# GLOSSARY OF TERMS

## ***Expected Progeny Difference (EPD):***

Is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

## ***Birth Weight EPD (BW):***

Expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

## ***Weaning Weight EPD (WW):***

Expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

## ***Yearling Weight EPD (YW):***

Expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

## ***Maternal Milk EPD (Milk):***

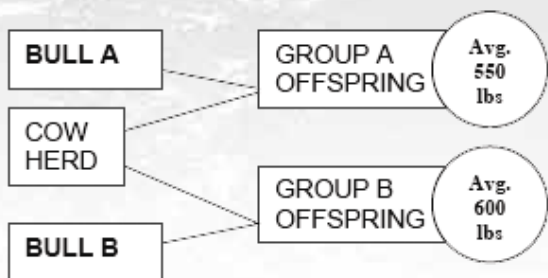

Is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

## ***Total Maternal EPD (TM):***

The expected overall difference in weaning weight pounds of calves out of a bull's daughters compared to calves from daughters of a bull with a zero EPD for total maternal. The total maternal EPD is a measure of both growth and milking ability and is an indication of the size of calf a bull's daughter will wean. The maternal milk EPD is combined with half of the weaning growth EPD to produce the total maternal EPD. This is a prediction of the total genetic influence that a sire will have on his daughter's progeny.

## ***How Do I Use EPD's?***

Imagine you are interested in purchasing a couple of bulls for your herd. You are looking at the EPDs in a sale catalogue. Bull A has a weaning weight (WW) EPD of +10 and Bull B has a WW of +60. What does that mean? How can you use those EPDs to choose between the two bulls? If these animals were randomly mated with 10 similar cows, we would expect the group average weaning weight of Bull A's offspring to be 50 lbs lighter than that of Bull B's (60-10=50). So, if you were interested in producing heavier calves, Bull B would be the one to choose. Remember, EPDs evaluate group average and offspring's performance. They cannot predict individual performance or weights.

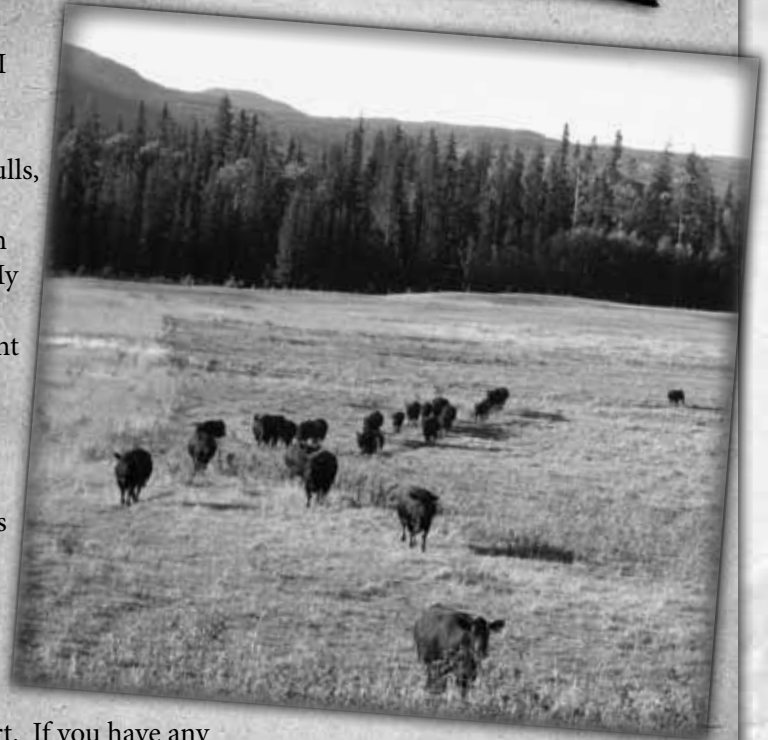

Average Black EPD's	BW	WW	YW	Milk	TM
	+2.9	+41	+72	+17	+37
Average Red EPD's	BW	WW	YW	Milk	TM
	+0.5	+25	+49	+15	+27

# Marberly Angus

Kim Beaudette

Welcome to the 2013 Northern Alliance Bull Sale. I have 7 yearling bulls on offer this year. Every bull in this group is structurally correct, and they come backed by proven maternal genetics. Four of the bulls, 22Z, 24Z, 26Z, and 28Z, are sired by the bull Wise Guy 10W; a bull I raised. I was very impressed with the quality and uniformity of the calves he sired. My top weaning bull calf is a 10W bull, and many of Wise Guy's heifers have made it into my replacement pen because they are proving to be very correct and easy fleshing. Three of bulls, 2Z, 6Z and 11Z, are sired by leading AI sires. I selected these sires for their excellent calving ease, explosive growth characteristics and good carcass qualities. The bulls and their dams have been fully vaccinated with the Express Vaccine Program, guaranteeing them to be BVD PI free. The bulls are being fed at the Lazy B Bull test and can be viewed there prior to the sale. I hope calving is going well for all who are calving and wish good calving to those who have yet to start. If you have any questions regarding the bulls please call, I would be happy to help. I look forward to discussing the bulls with you on sale day.

EPDs BW: -1.5 WW: +43 YW: +88 Milk: +26 TM: +48

Zoom 2Z is a really stout bull with a strong herd bull look to him. He is thick topped with excellent muscle expression and a good disposition. 2Z has been a stand out in my 2012 bull pen, and he continues to grow more impressive each time I see him. His dam, 126W, is a model Angus cow with excellent feet and a nice tidy udder. Connealy Thunder is a noted calving ease and growth sire whose calves are sound and easy fleshing. Zoom is a great choice if you are looking for a bull to service heifers or cows and not sacrifice growth and production.

## 2 MARBERLY ZEPPELIN 6Z

Gender Male Tattoo NXS 6Z Reg# 1658933 DOB January 16 2012

Zeppelin 6Z is a real performance bull. He displayed excellent growth from birth to weaning, and he has continued to be a top gainer at the Lazy B Test station in Fort Fraser. He is long, smooth and thick topped. 11T is a moderate, easy fleshing cow with good feet. Bennett Total combines physical superiority, performance and carcass excellence. He stamps calves with a square hip, rib depth and stunning profile; NXS 6Z is no exception. 6Z will work well on cows, and should sire calves that weight up well in the fall.

ZeLOS 11Z is a bull I really like, and I showed him with success last year. He is a smooth made bull with good thickness, depth, muscle expression and an easy going nature. He has nicely balanced EPD's with strong maternal numbers and well as good growth numbers. 54T is a cow from the Stewart Cattle Co of Manitoba. She is very maternal with an excellent udder. 11Z is sired by Final Answer, one of the most popular AI sires on the market, who is known for calving ease, excellent growth, and strongly maternal daughters. 11Z would work well on cows.

## 4 MARBERLY ZIP DRIVE 22Z

This very good bull had the heaviest 205 day weaning weight of all my 2012 bulls, and he has continued to grow very well on test. Zip Drive 22Z is long, thick topped and strides out well. His sire Wise Guy 10W is a home raised bull that has done a great job for me. His calves were born without assistance and were very vigorous. Duchess 4159 is a really great cow who consistently brings home a top calf each fall. NXS 22Z will work well on cows, and his calves should pound the scale down in the fall.

## 5 MARBERLY ZAZU 24Z

Gender Male Tattoo NXS 24Z Reg# 1658943 DOB February 21 2012

EPDs BW: +1.3 WW: +31 YW: +59 Milk: +13 TM: +29

Zazu 24Z is a really neat calf; he is moderate framed and well made with good depth and thickness. He is great choice if you are looking for a heifer bull. His dam, 93S is a picture perfect cow with excellent feet and a great udder. 24Z is sired by Wise Guy 10W whose calves were born easily and grew well last summer. 10W is a moderate, easy fleshing bull that is good footed and travels freely when on the move.

## 6 MARBERLY ZANDER 26Z

BW: 96 lbs Adj 205D: 610 lbs Jan 27 wt: 1028 lbs

EPDs BW: +3.6 WW: +29 YW: +55 Milk: +13 TM: +28

Zander 26Z is another good Wise Guy 10W calf. He is smooth and wide over the top, with good length and depth of rib. 26Z has really excelled on test, and is one of my top gaining bulls at Lazy B. 7R is a broody cow with solid feet and an excellent production record. 7R's calves tend to have heavier birth weights, so 26Z will work well on cows.

