Welcome to the Complete Dispersal of the Red Angus females at Crescent Creek. One always asks or wonders what the reason for a dispersal is. Luckily ours is not for health reasons, feed shortage, exiting the cattle business or retirement. The reason for ours is pure and simple - we need to lighten our work load. Our family which is, and has been, the labour base of our program is growing up and expanding to careers that have taken them away from the farm. Hopefully they may return at some time, but for now ma and pa are getting a little overwhelmed. The most logical solution was to sell some cows. At first it was going to be 60 head of some Black and some Red. But the added management of handling two colours would still be there. Separate breeding pastures, herd bull selection, and promotion of two colours.

In the end we decided the logical choice, but not the easiest, would be to sell the Red cows and Black Red carriers. It is only fair to the cows to sell them as a group and although small in numbers these Red cows have influenced this great Red Angus breed, in what in the purebred business, is a very short time. The cows will sell on August 14th along with the bred heifers and calendar year heifer calves. The bull calves will be retained and sold in our 2012 Spring Bull Sale. This will be the last set of Red bulls to sell. We are not entering back into the Red Angus breed, thus the purchase of these cows will offer the chance to open you up to a clientele of bull buyers who we were very lucky to have and we valued their patronage.

The cows can remain here until late September when the calves will be weaned. We will offer a payment plan, 60% sale day ... 40% October 1, both cheques left sale day. This small group of cows offers a chance for someone to start into a breed and era of the cattle cycle that will be second to none. The Red Angus fraternity is also second to no other - Breeders that truly understand what it means to be a friend and help somebody new. I believe this is a chance of a lifetime to own some of the most recognized genetics in the Red Angus breed. We will truly miss these females.

The *Annie Cow Family* - I am not going to write many footnotes through this catalogue but you will get the Dennis Ericson version on this one. I considered it like the "Luck of the Draw" or "Winning of the Lottery" the day we purchased Annie 22Z. Picture this - A young couple wanting to get into the Red Angus business, one logical start would be a trip to the famed "Mackenzie Brothers" fall female sale. Luckily we had an early harvest that year and were done by mid September. At the time we had two small boys so night travel was quite common. We leave Goodeve in the evening for a 10 hour trip through the night. At the time we had a Dodge colt which was Dodge's version of a "smart" car. To say the least this was one of the smartest trips we ever made. Upon arrival we spent two beautiful days at Cradle Mountain Lodge. Next a trip to the ranch and Don Mackenzie greeted us like we were long lost friends. We were impressed. Bryan showed us the heifers and I proceeded to select. It took me five minutes to find 22Z. She was simply terrific. Next morning was sale day. Upon arrival I saw that 22Z was to start the sale. Obviously some other people also thought she was pretty good. When the hammer fell we owned 22Z for less than the sale average that day. Dennis' words were "Merry Christmas" Wes and Kim. We truly were the luckiest people that day. We loaded our young family up and at 5 pm left for home. The rest is mere history. If every breeder ever gets the luxury of owning a cow such as 22Z consider yourself lucky. 22Z became a household name in the Red Angus breed. Her influence here is the heart of our program. She has left a giant footprint in the Red Angus breed.

The *Duchess Cow Family* - The fall of 1990 would mark one of the first purchases of Red Angus females for us. It was the Superstar Sale at Edmonton's "Fall Fair". I had marked my book and passed it over to my dad (Mike) just before he made one of his many trips to Angus events in Alberta. It had a Red Angus heifer calf marked. He looked at the book and said "So you want to buy a Red cow?" I replied yes. In true Black breeder wisdom he said "She can't be that bad - she has two black parents." Red Terlene Duchess 85Z became my first Red Angus purchase. When he phoned home to tell me I bought the heifer he said "I bid on a bull for you too, but why would you need a Red bull if you only have one heifer?" The bull was Red KBJ Prospector 133Z and I wasn't quite that lucky that day. Duchess 85Z was another large part of our program.

