GLOSSARY OF TERMS

Expected Progeny Difference (EPD):

Is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

Birth Weight EPD (BW):

Expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW):

Expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight EPD (YW):

Expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Maternal Milk EPD (Milk):

Is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Total Maternal EPD (TM):

The expected overall difference in weaning weight pounds of calves out of a bull's daughters compared to calves from daughters of a bull with a zero EPD for total maternal. The total maternal EPD is a measure of both growth and milking ability and is an indication of the size of calf a bull's daughter will wean. The maternal milk EPD is combined with half of the weaning growth EPD to produce the total maternal EPD. This is a prediction of the total genetic influence that a sire will have on his daughter's progeny.

Calving Ease Direct (CED):

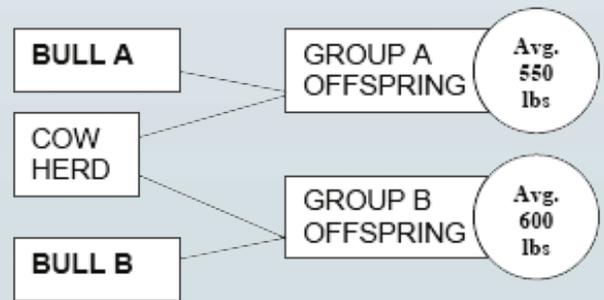

Is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Calving Ease Maternal (CEM):

Is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

How Do I Use EPD's?

Imagine you are interested in purchasing a couple of bulls for your herd. You are looking at the EPDs in a sale catalogue. Bull A has a weaning weight (WW) EPD of +10 and Bull B has a WW of +60. What does that mean? How can you use those EPDs to choose between the two bulls? If these animals were randomly mated with 10 similar cows, we would expect the group average weaning weight of Bull A's offspring to be 50 lbs lighter than that of Bull B's (60-10=50). So, if you were interested in producing heavier calves, Bull B would be the one to choose. Remember, EPDs evaluate group average and offspring's performance. They cannot predict individual performance or weights.

Average Black EPD's	BW	WW	YW	Milk	TM
	+2.9	+41	+72	+17	+37
Average Red EPD's	BW	WW	YW	Milk	TM
	+0.5	+25	+49	+15	+27

14
BLACK ANGUS YEARLINGS

We are pleased to be a part of the 5th Annual Northern Alliance Bull Sale. It is a pleasure working with the other consignors and especially working together with the people that inspired us to get into the Black Angus business- my parents, Frank & Dianne Strimbold!

It truly is an exciting time to be in the cattle industry! The demand for our product is greater than ever and we believe we must ensure we are offering our very best!

We strive to raise easy fleshing, moderate framed, correct, no fuss bulls that cattlemen can buy and depend on to profit with their progeny. Our bulls are ranch raised on mothers milk and mountain pasture until weaning and then fed a pellet ration and free choice hay until sale time. Bulls will be vet checked and semen tested prior to the sale.

We feel this is our strongest group to date. They did wean off a little lighter than other years as we went through the driest summer in over 50 years in our area. The bulls however, have come on nicely and will be more than ready to go to work! Most of the bulls are sired by our BCAR Game Day 012 bull! He has done a tremendous job for us and was sold in August back to Breed Creek Angus in Mankota, Saskatchewan. His sons have style, easy fleshing ability, depth, thickness and offer calving ease! His daughters are deep, broody females with gorgeous udders. We have one son out of our Ambush bull, Gerlei 62Z who we purchased as a calf. His calves come small but have lots of vigour and seem to really grow! We are also offering 3 sons of BCAR Right Time 2601 who has also proved to be a calving ease sire. His sons are long, thick topped and have lots of growth.

As we are great 4-H supporters, we couldn't have been happier when Game Day sons were Grand and Reserve Grand Champion market steers at the BV Exhibition this past August. Also, the Supreme Champion female at the BV Exhibition, the Lakes District Fall Fair as well as the Champion 4-H female was a Kodiak cow with her Game Day heifer calf that we sold a 4-H member as a calf!

Thank you to all previous bidders and buyers and we look forward to visiting with you on the 28th! If you are unable to attend the sale, please call and we can discuss your needs and find the bull that best suits your needs. We welcome anyone to stop by the farm and check out the bulls and their mothers. Free delivery to central points in Alberta and BC.

A really long, smooth, gentle disposition bull out of a cow we bought as a four year old from Peak Dot Ranch in Saskatchewan. 772L always throws lighter birth weight calves. This bull should work well on heifers. The dam is moderate in frame with good feet and udder. Full brothers sold last year to Garrett Ranches and Roger Raby. A daughter to Breed Creek Angus and another son to Ties and Darlene Prins and 2 daughters in the herd.

A deep sided, larger framed Game Day bull that was a twin to a heifer. The dam raised both of them on her own. Three bulls have sold through bull sales and two daughters through select female sales, and one to Tanya Belsham. Dam is a maternal sister to the dam of 9B. This bull should add some pounds to your calves!

The first Ambush son to sell. The Ambush bull was purchased as a calf from Gerlei Angus in Saskatchewan. He is a true calving ease sire-calves come small, have lots of vigor and seem to grow well. This guy started out at only 58lbs, but weaned off a smaller framed Kodiak two year old at 664lbs! 14B is very stout, good nuts and has lots of length. He also offers a straight Canadian pedigree. He should be a sure fire heifer bull!

