Livestock Insurance Available Sale Day

Offering 65 Bulls
20 Simmentals
25 Black Angus & 20 Red Angus

Welcome

It is a pleasure to present our 7th Annual sale offering. This year the Cutting Edge sale group has the largest sale offering to date, with an excellent selection of bulls in everyone's price range.

There is a great deal of optimism in the beef industry. Prices on all classes of cattle from feeders to cull bulls have been strong. Media reports indicate a strong bred heifer market in the fall.

Thank-You to everyone who bid and bought our genetics and placed them in your herd. There are many bull sales out there and we appreciate you selecting the Cutting Edge for your bull source.

Be our guest on March 3, 2012 for the Cutting Edge Hospitality.

Welcome to the 7th Annual Cutting Edge Bull Sale. Family is our priority and our cows are our passion.

We are really pleased with the bull pen, best yet. The depth of our offering runs deep. They all excel in: muscle, disposition, hair coats, testicle development, spring of rib, and overall mass. This year we are offering 2 two year olds. We have split up the herd into Jan. - Feb. and Apr. and May calving groups. These bulls have not been picked over.

We wish to thank everyone for supporting us, bidding, buying and showing up to the Cutting Edge. Taking the time out of your day to spend it with us. We appreciate your continued confidence in what we do.

Come view the bulls, the coffee's always on. Please consider this your personal invitation to lunch and the sale. See you there.

If you are unable to attend the sale please visit with us or Doug Henderson regarding your bull requirements.

Things change quickly! Kids grow up, move away, the cattle and agriculture industry look forward to profitability, for several years.
Our hard working, unpampered cow herd is enjoying the moderate winter weather, sure helps this lifestyle be more enjoyable!

The bulls this year are an interesting group, sired by calving ease and performance leaders. I think we have a variety of bulls that still maintain the features our customers have liked from previous sales.

THE SALE BULLS were weaned September 12, and transitioned for 21 days, and then we monitored their performance until Jan 1. Their data is reflected in the 91 day ADG. The feeding program has been good free choice hay and about 1% of their body weight of our home raised oat based ration. The pen of 40 bulls are pail fed, leading them to be docile, while maintaining their soundness and activity in a large group. As this sale takes place when most of the bulls are just 12 months old, they will return to the farm after the sale and will be semen tested when they have matured more and the weather has warmed up. Delivery to your farm will follow in April.

Welcome another year of the Cutting Edge Bull Sale, what a difference a year makes. Things are looking up for our cattle industry and lets hope it lasts for a long time.

We have 10 bulls on offer for you. A selection of calving ease cow, and maternal bulls. Our calves are not creep fed at all - this ensures that we know what our genetics are doing. They need to do it on their own.

Thank you to all our past and present bidders and buyers. We really appreciate your support. Also a thank you to Laura Knott for buying her 4-H steer from us. Good Luck Laura! Also thank you to Cathy Minchau for helping with the picturing of the bulls. Stop in anytime to see the bulls, along with their dams and sires. The coffee pot is always on!! Hope to see you on March 3rd in Rimbey.

We would like to thank Dwight Homan for helping us this past year.

Hello everyone and welcome to our 7th Edition of the Cutting Edge Bull Sale. 2011 has shaped up to be one of the best years cattlemen have seen in a long time. I think for the first time in history, bred commercial cows have topped \$2000 and good butcher bulls at an all time high now is the time to get rid of any bull you feel is not working, to old or just not sound anymore. It's hard to find a good bull but when you do, don't be afraid to step up and bid to get the bull you really like. Lockhart Valley bulls are fed a ration of silage, 12 lbs of bull pellets, 2 pounds of barley and pre-mix. They are fed to gain 3.25 to 3.75 pounds per day, no more. To gain 4+ pounds a day is a waste of feed and money. The bulls are housed in large pens with lots of space to get out and walk. This year we have 5 really good black Club King bull calves, a good selection of red factors from such sires as "Blue", PRL 42W (our Bravado son from Porters we used successfully on heifers) and an ER Big Sky son. There's also some really good fullbloods from Gidsco Apollo, Jahari, Bellringer and of course Jenkins. Bulls are selected for structural soundness, testicular development, they must look like a bull and most importantly - temperament. We can only describe the bulls so much but to really appreciate them, please stop by for a coffee and take a stroll through the pen. We would like to thank all bidders and buyers from past sales and hope to see you Saturday, March 3, 2012 at the sale. We have a DVD made of the bulls, if you would like one please phone. If you need help in selecting a bull please phone Glen Olson at 403-783-1599 or Dan Skeels at 403-783-1217.

