 Brian Good, Director of Field Services for the Canadian Angus Association, will have Angus tags available at the sale.

U.S. Buyers

We will do the required tests and deliver to the U.S. border at cost as soon after the sale as possible. The exchange rate will be announced at the start of the sale. Cheramiev Viator, U.S. Buyer Rep 1-979-777-9419 or cheramiev@gmail.com;
 Tony Heins, Rocking H Livestock Services, New Salem, ND USA. 701-400-4435

Semen Testing

Bulls will be semen tested prior to sale day by a licensed veterinarian.

Delivery

Free delivery up to 150 km or bring your trailer sale day and receive a \$50 credit.

Board

Free board for bulls until June 1st, but all bulls left at the farm must be insured.

Insurance

Insurance will be available sale day. All bulls returning to the farm must be insured.

Credit Card Purchases

Mastercard and Visa may be used for payment of your purchases. A 3% surcharge will apply.

Terms & Conditions

The sale will be conducted under the Terms and Conditions of the Canadian Charolais Association and Canadian Angus Association. Copies will be available at the settlement desk on sale day.

Breed Average EPD

	CE	BW	WW	YW	M	TM
Charolais	70	1.5	43	82	21.1	43
Red Angus	2.4	-.1	53	79	17	43

OPEN HOUSE at WRAZ

Saturday, April 2, anytime after 1:30 p.m. until the cows come home.

Presale viewing of the bulls, their sires, dams & siblings with calves at foot. WRAZ ultrasound data will be available.

From Wawota: 5 miles E on #48, 1 mile N on #601, 1/4 mile W.

Join us for lunch on sale day

The Percentage Calving Chart

1. An average cow of any breed should be able to calve 7% of her body weight.

2. Most Charolais cows will weigh between 1400-1800 lb., expected calf weight range 98 to 126 lb.

3. Most Red Angus cows will weigh between 1200 to 1600 lb., expected calf weight range 84 to 112 lb.

4. Calving Ease is MORE important than birth weight because a longer sided calf may calve easily, but the birth weight is higher.

7% Calving Chart

Cow Wt.	Calf Wt.
1200 lb.	84 lb.
1400 lb.	98 lb.
1600 lb.	112 lb.
1800 lb.	126 lb.

Once again, it is our pleasure to welcome you to the 2016 Cornerstone Bull Sale which could provide the genetics to be the cornerstone of any breeding program, whether you are a purebred or commercial breeder. The quality in both breeds this year is excellent with both proven and exciting lead time genetics being offered. The Charolais bulls again provide calving ease plus performance. The Brimner bulls are good haired, big volume bulls that will work at all levels of the industry. The WRAZ program is really reaching its stride with some excellent bulls from calving ease to performance to high maternal that will work for you. Red cows and white bulls have been the Cornerstone of the commercial industry for decades and will continue to be popular from the sale ring to the packing house. Using a quality bull is the first step to herd improvement and they are here in both breeds.

Again this year, there is a good offering of open Red Angus and Red Angus X Charolais open replacement heifers that would be excellent additions to an existing operation or a great place to start a new herd.

If Candace or I can be of any assistance before the sale or on sale day, please don't hesitate to give us a call. We would be happy to help you find a bull that is right for your program.

Sincerely,
Helge & Candace By • By Livestock • Tel 306.584.7937 • Cell 306.536.4261

Welcome to the Annual Cornerstone Bull Sale 2016!

First off, I would like to thank you for taking the time and interest in our bull sale. This year's bull pen is as even as we have ever produced. Once again, the Bar J Trojan sons are a big part of the bull pen. Their built in calving ease, muscle and shape have been really popular in the past and these boys won't disappoint! This is the first year for the Infusion sons and they are big topped and powerful with calving ease as well. These bulls are an athletic bunch ready to go to work and you can buy with confidence. Your past support is greatly appreciated! Always great to see repeat customers coming back – means we're doing something right and gives us the confidence moving forward. Feel free to call or come to the farm to see them in their natural environment. Looking forward to seeing some old faces as well as meeting new ones. See you sale day!

~ Kelly

DbI Pld

Sire of lots 1-12

CE 100	BW -5.6	WW 29	YW 58	M 22.3	TM 37
--------	---------	-------	-------	--------	-------

When you find a bull that breeds so well on everthing you keep on using him – exceptional calving ease, super quiet and excellent feet. His daughters are great milkers and are docile. The Trojan sons are peas in a pod; smooth made and moderate with natural thickness.

