## Welcome

Welcome to another edition of the Cutting Edge Bull Sale. I think everyone would agree that 2009 was another trying year for farming. With another calving season done for some and starting for others, believe it or not it's bull buying time.

Every year our sale seems to change. We would like to welcome back Blaine and Sandra Meyers of Poplar Grove Red Angus and welcome new contributors, Mark & Kathy Matejka of Matejka Farms and Darryl and Brent Papuschak of Norell Angus.

This year we will again be offering a good selection of commercial breeding heifers. Allwest Farms and Lockhart Valley Simmentals are selling good quality heifers this year just to name a few.

The sale location is still the same, but the day and time have changed. Make sure you mark your calendar on Saturday, March 6, 2010 at 1:00 p.m. for another exciting Cutting Edge Bull Sale. Last year the night sale was brutally cold, so hoping for better weather, we decided to move it to a Saturday afternoon sale and a week or so later.

Again we would like to thank all bidders and buyers in advance for their support of our sale.

Good luck calving and we hope to see you sale day.

**Please bring this catalogue to the sale!**

*We would like to thank Dwight Homan for helping us this past year.*

Michael Dolman

**H**ello and welcome to the 5th Annual Cutting Edge Bull Sale. This year marks our 20th Anniversary selling bulls. We would like to thank all our past buyers, bidders and supporters of our breeding program. Again this year we have some big, soggy bulls from our proven herd bull Jenkins. There is also a nice offering from our senior red factor bull "Blue". His calves are proving to be growthy, docile, good testicle development and with plenty of hair. Also you will see a small sampling from our heifer bull Bellringer 21T. We are also offering 9 really good commercial heifers - all are red or red blaze faced. We really think the cattle market is going to turn and you should be prepared to take advantage.

We hope to see you on sale day and as always feel free to stop by the farm for a coffee and visit. See you sale day.

Lee & Tina Robson

What can be said about Jenkins that we haven't already said. His heifers are real producers and his bulls speak for themselves. Even though Jenkins is now gone, his genetics will live on through his progeny. We have 3 powerful sons this year and they are good. Look them over carefully for they are all awesome bulls.

JB HUCKLEBERRY 113H**

LHVS 69W is my favorite bull. I've always told Lee that 69W reminds me of Jenkins, almost a carbon copy. He takes after his sire in color, body type and disposition. I've had numerous

conversations with Jason Bruketa (the breeder of JB Prada 51P) and there's one thing we always end-up saying to one another . . . it is so hard to find a good Fullblood bull, whether he's Full Fleck or percentage they are hard to find. Well if I were a breeder looking for a good bull, I'd definitely look at this boy. What more can you ask for, I don't know. He's got that moderate birthweight with explosive performance. He's well balanced with good muscle to bone ratio. Combine that with his excellent temperament, testicle development and hoof structure I'd seriously look him over.

We purchased "Blue" as he is nicknamed, in partnership with Anchor D Ranch from Barry Labattes bull sale in 2007. Blue has really come into his own, developing into a moderate framed bull with short legs

and big, big feet. He does have an impressive hoof structure. We really like his calves. He seems to put growth, along with hair coat, disposition, feet and legs and impressive testicle development on his calves. Blue has been used heavy over the last two years. He saved our butts when he turned two and A.l.ing became a nightmare. He bred cows up at Danny's, came here and bred 25 - 30 cows in the worst spring conditions I've ever seen. Last spring he was again used heavily at Danny's, here and then he went onto breed cows at a neighbors when his bull went down. He is dark red, hetero-polled bull all wrapped up in a very docile package. Look at his sons and really study them, I think you'll like what you see.

MOSES  
DAYTON'S POLLED MILLIE

This year we are offering two good young bulls form our proven heifer bull, LHVS Bellringer 21T. We helped one heifer last year and that calf was backwards.

