# Welcome

Wow, 22 years of breeding Red Angus cattle and still going. I keep remembering that the average purebred producer is in business for only 7 years. Well when you find the right breed and it clicks you can grow old with beautiful females surrounding you all the time. So guess what Cameron is in heaven on earth with all his gorgeous red heads. It was my dream to go into Red Angus cattle and they have looked after us over the years. Through the years we have met some wonderful people and continue to make new friends and customers with the sale of our bulls in the spring. Every once in a while I have to put my foot down and tell Cameron some of the girls have got to go. This is like pulling teeth out of a laying hen on our farm. We have over the last few years slowly dispersed our commercials to various people and now the time has come again to offer some more females. The numbers are climbing again and the commercial numbers are low, so the logical move is to offer some of Cameron's prize purebreds.

So on December 3 we are going to open up the heart of our herd and offer some of these gorgeous red heads of Cameron's. It took a lot of convincing on my part to get Cameron to do this and he is still threatening to pull out some of his favourites. I am learning as I go through the pedigrees to not tell him what he is picking. The direction he was given was to pick the top females with heifer calves at foot. If the cow had a bull calf at foot he was to find another cow or a bred heifer with similar breeding to offer as the bull calves are for our sale in the spring. So the rules for our sale this year will be to offer either or. To ease Cameron's mind we will offer two and the buyer will pick which one they want to take home and Cameron can keep the other. So you are starting to get the picture, we are offering the very top females out of our herd. They are the younger females so you will have lots of years to watch these girls produce for you. This is not a herd reduction; this is the cream of the crop sale with us showing you what we have while still allowing Cameron to maintain some of them. There are many wonderful cattle in our breed and a lot will be offered in various production and individual sales throughout the fall but we are hoping that with the catalogue you are about to go through that you will make room in your busy schedule to come and be part of our sale that we hope is the start of a legacy of great offerings.

Our auctioneer Mr. Brent Carey has watched us grow over the years with our red herd. He is excited for us and stops in whenever he is in the area to offer some well meaning advice and to keep an eye on the ones we have put up for sale. He has been a wealth of information and he really wanted me to tell you our protocol for our girls. We vaccinate all the cows after calving with a live vaccine for IBR, BVD, and PI3 and then all the other ones we get in the vaccines our vet advise us to use. The old adage that a closed herd doesn't need to vaccinate so much is not the way we look at it. We want to send an animal that we sell off our farm to come covered for everything out there so that they aren't the carrier coming into their new herd. In the past few years we have also vaccinated for anthrax. So all yearlings and older animals both our breeding bulls and the cows are also vaccinated with the anthrax vaccine. The calves are vaccinated at 6 weeks of age for Clostridia's and we use Covering Plus to try and get away with a different mix of pasture pneumonias by using this strain of the vaccine. At the same time we do the live 5 way shot. In the fall we booster everyone when we wean or just before we wean. Then protocol has us doing young bulls and heifers again at a year before they go out for breeding season. This is when we do the cows for the breeding diseases as well.

Then around December or first warm day in January we do a scour vaccine for the e-coli and rota viruses that can be a bother later on in spring. We booster when it is necessary on the bred females so that they have full coverage of these scour viruses. We also do a lice and internal worm control with everyone in the fall with Ivomec products or Ivermectin and then every so often we do a Safeguard crumble fed in a trough to do the internals. We strongly believe an ounce of prevention is worth its weight in gold for health and weight gain. So rest assured your new purchases will come to you safe and sound and up to date on all their shots.

We will preg check the sale females the 30<sup>th</sup> of October and if any should be open we will decide how we will proceed with our offering of the lots on sale date. Cameron feels that they all look quite pregnant and they haven't shown any indication otherwise so we will just verify it with our local vet in Melville.

The cattle will be pictured in early October for the catalogue and these will be the pictures that we sell them by. If there are any notes on individual animals that we need to bring to your attention we will do that in the catalogue or on sale day. We want to present as honest a group of cattle that we can to the potential buyer. We will not clip or put the cows or calves on heavy feed. They will be given some grain but it is to help the younger ones to keep growing and to help the young mothers recover after raising such outstanding off-spring. It is important to us that the cattle are as easy keeping and in working shape as we can present for the public. We will keep the cows and calves close for anyone to come view them before the sale, at the farm.