When we were looking for a new Black Simmental bull to breed our few black cows to, we immediately liked the look of Club King. He has the muscle expression on his rear that is so lacking in a lot of Black Simmentals. He has not disappointed. He caught 7 out of 8 cows and gave us 6 bulls and 1 heifer. We are keeping the heifer. His calves came easy and were small until they hit grass - then pow! They really took off. Muscle, style and thickness. Look over his 5 sons and tell me which one is the best. Lockhart Valley reserves the right to draw semen on any Club King bull.

Here's the first of the Club Kings and he is defiantly a good one. Excellent hair, legs, feet, testicles and temperament. This bulls dam is maternal sister to the dam of 29Y and his maternal grand dam is the mother of 35Y. Everyone who has walked through our bull pen really likes this calf. His dam raised one of our high sellers at last years bull sale that went to the Leedale Colony. Danny is very pleased with Mumbo Jumbo and I expect Thor to be no different for his new owners. If any bull could be called "Pretty" it would be this guy. Tested inconclusive for homo polled. Test not back for the black gene.

Heres the second Club King in our line-up. 38Y is a genetic full brother to 2Y. LHVS 11N & LHVS 39P are full sisters who we featured in the Simmental Country this summer. Lee likes this calf because of his style and I've always liked his dam because of hers. This calf has all the attributes to be a breeders bull or the commercial breeders ace up his sleeve. A little more punch to this calf because of his length, good hair, testicles, feet and temperament. Tested positive for homo polled. Test not back for the black gene.

Here's the third Club King bull calf in our string and what a powerhouse he is. This bull's dam is a real producer and it shows in this calf. Long spined but has the rump of a Fullblood bull. The dam of 29Y is this bull's maternal sister. Productivity runs in this cow family and when you throw Club King in the mix you've got the "Wow" factor. He is an out-cross to a lot of black pedigrees and in my opinion would do the breed a lot of good. This cow produced a really good First Dream bull calf that sold in our 5th sale. He was purchased by Remington Cattle Co. and they used him heavily in their Black Angus program and at the time of their dispersal this past fall he was moved into the Simmental program and used there.

Here's the fourth of our Club King bull calves. His dam is a very functional Fully Charged cow. God hair coat on this calf. Club King really puts the testicles under his progeny and this guy is no exception. Good feet and muscular development. He also has that blaze on his face everyone seems to want. Don Oberg calls it the "money" sign. Tested positive for homo polled. Test not back for the black gene.

This bull was admired this summer for his moderate frame and thickness. Solid black, large testicles and a good temperament, this is the last of the Club King calves. His dam is a small framed, back-blaze faced cow out of the famous cow maker Black Joker. His dam has just had his full brother and he weighed 82 lbs at birth. Definitely a heifer bull. Lee feels this calf would be safe to use on heifers also. For Black Simmental breeders or the astute commercial man, this calf is an outcross to many black pedigrees.

Its hard to find a heifer bull but when we saw 42W in Porters 2010 Bull Sale line-up we knew we had found the bull. He's so stylish, has big testicles and best of all he has great big feet under him. This guy is an aggressive breeder. 42W calves like a dream. As I'm writing this, Lee and I watched a heifer calve to him and from start to finish (calf on ground) less than 30 minutes. Easy calving and explosive growth. What a hard combination to find. We used him this spring in the heifer pen, the he went out into the cow pen. Look for more of his sons next year.

This bull is from a first calf heifer who had him unassisted. He's polled with a white blaze. (He has little scures). His maternal grand-dam is an Anchor T Vision cow so he has a little more jam to him than a straight red pedigree. Lots of length and style to this calf. Large feet and a beautiful hair coat. He also has a well developed scrotum.