Weights		
BW	205 Day	365 Day
80	805	1296

Birthweights averaged 80 lbs on heifer calves and 90 lbs on bulls. This year we haven't seen a calf born yet. His calves in the feedlot are performing very well, they have good growth and performance. Bellringer marks his calves up very nicely with lots of pigment. He also puts a tremendous hair coat on them. These two calves are a fair representation of what he can do.

Polled Purebred

**W**elcome to the Fifth Annual Bull Sale. We wish to thank all our buyers and bidders and supporters of the past sales. This past year has been challenging to say the least. However we are proud of the sale offering. This group will offer both heifer and performance bulls.

We are constantly trying to improve our farm & the calves we raise. The cowherd is something we are proud of. The traditional Angus advantage is important around here, easy calving, plenty of milk, natural mothering ability, disposition, good hair, fertility, and feed conversion, are features the breed boasts. We certainly strive to improve our program so that we can better serve our customers.

If any of us here can help answer questions, don't hesitate to call.

All roads lead to the Cutting Edge Bull Sale Saturday, March 6, 2010 in Rimbey. Please consider this your personal invitation to sale and lunch, see you there!

270 is a heavily muscled heifer bull producer. He improves the leg structure and has a perfect shaped foot, wide and well set. His ability to maintain condition is an important trait. His daughters are uniform and eye appealing while they wean off very functional cattle, that go onto have an economic bonus on the farm.

It's great to be back - After taking a year off and downsizing our herd with the focus on only top quality females remaining at our farm. The bulls we are offering are the result of this process. We strive for quality not quantity, and hope you see something you like. The dams we have all have excellent udders, feet and tonnes of milk. The sires are all long skulled, long bodied, and smooth shouldered. Lots of growth! Stop by and see the boys anytime. We hope to see you on March 6, 2010 at 1:00 p.m. in Rimbey.

 RED MAC GOLDIE 57G  
 RED NORTHLINE PATRIOT 606F  
 RED BSM MISS YOUNG FORTUNE 6E

Reg and Cathy Minchau bought his half brother 8 years ago and he is still going. 218W is recommended for heifers or cows. His dam has elite cow status with the CAA. Her sire is Red Mac Tailor Made 7J whom we bought from Don and Linda McKenzie, 10 years ago. We are going to start using this semen again this spring. As you will see three of the dams are Tailor Made 7J daughters. He is halter broke.

It's a pleasure to be participating in the Cutting Edge Bull Sale Group. We have put together a strong group of bulls for this offering that represents our program.

At Matejka Farms, we are very proud of our cow herd, 200 head of Black & Red Angus as well as Herefords, only the good ones get to stay and they work hard for us, they are the backbone of our business. We feel it is important to have a low maintenance cowherd that can produce calves that weigh up with minimal inputs and labour. Our bulls are on fed a high roughage and light grain ration, they are kept in a large pen in large groups so they have lots of room to move. You are welcome to stop by the farm and view any of the bulls prior to sale day.

Just give us a call and we will be more than happy to show you around

RED BLUE SPRUCE MERCURY 73H  
RED TASSEL DYNA QUEEN 82G

A top prospect from birth. The first calf heifer did a great job, indexing 112 with this strong, deep and performance orientated bull. Sired by 6T, who has as good of pedigree as any, note the popular Smash grand sire, he is well respected world wide. Balanced numbers and moderate birth weight indicate Rocket 13W will have a great future.

Here is an own ET son of our top producing performance and maternal cow 310N, she as calves in several countries, and it seems no matter what we mate here with she raises our heaviest calf! Combined with the popular Smash sire will ensure moderate BW with lots of growth and capacity in all his progeny. We will be using a maternal brother this year, and he has had many astute cattlemen appraise him this fall, this guy has just as much potential.

Boy, when we start looking for low birth weight, length of body and attractive package, we should think of 18U. His sire is a low BW AI sire, who is gaining popularity due to his positive progeny and maternal strength! Even the dam has moderation built in to her, she did a nice job on 18U as a heifer, and has another good heifer calf in the replacement pen. Hard to find a negative BW with positive growth and maternal, in a neat tidy package. Jan 4 weight - 1870 lbs.

