*WHITEWOOD LIVESTOCK  
WHITEWOOD, SK*

**WRAZ RED ANGUS**

**BRIMNER CATTLE CO**

Welcome to the  
Cornerstone Bull Sale-  
Two Breeds-Two Breeders  
& an excellent set of bulls

Welcome to the Cornerstone Bull Sale. If you would have told us a year ago the industry would be as strong as it is, some would have questioned.

The combination of Red Angus/Charolais calves are one of the most sought after feeder cattle taken to any given auction barn today.

Today, we have on offer some of the top genetics of both breeds. The Charolais bulls brought to you from the Brimner family are bred to be soggy, easy fleshing and moderate framed.

To appreciate the Red Angus bulls you must see the great set of cows at Phil's - structurally right, good uddered, fertile females. Their sons will produce some great replacement female and steers that will top the market.

We also have a group of fancy Purebred Red Angus heifer that will fit into any top end Purebred herd and groups of Angus cross commercial replacement heifers and they are good.

If you are looking for a herd sire that will produce calves to meet the industry needs today, look no further. I assure you they are here today! The Brimner and Birnie families are dedicated to producing quality seedstock.

If I can be of any assistance before or on sale day. Please give me a call. I would be happy to help.

Doug

**SEMEN TESTING:** By sale day your bull will have had a Bull Breeding Soundness Evaluation completed by a licensed veterinarian.

**BOARD:** We will keep your bull after sale day at the farm at no charge until June 1st. We ask that all bulls returning to the farm be insured.

**DELIVERY:** We will provide delivery (up to 150 kms) free of charge. Bring your trailer sale day and receive a \$50 credit.

**INSURANCE:** Stockman's Insurance will be available sale day. All bulls returning to the farm must be insured.

**2012 BREED AVERAGE EPD's:**

Charolais: BW: 1.9 WW: 41.0 YW: 78.3 M: 20.6 TM: 41.4

Angus: BW: 0.5 WW: 26.0 YW: 50.0 M: 14.0 TM: 27.0

EPD's cannot be compared between breeds, as each breed has its own base.

# BRIMNER CATTLE CO.

Welcome to our 4th Annual Cornerstone Bull Sale

First off, I would like to say thank you to all of our past customers and supporters over the years. Your confidence in our program means the world to us. From the time my dad started in the Charolais business in the mid seventies to now our goal hasn't changed; raise good, sound functional bulls that calve right, grow and not fall apart, performance that is bred in, not fed in.

Our bulls this year again are pail fed to control their intake and for personal contact. We are feeding a pelleted ration with free choice hay designed by JM Beef Consulting to grow out these bulls without hurting structural soundness.

We have a good, even set of bulls for you this year from red factor and white bulls, heifer bulls to performance bulls. I am sure you will find one to fit your needs. Good times for cattle producers are here and looks like it will be for some time. Those buckskins and silver calves continue to bring top dollar. Brimner bulls are bred to give you quality calves for your greatest return.

If you have any questions or can't make it to the sale feel free to call myself, Phil or any of our sales staff to look after your needs. This is a sale worth waiting for and I look forward to seeing you there!

Kelly

### SALE FEATURE

If you are looking for a new heifer bull, look no further than 14Y. A son out of Riptide who has been our heifer bull for 5 years now proven. He is square hipped, lots of middle and a nice small polled head. There is a good chance he is homozygous polled. His dam is one of the nicest uddered, great tempermented females we have raised. Purebred or commercial this guy will work.

Great performance bull here. Number one ranked for 205 day weight. His dam has accomplished this more than once. Correct, thick and carries hind quarter down well.

