GLOSSARY OF TERMS

Expected Progeny Difference (EPD):

Is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "T", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

Birth Weight EPD (BW):

Expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW):

Expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight EPD (YW):

Expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Maternal Milk EPD (Milk):

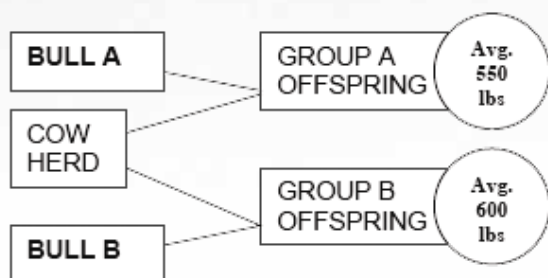

Is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Total Maternal EPD (TM):

The expected overall difference in weaning weight pounds of calves out of a bull's daughters compared to calves from daughters of a bull with a zero EPD for total maternal. The total maternal EPD is a measure of both growth and milking ability and is an indication of the size of calf a bull's daughter will wean. The maternal milk EPD is combined with half of the weaning growth EPD to produce the total maternal EPD. This is a prediction of the total genetic influence that a sire will have on his daughter's progeny.

How Do I Use EPD's?

Imagine you are interested in purchasing a couple of bulls for your herd. You are looking at the EPDs in a sale catalogue. Bull A has a weaning weight (WW) EPD of +10 and Bull B has a WW of +60. What does that mean? How can you use those EPDs to choose between the two bulls? If these animals were randomly mated with 10 similar cows, we would expect the group average weaning weight of Bull A's offspring to be 50 lbs lighter than that of Bull B's (60-10=50). So, if you were interested in producing heavier calves, Bull B would be the one to choose. Remember, EPDs evaluate group average and offspring's performance. They cannot predict individual performance or weights.

Average Black EPD's	BW	WW	YW	Milk	TM
	+2.9	+41	+72	+17	+37
Average Red EPD's	BW	WW	YW	Milk	TM
	+0.5	+25	+49	+15	+27

Poplar Meadows Angus

These are the first calves from our new herdsire HF Kodiak 132W and we are really happy with them. These bulls were all raised on grass and mothers milk except 1Y who we had weaned early to go to local shows. They have the best weaning weights we have ever had and just keep on coming. Two are by one of our own bulls that is out of a dam that produced the top gaining bull at the test station a few years ago. We have been in the Angus business for 47 years and feel that our bulls are predictable and fit into our philosophy of low maintenance cattle raised in a ranch environment, bush pasture in the summer and a hay diet in the winter. These calves have been fed at Lazy B feedlot again as we have for the past seventeen years.

We thank our past buyers and hope to visit with you all at the sale.

~ Frank & Dianne Strimbold

Great performance on this calf as he was over 900 lbs when we weighed on Sept 21. He is a 3/4 brother to HXT 1Y - both from Battle Cry dams. He has a little more frame than some of the others but still has the muscling that we expect from 132W. His dam came in fat last fall as she is an easy keeper.

HEART OF THE VALLEY RANCH

BRAD AND ALETA CHAPPELL, COURTENAY BC

Red Moon Angus

Welcome to the 2nd annual Northern Alliance Bull Sale. We are again proud to be part of this event and partnering with a great group of purebred breeders. Over the years, the cattle business has introduced us to an exceptional group of people, both commercial cattlemen and purebred breeders. It's these people and their families that make the cattle business in British Columbia; they have been the best we have every worked or learned with. Over the past few months, we have seen some of the best cattle prices since before BSE, we salute those who stayed with the business, knowing it hasn't been easy.

It is an exciting time to be in the cattle business, cattle numbers are low and demand is high. Many of you have retained heifers and are looking for bulls with calving ease and still maintain performance. We have for your selection this year a great group of heifer bulls. The calves sired by Red Northline Dillinger have hit the ground running with easy birth weights and have gained well in our on farm feed test. The Red Northline Rev bull has produced some really good working females. We are now calving some of his granddaughters and they are showing all the signs of carrying the maternal traits we breed for.