1

WR^{ed} ANGUS

Welcome to the 8th Annual CORNERSTONE "More Bang for Your Buck" Bull & Female Sale.

We sure do appreciate your time to have a look at our catalogue and the genetics we have put together for you this year. We would like to extend many thanks to all who have attended or taken the time to have a look and a special thank you to our past buyers for their confidence in using our genetics. Many of you have been repeat buyers and we feel very fortunate to have you back. Our goal is to fulfill your genetic needs as well as look after any needs that may arise after the sale so that you will for sure have a bull to cover your females no matter what situation may arise. We know there are plenty of bulls/choices out there and most sales are before this one so again **THANK YOU!**

Everyone is invited to come on out to the Ranch 5 miles east of Wawota for a preview of this offering and their dams with their next calf at foot – really the whole program – on Saturday, April 2 anytime after 1:30 "til the cows come home". Please come for a preview of the offering and a little WR^{ed} hospitality.

These are exciting times in the cattle industry so enjoy it while you can. I know some of you are saying "Ya but the price is \$200 a calf less than I got last year" but think back just a few more years or maybe even pull out an old cheque from the fall run of calves to remind yourself where we really are at today in the cattle industry. We are a lot closer to all-time highs than to all-time lows and we also have access to something we never had before in the cow-calf, feeder and fat market with what I would like to call the cover your ass insurance program (WLPPI). Is it perfect – not likely but it's a heck of a lot better than nothing which is what we had before. I also have to say my hat is off to the SSGA for their part in their lobbying efforts in the interests of fellow livestock producers. The behind the scenes actions of these grass roots associations carry a big stick with respect to getting things done like insurance programs and landowner rights when dealing with the government. I also have to say I really appreciate the speaker they brought out to spread the word about the fact that McDonalds all across Canada is using Canadian beef from two Canadian plants and the patties are all made at one Canadian plant. The McDonald's verified beef program is very interesting if you have not heard about it. I guess my point here is that the beef industry in my eyes – for what that is worth – looks pretty darn good!

There is no better investment for your bottom line than the best herd sire you can afford for the goals you are trying to reach in your own operation so do your homework. I am pretty much always a phone call or a text away if I can help in any way I would appreciate the opportunity to chat with you. See you at the sale!

Take care out there!

~ Phil

-------	-------	-------	------	-------	-------

I could speak volumes about this excellent Herdsire but I will do this in point form to keep it short. I will say that he is the most influential sire we have used and he will definitely leave his mark here and in other programs across the globe. His progeny have been well accepted both male and female.

- Daughters are now milking and they are excellent uddered with plenty of milk.
- Progeny are very good footed and structurally correct.
- Progeny are well above average at feed conversion and flesh very easily.
- Progeny have a great hair coat
- Progeny are born easily with excellent birth to wean growth
- Progeny are thick and full of muscle and red meat
- He has the ability to add a little frame yet keep progeny stout and easy fleshing

CALVING EASE SALE FEATURE BY GHOST RIDER 108Y! If you are looking for a proven calving ease sire with consistency in birth weights, tons of hair, a fabulous temperament and a dam that is very functional with a proven production record then have a look at this fella. Cameron & Carla, Double C Red Angus, Foam Lake, SK, purchased his full brother last year as our high seller at \$26,000. Many thanks to Cam & Carla for their confidence in our program and to Rick Rohrich, from Steele, ND, who was runner up bidder that day (special thanks to TRCC, Ron, Ed and Ryan Clemetson for making the trip up to attend our sale and carrying that bid – greatly appreciated!). All reports are that he is still looking great and he has done his job breeding as well as calving on their heifers. Don't be afraid to go check out the good set of bred heifers that Cam & Carla have on offer at the ranch every fall – many this past fall carried his service. Ghost Rider 95C entered this world at 74 lb. and never looked back (very consistent with his full brother last year at 73 lb.). 95C has a very nice spread from 74 lb. at birth to 834 Oct 12 to 1174 Feb 8. Check out the video online at www.wraz.ca.

