GLOSSARY OF TERMS

Expected Progeny Difference (EPD):

Is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

Birth Weight EPD (BW):

Expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW):

Expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight EPD (YW):

Expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Maternal Milk EPD (Milk):

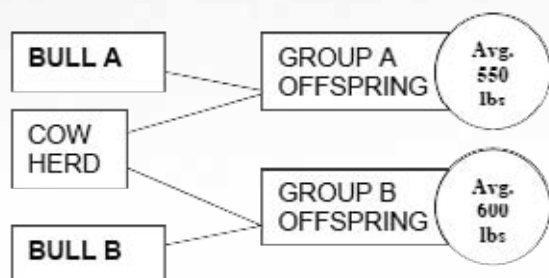

Is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Total Maternal EPD (TM):

The expected overall difference in weaning weight pounds of calves out of a bull's daughters compared to calves from daughters of a bull with a zero EPD for total maternal. The total maternal EPD is a measure of both growth and milking ability and is an indication of the size of calf a bull's daughter will wean. The maternal milk EPD is combined with half of the weaning growth EPD to produce the total maternal EPD. This is a prediction of the total genetic influence that a sire will have on his daughter's progeny.

How Do I Use EPD's?

Imagine you are interested in purchasing a couple of bulls for your herd. You are looking at the EPDs in a sale catalogue. Bull A has a weaning weight (WW) EPD of +10 and Bull B has a WW of +60. What does that mean? How can you use those EPDs to choose between the two bulls? If these animals were randomly mated with 10 similar cows, we would expect the group average weaning weight of Bull A's offspring to be 50 lbs lighter than that of Bull B's (60-10=50). So, if you were interested in producing heavier calves, Bull B would be the one to choose. Remember, EPDs evaluate group average and offspring's performance. They cannot predict individual performance or weights.

Average Black EPD's	BW	WW	YW	Milk	TM
	+2.9	+41	+72	+17	+37
Average Red EPD's	BW	WW	YW	Milk	TM
	+0.5	+25	+49	+15	+27

MARBERLY ANGUS

Welcome to the Northern Alliance Bull Sale. I hope calving has gone well for those who have started, and that it goes well for those who haven't. The bulls I have on offer this year are just plain good. They are backed by cows that have proven themselves to be consistently productive; as cows with bad udders, feet, dispositions and poor fertility are culled. We are confident the following bulls will go out and perform well for you. I would like to thank my previous customers, and I look forward discussing the cattle with you on sale day.

Kim Beaudette

1X has always been a stand out. He is a moderate framed bull that is a smooth made with good muscle expression and thickness. His dam is a model cow with excellent feet and a nice tidy udder; that always brings in a strong calf in the fall. 1X has continued to gain well at Lazy B test, offering exceptional performance in a solid package.

Stout is the best way to describe this bull. He displays excellent muscling, body depth, and disposition. This calf exhibited explosive growth from birth to weaning in a dry year when grass was scarce, and he has continued to pound the scale down at Lazy B. 6X's dam is a feminine, easy doing cow who always gets the job done well. If you are looking for an easy calving sire whose calves will perform, this is your next herd sire.

11X is a long bodied yearling with a lot of maternal strength in his pedigree. His sire is a home raised bull whose dam, 2K, is one of our top producing cows. 11X's paternal grandsire, Density, is known for his exceptionally maternal daughters, and his paternal grandsire, Bando, is known for his calving ease and carcass traits. Backed by breed leading sires, 11X will work well on all types of cows and heifers.

14X is a true calving ease bull who exhibited excellent growth from birth to weaning. His dam is from Dennis and Shelly Erikson's Get-A-Long farm in Wetaskiwin, Alberta. She is a strong and maternal brood cow. I used her first bull calf in our herd and was not disappointed with the calving ease or the grow-ability of his calves. Thunder is a leading calving ease sire that does not sacrifice performance in his calves, as can be seen in 14X.

20X is a larger framed bull who exhibited great growth from birth to weaning, and continues to gain well at Lazy B. His dam is an excellent cow at Wyspering Wynds, who consistently brings home one of the growthiest calves in the fall. Bennett Total sires highly maternal females with excellent udders, and he does not sacrifice growth or productivity in his calves. If you are looking for a bull to produce productive replacement females without losing growth, 20X will work for you.

POPLAR MEADOWS ANGUS

Welcome to our first Northern Alliance Bull Sale. It is great to work with a group of progressive thinking people.

Our bulls have been fed at Charly and Lucille Belsham's Lazy B feedlot in Fort Fraser. The bulls are fed a ration to obtain a 3lb per day gain.

