Rimbey Auction Mart - Rimbey, AB

Welcome to the Cutting Edge Bull Sale

Offering **54** Angus Bulls 33 Black Angus & 21 Red Angus

It is a pleasure to present the 10th Annual sale offering. This year the Cutting Edge Sale has gone through some changes with the decision to separate the Angus and Simmental into two separate sales. We certainly have enjoyed the past sales and wish our best to the Robson & Beagle families with their sale on March 7th. With cattle pricing strong and the future outlook promising, it is an exciting time to be in the cattle industry.

As usual we will be offering our best for your appraisal at this years sale. We would look forward to any questions, comments, or concerns you have prior to, or sale day. Visiting with our customers is one of the most enjoyable parts of the business.

Please feel free to contact any of our sales staff to assist you with your bull selection. For your convenience videos on all bulls have been posted online through our website www.cuttingedgebullsale.com and the sale will be carried live sale day on vjvauktion.com.

Be our guest on Thursday, March 5 for the Cutting Edge Hospitality prior to the sale. Bulls will be available for viewing sale day at 10:00 am.

*Family is our Priority
& our cows are our Passion.*

Welcome to the 10th edition of the Cutting Edge. The bulls on offer this year for your evaluation are sound in structure, excellent hair coats, soft in their make-up, great performance, maternal power, lots of testicle development and most of all have excellent dispositions. This may be one of the heaviest influence of SAV 707 Rito 9969 offerings that you will find. We really like how the Rito 9969's work, his daughters are super, his son's will match raw power from any breed.

The past year has been a great one! The fall feeder sales were epic – so many happy people in one place. The fall purebred sales had to be close to breaking records with topping sale averages. Those of us still in the livestock sector are finally getting rewarded. Indeed it is an exciting time to be raising the best cattle one can.

We had a fabulous summer watching Will & Wyatt participate in 4-H, the Alberta Junior Angus Association Show, Summer Synergy, Alberta 4-H Provincial Beef Heifer Show. They both are learning so much from these awesome programs. These are some of my fondest memories of the summer, watching values grow strong and passing the tradition on.

We thank you for your support both past & present in our program. If we can be of any assistance, please do not hesitate to contact us.

Please consider this your personal invitation to the sale, and hospitality before & after.

Peter, Vicki, Will, Wyatt & Glenda

As the cattle industry enjoys a very strong market it is enjoyable to be in such a positive industry with calves bringing premiums. We have a set of bulls in the 2015 offering that will help ensure you get your share of the profit from the cattle industry. We research and select the top genetics that will continually improve our cowherd, which in turn gives us the opportunity to offer you some of the best Angus genetics available. The feeding program has remained the same. The home raised, rolled oat based ration at about 1% body weight and good free choice hay, has allowed our bulls to perform, grow and mature at reasonable rates with their future in mind. Our red and black bulls are comparable in genetics and performance. Our Cutting Edge bulls are selected from over 50 bulls retained from a 200 head cow herd base. These bulls are pail fed, leading them to be docile, while maintaining their soundness and activity in a large group. As this sale takes place when most of the bulls are just over 12 months old, and our weather can be unpredictably cold, the bulls may need to return to the farm after the sale for semen testing when they have matured more and the weather is more favorable. Delivery to your farm will follow. If you have any questions or wish to view the bulls ahead of time on the farm, please do not hesitate to contact us. We look forward to seeing you sale day!

Utilize EPD's in your Bull Selection!
It's a predictability tool that can work for you.
This sire, Red MAF Chester 20Z is proof!
See page 23 for information on how they can assist you in your selection!

REFERENCE SIRE
RED MAF CHESTER 20Z

- **A REAL BEEF BULL with 7 sons on offer!**
- Could not ask more out of a herdbull in his first calf crop, his 9 sons average weaning index of 111 and an **average BW of 83 lbs!!!!**
- As thick made and square hipped as you will find. He is backed by a extremely balanced dam, sound, functional and moderate in her make up.
- We have alot of confidence with this herdbull and his progeny. He combines moderate BW and outstanding performance and is maternally strong.

Video

- An attractive, dark red, smooth made and long bodied bull that is very deep sided and square in his make up.
- Heifers first calf, that was our choice from the Kuntz dispersal, and this big broody Real Deal daughter did an excellent job on her first calf.
- Glorious 171Z did a great job here, before going to work at David Gibbs.

- Finalize 11B is a smooth made, low BW son of our popular 1Y sire and a heifers first calf!
- His data shows he has calving ease built in with strong performance.
- Excellent disposition on this stylish bull.

EPD's - an effective tool to assist your bull buying decisions

To use EPDs effectively you must understand how they work. Imagine you are interested in purchasing a couple of bulls for your herd. You are looking at the EPDs in a sale catalogue. Bull A has a weaning weight EPD of +10 and Bull B has a WW of +60. What does that mean? How can you use the EPDs to choose between the two bulls?

If these animals were randomly mated with 10 similar cows, we would expect the group average weaning weight of Bull A's offspring to be 50 lbs lighter than that of Bull B's (60-10=50).

It would be easier if we could assume that the highest EPDs are the best. Unfortunately, it isn't that simple. Like most decisions, using EPDs for sire selection involves tradeoffs. For example, bulls with high growth EPDs may sire calves with a higher birth weight as well. And there may be other impacts on your operation to consider.

Examples:

When **breeding heifers** it is desirable to produce calves with lower birth weights, so a breeder may want to pay special attention to birth weight EPDs of prospective bulls.

If all calves were sold as **feeders**, the milk EPD would generally not rate much attention. Yearling weight will be important if you want to ensure finished steers in the appropriate weight range.

BW = Birth Weight – pounds of birth weight (the lower the number, the lighter the calves)

WW = Weaning Weight – pounds of weaning weight (the higher the number, the more pounds will be weaned)

YW = Yearling Weight – pounds of yearling weight (the higher the number the more pounds as a yearling)

Milk = Maternal Milk – pounds of calf weaned by a bull's daughters. A management number with reflection of the environment and feed resources.

TM = TM Maternal – The total maternal EPD is a measure of both growth and milking ability and is an indication of the size of calf a bull's daughter will wean. The maternal milk EPD is combined with half of the weaning growth EPD to produce the total maternal EPD. This is a prediction of the total genetic influence that a sire will have on his daughter's progeny.

This does not make buying a bull any easier – it should only give you more confidence in realizing what the animal can contribute. EPD's are a pedigree estimate that can help you navigate management and environmental conditions. Keep in mind that it is still a 50/50 contribution between the bull and the female.