### The Percentage Calving Chart

1. An average cow of any breed should be able to calve 7% of her body weight.
2. Most Charolais cows will weigh between 1400-1800 lbs, expected calf weight range 98 to 126 lbs
3. Most Red Angus cows will weigh between 1200 to 1600 lbs, expected calf weight range 84 to 112 lbs
4. Calving Ease is MORE important than birth weight because a longer sided calf may calve easy, but the birth weight is higher

7% Calving Chart	
COW WT.	CALF WT.
1200 lbs.....	84 lbs
1400 lbs.....	98 lbs
1600 lbs.....	112 lbs
1800 lbs.....	126 lbs

# WRAZ RED ANGUS

## Welcome to the Annual CORNERSTONE More Bang for Your Buck Bull and Female Sale!

Please accept this as your invitation to our fourth annual event. Thanks to all that are presently using, or are considering WRAZ genetics! Without your support we simply do not exist. Similarly the purebred industry does not exist without the support of a good strong commercial industry! My hat is off to those of you who have stuck things out or those who have perhaps looked at the past market as an opportunity to build or grow. WRAZ will continue to use HONESTY and INTEGRITY to gain your support and confidence to return as a repeat customer. We also have again retained a group of April bulls as our insurance bulls for your convenience should a problem arise. These bulls are what we sell as two year olds the following year, not bulls that could not make the cut last year!

What a pleasure it is to sit and write this while prices are breaking historical highs. These prices are the best I have experienced. Your perseverance will pay you in spades now that many herds are gone and the demand will outstrip supply for the next while. Take advantage of it while you can and produce the most pounds of calf you are able to. Start with the best bull you can afford and work from there. Some bulls will definitely give you more lbs. of calf to market while others may leave behind a trail of good sound, heavy milking females for the future. Some can do both! Please give us a call anytime to discuss what your needs are. We spend a lot of time and effort to put these cattle together for your evaluation and would certainly love to help with your decision of what will work best for your operation!

We are on a whole herd health program with the assistance of Dr. Henry McCarthy of Wawota Vet Service. The heifers and bulls were vaccinated as calves going to pasture with: Express 5, Blackleg and One Shot. Then three weeks prior to wean they have a booster shot of BoviGold, 8-way Blackleg, One shot and Ivermectin. During the winter months they have a second treatment of Ivermectin as well. All the bulls in the sale will have good testicular development and will have passed a semen evaluation by sale time.

Kevin Wadham of JM Beef put together much the same forage based ration that was used last year with the exception of a pellet rather than grain as it is hard to come by grain in this area. Our goal is to gain roughly three lbs/day. This feeding program along with plenty of exercise should maximize the value of your purchase.

Please join us on Friday April 6 at the farm east of Wawota for a preview of the sale bulls and heifers. There will be a little food and hospitality to enjoy as well.

All the best!  
Phil

Toaster 3Y is very good footed, dark red bull with a great hair coat that will add frame and growth. Toaster had a wean index of 114! His sire Toast 15W consistently adds frame and tremendous growth. His dam 41W has done an awfully good job on her first try! She has a very good udder and milks very well.

Another one out of a first calver here that you have to admire. Toast 8Y is a twin that started out at 57 lbs and turned into what you see here today! He was fostered onto another first calf heifer that had her calf stepped on. The growth in these Toast calves is phenomina! He has a little different twist to his pedigree with a black red carrier on his dams side if you need to change things up a bit. 8Y will add frame, milk, hair and growth to his progeny.

Lancaster has been a favorite since the day he hit the ground. He is so balanced and well put together. I really admire his foot, hair coat and length of body. His sire Bieber Roughrider is doing an admirable job at Bieber's Red Angus Ranch in the US. His dam 109L has a lot of good in her pedigree. She was purchased along with her daughter out of Bryan's Tradition with a vision sale. 109L has a proven record with a maternal brother by the name of Walkerton doing a great job for our southern friends Stuart and Kay Gilbert.

Donovan comes from a no miss cow family. I have four maternal sisters in the herd. His dam 63W sold to Gordon Murray for \$3000 in the Red Coat Advantage Sale in Brandon as a heifer calf. Gordon leased her back to me and this is her first calf! She has done a tremendous job. Take the time to get in behind Donovan and have a good look. He will add the frame and thickness to give you a few more lbs of calf to market in this very strong, exciting cattle market! EPD's for wean and yearling wt are in the top 10% of the breed.