We have been developing our herd of the last few years carefully selecting top quality females, using top AI sires and using the best walking bulls we could find. We calved out close to 50 cows this winter and plan to breed 70 head this spring.

We believe the cattle industry is turning around and we are headed for exciting times.

We are very pleased with the bulls we have to offer. They are tie broke, semen tested and vet inspected for soundness. We stand behind our bulls 100%. Please check out our website for updated weights.

Give us a call if you have any questions.

Tanya, Monty and Taylor Belsham

15X is sired by HF Tiger the 2009 World Angus Forum Champion. 15X is moderate framed with tremendous thickness, superior phenotype and friendly disposition. His dam is a very deep sided cow with strong feet, legs and udder quality. Tiger was also the sire of my heifer calf champions this summer. 15X is quite possibly the first Tiger offspring to sell at auction in BC. Don't miss this guy he is VERY good.

113X is sired by MVF Retail Product 54S who sired all my bulls that I sold last year in the Vanderhoof bull sale. 113X's dam is an 11 year old cow who has picture perfect feet, udder moderate framed and very fertile. His dam is owned by Nikki Royer of Houston. 113X is very smooth and has added length. He is a mid April calf who will be plenty big enough to breed cows.

BLAST ANGUS

We are pleased to be part of the 1st Annual Northern Alliance Bull Sale. We are consigning 7 sons of our new herd sire, HF Comeback 264U, a son of the renowned HF Kodiak 5R who just sold as a 5 year old in Denver for \$150,000.00! We think this is the best group of bulls we have ever offered for sale. They have an abundance of thickness, depth and are extremely uniform.

Tori's red bull is sired by the popular AI sire Red Six Mile Sackic 832S who has sired many high sellers across Canada.

The bulls are being fed at home. We welcome you to stop by and view them, their dams and the sire any time. The bulls will be tie broke, semen tested and vet checked.

If you can't make the sale, give us a call and we would be happy to help you select the bull that would best fit your needs! We thank all our previous buyers and supporters and look forward to seeing you on March 26th!

A little younger bull out of the popular AI sire Red Six Mile Sackic 832S. The dam is Tori's original cow which came from Deep Creek Angus. She wops out a great calf year after year, no matter what she is bred to! Maternal brothers have sold to High Lonesome Ranch, IC Ranch and Walter Steidl. Maternal sister sold to Andy Meints. 26x has ample thickness and an awesome hair coat. If you are looking to put a little power in your herd, this might be your bull!

RED MOON ANGUS

Welcome to the first Northern Alliance Angus Bull Sale. Red Moon is very proud to be part of this event and partnering with a great group of Angus Breeders who have proven they and their herds have what it takes to survive and grow in the purebred business. The storm is clearing and cattle prices are up, many of you culled bulls this past fall and are looking for replacements, you won't find a better set of Angus bulls in the province than what are listed in this catalogue.

Thank you to all our past customers, our business is your business and we take that seriously and truly appreciate your support.

All Red Moon bulls are fed at home. They are fed a balanced ration not exceeding 1% of the pens average weigh, along with a dry mixed grass and alfalfa forage. Minerals are fed free choice. All bulls are weighed monthly. Weights can be viewed on our web page www.redmoonangus.com. The bulls are fed to grow and are not pushed, at time of writing the pen average gain is 3.5lbs per day. The pen will be vet checked and semen tested before the sale and vaccinations are up-to-date. They will be ready to go to work for you.

Our cow herd is a maternal herd. We breed for the maternal traits. We strive to produce moderate frames, calving ease, and profitable weaning weights. The females have eye appeal, with that comes sound conformation, good udders and sound feet.

Most of the bulls in this offering are sired by Red Northline Crush 59R, we own this bull in partnership with Northline Angus, Howard and Wendy Schneider from Ardrossan, Alberta. Last fall we sold a group of his heifers in the Northern Highlights Sale in Vanderhoof, they topped the sale. Red Moon had the high selling bred heifer Red Moon Goldie 16W going to Brad and Anita Schappel of Heart of the Valley Farms, Courtenay BC, for \$4 000.00 and the high selling heifer calf Red Moon Pralee 15X also selling to Heart of the Valley Farms for \$3 000.00.

Andy Meints of Houston, Henry Meints of Houston and Giddings Brothers of Telkwa also took home Red Moon heifers, sired by Red Northline Crush 59R. The average price on Red Northline Crush 59R sired bred heifers was \$3 062.00 and on heifer calves was \$2 083.00. Crush progeny have been shown in both Canada and the US.