## 7 MARBERLY ZIGGY 28Z

Ziggy 28Z is the youngest calf I have on offer and he is a good one. He is a smooth made calf with good muscle expression that is structurally correct. Idelette 4S is a good footed maternal cow sired by Bando 9074. Bando 9074 is a proven calving ease sire known for his great marbling genetics and excellent disposition. Wise Guy 10W is a bull I raised and used with great success. He is sired by BC Lookout a bull known for his moderate frame, calving ease and rapid growth. 28Z would work well on heifers.

# Poplar Meadows Angus

Frank & Dianne Strimbold

This is the second calf crop from our Kodiak son and we are still impressed with their performance, light birth weights and good weaning weights. His first daughters are due to calve soon and they are impressive putting down great udders. They appear to be going to be great cows.

The weaning weights are a little behind last years as we were very dry last summer. We do not have a big herd but after 48 years of our selections we are very proud of our cattle and feel they should be predictable. We have not strayed from our philosophy of low maintenance cattle. They spend summers in bush pastures and winter on hay. We have had our bulls at Lazy B feedlot as we have for the past eighteen years.

We thank all our past buyers and hope to visit with you at the sale. If you want any more info call us.

From a Final Answer dam that was to be our entry in the World Angus Forum had she not had a injury. 16Z has a little less frame than some of the other calves but has tremendous muscle pattern. He is a real herd sire possibility. We have a full sister to this calf that will calve soon and she is good. Dam has 2 calves avg birth wt 80 lbs. Avg 200 day wt. 744 lbs.

# Red Moon Angus

*Jim, Shirley & Tom Moon*

Welcome to our 3rd Annual Bull Sale. Where does time go! We are proud to be a part of the Northern Alliance Sale group and very thankful to be working with a progressive, hardworking and honest breeder group. Thank you to all who have supported us, it has truly been appreciated.

Things have changed drastically and quickly in this industry! Many ranchers are now in expansion mode with replacement cattle prices expected to be higher than the industry has ever seen. With that in mind Red Moon has stuck to the fundamentals

– calving ease, structure, maternal traits, moderate frame and performance. We have a selection of bulls this year that will do that and protect the investment you've made in your females. This is what Red Angus Cattle should be bred for, Calving Ease!

Our newest herd sire Red U-2 X Factor has proven to give us calving ease and performance. This spring's calves are coming as easy as last springs. The average birth weights on the 2012 calves, 75 lbs., lots of vigor and length of body. Going from moderate beginnings, to good growth and performance in our bull pen. The calving ease with this bull is exceptional without giving up performance. We own this bull in partnership with Heart of the Valley Ranch, Brad and Aleta Chappell of Courtney BC. The bull will be going to Heart of the Valley to work for the next couple of years.

Another of our bulls, Red Northline Dillinger is represented by some dark red, deep bodied calves. Average birth weights have been 77 lbs. We are now calving daughters from this bull and all indications are they have all the maternal traits we have come to expect from our mother cows.

All of our bulls are fed at home, we feed a balanced ration and locally grown dry mixed forage. The bulls are fed to promote healthy growth and development. The pen is on a complete vaccination program; including protection for foot-rot, by sale day all will have had their booster shots and ivermectin. We weight the bulls every 28 days and weights may be viewed on our web site [www.redmoonangus.com](http://www.redmoonangus.com). The pen is fed by hand and is familiar with people walking amongst them. They are not over conditioned and will be ready to work the day you turn them out.

Thank you to Al Smith and crew at the BC Livestock Yard in Vanderhoof. They have been a great group to work with. Thanks to Jeannie Chaisson for making a great beef stew for our lunch. Come out and join us for lunch at 11:30 am sale day.

To all that have supported our program over the years, thank you! We wish you all easy calving and profitable calf sales!

Great growth on this young herd sire. This is the 3rd calf from our Barmaid 40U. Her first bull calf to date, the two heifers from her are both producing. Her heifer calves have averaged 79 lbs. at birth. Her birth weight 88 lbs. This young bull hit the ground at 70 lbs. and weighed in at 909 lbs. on November 4th 2012. The epd for birth weight, calving ease and milk are all above average on this bull. As of January 27th his weight was 1191 lbs., 3.36 ADG on feed. One of the first bulls from Red U-2 X-Factor 387X.