Heres the second calf from our red factor heifer bull. This little bull calf is related to 25Y. LHVS 23 and 25Y are maternal sibs. This calf is solid red with a blaze face. Smaller framed with good hair, feet and temperament. 62Y also has good testicle development. We are very pleased with PRL 42W, the bull we purchased from Porters in 2010. He calves perfectly on heifers but his calves have good performance. Many commercial men are wanting low birth weight bulls but lots of gaining ability, that's hard to find, but any of these three 42W sons will fit the profile nicely.

Believe it or not this calf is related to 45Y. This bull's dam 9W and 45Y are maternal sibs. I think its truly impressive when your bull pen is full of genetic full sibs, maternal sibs, uncles and cousins. This young bull is later born but he is a cocky little sucker. Large testicals and with the "money" blaze on his face, this calf will calve easy but put some growth in his calves. Just a note, his dam is a black blaze faced cow.

This red-blaze faced bull calf was bred to be a heifer bull. 17Y oozes calving ease out his pores. His sire, ER Big Sky is a 20 year old pedigree. Big Sky is a known calving ease bull & cow maker. He also has 50 plus pages of registered progeny. He is in the top 2% for CE, top 1% for BW and top 10% for milk. His maternal grandsire, Bellringer 21T, has identical percentages except Ringer is in the top 3% for CE. He is smooth polled and red to the ground, nice tempered and has a good testicular development.

Blue's calves, especially the bulls are like peas in a pod. 54Y is from a really thick stout Jenkins red factor cow. This calf has old breeding in his pedigree from the dams side. His pedigree has some excellent bulls in there such as: Hook's Red Quorum and BHL Mr Zotte 64Z. Both highly maternal bulls. 54Y is thick, soggy, hairy and good testicled. Blue has also given him that nice quiet temperament.

Jenkins is probably one of the best Fullblood bulls we've ever used. There's not many bulls out there that will give both good heifers and bulls. Jenkins does both. His heifers are fantastic cows with beautiful udders and excellent feet & legs. His bulls - well those of you with a bull know what I mean and those of you who don't - you'd better buy a son, semen is getting in short supply.

Every year we use less Jenkins and soon his sons will be hard to come by. This calf has been admired for his thickness and masculinity. He's that really nice brown color that I favor. Lots of testicle, good hair, feet and legs. His pedigree is rich with names like PRL Houston, Western 36R, Sir Arnold 809G, Bold Leader and MFL Foreman 36Z. Again he's backed by Jenkins, so you just can't go wrong. His calves will be heavier at weaning and more pounds at these prices mean big dollars in his owners pocket. Don't pass him up or you might kick yourself in the butt for not buying him.

Here's a really good SU Jenkins son from a Sim-Roc Stroller Cow. Stroller is very rare to find in your semen tank and we really had to dig deep here. 70U is a small yellow cow with a perfect udder. Her maternal sister has a Jahari bull calf in the sale. Both sisters come from my favorite cow LHVS 52M. We've sold bull calves from her in past sales and with the maternal lineage this calf has I'd buy him just for the females he'd make. Backed by Jenkins this calf can't miss. Good hair, testicles and temperament.

Gidsco Appollo is a cow maker and you see him in a lot of pedigrees. Strong maternal strengths, color and performance are some of the attributes we like about him. We have one calf on offer and he is a dark red with black on his muzzle and tailhead. Out of our polled donor cow, we feel this Full Fleckvieh calf is worth your appraisal.

We flushed our good polled Full Fleckvieh cow, 10R to Gidsco Apollo and as a result we have a very unique pedigreed bull. Dark red with a big star on his forehead, this calf offers a blend of old and new genetics. He came out horned but keep in mind his dam is a polled cow. 10R is definitely a stout old girl and is the dam of Bellringer. Apollo is a cow maker and backed by 10R, 25Y should be a cow maker himself. Good feet, hair coat and temperament. Hannah thinks this is one of our best bulls and should stay at home.