Chateau 43Y was an in dam purchase from the Autumn Angus Classic in Ontario. I really liked his grand dam at WCF and the cub daughters I have here work so well that I brought 52P home. 43Y is a good solid bull with above average growth and I would recommend him for a herd that is retaining heifers as well. Please overlook the fact that he has no EPD's. He had to be DNA tested for parentage as the breeding dates were too close to call for his sire. With late registration he missed the cut off to be included in the last evaluation for EPD's.

Definitely one of the feature bulls! This is one stout dude! Excellent black foot, moderate frame, deep sided, lots of butt. Top 10% for weaning weight, yearling weight and carcass weight EPD while maintaining an average milk EPD! Definitely HERDSIRE potential here!

Lance

Designer is one of the younger bulls in this year's sale. Check out the ww and yw EPD's indicating his genetic growth potential. His mother is a larger framed good producing female. Full brother is working for Drake Valleyview Farms good cow herd near Elkhorn, Manitoba. .

Tremendous growth in this April born calf. April born but ranked 5 out of 31 in weaning weight with a weaning ratio of 112. His EPD's indicate superior growth genetics as well. We usually keep these April born bulls back as high quality two year olds for the following year, but felt this guy was an exception to the rule having the maturity including early testicle development to be included. This guy is last but not least. 121Y is definitely herd bull quality!

This is the only two year old that was in the sale last year. His paperwork last year indicated testicles of 31cm so of course he did not sell, but it was a typo and he actually measured 37cm! He is a long sided devil if you need to add some length of body. He went out to breed a few cows for a customer that needed a bit more bull power so he is a proven breeder.

Moderate but real stout made virgin two year old bull here. We held him back to make sure his front feet would meet our expectations in the best interest of our bull customers and he has passed the test of time. He has a maternal brother selling as WRAZ 96Y. Lots of milk from his moderate made dam.

Last year at the open house many asked why we were not putting 118 in the sale as he was obviously good enough. To explain he was April born and we feel they are usually just not mature enough. Here he is as a two year old powerhouse! He has a full brother selling as 88Y. There is a tremendous amount of growth, length and muscle in this guy. He will cover more cows and mature into one big fella.

Here is a dark made April born two year old virgin bull. He is quite moderate but really well put together. He rises to the top in calving ease EPD's top 2% and his -3.2 BW EPD puts him in the top 3%. This rascal will go out and breed a pretty big group of heifers this year and many more to come! He is the kind you can keep using in your heifer pen as he should stay very moderate.

Smack daughter here that will do a real good job for her next owner. We purchased her dam from Nancy Howatt as our pick of the heifers in the Cowmaker Classic back in 2007. Well a cowmaker she was –a daughter retained here and a bull to the real good herd at Cockburn Ranch. Here you go Nancy a new Gloria to replace the factory!

Another Smack daughter here, they look pretty darn good. 33Y has a touch more frame than some of the other heifers if you are looking for a little more frame. Maternal sister 10X was selected for Red Round Up 2008. That maternal sister to 33Y now resides in Kansas with Klee Watchous and the crew of Wildcat Creek Ranch. Wildcat had a 10X daughter in their 2012 Denver show string.

Here is a sweet made heifer sired by Smack. Not huge on frame but exceptionally well put together. Excellent foot, lots of rib and capacity in a moderate package. Smack left us a very nice group of females and they look like they will work very well! Her dam is a dark, moderate made female with an exceptional coat of hair. 12T has a very nice udder and milks well. Her granddam 3R always has a good one and her great granddam, 2J is the definition of the Red Angus female and a cornerstone of the WRAZ herd.

Smack daughter out of a Fayette female purchased from Bryan out of the Tradition with A Vision Sale. She looks to be the moderate easy doing kind. Her pedigree reads well with the likes of NewTrend, Blaze V415 and Choctaw Chief in there.