This bull goes back to a great cow we purchased from Brox Stock Farm, Wetaskiwin, Alberta. The original 28T has produced 4 calves for us, three heifers and one bull. Two of the heifers have been retained in our herd; the third working in the Andy Meints herd, Houston BC., the Bull was sold to John Bailey, of Vanderhoof, BC. The Dam Dyna Storm 37X did a great job on this, her first calf, 74lb. birth weight and 826 lbs. on November 4th 2012. This bull is a son from our Red Northline Dillinger 17W and another above average calving ease epd. As of January 27th weight was 1001 lbs.

MOON 22Z

Another good Dillinger calf, hit the ground at 77 lbs., good structure in this bull. This bull is from a first calf heifer; her birth weight was 72 lbs. The grand Dam Countess 18U is a daughter of the Canadian Red Angus Champion, Red Northline Rev 341R. We have retained both of her daughters to date for our own herd. The Cassandra 19H cow in this pedigree is considered by us to be one of the best we have ever raised. November 4, 2012 weight was 671 lbs. January 27th weight was 951 lbs.

MOON 23Z

From one of Jim's favorite cows, Lady 24R. She has produced 6 calves for Red Moon; five of them were bulls with an average birth weight on bulls of 75 lbs. and the heifer with a 72 lb. birth weight. The heifer has been retained in our herd. The bulls are working in the herds of John Valla, Ryan Kusler and Eldon Buck. Direct Calving ease epd is above average along with milk epd. A birth weight of 71 lbs. and a November 4th 2012 weight of 812 lbs. January 27th weight 1079 lbs. We really appreciate the consistency in these U-2 X-Factor 387X calves.

MOON 25Z

A really good calf from a really great dam. Dyna Storm 28L has been designated an elite dam by the Canadian Angus Association. She has produced 10 progeny to date, 6 females average birth weight 81 lbs. and four bull calves averaging 89 lbs. A high milk epd and good calving ease epd on this bull. November 4, 2012 weight of 828 lbs. January 27th weigh of 1088 lbs. She is another good dam we have been keeping females from. Made a great cross with U-2 X-Factor 387X. A good son is working for C4 Ranching, the Weaver family, Vanderhoof, BC.

A low birth weight with an good weaning weight EPD, what can be better than that, well maybe the above average milk number and calving ease EPD. Hit the ground at 77 lbs. weighed in at 843 lbs. on November 4th 2012 and 1089 lbs. on January 27 2013. This bull is the second calf from a good Red Northline Crush Daughter. Her first calf, a heifer weighed in at 64 lbs. The Crush daughters are proving to be good producing and easy calving females. The grand dam Red Moon Tess 32R has sons working for Lone Fir Ranch, Fort Fraser and Steve Siegner of Burns Lake. One daughter is working in the Gidding herd, Telkwa BC and another has help pay the college tuition of a young girl from Prince George, Rebecca Read. We have also retained daughters in our herd.

Goes back to one of our original females bought for our herd, Red Brylor Alexis 67B. Our good friend Dennis Ericson bought this cow for us and she has left a mark on the herd. This bull calf weighed in at 835 lbs. on November 4, 2012 and an impressive 1161 lbs. on January 27, 2013. Higher than average milk and calving ease epd on this bull. The Dam 39W has raised two bull calves to date, the average birth weight is 80 lbs. A son is working in Gordon Larson's herd, Fort Fraser, BC. The calving ease from Red U-2 X-Factor 387 has been really consistent on his calves.

As of January 27 2013 this bull had the highest ADG in our on farm feed test, 3.76 lbs., a November 4, 2012 weight of 758 lbs., a January 13 2013 weight of 1074 lbs. This bull is from a mature cow and is the first on offer for sale, she has given us 6 calves. We have only let one female go from this cow, 4 others are working in our herd. She is a very feminine cow with an excellent udder and raises a good calf every year; her daughters are doing the same. Above average calving ease on this bull: without giving up performance. 85 lb. birth weight on this calf, dam has averaged 81 lbs. on heifer calves. The Get-A-Long Mesquite bull was one of the best female producers we have had on the farm, producing no nonsense hard working females.