SALE FEATURE BY GHOST RIDER 108Y! What a tremendous job Ghost Rider has done for our program. A big thank you to my good friend Bryan Mackenzie for these great genetics! We are very pleased with his many daughters now proven in their milking ability and sons proving their value as breeders. This guy has been a standout for quite some time and he would have been in our Agribition pen of bulls had it not been for an injury last August that set him back. After carefully watching him all winter right in the middle of the pack during all the riding that went on in the main bull pen, I am confident that he is now physically and structurally sound for breeding. This guy will have the calving ease required for the heifer pen along with the performance and power you would expect from a higher BW cow bull. Excellerator 54C is a standout in my mind with a tremendous hair coat along with all the pieces to the puzzle of a great herdsire in the making including his dam from the Christy cow family by Tycoon 2T – a bull I sure wish we would have collected and a Black Red Gene Carrier granddam that goes back to the great black sire Fortune 425C. 75T is still here and going strong as well. Excellerator 54C is at the very top of my list of favourite bulls in the offering. This is a bull we would like to use in our program. Please do not hesitate to call Phil at 306-577-7440 with your ideas on how this could benefit your program and ours! Perhaps you calve at a different time of year than we do. FEATURE GHOST RIDER POWER BULL!

This could be the most powerful son of Ghost Rider we have produced to date. He was our heaviest of all the bull calves on Oct. 12 at 940 lb. followed by a Feb 8 weight of 1247 lb. - still the heaviest! I appreciate a bull that has the kind of growth this fella has – he was steady from birth right up until the last weigh date on Feb 8. There are plenty of bulls out there that grow at times throughout their life but the vast majority of them cannot keep it up – they either do it from birth to wean and then stop or they idle along with adequate growth and then explode when they get on feed. This guy is unique in his growth pattern which would be very desirable to breed into the herd. I have yet to mention that the structural correctness of Crusader 48C is right at the top of what we have ever produced here as well. The foot and leg structure is very good on this guy! His young dam, 265X is proving to be an excellent producer – her first daughter 34Z is working in our herd (her first calf was a bull that sold in the bull sale, second calf was a female selected for the Masterpiece Agribition sale and sold to the Hunt family - T&S Red Angus). She also produced one of

the top young open heifers in our annual bull sale last spring selling for \$5250 to Murray & Karen Crawford and family, Ramblin Rose Stock Farm. We would like to use this guy in our herd in some way as well, so do not hesitate to give Phil a call 306-577-7440 with any ideas you may have – I am open to suggestions! Check out the video on our website www.wraz.ca

Avenger 45C is another son of Ghost Rider that we have had our eye on all year. He is so long bodied and has tons of hair and a great Oct 12 weight of 836. This guy has been on Gordon's radar screen all year. He was one of our choices for the pen of 3 bulls at one point but he too suffered a setback from an injury before he was weaned. The libido of these young bulls as calves on pasture does them more harm than good sometimes. We have been watching him closely all winter. The way he has held up during all the riding and fighting in the big pen we are confident that he is fully healed and physically/structurally sound to sell for breeding. The dam Serebl 107X is a daughter by Indeed 105R out of our strong producing Serebl 95N donor female. The female side of this deal is outstanding! There is a maternal sister 105A working for Larry Nielson, Neilson Land & Cattle Ltd. We have retained another maternal sister 29B and she is doing a great job on her first one. Avenger 45C will give you a return on your investment many times what the greatest portfolio manager can offer you! Keep all the females.

KMAC 95N, Granddam of Lots 30, 53 and

	RED WRAZ LASS 56W
	RED HAMCO LASS 206T

Here is a good solid Ghost Rider son for your cow pasture. Raptor 49C is attractive and very well put together. He has a real good set of EPD for WW, YW and Milk as well as Total Maternal if you are watching your EPD. There can be a little more punch back in this pedigree so please plan to use him in the cow pasture. Granddam 206T is a donor female that is often picked out by visitors as one of their top picks in the herd of mature females. We have successfully flushed 206T in the past and we will once again harvest her embryos as soon as possible this spring. Gord owns the dam 56W and she is leased back to WRAZ. There are two maternal sisters working in purebred herds – one 74Y, for the Wushke family of Emmatt Creek Red Angus, and another one 72Z is working for the Kyle family of Kenray Ranch – our new partners for the Pride of the Prairies Female sale this coming Dec 10 at Saskatoon Livestock Sales. You can find a video of this guy on our website. www.wraz.ca

CE .1	RED BRYLOR/WSP KARWEIK 1P MAF
	RED WRAZ VELESA 3X
	RED VELESA OF KINARED 502N

This Ghost Rider son is a twin that was raised alone on his natural dam. Using birthweight as your guide of calving ease especially in a twin is not usually a wise decision. This guy has a birthweight of 78 lb., which as a twin I would usually caution you against using on heifers but I believe this guy to be an exception to the rule. The female side of this pedigree is strong in calving ease so I will say this guy would be acceptable on heifers. There are Ghost Rider sons in this offering that are heifer bulls as well as some out there already being used on heifers so feel free to use him in the heifer pen if you like folks.