So please don't hesitate to call Cameron and come take a look at the offering at anytime before the sale date. The cattle will only be on display at the farm. So come early if you want to check them out personally. The cattle do not have to be taken the same day, they can be picked up later or Cameron can be easily convinced to deliver. So please mark us on your calendar as a sale to attend if you are looking for some awesome producing purebred cows. They will produce calves that have the ease of calving, the will to live and the ability to perform. What every cattleman strives to have on their ranches. Join us for lunch at Tuffnell community hall which is 4 miles east on #16 highway, from our yard approach and turn north into the hamlet of Tuffnell. The community hall is on the main road in town. Till December 3<sup>rd</sup>, we wish everyone a good run with their commercial calves and all the best that are showing in the purebred shows. We will be exhibiting a few of the heifer calves from our farm and a couple pens of purebred bulls at the commercial barn at Agribition so stop in, have a look and we look forward to visiting with everyone.

# Heart of the Herd Female Sale

**Monday, December 3, 2012**  
**Lunch at noon - Sale 1 o'clock**

## SALE DATE INFORMATION

We are located 2 hours North of Regina by taking #35 highway to the Yellow Head Highway (16) and coming East past the ranch and on to Tuffnell Town Hall. The Ranch is located 1 mile east of Foam Lake SK on the East side of Highway #16. Watch for the bales if coming from the West or the Barn with our name on it if you are coming from the East.

The sale will be a PowerPoint presentation in the Tuffnell Hall 4 miles east of Foam Lake in the Hamlet of Tuffnell on the N side of #16 Highway. This is for your warmth and convenience. The cattle will be at the ranch for viewing anytime before the sale date and on sale day before lunch.

From Saskatoon we are 2.25 hours East on the Yellowhead Highway. Everyone welcome to come view the cattle at anytime before sale date. Just give Cameron a call on his cell to make sure he is around to show you the pens. 306-272-7141.

## ACCOMMODATIONS

If you are requiring a room for the night before you have very limited choice in Foam Lake but Wynyard is half an hour to west of us and Yorkton is 45 minutes to the east. Googling both will give you the names and numbers of all their possibilities.

LaVista Motel, Foam Lake SK

1 mile from the ranch or 4 miles from the Tuffnell Hall | 1-306-272-3341

Willy's Hotel & Tavern: 1-306-272-3328

If you would like us to book you in on your behalf please just let us know!

Buster as we call him was the steal of the day at RSL and Spittleburn's sale a couple years ago. This boy was sold as a 2 year old by Robert. Our daughter Charlene had seen him in the sale catalogue and she did some homework and told her dad that if this boy was in the sale he would go fairly high because of his pedigree. When there didn't seem to be that much interest Charlene and Cameron decided that we would go after this boy. We ended up getting him for a song as the saying goes and we are hoping he is with us for many breeding seasons. I think Cameron is considering drawing semen off of him for in herd use just in case. His ET sibling is in Blair's program at Lanigan and they are hoping just as we are that the offspring will stand out as no others and that the ET siblings are headed to elite status themselves in the near future.

Cameron bought Premiere as a yearling from Phil Bernie. The calf was a good buy with lots of meat and length in his body. We are not sure why he did not go higher as he is built smooth in the front end and with his length of spine he can carry extra in the birth weight department and still have calving ease. This bull was purchased as a back up in case we had any of the other sires go down. We got a few offspring from him last year and a couple of daughters at least are in the sale this year but we chose to use him heavy in our breeding program for this year. He is destined to stay in our herd for many years as long as he stays sound breeding wise.

We went to Flying K to find a new herd sire and Cameron came home with this heifer bull supreme. He has not disappointed us for one minute and he has grown into a powerful herd bull. So much so that after two years on heifers he will now graduate up to the cow herd. He is thick and massive in all areas that matter. This bull will be a long time in our herd.