The mothers of our bulls are a sound, no nonsense group of females. This is a maternal herd, we look for calving ease, moderate frames and a profitable weaning weights. While reading the EPD's and write ups on the bulls you will see a lot of calving ease. As we calve in January and February we have no time for hard calving cows or slow calves. When walking through our herd you will find, good feet, good udders and good temperaments. The traditional Red Angus Cow has proven time and again, she can get her calve up and going faster than any breed out there.

All Red Moon bulls are fed at home. We do not have exaggerated weight gains; we have gains that promote healthy growth and development in our bulls. They are fed a balanced ration not exceeding 1% of the pens average weigh, along with locally grown, dry mixed forage. Our feeding program is geared to a 3lb a day gain, as of the January weigh our bulls are on target with the pen average being 3.18lbs per day. Mineral is fed free choice, all vaccinations are current and the bulls are weighed monthly. Weights can be viewed on our web page www.redmoonangus.com.

Our bulls are in condition to go to work the day you turn out! We wish you all easy calving and profitable weaning weights!

~ Jim, Shirley & Tom Moon

The first Northline Dillinger 17W calf born. 10Y comes from one of our best mature mother cows. She is deep bodied and carries the maternal strength we require in our mother cows. This bull has a low birth weight EPD while maintaining a higher than average weaning weight EPD. He is rated in the top 30% for Maternal calving ease EPD and the top 20% for marbling. An average weaning weight gain of 3.36 lbs. The Dam Moon 32R was a prior 4H project for our son's best friend, she topped the 4H classes as well as the Ranchers Choice classes in Vanderhoof. She has passed her easy doing and great disposition onto this really good yearling bull. The Dam's birth weight was 63 lbs. and this is her 5th calf.

Dillinger's second crop of calves are hitting the ground at the time of writing, he is staying consistent with birth weights and very vigorous calves. No calving problems. Again top 20% of breed average for Birth Weight and Maternal calving ease. The Bayberry cow line is one of our best at Red Moon. An average daily gain at weaning of 3.05 lbs., on this yearling bull with a BW of 75 lbs., out of a second calving Red Northline Rev daughter. These Rev daughters are turning into great mothers with exceptional udder development.

A nice package, from the Canadian Red Angus Champion, Red Northline Rev 341R. His weaning weight and Yearling weight EPD above the average for this breed. The Pralee cow has been a very consistent easy doing cow for our herd., she has produced 9 calves with bull calves averaging 86 lbs. and heifers averaging 89 lbs. Good bull to ad good maternal traits in your cow herd.

Here is a lighter than average birth weight EPD; yet maintaining enough weaning weight to make a profit. The Lady Cow family is one of the best in the Red Angus breed. We are retaining these females in our herd. Crossed with Rev making another maternal trait young sire, above average milk EPD in this bull. Dams BW 78 lbs., her bull calves have averaged 77 lbs. and heifer calves average 72 lbs

From a good working Cow family and grandson of Red Northline Rev 341R. A well-proportioned moderate frame on this yearling with a low birth weight; respectable weaning weight. This bull is from a second calving young cow; her first calf was a 72 lb. heifer and has been retained for breeding. He will not produce the biggest females, but they will be good. The young Rev cows are exceeding our expectations of being exceptional mothers.

This bull has well balanced EPD's, no big swings in one directions or the other. He is from the Soapy cow family, an anchor in any good Red Angus breeding program. The dam was a good investment purchasing her from Red Get-A-long stock farms, Dennis and Shelly Ericson. She has produced 8 calves, calves birth weight average have been 80 lbs. With a pedigree showing Red Bakers Century and Red Northline Rev 341R this bull should produce some really good females for your herd.

MOON SIMMENTAL BULLS

Over the years, many of our customers have talked about the great mothers Angus and Simmental produce. In the fall of 2011 Red Moon made a decision to expand into the Simmental business, we have purchased both solid red and solid black Simmental cattle, all are polled. Our first purchases came from Remington Land and Cattle dispersal and our second was from J Anchor Simmentals.

The two bull calves in this sale both came with the group of cows from Remington Land and Cattle. They were fed along-side our Red Angus bulls at our farm. Both bulls are April calves and show respectable gains on feed of just over 3lbs per day. Welcome to Moon Simmentals.

30 REMINGTON MRL25W 220Y

Calving ease EPD 9.5, top 10% of the Simmental population. His sire IPU Red Specialist 70T was reportedly purchased by Remington Land and Cattle for their heifer pen. They have reported him to be "a sleep easy calving herd sire with his daughters having a moderate size with perfect udders".

IPU RED SPECIALIST 70T, Sire of RCCI 254Y

Blast Angus

We are pleased to be part of the 2nd annual Northern Alliance Bull Sale. It is a pleasure to work with the other consignors.

Once again our offering are all sired by our senior herdsire HF Comeback 264U, a HF Kodiak 5R son. We have been extremely pleased with the 264U offspring. They have an abundance of thickness, length and are really uniform. We are calving out the first daughters this spring and they are impressive!

We strive to raise easy keeping, no fuss cattle. Our cow herd is moderate in frame, with emphasis on good feet and udders and maternal abilities.

The bulls are being fed at home, so we welcome you to stop by at any time to view the bulls, their mothers or the sire any time!

The bulls will be semen tested and vet checked.

If you can't make it to the sale, give us a call and we would be happy to help you select the bull that will best fit your needs.

Thanks to all our previous buyers and supporters and we look forward to seeing you on March 31st!

~ Brent, Lia, Shea and Tori Long

Take a serious look at this guy! A tremendously long, thick butted, thick topped bull out of a beautiful Peak Dot Rito 35L cow who has perfect feet and udder. A full sister was selected by Tanya Belsham last fall as her pick of our bred heifers. We very successfully showed a maternal sister with calf last fall. Another maternal sister is working in the Poplar Meadows herd in Topley.

Classy, deep, smooth, thick are the words that best describe this March bull! Once again out of a Mayflower cow. Our original Mayflower cow made it to age 19! Longevity built in here

HF COMEBACK 264U HERDSIRE AT BLAST ANGUS

Poplar Meadows Angus

Welcome to our second annual Northern Alliance Bull Sale. We are very proud of our group of bulls. We have several heifer bulls as well as power cow bulls. With the North American cow shortage it has never been more important to buy good quality bulls. People are keeping more females and need to breed them to top bulls for replacement females.

Our 205 day weights were down this past fall because of lack of pasture. We refenced several areas last summer and battled the mud in July and August to get them done. Our cow herd has increased to 150 mother cows which consist mainly the black angus purebreds and black baldie commercials.

The bulls have been fed TMR to obtain a 3 lb a day gain. The bulls have done extremely well on test. The bulls have all passed a semen test and are ready to go to work. Bulls were vaccinated in May and October with Ultra Choice 8 and CattleMaster 5. They will receive a booster prior to our sale as well they will receive the Fusogard foot rot vaccine.

Bulls will be available for viewing at the Lazy B feedlot in Fort Fraser prior to sale. All the dams are available for viewing in Houston.

We can assist in the trucking arrangements and feeding post sale. Please give us a call if you would like more information.

~ Tanya, Monty
and Taylor Belsham

Aberdeen 17'11 was the coupon I received when I purchased his dam as the high selling fall bred heifer at the Mountain View Dispersal. He has a low birthweight of 74 lbs and high 205 day weight. 17Y was part of our show team. He placed 3rd in the Ranchers choice in Vanderhoof and Smithers. This is a real good bull and could easily be a herdsire for a purebred operation.

Adaptor 1429Y was purchased with his dam at the KFC dispersal last spring. In my opinion they were the strongest cow / bull calf combo in the sale. I also purchased his sire Royal Adaptor DRCC 8094U in that sale. He is very strong footed and agile, definitely can cover a lot of ground. Note his light birthweight. I should have more Adaptor calves by sale time to let you know what birth weights and calving ease will be.

Marberly Angus

Welcome to the 2012 Northern Alliance Bull Sale. I hope that calving is going well for all who are calving and I wish good calving to those who have yet to start. I have 6 yearling bulls on offer this year. Every bull in this group is structurally correct and comes backed by strong, proven maternal genetics. Two of the bulls, 1Y and 4Y, have dams who are herd matrons that are still going strong. Both calved in early January this year and had heifer calves that are slated to be retained as replacements. Two of the bulls, 7Y and 12Y, have first calf heifers for dams. Both of these calves grew well and are testaments to the maternal and growth traits they will provide to their daughters and sons. 4Y and 16Y have dams that I purchased for their varied genetics, and they have not disappointed me. The bulls and their dams have been fully vaccinated with the Express Vaccine Program, guaranteeing them to be BVD PI free. If you have any questions regarding the bulls please call, I would be happy to help. I look forward to discussing the bulls with you on sale day.

~ Kim Beaudette

1Y has always been a stand out in our 2011 bull pen. He is a smooth made bull with good thickness, depth, muscle expression and an easy going disposition. He has a 12 year old dam who continues to be sound and productive; bringing home a good calf every fall. His sire is a home raised bull I used on heifers and cows with very good results. The calves came easily and grew well. NXS 1Y has production and fertility built in.

4Y is a larger framed bull with great depth and thickness. He has nicely balanced EPD's with strong maternal numbers as well as good growth numbers. His sire is the great Final Answer known for his calving ease, excellent growth, and strongly maternal daughters. 54T is a cow from the Stewart Cattle Co. of Manitoba. She is very maternal with an excellent udder. I used her first bull calf in herd with very good results; he is the sire of 1Y and 12Y. 4Y has excellent numbers and should sire calves that weigh up well in the fall.

5Y is a really strong bull from a really great dam. He is long, and smooth with good muscle expression. 5Y has exhibited excellent growth from birth to weaning and is doing well on test at Lazy B. His dam, 50L, is a model cow with excellent feet and a nice tidy udder at 11 years of age. Objective 3J15 is a leading carcass bull and known for siring steers that grow well, finish early, and grade well in the feed lot.

7Y is a great choice if you are looking for a bull to service heifers or cows and not sacrifice growth and production. He was one of the heaviest weaning calves from our 2 year olds last fall, and has continued to grow well on test. He is thick and deep with a quiet disposition. 24W is a daughter of NXS 5Y's dam and has longevity and maternal traits built in. Mytty in Focus is a noted calving ease and growth sire. This bull should work well on heifers.

12Y is a larger framed bull who has performed exceptionally well on test. He was our heaviest weaning bull calf from our 2 year old dams and hasn't looked back. This bull is backed by breed leading sires to give you a balanced mix of maternal, carcass, and growth genetics. Sitz Alliance and New Frontier are noted for their females, and Retail Product is a carcass and growth sire. 12Y should work well on all types of cows and heifers.

This is a really stout bull. He is a moderate framed bull with exceptional thickness, and depth. He has good muscle expression and is really smooth. 2107M is from the famed Crowfoot herd in southern Alberta. She is good footed with a strong production record. Wise Guy 10W is a home raised bull that has done a great job for me. His calves came easily and were very vigorous. 16Y would work well on cows.

TERMS & CONDITIONS

Terms

The terms of the sale are cash or cheque payable at par. Cheques to be made payable to sale clerks on sale day unless prior arrangements have been made. The right of property shall not pass until settlement is made. All settlement is made with the clerks of the sale before any cattle will be released. US funds will be accepted at current rate of exchange announced sale day.

Bids and Disputes

Every animal will be sold to the highest bidder. In case of disputes, bidding will re-open between the parties involved. If no further bid is made the buyer will be the persons from whom the auctioneer accepted the last bid. The auctioneer's decision in such a matter will be final.

Announcements

Any corrections or announcements made from the block on sale day will take precedence over the catalogue.

Purchasers Risk

Each animal becomes the risk of the purchaser as soon as it's sold or as soon as the auctioneers gavel falls.

Certificate of Registry

A certificate of Canadian registry duly transferred will be furnished to the buyer of each animal sold as a registered animal after settlement is made in a timely manner.

Breeders Guarantee

All cattle are sold sound and right with a responsible breeder guarantee of satisfaction. In the event of an unlikely dispute the terms and conditions standard with the Canadian Aberdeen Angus Association shall apply.

Liability

Although every precaution will be taken to protect the safety and comfort of the buyers, the auctioneer, sale management, sale staff, the auction mart and owners assume no responsibility in this matter and disclaim any liability, legal or otherwise in the event of an accident or loss of property.