Terms of Sale

Cash or cheque at par payable on Sale Day, unless other arrangement have been made prior to Sale. Registration papers will be transferred only upon full and final payment. Announcements from the block will take precedence over printed material in the catalogue.

Payment Terms

Females 60% down sale day, 40% October 1, 2011, two cheques sale day.
 \$75 Credit if you take your purchase home sale day on purchases over \$2000.

Terms and Conditions

All cattle sell under the standard terms and conditions set forth by the Canadian Angus Association. Precautions have been taken to ensure your safety, neither Owners or Management are responsible for any accidents. As this is a Red Angus Dispersal, every animal will be offered 'as they are' on Sale Day with no further guarantee expressed or implied. Every precaution will be made to announce known blemishes from the Auction Block. Up-dated breeding information will be available sale day.

Welcome to the Crescent Creek Red Angus Dispersal, a source of genetics that has proven to be most valuable for past customers – and now this genetic base holds a tremendous future for the Red Angus industry. The cow herd is functional with sound basic features, unique outcross pedigrees and a really rippin', great set of calves.

Crescent Creek history holds many chapters of success stories including the great cows that walked the pastures; Annie 22Z, Terrlene Duchess, Duchess 155H and many others. Always striving to be unique these cow families have been mated to numerous interesting herdsires, both old and current, Red and Black. Most recently at the World Angus Forum, the success of Crescent Creek genetics was realized when no less than four Division Champions were Crescent Creek females, or direct descendants, a feat highly cherished and appreciated by the Olynyk family.

Because of the early nature of the Dispersal, the 2011 bull calves are being retained for their Annual Bull Sale. Upon visiting the herd in early July, we were overwhelmed by the tremendous set of herdsire prospects and therefore Crescent Creek are offering the Pick of the 2011 bull calves as a feature lot – what an opportunity!! As well, they are offering a special heifer calf Lot 62 from Kim's cow who is apparently 'untouchable'.

OBI has worked closely with the Crescent Creek program and highly recommend researching and investing in this great offering; who knows, the next Annie 22Z gem could be amongst them. Remember the Finance Program that will help in securing your choices. If for any reason you are unable to attend, we can assist with either visiting or purchasing proven genetics at their finest.

If you have experienced Crescent Creek sale days then you will understand: The genetics are excellent and the hospitality is abundant... Don't miss out on this breed leading event.

Rob Holowaychuk, OBI

I believe it's only fitting to start the offering with the "Annie" cow family. 68P is an excellent Rambler 5162 daughter.

22Z was mated to some of the top bulls in the industry and never missed. While at Crescent Creek she was flushed very successfully. Her total registered calves number 39.

Red Crescent Creek Duchess 155H has written her own legacy through progeny that have surpassed breed leading standards. Her now famous son Red Crescent Creek Chf 75L after being one of the high selling bulls at the Crescent Creek Bull Sale to Soo Line, entered their breeding program and simply sired as great a set of producing cows as could be found anywhere.

The well documented productivity of the 75L daughters at Soo Line was followed by their tremendous evaluation and North American wide acceptance. The most interesting part – all 75L progeny were naturally sired as there was no semen collected.

The accomplishment is simply second to none. The success others enjoy with Crescent Creek genetics is the ultimate in raising and marketing livestock genetics.

An exciting young Suiji 18M daughter out of 23R. Anyone wishing to do some showing, check this young female out. Simply put select by production and you can never go wrong. Bull calf WOS 159Y.

AP'd May 8 Red Crescent Creek Baron 39L. PE May 13 to July 5 Red D-Bar Pathfinder 36P.

99T is the result of two exceptional lines of cattle matching up. Her sire is an Annie 22Z son who left a really functional set of females and her dam is Claire 62F. Bull calf WOS 163W.

AP'd May 11 Red Crescent Creek Baron 39L. PE May 13 to July 5 Red D-Bar Pathfinder 36P.