Cameron and I went for one bull and came home with two. Cameron purchased this bull for the cows. Both Flying K bulls were chosen because of the outstanding young dams they came off of. Brian is a very honest cattleman and very much like Cameron in what he wants to see out of his girls. These bulls both are built well but their moms both have amazing udders and sound feet. Brian suggested we look at these Max calves for that very reason. This fellow we have used quite a bit on our cows and he has not disappointed us in any way. He is one of the main sires again on this group of females we are offering for sale.

Here we go again. Cameron is not scared to line breed and you should see this massive boy. He is an amazing individual and when the vets come from Swift Current to semen test they love this big boy. His name is inspired by a hockey player as Charlene named all the T bulls. He is a big, quiet bull that moves with grace and stature. His calves are walking in his footsteps like no other in the yard.

This bull was too young to sell in our sale the year he was a yearling so we held him back and liked his style so much that we chose to use him as a clean up bull. He is out on loan as I put this catalogue together with some commercial girls. He is a smaller built kind of bull with a neat front on him but lots of thickness through his middle and along his back. He is a calving ease kind of fellow that we used on quite a few animals later on this spring and early summer.

This cow affectionately called Apricot was a 4H heifer for our son many moons ago. Apricot has raised us numerous bulls and a few keeper females. Her last bull calf sold in this year's sale as our second high seller to Diamond C Liberty Angus-Cathy Piller of Melville SK. Apricot has the distinction of being a granddaughter of the infamous Red Knight who continually has top producing females.

This daughter and grand daughter just get more and more jam packed with pedigree as you go along. It all culminates in beautiful feminine females that are going to last a long time and produce many productive offspring. The Typhoon daughters are stylish females and then the grand daughter has the max bull that Cameron purchased for use on heifers and the bull calves and heifer calves are outstanding. In person or by the pictures they are truly a great investment in anyone's future.

This cow is definitely a unique girl. Her claim to fame was her bull Calf Whippet 399W who was our top selling bull to Flying K Ranch and Brian said he called all of Whippet's bull calves Bears because of their stoutness with so much natural thickness. Marcy is a beautiful uddered cow that continually impresses us every year including this year. When we decided to put her up against 127R we felt compelled to not offer her heifer calf from this year. We couldn't risk losing the only female offspring from this major producer for our farm. This cow throws low birth weights into her offspring so performance and light weight start is this female's stamp. So take your pick!

Exposed April 28-July 6th to WRAZ 95X.  
Finished off with FKR 96X from July 8-Sept 30 2012.

# Heart of the Herd

**DOUBLE RED ANGUS**

Maggie 301X 1569496

This young cow is an amazing individual. She and her calf have so much eye appeal they will be our females that grace our catalogue cover. This female is off the Six Mile Typhoon bull that has done amazing things for us in his short life on our farm. Then on the bottom side is Red Knight and the combination is looking to be headed for a winning combination all the way.

This heifer is truly an eye catcher. With her extra length and style she stands out in our heifer pen and coming from a young cow with an absolutely outstanding udder it will be hard to choose which one to take home. But yet again you bid on your choice and Cameron will keep the one that isn't chosen.

# Heart of the Herd

Rosa 271X

Rosa 271X 1569478

SSSSh I don't think Cameron caught on. Here is a daughter of 127R. This young cow is packed with elite in her family. So if you weren't able to get her mother earlier in the sale here is an opportunity to take home her or her daughter. They are both destined to be elite mothers if their pedigrees indicate anything.

Exposed to RSL 522U from April 24 - June 22, 2012.

Finished off with CPRA 511W to Sept 30, 2012.

Here is a calf that is destined for greatness with her new owner. She is stylish with pedigree to burn. Stewart Front Man goes back to Badland Bonus 702 and the rest of her pedigree is jam packed with Royalty for sires and dams. Cameron probably offered the mother because of this powerhouse heifer. She has the looks and the style and the pedigree to breed on these traits and just get better with each calf she will produce. But yet again you tell us which one you want to take home.

# Heart of the Herd

**Roka 318S**

**Roka 318S 1307516**

Here is a younger cow that we really love. We have been told that when you breed closely and it doesn't work you call it inbreeding and when it works you call it line breeding. Here is a female that is line bred to our elite bull Big John and the results are always great.