First off let me describe 76Y. Dark red, double goggled, good hair, body length and good feet and legs. He's the only Whistler son in the sale (Whistler liked to throw heifers this past year) and we felt he deserved a look over. His dam is from a Bar 5 Evans son we raised and sold to Dale Andrews. 76Y would be an excellent cross on a British based herd. He'll add length of spine and pounds on your calves. Pounds = money in your pocket.

Shawacres Jahari is an older bull that we used a few years ago and we thought he might work well on Jenkins daughters. Disappoint he did not. We have a couple of Jahari daughters and really like the femininity and productivity they have. His calves are usually dark red with lots of pigment and hair. He gave us alot of daughters and a couple of bulls - both of whom are in the sale. Both are definitely beef bulls and their calves will put added pounds to your calf crops weaning weights. Pounds = more jingle in your pockets.

Lee and I dug deep in the semen tank and found some Jahari semen. We've used him before and really like the maternal traits he throws. This bull is dark red with some white on him. If you want your calves to show "Simmental influence" use him. He's double goggled with an excellent set of feet under him. Nice temperament and testicles. His dam is a very productive Apollo cow who is small in stature but big on production. Maternal sister to 37Y's dam. All going back to LHVS 52M my favorite cow.

Many people are surprised that a lot of our cows are not big and huge. 74Y's dam is such a cow. Smaller in stature but loads of performance. This calf is also smaller in frame size but looks like a little tank walking around the pen. He's dark red and double goggled. Born near the end of January his dam still weaned him at near 900 lbs. Again, nice temperament, testicle development, hair and feet.

With over 30 calves registered his average BW on both heifers & bulls is 82 lbs. His daughters calving this year have all calved without assistance and have beautiful udders. Step up and buy a son, if not for the calving ease then for the replacements they will leave you.

Since Bellringer is a caving ease bull with added performance we decided to use him on cows that like to put extra pounds on their calves at birth. 34Y's dam is such a cow and the "Ringer" did what we wanted, smaller birthweight calf but good performance. Bellringer always marks his calves nicely and this boy is no exception. Good hair, temperament and testicle development. His dam is a Roonik cow who is very much a performance cow - but she's small framed, has a good udder and is as thick as a clubhouse sandwich. I wish she'd have heifers but shes a bull maker. Take a look, I think you'll like him.

This stout fellow is from a deep bodied Bar 5 Evans cow. 11P is a real sweet-heart and a pleasure to work with. This bull is hairy, deep and thick. Nice tempered and has excellent testicles. Bellringer worked really well on this cow and helped her in keeping her calf's BW down. This youngster should calve easy and put those all important pounds on your calves.

Two springs ago we went down a bull and decided to put the Bellinger out as a clean-up on our cows. Thank goodness we did because he really worked well. This small framed calf is very stylish indeed. Good hair, temperament and marked up really nice. Definitely a calving ease bull - heifer recommended.

TERMS AND CONDITIONS

TERMS: The terms of sale are cash or cheque. All cattle must be settled for at the conclusion of the auction. Cattle will not be released from the sale premises until payment is received in full, unless other arrangements have been made prior to the sale with the individual contributor. Every animal sells to the highest bidder, in the case of disputes, the auctioneer's decision will be final, and becomes the risk of the purchaser. We reserve the right to withhold animals from shipment for whom payments have not been received prior to departure times.

BUYERS REGISTRATION: Buyers please register for a buyer number at the office prior to purchasing.

BREEDING GUARANTEE: All bulls are guaranteed to be fertile & reproductively sound in accordance with the rules & regulations recommended by the breed association. All bulls will be semen tested.

ANNOUNCEMENTS: Errors in this catalogue will be corrected by announcements from the block at sale time & such announcements will take precedent over any printed material. Any disputes will be settled by the auctioneer.

ACCIDENTS: Although every precaution will be taken, All Persons who attend the Sale do so at their own risk, & the owners, management, the sales staff assume no liability, legal, or otherwise for any reason.

CERTIFICATE OF REGISTRATION: A certificate of registration duly transferred will be furnished to the buyer by the breeder for each registered animal after complete and full payment has been made.

INSURANCE: Bulls who go back to the seller's farm must be insured by the buyer, insurance agents will be in attendance.