Two of the bulls on offer are sired by Red Get-A-Long Ten 710. This bull was purchased from Get-A-Long Stock Farms, Dennis and Shelly Ericson of Wetaskiwin, Alberta. Ten has produced some of the best heifer bulls we have raised, low birth weight and respectable weaning weights. These two calves have exceptional pedigrees. One is a grandson of our Canadian Red Angus Champion, Red Northline Rev 341R, owned in partnership with Northline Angus, Tripple L Angus, Viscount Saskatchewan and Two M Angus, Cudworth Saskatchewan.

Thanks again for your support over the years, we wish you all easy calving and good returns on your calf crop.

Jim, Shirley and Tom Moon

A very good calving ease epd bull, with a high milk epd. His Dam Madison 34R is a deep bodied cow. She possesses all the maternal strength we require in a Red Moon cow, good feet, good udder, structurally correct and a very quiet temperament. This bull will pass on some really strong maternal traits to your replacement heifers.

The dam has consistently weaned a large calf. Her bred daughter sold last fall in the Northern Highlights sale, topping the sale at \$4000.00 to Brad Schappel of Heart of the Valley Farm, Courtney, BC. The dam is easy to work with and deep bodied. A larger birth weight on this bull but still maintains a low birth weight epd and good calving ease numbers.

This is the first of two bulls in the sale from Red Get-A-Long Ten 710. Ten has consistently produced really good heifer bulls for us. This calf has a lower birth weight with a respectable weaning weight. This is a bull from a first calf heifer. Her sire is the first of the producing daughters from the Canadian Red Angus Champion bull Red Northline Rev 341R. We have no doubt about the excellent mothering traits in these Rev daughters and are sure Rev will leave a super mark on our herd. His calves have done extremely well in the shows in Canada and the USA. Low birth weight epd and good calving ease in this bull.

Another good two year old ready for work. Lots of calving ease bred into these two year olds. The two year olds will be semen tested and vet checked before sale time.

POPLAR MEADOWS ANGUS

We bought our first pure bred angus in 1965 and have been raising them ever since. We have stayed with the same goals, fertility, moderate birth weights, good gains and good maternal traits. After all this time we feel our animals are predictable. Our aim has always been to raise low maintenance cattle in a ranch type environment running on bush pastures in the summer and wintering on a hay diet. We are pleased with our consignments all sired by a homebred bull. We have had our bulls fed at Lazy B feedlot for the past sixteen years. These bulls are fed a ration to express their potential. It is programmed for a three pound gain. We have sold bulls from there for the past years and have never had a problem.

We would like to thank our past buyers and hope to see you all at the sale.

Frank and Dianne Strimbold

From a first calf heifer. Dam has a maternal sister at Benchmark Angus in Alberta. Same cow family as Poplar Meadows Freedom 14R that has done such a good job for Todd and Pam Marchant at Williams Lake.

From our top Leadtime of Alcan 150 cow. She is a real producer and has bulls working for Myles Storey and James Breit. Probably the easiest keeping cow in our herd. This is real herd sire material.

From a first calf Benchmark Paradigm daughter. The Paradigm's have beautiful udders and can really milk. This calf has Freedom on both sides of his pedigree so should breed true. He has been one of our favourites since birth. Great EPD's

The youngest of our offering. Another produced by a first calf heifer with a shot of Peak Dot Hobson in her. Dam is a daughter of the dam of 5X. A balanced set of EPD's. The Cassie cow family can make them fancy. We have been high on this guy also.

TERMS & CONDITIONS

Terms

The terms of the sale are cash or cheque payable at par. Cheques to be made payable to sale clerks on sale day unless prior arrangements have been made. The right of property shall not pass until settlement is made. All settlement is made with the clerks of the sale before any cattle will be released. US funds will be accepted at current rate of exchange announced sale day.

Bids and Disputes

Every animal will be sold to the highest bidder. In case of disputes, bidding will re-open between the parties involved. If no further bid is made the buyer will be the persons from whom the auctioneer accepted the last bid. The auctioneer's decision in such a matter will be final.

Announcements

Any corrections or announcements made from the block on sale day will take precedence over the catalogue.

Purchasers Risk

Each animal becomes the risk of the purchaser as soon as it's sold or as soon as the auctioneers gavel falls.

Certificate of Registry

A certificate of Canadian registry duly transferred will be furnished to the buyer of each animal sold as a registered animal after settlement is made in a timely manner.

Breeders Guarantee

All cattle are sold sound and right with a responsible breeder guarantee of satisfaction. In the event of an unlikely dispute the terms and conditions standard with the Canadian Aberdeen Angus Association shall apply.

Liability

Although every precaution will be taken to protect the safety and comfort of the buyers, the auctioneer, sale management, sale staff, the auction mart and owners assume no responsibility in this matter and disclaim any liability, legal or otherwise in the event of an accident or loss of property.

NOTES:
