DELIVERY

Take your bulls home sale day and receive \$50 off of your purchase. We will deliver free of charge until April 15 within a 300 km radius. Beyond that distance and time bulls will be delivered to closest central points. After April 15 delivery becomes responsibility of the new owner. Bulls staying past May 1 will be charged \$3 a day. If you wish your bulls to stay in our care we would ask for you to protect your investment by purchasing insurance which will be available sale day. Animal becomes responsibility of purchaser after being sold.

SIGHT UNSEEN PURCHASE PROGRAM

Call us to discuss your specific needs. We will make the selection and fully guarantee your satisfaction.
 "Don't like him, you don't own him"

**ALL BULLS IN THE SALE WILL BE
 VET INSPECTED AND SEMEN TESTED PRIOR TO SALE**

SALE DAY PHONES

TAYLOR AUCTIONS (204) 522 - 3996

On behalf of all of us at Ramrod Cattle Co. and Cor Vet Cattle Co., we would like to take this opportunity to personally invite you to join us for our second annual Cow-Boys Angus Bull Sale being held at 2:00 pm on Saturday March 29, 2014 at Taylor Auctions, Melita, MB.

It's hard to believe that an entire year has passed since our last bull sale, but it's once again time to bring the "boys" to town and offer up the best of our breeding programs. You'll find bulls in the offering carrying some of today's freshest genetics as we continue to seek to enhance the potential of our own breeding programs and in turn that of our customers'. Additionally, many proven bloodlines from cornerstone Angus icons are represented; if it aint broke it don't need fixing. The individuals within the sale offering that are sired by past sale features represent a testament to the confidence we have in the genetic merit of the bulls we're producing, and the best hands on method to evaluate and ensure that the bulls being offered deliver on our commitment to supply our customers with functional and sound breeding bulls that will improve the profitability of their operations. We believe the diversity in the offering will allow producers to find bulls suited to their individual needs and taste, while providing sufficient consistency for the production of large, uniform calf crops.

The commercial aspects of our operations keep our breeding programs firmly grounded; ensuring that we remain focused on producing functional and balanced breeding stock with the commercial cattle producer in mind instead of focusing on one particular trait or a current "IDEAL". The purebred operations exist alongside their commercial counterparts under the same management programs. The bulls are weaned off grass and mother's milk in early fall and placed on a practical and moderate ration designed for controlled development; allowing the bulls to express their true genetic potential without being pushed into excess fat deposition or sacrificing longevity; bulls developed in a manner that preserves their potential.

Once again, the footnotes on the bulls have been kept to a minimum to allow customers to ultimately form their own opinions of the bulls and determine those best suited to their individual breeding programs. In an attempt to continue to provide our customers with additional information for selection purposes, results of ultrasound scanning or genetic evaluations have been included alongside EPD's and performance data. We would be more than happy to provide our insight or additional information wherever possible and invite all inquiries on the bulls being offered in the sale.

We greatly appreciate the support of past customers and value their friendship and opportunity for repeat business. We would like to extend an invitation to both past and prospective buyers to join us on sale day, give us a call to arrange to view the bulls at your convenience prior to the sale, or contact us to discuss the sale offering and how we can assist in meeting the needs of your individual breeding program.

Hopefully, you'll be able to join us on March 29 at Taylor Auctions, but if not, please consider our sight unseen purchase program.

Cor Vet Bulls HD 50K Tested

High Density 50K percentile ranks are genomic predictions that rank an animal for a particular trait as compared to the reference population of tested Angus animals. There is no other genomic tool as powerful to help producers predict genetic merit in young, unproven Angus cattle. The technology enables genomic predictions for multiple traits; some of which are difficult, if not impossible, or very expensive to measure. A summary of the results for those bulls tested can be found in the comments section following the "50K".

HD 50K provides powerful predictions for economically important traits not available as EPDs, allowing you to make objective selection decisions. Producers making breeding decisions utilizing HD 50K along with EPDs, resulting in animals used in a commercial setting, can benefit from on average a 3:1 improvement in return on investment versus using EPDs alone.

Ultra Sound Information

LMY = Lean Meat Yield, expressed in %
REA = Rib Eye Area, adjusted value expressed in square inches
% IMF = Intra Muscular Fat, adjusted value expressed in %
Rib Fat and Rump Fat = Rib Fat, adjusted value expressed in inches.

The first question producers want to know about ultrasound; is how accurate is it? The answer to the question depends on who does the actual scanning and interprets the images. Ultrasound data in this catalogue was collected and analyzed by a technician that is certified by AUP and CUP. This means that they have met the standards set by many breed associations.

The accuracy, although not perfect, is high enough that bulls selected based on ultrasound, results in positive genetic change in progeny carcass traits. Heritability for carcass traits is moderate to high, which is slightly higher than birth weights, weaning weights and yearling weights.

% Lean Meat Yield (Cut ability)

Cut ability is the percentage lean meat yield in the carcass. Yield grade is an important factor in both Canada and US. Producing calves with a high genetic potential for this trait can be an important objective of a breeding program. Back fat will reduce yield by 7 to 8 times what REA will increase yield.

Ribeye Area (REA in2)

The REA is the largest muscle in the body at birth so REA give an indication of overall carcass muscling (measured in inches)

% IMF (marbling)

Marbling is the best indicator that we have to tell us what kind of eating experience we will have when eating beef. Extensive research shows that average AAA and above marbling producers the most satisfied customers. As marbling increases so does the juiciness, flavor and tenderness. This may not always be true but for the most part AAA marbling produce more satisfied customer than doe A or AA marbling.

Meaning of Values:

< 2.3 = Single A
2.3-3.99 = Double AA
4.00-9.89 = Triple AAA
9.90 and above = Prime

Rib Fat (in inches)

Fat depth influences lean meat yield. Fat bulls have less lean meat/muscle in the carcass. The fat measurement also gives an indication of the bulls fleshing ability. Calves from a bull with very little fat may finish too slowly in the feedlot. Body condition score in females is related to their ability to reach puberty at an early age, produce milk, re breed and maintain a short calving interval. Bulls carrying excessive fat may suffer reduced fertility.

Summary

Like all traits, we should avoid extremes. Moderation is the key. As producer we need to evaluate our females and then decide what kind of progeny we want to produce and this should dictate what kind of sire we want to purchase.

Terms and Conditions

Breeding Guarantee: All cattle are sound and right and sell with a responsible breeder guarantee of satisfaction. In the event of an unlikely dispute, the regular terms and conditions of the Canadian Angus Association shall apply.

Cow-Boy Warranty: Cow-Boys Sale Group guarantees to sell you a bull that is structurally sound and has passed a breeding soundness evaluation by a licensed veterinarian. Should any bull fail to be a satisfactory breeder-unable to physically service a cow or heifer-he will be replaced with a bull of equal value. Should this not be possible an adjustment will be made to reflect the value of the bull in questions or a credit will be given towards the purchase of another bull.

We will not provide replacement or adjustment for physical injury or mismanagement. With this in mind, we stress the importance of insurance on your bull. Should you have problem with your bull, notify us right away and we will make sure you are satisfied with your bull.

Terms: The Terms of the Sale are cash or cheque payable in Canadian funds; US Funds will be accepted at current rate of exchange at sale location. The right of property shall not pass until after settlement is made. All settlements must be made with the clerks after the sale before any cattle are released

Risk: All animals are at the purchaser's risk as soon as the Auctioneer's hammer falls. Insurance will be provided sale day. All persons who attend the sale do so at their own risk. The owners and sale staff assume no liability, legal or otherwise for the property loss or any accidents that may occur.

Disputes: In the event of a dispute, the bidding will be reopened between the parties involved. If no further bid is made the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision will be final.

Interest: Cow-Boy Sale Group reserves the right to retain an interest in any of the animals selling. The consignors reserve the right to collect 100 doses of semen on any bull in the sale at their expense and the buyer's convenience. The semen is for in-herd use only.

Phone or Mail Bids: If you are unable to attend sale day, you can entrust your bid in confidence with the sale staff or consignors.

Announcements: Changes of information of any kind in the catalogue will be announced from the block and will take precedence.