36 RED WRAZ GHOST RIDER 111C

BW 2.6	1869164	WRAZ 111C	28 February 2015

	RED D.J. MISS CLAY 10P

This attractive son of Ghost Rider catches many a visitor's eye in the bull pen. There is some power in the female side of Sheba 40X with the likes of Bodacious and Mambo along with a lot of maternal goodness as well. Add Ghost Rider in on the top side of this pedigree and you have a female making machine that is full of red meat. Maternal brother 52A is walking the pastures near Kisbey for our good friends Moose Creek Red Angus, the Ippolitto family, watch for their upcoming bull sale. Ghost Rider 111C is shaped right for breeding well grown out heifers with adequate frame if you need to but I would rather see him used on a group of cows that have had one calf or in a spring program looking for calving ease on the grass. This fella should add volume and improve udders of his progeny. Keep the females! Check out the video at www.wraz.ca.

37 RED WRAZ GHOST RIDER 117C

CE 1.9	RED YY SQUIRE 334N ET
	RED JB WINTER ICECAP 9019
	RED BROX ICECAP 24N

This son of Ghost Rider would be a good option for someone looking to keep a strong group of replacement females with lots of growth potential. His dam Icecap 9019 (19W) is a strong producer with a ton of hair and lots of milk in a moderate but very stout package. She is real easy doing and when you couple that with the feed efficiency in this Ghost Rider blood you have huge potential for top shelf replacement females – the kind that are in high demand. Icecap 19W has produced three maternal brothers to this guy and they have all made the cut and sold through our bull sale. The Squire 334N bull left behind some great females and Granddam 24N was a beautiful top end female in the herd until we had the misfortune of losing her. Ghost Rider 117C had a pretty nice Oct 12 weight of 786 lb. If you have a herd of cows that need to be bred, this bull will give you a better return on your investment than almost any investment out there today. Good bulls don't cost – they pay!

CE -2.7	RED FABULOUS FRONT LINE 315N MAF
	RED JET ANNIE IRENE 8810
	RED IRENE 36E

Power bull here folks! His dam Annie Irene 8810 (10U) is one of the bigger more powerful females in the herd and this son of hers is loaded with her power. He had a little more birth weight but I will give you a few very good reasons why it is not a worry. He is well under 7% of her body weight, there are other Ghost Rider sons successfully calving on heifers and the length of body he possesses will maintain that all important calving ease and give you more weight across the scale in the fall where it helps your bottom line. Here is a prime example of calving ease being way more important than actual birthweight – don't be afraid to use this big fella on your cows it will pay you in spades come weaning time – he was 780 lb. Oct 12 on

mamas milk and grass! Granddam Irene 36E was a donor female for fabulous females with 12 progeny. We have retained a maternal sister to this guy in our herd and she had second highest seller in the sale last year to Brox Stock Farm and another good one on offer this year in Hitch 36C. Maternal brother Tidal Wave 56A is working in the purebred operation for Vikse Family Farm herd near Donalds, AB (congrats on another great sale Dave, Tracee & Family). Maternal brother last year went to the good herd of KW Heaton Farms Ltd. Don't miss this genetic opportunity – you won't be disappointed! Check out his video at www.wraz.ca.

	RED KAYMAC SEREBL 760T

Keep every female from this awesome Ghost Rider son! His Granddam Serebl 760T is designated CAA Premier Dam with her excellent production record – she will be in the donor pen and flushed this spring. His dam Serebl 57W has also been a stellar producer. Serebl 57W was held open for our donor pen this year so watch for embryo opportunities on both of these females in our Inaugural Pride of the Prairies fall female sale, Saturday, Dec 10, at SLS with sale partner Kenray Ranch. Gordon snapped up her first daughter/maternal sister Serebl 14Y, so she is here on lease. The keen eye of Neil Davis picked out her first son by Indeed 802S and tells me they are very pleased. The next son was a real chunk by outcross sire Creed 75W that was the talk of the fall tour. Then last fall full sister Serebl 84B was selected and made the trip to the mighty Red Round Up Sale in Red Deer, AB. She was one of the three Ghost Rider sisters that were very well received and sold for \$7500 to Brent Troyer, of NBT Cattle Co., in Ontario – she has now calved and has a flawless udder. Put him out with the cows and let him make you an awesome return on your investment! Check out his video at www.wraz.ca

RED YY HITCH 23X

YY 23X

Sire of lots 41-49

BW -.8	WW 72	YW 112	M 21	TM 57	CE 4.3
--------	-------	--------	------	-------	--------

Hitch was also purchased as a female producer with a little different twist to his pedigree. His dam is an extremely easy to find Black Red Carrier female that was one of the high selling females in the Chickadee dispersal a few years back. He is extremely long bodied and very consistent in production of calving ease progeny. The males are extremely masculine with more to them than you would expect and from all reports his sons maintain that terrific calving ease. His daughters mature a little slower than some but they have now proven themselves and we have many long bodied, productive females working in our herd and other herds around the country.