One of the youngest calves in the pen. The bull is from a mature cow whom has produced 6 calves for us. She is the Grand Dam of Moon 27Z listed earlier in the Catalogue. As stated in write up for Moon 27Z she has had two bulls sold, one to Lone Fir Ranch, Fort Fraser and the second to Steve Siegner, Burns Lake, BC. Females from this cow are working in pure bred herds. Average birth weight on her bull calves is 73 lbs. This calf hit the ground at 84 lbs. and weighed in at 809 lbs. November 4, 2012. The January 27, 2013 weight on this bull was 1116 lbs. with an ADG of 3.65 lbs. A great pedigree and consistency stand behind this bull.

The youngest calf in our pen, March 13th birth weight of 64 lbs., from a first calf heifer. The interesting thing about this bull is the combination of the low birth weight along with the higher than average weaning(+52) and yearling weight(+80) EPD. The milk and calving ease EPD numbers are also above average. For those of you that know pedigrees check it out. Mulberry, Pump, Advance and Dynamo. We purchased this young cow as a heifer calf from Arntzen Angus, Alberta and think she will be around for a long time. November 4, 2012 weight on this calf 645 lbs., Jan 27, 2013 weight 901 lbs. ADG on feed test 3.05 lbs. A U-2 X-Factor 387X son.

# Red Moon Simmentals

We have on offer three Simmental Bulls from three different sires. One is black and the other two are red. All three bulls are polled. We are in the process of building our select group of Simmental females to provide you with a greater choice of Simmental bulls. We have made our selection of females from Remington Land and Cattle, J Anchor Simmentals and most recently from KRSS Simmentals.

The bulls are fed along -side our Red Angus Bulls. They are weighed every 28 days and up- to- date weights may be viewed on our web page. [www.redmoonangus.com](http://www.redmoonangus.com)

MOON 31Z

This is a black Simmental performance bull. With a birth weight on 102 lbs. and a November 14th 2012 weight of 929 lbs. The ADG on feed to date is 3.79 lbs. His mother was purchased from J Anchor Simmental, Lethbridge, Alberta. We have found her to be a very quiet cow and easy to work around. She has given us a good calf with a lot of growth. The weight on this calf Jan 27 2013 was 1247 lbs.

*WE EXPEDITE & DELIVER*

# Blast Angus

*Lia, Brent, Shea & Tori Long*

We are excited to be a part of the 3rd annual Northern Alliance Bull Sale. It is a pleasure to work with the other consignors.

We are extremely proud of our sale offering this year. We have two upcoming two year olds, and ten yearlings. Nine of the bulls are sired by our senior herdsire HF Comeback 264U, an HF Kodiak 5R son. The Kodiak's are a uniform group with an abundance of thickness and length. The first daughters calved last year and weaned off some of our top indexing calves. Three of the bulls are sired by our junior herdsire BCAR Game Day 012. We are most impressed with the Game Day bull. He is deep sided, thick, big nuted, athletic, long and very stylish. His calves come light and really grow. 12X is an easy fleshing tank.

We strive to raise easy keeping, no fuss cattle. Our cow herd is moderate in frame with emphasis on good feet, leg structure, udders and maternal abilities.

The yearling bulls are being fed at the Lazy B feedlot in Frt Fraser. The two year olds are at the farm. Bulls will be semen tested and vet checked.

We invite you to stop by the farm to view the sire and dams, and stop at the feedlot to view the bulls. If you can't make it to the sale, give us a call and we would be happy to help you select the bull that will best fit your needs. We have a trailer heading east to Lloydminster at the end of April, and we also offer to arrange delivery on purchases over \$2500.00.

Thanks to all our previous buyers and supporters! We look forward to visiting with you on March 30th.

BCAR GAME DAY 012 - Our junior herd sire

A big, powerful 2 year old bull. We used this bull last year and will have calves on the ground by the sale day. A full brother sold to Always Angus in the 2011 sale. Dam is a gorgeous, moderate framed, Hobson daughter. Lot 43 , 28Z is a maternal brother so you can see what the dam is capable of. I would suggest using this bull on cows.

HF Comeback 264U- reference sire of many lots

This is Tori's bull out of her original cow from Deep Creek Angus. He is a twin, therefore, his 205 day weight is a bit lower. His is thick made and has an excellent hair coat. The dam 21N is a deep, large volume functional cow who has produced herd bulls for Walter Steidl, High Lonesome Ranch, Herb Neville and IC Angus and a daughter to Tanya Belsham. She has supported Tori's "horse habit" for many years!!