If you are looking to add a few more pounds, and cover a few more cows, this is an outstanding prospect. We saved him as our spare bull for our herd, sired by our Advantage bull, who did a little show winning in his day, but more importantly, has sired great calves for ourselves and our partners, Big Sky Angus, Schuler, and Corner Creek Angus Edmonton. We were fortunate to have procession in Advantage this year, and didn't need the to use Addition 51U, but we would not have hesitated! Dam's side is a moderate and totally functional cow, who's influence we would love to incorporate into the herd. This is a meat machine! Jan 4 weight t- 2070 lbs.

## Guidelines for Management & Care of Yearling Bulls

**FEEDING:** Your yearling bull still has a lot of growing to do. Feed the young bull well. You should geed 5 - 10 lbs of grain in addition to a full feed of good quality had or silage from now until the start of breeding season. Recondition your bull after the breeding season to allow them to mature to their genetic capabilities. This is a very critical age as they start losing their teeth at 18 - 24 months. A young bull consequently eats slower and cannot utilize as rough a feed, or compete for feed, as one with permanent teeth. Research indicates that a bull's usefulness as a 2 year old can be retarded if not properly reconditioned after use as a yearling.

**BREEDING SEASON:** Don't expect a young bull to compete with older bulls, or horned bulls. If intimidated by an older bull, he won't breed effectively. A young bull, if handled properly and not dominated by other bulls, should service 20 - 25 females his first season. Size of the pasture and terrain also influence this. Limit the breeding season to no more than 60 days on a yearling bull. If you can't limit the season, consider rotation to give him a rest. Watch a young bull early in the season to detect any physical problems. A virgin bull can have inadequacies undetectable except through observation.

**HEALTH:** Maintain a good general health program, salt, mineral, and fly control. Worming can make a significant difference as well as grub & louse control problem.

# OPEN REPLACEMENT HEIFERS

Heifers penned in uniform groups of 3 or 4. The heifers are guaranteed open.  
The heifers are selling with a breeding guarantee.

### 41 - 43

## ALL WEST FARMS REPLACEMENT HEIFERS

### Lots 41 - 42

We are offering 2 groups of 4 black heifers this year that are penned in uniform groups. These girls are all sired by LVA 114 Tradition, a long, sound bull out of the Bar 17 Little Valley Angus herd.

### Lots 43

This year we are also offering one group of 3 uniform solid red heifers sired by Maltese. These heifers were part of our Champion pen of 5 from Farmfair 2009.

We would like to once again take this opportunity to thank Peter, Vicki, Lee and Tina for the privilege of having a place in their bull sale that continues to be the high quality sale that many ranchers choose to attend. We have been selectively breeding Simmental/Angus cross genetics from select AI bulls and herd sires to make the best animals with the high maternal instincts and finishing qualities that we demand from our herd. We would like to offer you a few of our black and red future mothers this year.

The dams sires include: Red Light, Cactus Red, and Anchor T Legend. Many of these heifers full and half sisters have been Champion or Reserve Champions at Farm Fair and Bull Congress in Camrose consistently for the past four years.

These heifers will sell with a guarantee of soundness and open.

Darryl and Anissa Friesen

## LOCKHART VALLEY REPLACEMENT HEIFERS

### 44 - 46

Lee & I are really pleased to offer for sale, 9 (3 groups or 3) very good replacement females. All are either red or red blazed faced. They have excellent hair coats, good temperaments and good performance. Remember, these heifers could go into our herd, but I think 30 heifers is plenty to calve out. These nine are too good to finish so we're offering them to you. We've never sold heifers for breeding before, so feel confident that these heifers will work for you for many years to come. We are very proud of them. These heifers will be palpated by our vet, Dr. Pat Burrage, guaranteeing that they are sound breeding females.

### 47 - 48

## BAR 17 LITTLE VALLEY ANGUS REPLACEMENT HEIFERS

We are offering one group of 3 heifers, and one group of 2 heifers.