PERFORMANCE HEIFER BULL BY YY HITCH 23X! This bull will have that extra performance many are looking for while maintaining that all important calving ease. There are many Hitch 23X sons out breeding heifers to date and the common theme in the feedback among them all is calving ease with very consistent low birth weights. Hitch 23X was our go to calving ease specialist until we had to part with him this fall after an injury. The Hitch progeny will be a little slower to mature but good things take time and the proof is in the females. His daughters are proving to be great uddered milking machines that can really produce! The dam behind this Hitch son will only add to the strength behind this breeding machine as your next herd sire. LMP 3X has everything you are searching for as the dam behind your next herdsire. She is real hard to pick a hole in! This bull is right at the top of the quality list for calving ease with extra performance. We were unable to get a video of this guy but it has nothing to do with his quality, we just simply ran out of time!

	RED WRAZ SIENA 56X		
	RED JAS SIENA 13R		

Excellerator 30C is another Hitch 23X son. Hitch was our go to heifer bull for very consistent calving ease. When we found Hitch 23X it was his beautiful black dam that sealed the deal on the need to own him. Time will always tell the tale on whether or not your decision was a good one or a great one. The decision to buy Hitch that day ended up being a great decision. His sons calve like a dream and his daughters are proving to be an extremely valuable asset in the operations that own them. The Tycoon blood in there will only increase the potential value of this good Hitch son.

	RED SANDY SLOPE STARDOM 47L		

Rocket 28C is bred to be a calving ease specialist. He will settle your heifers and then let you sleep at night when it comes time to calve them out. Pretty solid EPD backed up by a respectable 738 lb. Oct 12 weight – not too shabby for a bull bred for calving ease. Maternal sister 90Y is working in the great herd of Jarret & Jenna Loveridge. of JLL Livestock – ask them what kind of ROI she has turned for them! Maternal sister 62A was one of the high sellers a couple years back to Collin Sauder and family of Windy Willows and another maternal sister sold in the bull sale last spring into Murray & Karen Crawford's good herd near Rocanville. We will be keeping the next female right here at WRAZ!

This fella will excel in the heifer pen but has enough power for the cows. He is rich in numbers if you like to follow the EPD's. How many heifer bulls have solid growth numbers and carcass numbers as well behind them? Mix all this up with the dam to his sire being a CAA Elite dam as well as female producing sires the likes of Indeed and Bomber on the bottom side and he is genetically pretty damn solid! Granddam 281K has 13 progeny with daughters in our herd as well as Red Ember Ranch's herd and a son that proved himself of great value in Alvin Ginter's Pasquia Red Angus herd. Many of his daughters topped Alvin's dispersal sale last fall. Keep all of his daughters!

These Hitch sons will really work well in the heifer pen and then when they get physically too big to breed your heifers they can graduate to the cow pasture. They will mature a little slower than some bloodlines, but generally good things take time! Maternal brother by Swayze went to Brox Stock Farm near Wetaskiwin, AB, for \$10,000 in the sale last year. Hitch 36C is backed by a very good, strong cow family – his dam Annie Irene 120X is a very good producing, long bodied, well put together, moderate framed female. Granddam Annie Irene 10U has a top end bull in the offering, another son at KW Heaton Farms and a high selling son by Makn'Waves working for Dave & Tracee Vikse of Vikse Family Farm near Donald, AB. Granddam Irene 36E was an ET donor for Fabulous Females that had 12 registered progeny.

		RED SSS ARSENAL 271S	
		RED SSS BLOCKANNA 23U	
		RED SSS BLOCKANA 2M	

What a proven track record there is behind this Hitch 23X son through his dam. His dam, 23U was originally purchased out of the mighty Red Round Up sale in Red Deer, AB, and has been here on lease ever since - currently owned by Gordon Murray. The consignments from this well respected long time sale are from the top of each consigner's program and this female has proven herself well. Her first son, BUCC 5X was our high seller to Emmatt Creek Ranch and then a couple years later to Hamco Cattle Co., near Glenboro, MB – watch for their upcoming sale for sons. The BUCC 5X daughters I have seen are phenomenal. The next son 32A went to Shawn Tessier, of Broken T Ranch, near Weyburn – watch for sons in their upcoming Equinox Bull Sale. Maternal sister 54B was the high selling open female last year to Baxter Blair/Blair Ag – thank you so much to the Blair family for your confidence in our program!

Now this guy has a little different twist being by our proven calving ease sire Hitch 23X but with the same great female behind him. You will get a ton of calving ease for your heifer pen and even the females off those heifers will be worthy replacements. Then when he gets too big to breed heifers he will still be an outstanding sire in the cow pasture to produce some of the best females you will find anywhere. We did not get a video but he certainly is worthy of one.

Dam: SBB 23U

Reference Sire

RED BRYLOR KODIAK 3A

LMP 3A Sire of lot 50

BW -3.1 WW 65 YW 87 M 17 TM 50

Kodiak 3A is a bull that I was interested in from the moment I saw him at Bryan Mackenzie's bull sale in Fort Macleod. He sold that day to Darren Vancuren of Sunberry Valley Farm for \$58000. I was one of the first in line to buy a semen package on him to incorporate the calving ease of the well accepted Kodiak blood line into our heifer pen. The calving ease has been excellent and his progeny have exceeded all of our expectations including females that will make you take a second look. I liked him so much that I recently made the investment to own a 50% interest in the bull himself and he will be breeding heifers for us in 2016.

RED CROWFOOT MOONSHINE 3084A

CFCC 3084A Sire of lots 51 - 57

BW 2.4 WW 76 YW 110 M 16 TM 54 CE 2.4

Gerry Walter, WCF Red Angus and I purchased this bull together from the Crowfoot dispersal. His sire was the talk of the dispersal sale and sold to Genex and Oly Farms if I remember correctly for \$68000 - unfortunately he met his death not long after that. We used this direct son Moonshine 3084A as a yearling and then he went to Ontario to breed for WCF so we only have a few progeny for the next couple of years as the trip is long to Ontario so Gerry will use him there until he is done with him. He has left us some very stout made dark hided offspring that are very interesting to say the least. His young females are well above average in udder development for their age and the calving ease appears to be very good for the limited use we have had with him. Give Gerry Walter a call if you need a second opinion.

 RED WRAZ SREBL 146A
 RED KMAC SREBL 95N

FEATURE RED KODIAK 3A SON! If you are looking for a heifer bull with a little more frame and jam behind him you may want to have a look at this guy. He has a little more birth at 82 lb. than is typical of the Kodiak 3A line but our Serebl cow family is known for long bodied high growth cattle. I am far more inclined to check out the dam's weight and check whether or not the calf's birth weight is plus or minus 7% of her weight than to get all hung up on birth weight! The Serebl cow family is one of our best cow families in terms of production potential but they are not small framed. Granddam 95N is a powerful daughter of Sensation 702E that we have flushed very successfully and typically has progeny that are less than 7% of her weight. Although this fella's dam Serebl 146A weighed 102 lb at birth, she was still well under 7% (1650 @ 7% = 115). Serebl 146A was selected for the Masterpiece sale at Agribition as a heifer calf a couple years back and sold to Callaway Cattle Co. Dave put her back here on lease with us and this is her first calf on offer. Kodiak 66C has a little more frame and he will work in the heifer pen but he also has enough growth in him for the cow pen in the future as he will mature into a big lad! The strength in this cow family also presented itself this past fall when a full sister to his dam, 104B, was selected as a bred heifer for Red Round Up 2015 and when the smoke cleared the winning bid was \$10,000 and the proud new owner was Cheramie Viator of Texas! Thanks again Cheramie. Please check out the video on our website www.wraz.ca.

This is a very interesting individual – he is quite likely the female producing sleeper of the whole sale! His dam, Serebl 760T has made the CAA Premiere dam list which is based on consistent outstanding production. 760T will be a donor for our program this spring as well. I would be willing to wager a pretty fair bet that the females out of this guy might be as great as any out there. They are likely to be feed efficient, dark red, hairy, moderate framed cattle with a big rib and body. Beautiful udders with tons of milk will be a given for the daughters of Hooch 69C. I would like to collect him before the sale if possible and put a little owner's use semen in our tank for our own in herd use only by AI. We have retained two maternal sisters 57W and 57X in our herd (both have bulls in the sale). Maternal sister 91B was selected for the Agribition Masterpiece

sale and ended up in the good purebred herd of Jeff & Nancy Frazer in MB. Maternal brother Senator 79Y was our high seller a few years back and went to a great home not far away to work for Robin Thompson and family. Please check out the video at www.wraz.ca

-------	-------	-------	------	-------	--------

Sequoia 212X is a son of one of what I feel is one of the leading females in this breed - XXX Lakme 70M. Murray Crawford and I own this bull in partnership purchased mainly to produce females similar to his awesome dam. We were fortunate to have found him as an aged bull in the Equinox bull sale as a feature lot from Shawn Tessier of Broken T Red Angus Ranch near Weyburn. He has done what was expected of him in producing excellent females but with the added bonus of above average calving ease. His sons will be extremely useful in the heifer pen and his daughters catch your eye every time and they are developing very well to date. Sequoia 212X will consistently add eye appeal and is now proven to be a calving ease specialist. He will ultimately be remembered for his females.

	RED WRAZ CHRISTY 69Y
	RED T J F RAMBO 22R

This Sequoia son will catch your eye. The eye appeal that his sire passes on is worth quite a bit in the eye of the buyers of your calves. The dam 69Y is a young daughter of the Smack 31U sire that we used and he left us some really good females. Use this young fella on cows for his maternal strength and take a look at his birth date when you evaluate him with his Oct 12 weight of 650 lb. He was born March 18 so he is a month younger than many of these bulls!

	RED KMAC SEREBL 95N

Dam: Serebl 63W

Here is a Sequoia 212X son from one of Gord's good females. Once again nice EPD for growth and frame with actual numbers to back them up! This, to me, is what EPD should be about. When the numbers for growth and mature frame size are above average then the animal should be fairly similar when you look at his actual numbers and when you see him with the eye. This guy has a Oct 12 weight of 724 lb. and when he matures he will be above average frame. His dam Serebl 63W is a bigger framed power female. There is a maternal brother by Hitch working in the good herd of Dennis Mauthe SE of Brandon, MB, and a maternal sister here in the herd. If you are trying to add a bit of frame to your keeper females this guy would be a good choice.

CE 2.3	RED OLE KNIGHT 211W
	RED WRAZ PRINCESS 219Z
	RED WCF HAWK PRINCESS 23U

Here is a moderate birthweight, young Sequoia son with lots of long dark red hair. His dam, 219Z is a young, structurally correct, moderate framed female with a dark red coat of hair and a good udder. If you are looking for a bull to breed cows but also want to mix a few heifers in the pasture then this guy may work for you. He should have moderate calving ease for the heifers with enough frame size to reach the cows.

Reference Sire

RED BAKER'S RIDER PRIDE 100Z

RB 100Z

Sire of lots 64 & 65

BW -.5 WW 52 YW 75 M 14 TM 40 CE 9.6

Rider Pride has done an excellent job here and also in Baker's program under the very capable direction of Stuart McIntyre. His females were very well accepted in our fall sales and we look forward to breeding a large group of females to him this breeding season. (We used him as a yearling then he bred for Baker's last year). The first females are now milking and the udder development we were talking about last year is now proven. By all reports the udders on his females are awesome. His females will in the end be his legacy.

- Great footed and excellent structured
- Outstanding eye appeal
- Calving ease with good growth to wean
- Loose hided progeny with tremendous hair coats
- Progeny are moderate framed, stout and easy fleshing with plenty of muscle
- The females are stout and impressive with very good udder development

RED VELESA OF KINARED 502N

Here is a Rider Pride son that has a neat twist to his pedigree. His dam, Velesa 39A is a real stout daughter of the black red gene carrier DMM Creed 75W. We think a lot of his granddam Velesa 502N with her strong production record of 12 progeny - 8 are classified Grand calves which designates her as CAA Premier Dam. Her progeny start out small but grow amazingly well. She is still here and going strong. We used Rider Pride on all of our heifers with great success as a yearling, then he went back to breed at Baker's the next year. This young fella is moderate in stature and very well made. A very interesting heifer bull prospect.

CAA Premier dam Velesa 502N.

Well would you look at that – calving ease galore in this pedigree and EPD that match! High marbling score on this guy if you are breeding for premium carcass traits and his stay EPD is top 4% of the breed as well. The female side of this guy is awesome with many known female makers on both sides of his pedigree. His young granddam, Sparkles 31X has made the CAA Elite dam list in the first year that she is eligible for the achievement. Hitch daughters have proven themselves, the Tycoon daughters are awesome and the young sire Rider Pride 100Z is already becoming well known for his stout made, moderate framed daughters with great feet and udders. Sleep easy heifer bull here that will leave behind a legacy of daughters with bred in calving ease!

