your program and are recommended on larger framed cattle.

Double AA Bardolene 606'78 is known for producing great-milking females with tremendous udders. His calves are very correct and stylish. RCE 606K sired the original Tibbie cow and has played a large role in the Double AA breeding program. We thought it was suiting to use some of this older semen on our Annie K cows.

Zaniabar Heads Up 35X was selected from Bill Abbott's program at Westeros, Alberta. We used this bull on our heifers for clean-up and a few select cows. Unfortunately, this bull is now deceased and we were only able to use him for one breeding season. This bull is a complete outcross to our breeding program and his sons are correct.

SHIRAZ FLEURY
MOOSEVIEW FARM

Double AA Bardolene 150A is a wide-based, long-bodied, powerful bull. RCE 150A was a sure bet stand-out in the bull pen from day one, and has remained at the top. This bull could be one of the most interesting Double AA Bardolene 50'08 sons to sell to date. His dam, Double AA Annie K 83'08 is a very special cow at home. This female has raised a full brother and maternal brother, both working at Saskalta Farms. When analysing this bull's pedigree, you'll notice he is line-bred to the Double AA Annie K 289'02 cow. This female raised numerous herd bulls for the Double AA program. If you are in the market for a herd bull Double AA Bardolene 150A is a great candidate.

Terms to be announced.

Fleury Bandolier 27A is a powerful, long-bodied bull offering as much performance as an Angus bull can offer. FAR 27A was retained from last year's bull pen to be a back-up herd bull at Fleury Cattle Company. This bull was a pen favorite in 2014 and was not offered for sale. A large asset to FAR 27A is his sire, Johnston Bandolier 170F. The amount of muscle, easy-doing-ability, and performance that this bull throws in his offspring is tremendous. Fleury Bandolier 27A's dam, Double AA Elena 38'02, was a well-proven cow in our program, producing many top replacement females and sale bulls. This is a great opportunity to invest in some very proven genetics. A full brother was sold to Saskalta Farms, and maternal brothers were sold to Walter Hauber, Quill Lake Farming, and Davies Livestock.

FAR 146A is another straight Canadian bull with a lot of depth and balance. Fleury Tom Boy 146A's dam, Fleury Missy 42X, is an extremely nice Double AA Blackman 414'06 female and is deep-sided with a great udder. This is a great opportunity to breed the Tom Boy line of cattle into your herd to produce some great females.

NEW SIRE POWER

We are proud to announce Fleury Bardolene 49X is back in our breeding program and we are really excited about what this bull has to offer. FAR 49X was a standout at a young age, with a lot of length of body, top, and a big foot. This bull was shown as a calf and was the 2010 Jackpot Champion Bull and a member of the champion pen at the Saskatoon Fall Fair pen show. Fleury Bardolene 49X's dam, Double AA Annie K 53'06, is one of the top producing females in our program and has a tremendous udder. We feel this bull will be the new version of Double AA Bardolene 50'08 in our breeding program. FAR 49X is line bred Bardolene on both sides of his pedigree, doubling up the strong line of Bardolene cattle. This bull was sold to Quill Lake Farming in 2011 and had a great influence on their cowherd. When we realized we needed another top bull to walk our pastures at home, FAR 49X came to mind. Fleury Bardolene 49X combines a great mother cow, Double AA Annie K 53'06, with the well known Double AA Bardolene 50'08; this creates some predictable genetics that we are excited to be offering in the future.

BARDOLENE 49X

Fleury Blackman 76Y is a powerful bull offering lots of depth, width, and length of body. This powerful Double AA Blackman 414'06 son displays many of the traits of his sire. In 2012 FAR 76Y was retained to use in our breeding program. Fleury Blackman 76Y's dam, Double AA Annie K 261'06, was a powerful cow who brought in a top calf every year. Double AA Annie K 261'06 has produced numerous females retained in our herd today. Double AA Blackman 414'06, FAR 76Y's sire, was a performance bull that sired some of our top performance bulls sold to date. We are extremely excited about Fleury Blackman 76Y and feel he is a great bull to carry on the impressive line of Blackman cattle.

BLACKMAN 76Y

Terms and Conditions

Terms:

The terms of the sale are cash or cheque, payable at par at the sale locations. The right of property shall not pass until after settlement has been made; no invoicing on buyers in attendance unless previous arrangements have been made. Every animal sells to the highest bidder and in cases of disputes the auctioneer's decision will be final.

Announcements from the auction block will take precedence over the printed matter in the catalogue. Current exchange rates will be announced sale day. All monies are in Canadian funds.

Certificate of Registration:

Each animal will carry papers issued by the Canadian Angus Association. A certificate of registry duly transferred will be furnished to the buyer for each animal after payment has been made.

Health:

All animals in the sale have met all necessary health requirements.

Guarantee:

Each animal becomes the purchaser's risk immediately after the animal is sold. All animals in this sale will be sold under the terms and guarantees set for by the Canadian Angus Association with regard to health, freedom from defects and from both reproductive and specific genetic unsoundness.

Liabilities:

All persons attend the sale at their own risk. The sellers, facility owner, auctioneer and sale staff assume no liability, legal or otherwise, for any accidents that occur.

Delivery:

Every assistance will be given in getting your purchases home. Each animal becomes the risk of the purchaser as soon as sold.

Sight Unseen Purchase Program:

For those who cannot attend, we offer a sight unseen purchase program. Call us with your needs and we will recommend suitable bulls. All bulls sold through this program do so with a satisfaction guarantee.

Insurance:

Agents will be in attendance to insure your purchases. We strongly recommend that insurance is purchased for full value. All bulls returning back to the sellers must be insured.

The Right to Collect Semen:

Wheeler's Stock Farm and Fleury Cattle Co. reserve the right to collect semen for within herd use on any of the bulls sold at their expense and the buyer's convenience.