Wow time flies!! Hard to believe we are getting ready for our 3rd annual Northern Alliance Bull Sale. Our sale last year was an overwhelming success. Even better than my wildest dream. We have brought to town another strong group of bulls. Many power bulls as well as true calving ease sires.

As I write this we are in the middle of calving out 180 mother cows which consist mainly of the black angus purebreds and a group of black and black baldie commercials.

Since I started in the purebred business my goal has remained the same. To breed moderate sized, easy fleshing no hassle cattle for my own use and the use of the commercial rancher. I'm very proud of the cow herd I have put together and welcome anyone to come tour through them.

My calves receive no creep feed other than a few show calves. The bulls are vaccinated in May and October with Ultra Choice 8 and Cattlemaster 5. Bulls will also receive the Fusogard foot rot vaccine prior to sale. The bulls have been fed a TMR to obtain a 3 lb a day gain. The bulls have all passed a semen test and are ready to go to work. We stand behind our bulls 100%

We would be more than happy to help with trucking arrangements and feeding post sale. Please give us a call if you would like more information. We have taken videos of several of the bulls which will be available online.

The Reigning 2012 Show Bull Calf of the Year in Canada. 2'12 was the standout calf from a very early age. 2'12 has flawless phenotype and would make an outstanding show bull prospect and an even better breeding bull. Would be interested in assisting showing him in 2013. Would like to retain a 1/3 ownership and no possession. (In herd use semen semen only at Buyers convenience and Sellers cost)

Consensus 65'12 was the calf alongside my awesome 2 year old Tiger show cow. She was #4 black show female in Canada for 2012. This guy is very long and deep sided. I think he would make a great purebred heifer bull. If I didn't have so many Tiger's and Kodiaks's to breed I would definitely be keeping this him.

Game Day 67'12 is a tremendous calf. He is sired by Lia's Game Day bull. I admire her bull for his easy fleshing ability, smoothness and great spring of rib. This calf has lots of style and thickness and would offer calving ease. His mother is a sharp fronted picture perfect 2 year old. This guy would make a big time herdsire.

The start of my Adaptor calves. I purchased the Adaptor bull at the end of May 2011 from the KFC Dispersal sale. I am most impressed with his calves. Moderate sized, huge middle, thick made and good performance. I love watching the Adaptor bull on the move. This bull is out of a direct daughter of 43 Bismarck. He is linebred to the great SAV Abigale 0451, as she is the dam of Bismarck and SAV Adaptor.

This mid March calf could just be the best one in the pen. His mother is a powerful Freewheeler daughter and just happens to be a full sister to Johnson Livestock's donor 57R. I was impressed with the 57R offspring I saw in Denver this past January. 113S is definitely slated to be flushed this spring. I must thank John and Donna Donaldson for the opportunity to own this great cow. This bull is deep sided, thick and has lots of testicle development for his age. He has a presence of being something special. TERMS TO BE ANNOUNCED

# TERMS & CONDITIONS

## ***Terms***

The terms of the sale are cash or cheque payable at par. Cheques to be made payable to sale clerks on sale day unless prior arrangements have been made. The right of property shall not pass until settlement is made. All settlement is made with the clerks of the sale before any cattle will be released. US funds will be accepted at current rate of exchange announced sale day.

## ***Bids and Disputes***

Every animal will be sold to the highest bidder. In case of disputes, bidding will re-open between the parties involved. If no further bid is made the buyer will be the persons from whom the auctioneer accepted the last bid. The auctioneer's decision in such a matter will be final.

## ***Announcements***

Any corrections or announcements made from the block on sale day will take precedence over the catalogue.

## ***Purchasers Risk***

Each animal becomes the risk of the purchaser as soon as it's sold or as soon as the auctioneers gavel falls.

## ***Certificate of Registry***

A certificate of Canadian registry duly transferred will be furnished to the buyer of each animal sold as a registered animal after settlement is made in a timely manner.

## ***Breeders Guarantee***

All cattle are sold sound and right with a responsible breeder guarantee of satisfaction. In the event of an unlikely dispute the terms and conditions standard with the Canadian Aberdeen Angus Association shall apply.

## ***Liability***

Although every precaution will be taken to protect the safety and comfort of the buyers, the auctioneer, sale management, sale staff, the auction mart and owners assume no responsibility in this matter and disclaim any liability, legal or otherwise in the event of an accident or loss of property.