This mother/daughter team was one of three pairs that attended the Saskatchewan Gold show this past summer in Yorkton in the pen show. They had many admiring them throughout the time they spent in there. This heifer calf is truly amazing. You can see it in her EPD estimates and in person you will be more than impressed. You choose, we are happy to keep the one you don't want to take home.

If Cameron had been paying attention he would have realized this cow/calf pair come from the Typhoon bull we bought from Six Mile a few years ago. If he had realized I can guarantee you this pair would not be a choice pair. They would be hidden from the public. Cameron swore he would not part with any of the daughters and granddaughters so here is a rare opportunity to pick up one of these daughters or granddaughter. Cameron holds these girls close to his chest so don't take too long in your bidding or he will pull both and allow neither to sell.

This cow/calf pair have some interesting pedigrees that contain a cow that we love to pieces. She has had a young bred Heifer go into the Six Mile program and this year lot 9 and 10 are a grand daughter and great granddaughter to this little cow. She is a cow with a wonderful nature and a low to the ground deep cow. She is a G cow and still right up there with another great calf this year. You want longevity and a solid individual take your pick on this pair.

Here Cameron is offering two S cows with different breeding but similar in style. If you want volume and easy doing both these girls will fit the bill. When we were picturing the cows I marked down the cow number as we went and how many pictures we took of each animal because there were lots we had that we had to go back to this to figure out which cow we had. When you have this kind of uniformity with different pedigrees that is a hands off to the fellow that matched cows to sires. Cameron does an awesome job on his red heads.

Here is a mother and daughter that are related to 306S. Then you take a look at each individual's sire side. On the cow we go back to Badlands Bonus and on the Calf's side you have the Flying K pedigrees. We strive for sound functional attractive cattle in our herd and Flying K has the same objectives along with the feet and legs to carry the animals across miles of pastures and many years of life. We work hard on that as well and you will find that in either of these girls. Take a look at the feet under the sires or the cows/calves.

As I type these pedigrees the memories flood back on the people that some of these pedigrees come from. Big John was a top seller the year he sold as a yearling to us from the late Ron Drinnon. Ron was a man you could talk to all the time and you could learn something each and everytime. His cattle were sound and productive as Big John was for us. He went elite within the confines of our cow herd. We never sold semen on him or leased him out. He made his status from cows with in our herd. Johnny had longevity and it was with great sadness when we had to put him down at 14. Fertility and longevity went with his name and we have a few straws of semen to be able to go back to this elite sire in the future. Here you have the opportunity to take home some of the Cumnock background.

Wow, its all I can say when you look at these two pedigrees. Here is one of the cows that contributed to Johnny going elite but the cow's side has Beiber Design in it along with going back to Premier Patriot 16. Then in the calf you get some Indeed which has taken Six Mile females so far. Either one of these girls is worth their weight in gold just from their pedigrees. Then you see them in person and WOW!

When I see these two females I see my husband squirming in his chair. When I asked him to pull the very best he did just that. This 7U cow is off an amazing cow that we often use in our adds to show off the perfect udder and deep bodies that we work hard to achieve in our females. 497K is too old to offer in the sale so we offer a daughter and some grandchildren. There are certain cows we don't like to part with because they are our foundation and from them we are pulling the top bulls. So this is a rare opportunity so take a close look at all these ladies on offer from the very Heart of the Herd.

Once upon a time Double C put out an add in a few magazines to show off a cow and a bull in a cloud and it was called cattle to dream about. What I didn't realize was we had an offspring off those two individuals so when you look at this pedigree the 7U mother in this pedigree is off those two animals in the add. And here you are being allowed to buy a daughter of 7U. Good luck! She will be a wonderful addition to anyone's herd.

Our pedigrees on the good ones always seem to go back to Red Knight and High Mark. There is a good reason why they go elite. They throw the traits we need in the Red Angus breed. By sale time I hope to have 133Z DNA'd as I just wanted to make double sure whom her daddy is. So if you chose the calf the parentage will already be done.

I have to say something about this calf. She is off a bull we sold a couple years ago that PFRA ended up buying and he was our second high seller. We retained some ownership as we wanted to draw semen. We did an oops and weren't able to freeze his semen and the bull went to PFRA so here is one of the few heifers we got from some natural breeding. If she is not the pick you will never see her on offer again. So have at her

We are offering this pair because of the heifer calf more than anything. We bought the RSL bull but only used him on a few animals then helped someone out that was having bull issues so we let them buy him from us. This cow and calf have wonderful parentage that will go on and produce for many years. You pick.

# Heart of the Herd

Nicolette 496S

Nicolette 496S 1353798

Great Cow calf pair with Cherokee Canyon and Prime Rib on cow side. On the calf pedigree you will notice Red Knight as well.

Exposed to CPRA 680T from April 30-Sept 30, 2012.

These two females have bull calves that are in our bull pen for this coming spring. So if they are good enough to produce animals like that. Just so everyone understands. We run over 200 purebred cows and we have close to 50:50 results usually and we only usually put 36-38 into our sale. So we only pick our top 30% and these girls are good! Again you get to pick.

Here is some really fancy breeding in both the heifer and her mother. The Buster bull we have high hopes in. He is a bull we are hoping to see go elite with his background but it is going to be tough when he comes with no numbers. It will take a lot of natural breeding to get there. So if you want a piece of the future in your herd either one of these girls will fill the bill.

Here is a cow/calf pair for your choice. Both individuals are packed with pedigree and they are a pretty site. With bulls like Lodi Prince and Cherokee Canyon along with YY Red Knight and our own Big John you can go for broke with the jackpot choices you have here.

Rochelle 152Z

# Heart of the Herd

Roxie 168Z

Roxie 168Z 1665682

We wanted to offer at least 35 lots in our sale so we went back into the heifer pen and pulled 4 more calves to put on offer. This first one we have is a sweetheart and what a pedigree. She is off our Buster bull which you can see the excellence in his pedigree but on the mother's side there is an interesting twist. She is black pedigree. With the likes of Buffalo Creek Hobo on the dam's side on the bottom and Krugerrand of Donamere 490 contributing the black from a bull we bought from Joyce and Laird Senft. What an awesome opportunity in this young lady.

This second heifer is a real sweetheart with such a nice way about her. She has the Canadian Flag on her pedigree. She is going to be a calving ease girl. With her background her birthweights in her calves should always be in moderation as can be noted in her projected EPD's.

Wow don't every say the last ones in the catalogue are the poorest in the sale. It won't be true. If Cameron saw what he picked for parents on both sides these girls would be back in the non sale pen. So take a good look as either one of these girls is worth taking home to be an outstanding producer.

# Heart of the Herd

**Blockana 623Y**

**Blockana 623Y 1621826**

We thought we were done with the catalogue until the bred heifers came home and Cameron realized he had kept 30 back like I had said we did. Now he thinks he can offer a few more of these precious girls and not miss them too much. So we will offer you some of the ones he wanted to keep for ourselves. This young lady is carrying some black breeding in her through the Krugerrand 1H bull we bought years ago. This bred heifer goes back to our most favorite cow CPRA 80G who is still producing for us. She has never gone elite because her whole line of daughters and sons are the lightweight majors in their field. You can see that a birth weight of 76 is more than reasonable. That is what 80G's children consistently do. We are so impressed with the longevity in this line of daughters and sons. The few females we have offered in consignment sales like the prestigious Red Round Up had one daughter CPRA 661T go to Six Mile and her offspring were offered in Lot 9 and 10 in their female sale that was held in October of this year.

# Heart of the Herd

Roxie 563Y 1652278

Here is one of the few Typhoon daughters we will offer in this sale. She is a looker and is built to be a well producing cow. She is deep and correct on her feet. It will be hard to part with a future elite cow if she continues on like her mother CPRA 823M.

Rebecca 621Y

Rebecca 621Y 1656942

Here is a bred heifer that goes back to our Point 1P bull that was a little meat machine. He was shorter in stature with pounds and pounds of muscle that never quit. He bred his muscle pattern into his offspring along with his smooth shoulders and sound foot to carry his impressive offspring on pasture. Take a look at this darling and she will do well in her new home. Point's offspring are very recognizable as Jenna Loveridge could go through the bred heifer pen and pick out his offspring that were walking around everytime.