Those of you who have been asking if I will have any higher birth weight cow bulls with lots of growth, here is one that will bring you in some extra pay weight in the fall. The female side of this fella is pretty attractive as well if you keep back some females for breeding. Proven female makers Typhoon and Indeed are behind this big boy and you will be very pleased with the females he leaves behind. Although he has a birth weight of 110 lb., do not be afraid of this good bull. He was 10 days old before this guy found the time to weigh him but that is what he weighed that day so that is what I put down. He likely should have been closer to 100 and look at his Oct 12 weight of 742 lb. Last I checked, we are still being paid by the pound!

Swayze 43C is genetically very maternally bred. Hobo 1961 daughters are known for their maternal strength and our Swayze sire is showing he is very likely going to be remembered for his females as well. Swayze 43C is another great candidate for the heifer pen that will still be an asset in the cow pasture for producing females if he gets too big for the heifer pen.

One of the few Swayze sons in the sale, not because we didn't want a bunch of them, but simply because of breeding circumstances beyond our control (we just nicely had Swayze 33Z out breeding and I had to pull him to send to a customer to replace a bull we had sold in the sale but had come down with a bad case of hardware disease and had to be euthanized). This guy is an attractive dark red, moderate but very well put together son of Swayze 33Z. Our sale partners Kelly & Tracy and family, of Brimmer Cattle Co., are using a maternal brother to this guy in their heifer pen and that is where Swayze 64C would be best suited as well. Check out the video on our website www.wraz.ca.

PRIDE OF THE PRAIRIES FEMALE SALE

Saturday, December 10, 2016 • SLS – Saskatoon, SK

Come on out to the Red Angus weekend

- Blair's/Six Mile – Genetic Focus '16, Thursday, December 8
 - Touch of Class, Friday, December 9
- Pride of the Prairies, Saturday, December 10

Terms & Conditions:

Terms: The terms of the sale are cash or cheque payable immediately after the sale in Canadian funds. All settlements must be made with the sale clerks before cattle will be released. The right of property will not pass until final payment is made.

Bidding: Each animal will sell to the highest bidder. Bidders unable to attend the sale may phone their bids and instructions to the sale manager, auctioneer or special representatives. Bids must be received in sufficient time prior to the sale.

Disputes: Bidding will be reopened between the parties involved. If no further bid is made, the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision is final.

Announcements: Announcements made from the auction block will take precedence over printed matter in the catalogue. Buyers are cautioned to pay close attention to announcements.

Purchaser's Risk: Each animal becomes the risk of the purchaser as soon as sold. Animals will be cared for at the purchaser's risk for a reasonable length of time. All animals left with the seller must be insured.

Certificate of Registration: Each animal will carry papers issued by the breed Association. A certificate of registry duly transferred will be furnished to the buyer after payment has been made.

Delivery: Assistance will be given in making delivery after the sale. The purchaser agrees shipping arrangements will be at the convenience of the seller, but will be as soon as practical after the sale, at the buyer's risk.

Breeder Guarantee - Bulls: Should any bull fourteen months of age or over, fail to prove a breeder after being used on cows known to be breeders, the matter shall be reported in writing to the seller within six

months following the date of purchase or six months after the bull has reached fourteen months of age. The seller has the right and privilege of six months to prove the bull a breeder. No guarantee is given that semen collected from the bull will freeze.

Exception Guarantee: In case where the animal is subjected to any hormonal or surgical reproductive techniques after the sale, this guarantee shall be null and void. The seller is not responsible for damage caused by foreign bodies after the animal has been sold or for sickness not apparent at sale time. In no event shall the seller be responsible for more than the purchase price.

Accidents: Although every precaution will be taken to protect the safety and comfort of buyers, neither the sale manager, auctioneer, or sellers assume any responsibility and disclaim any liability, legal or otherwise, in the event of accident or loss of property.

By Livestock is only acting as a medium between the buyer and seller and is not responsible for failure on the part of either party to live up to their obligations; or for the truth of any warranties or representations, expressed or implied. By Livestock assumes no obligation to enforce or collect monies between parties. By Livestock assumes no responsibility for any credit extended by the seller to the buyer. Any legal action taken in exceptional cases must be between the buyer and the seller. The buyer must look to the seller for fulfilment of all guarantees and representations.

Insurance: Insurance will be available sale day.

Pictures: By attending the sale you are granting permission for your picture to be used for promotional and advertising purposes relating to the sale.