Here is a cow that I just about missed. I will put her against CPRA 117U cow as both of these individuals are females we want to retain in our herd. So we offer two girls that we would be happy to see either one stay behind if the other was selected. So your job today is to decide which one is the one you want to take home.

This cow was covered by FKR 160X  
from April 24-Sept 30, 2012

# My Family

**The Rink**  
 I love the sound of sock tape being pulled off the roll.  
 The room smells of body odor and A535, but it doesn't phase me  
 I always have fun.  
 I like the environment.  
 The feeling of pulling my jersey over my head gives me butterflies.  
 I am almost ready to go.  
 The room is silent as we wait for our coach.  
 We walk through the hallway and burst onto the ice.  
 I see everyone tapping their sticks in anticipation for the game.  
 We line up on the blue lines and listen to the national anthem.  
 Chills roll down my spine.  
 The other team's starting lineup stares us down.  
 I stare right back into their eyes.  
 Getting that first big hit.  
 And hearing the crowd makes me feel proud again.  
 I skate up and down the ice watching and waiting for someone to  
 make a mistake.  
 Once they do I will be sure to take advantage.  
 The tickle in my lungs after a hard shift makes me crave more.  
 I'm an adrenalin junkie.  
 I dare someone to hit me.  
 When my team is on offense I shout for the puck,  
 I'm waiting for the perfect pass.  
 I know I can make my shot count.  
 The puck comes my way and my team yells "Howie"  
 I wind up and my stick hits the ice then the puck.  
 I have a small window and my shot makes it through the screen.  
 I feel a moment of jubilation as my shot crosses the goal line  
 The celebration with my tem makes it all worth it.  
 I love the atmosphere of the rink.

## TERMS AND CONDITION OF SALE

1. **Terms:** The terms of the sale are cash or cheque at par. No releases will be given until satisfactory settlement has been made. All monies are in Canadian funds, other funds will be accepted at the current rate of exchange.
2. **Bids:** Every animal picturing will be sold to the highest bidder. On choice lots only the animal chosen will be sold. The other will remain the property of Double C Red Angus Farm Inc.
3. **Disputes:** In case of disputes, bidding will be reopened between the parties involved. If no further bid is made, the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision in such matter will be final.
4. **Announcements:** Any changes from information in this catalogue will be announced from the auction block, such changes will take precedence over the printed matter in the catalogue. Buyers are therefore cautioned to pay close attention to any such announcements.
5. **Certificate of Registration:** Each animal in the sale will carry registration papers issued by the Canadian Angus Association. A certificate duly transferred will be furnished to the buyer for each animal after full total payment is made.
6. **Purchaser's Risk:** Each animal becomes the risk of the purchaser as soon as sold.
7. **This is a production sale:**
  - (a) cattle will sell as is.
  - (b) Preg checking will be done prior to sale and any additional information will be provided on a supplemental sheet on sale day.
  - (c) All known blemishes will be announced from the Auction block on Sale Day.
8. **Liability:** All persons attending the sale do so at their own risk: sellers and/or sales management and/or any of the sales staff assume no liability legal or otherwise for any accidents occurring in, on, or about the premises.
9. **Insurance:** Livestock insurance and/or transit insurance will be available at the sale or information will be available at the sale.
10. **Export Testing:** In the case of animals purchased for export the necessary custom, health and export certificates will be supplied.

## GENERAL INFORMATION

**Sale Location:** Tuffnell Town Hall in the Hamlet of Tuffnell Saskatchewan, cattle on display at the Double C Red Angus Farm Inc. No cattle will be at the sale facility.

**Health:** All cattle will be supplied with proper health papers for shipping anywhere in Canada or for export to the USA. Cattle requiring Brucellosis and TB testing (US purchases) will be tested after the sale and will be ready for shipment approximately one week later, Note: All U.S. buyers should be aware of the Brucellosis vaccination requirements of their own state.

**Disclaimer:** As responsible Angus Breeders, we have done everything possible to insure these cattle are free from genetic defects at the present time. This in no way guarantees they will be free from future genetic defects that may be discovered by any association, party or persons.