Really good performance in this March 18 bull. Once again out of a heavy milking Hobson daughter. Good weaning and yearling numbers. He had a weaning index of 107. Dam is a gorgeous cow who we have sold bulls out of to Alexis Creek Ranch, DMS Feedlot and Kevin McCreery. A full sister is due to calve this spring. She is a beauty too! This bull will add some pounds. I would suggest using him on cows.

POPLAR MEADOWS ANGUS

Welcome to the 5th Annual Northern Alliance Bull Sale. We are pleased to offer you 59 Angus bulls and 1 Simmental.

Never has there been a more important time to select top quality herd bulls. With the increased value of calves a live calf and one that pushes down the scale means more money in your pocket. Along with eye appeal and conformation we believe the use of data collection such as 50K, ultrasound and EPDs will provide our bull customers with the best possible tools in selecting a Poplar Meadows herd sire. Our cattle are bred and raised in BC so will not have to adapt to your environment. We have strived hard to bring our customers breed leading genetics. This is the first year we have incorporated embryo transplant in our herd and you will notice several full brothers in the sale.

Bulls were vaccinated with Ultra Choice 8 and Cattlemaster 5 in April and September. We will also have the bulls vaccinated with Fusogard foot rot vaccine prior to the sale. Our entire cow herd is vaccinated yearly with Cattlemaster 5 as well. Bulls will be semen tested and ready to go to work.

We would like to thank Scott & Orycia Anderson, Morgan & Talon Volts and Olaf & Gloria Halvorson for all the help over this past year.

Congratulations to Mom and Dad for achieving 50 years in the Angus breed.

We would be happy to help with trucking arrangements and feeding post sale. Please give us a call if you would like more information.

Tanya, Monty and Taylor Belsham

ZOETIS 50K AND ULTRASOUND DATA

ZOETIS 50K Testing done on all PM Bulls marked with this logo.

All bulls have been scanned with Ultrasound results available. Results for both will be on hand sale day, or if you prefer we can email them to you to study ahead of time. Let us know if we can be of assistance. Ultrasound and 50K data will be updated on website.

If you're looking for a heifer bull this guy offers you several generations of just that. This bull is phenotypically very correct and genetically superior. His birthweight and calving ease EPD rank him in the top 1% in the breed. To back up his calving ease his 50K numbers also put him in the top.

For many years all Taylor wanted was his own bull calf. His cows never cooperated until this guy came along. As you can tell Taylor named him. I think that is what he is hoping to buy after he sells. This bull has all the correct parts loaded with style and ready to go to work.

Aviator out of a first calf heifer. This guy is a larger framed bull who had an 80 lb birth weight and just shy of 800 lbs at 205 days. He does have a negative birth EPD but I would use him on cows as there is some higher birth animals up close in his pedigree

If you're looking for a power bull here he is. He started off at 88 lbs and his 205 day weight was a whopping 925 lbs. We took this guy to Burns Lake this summer to a show where Dave Vikse awarded him Supreme Champion in show. He is free moving and could really make an impact in many herds. His ribeye measurement was outstanding. Just waiting for final results. His dam is a beautiful Bar EXT 205 daughter who continually produces high performing offspring.

This bull is the reigning 2014 Canadian Angus Show bull calf of the year. He consistently placed in the top in BC, Alberta and Saskatchewan last year. He is moderate in stature and extremely complete. This bull was also a member in the Champion Angus pen of bulls at Farm Fair. Make sure you come take a look. You will be hard pressed to pick him apart.

We had the opportunity to purchase a few top end cows from the Crowfoot dispersal. This bulls dam was my choice of those to flush last spring. This bull is long sided and commands your attention on the go. Sired by the Crowfoot Equation 5793R he will offer unique genetics in BC. This bull is good could easily be a major herdsire. Just have a look at his dam. Moderate in stature with tons of middle and easy fleshing ability.

This is the bull I dreamed I would get out of Aviator. When we stepped up and bought Aviator we had a vision of what we thought he would bring to our herd. I am so thrilled that Aviator is everything I thought he would be. He is an unbelievable calving ease sire with offspring that display growth, superb muscle pattern, great foot structure and structural correctness. Renegade was part of the champion pen of three at Farm Fair. Out of two year old dam who bred back to calve in first cycle. I'm excited about this bull and I'm sure you will have no problem finding him sale day.

Dam

Another tremendous individual. This bull's mother is a direct daughter of Right Time who had been a donor for Remington Angus. It's nice when you plan a mating and it works out this well. Look this guy up. Son sold to Dirk and Diane Vandermeer.

Powerful Aviator out of a powerful donor cow. This bull was part of our champion pen of 3 from Farm Fair. His maternal sister was the winner of the Legends of the Fall also in Edmonton. Let It Ride has been Scott's favorite from a young age. This bull could definitely be a breeder bull. He shows tremendous breed character and large scrotal as do all the Aviator's.

I know you're thinking a Simmental!! Last fall I purchased several Simmental open heifers and a few breds. I plan to have a small group to run alongside my Angus herd. This is my first bull calf to offer for sale. His dam is a good footed and good uddered baldy She did a good job on her first calf.

You're at home here.

As MLA for Nechako Lakes, I am proud to support the 5th Annual Northern Alliance Bull Sale.

The Nechako Valley is renowned for the quality crops, livestock and excellent breeding stock it produces. Agri-foods are an important part of our provincial economy and the Nechako Valley is unique in that it is home to; two abattoirs, two hay compression plants and multiple agricultural retail businesses.

The Bull Sale attracts buyers from as far north as Fort St John, south to Merritt, west to Smithers and as far east as Quebec. Last year the local BC Livestock Producers Cooperative Limited sold over 33,000 head. Proof that the Nechako Valley agricultural industry plays an important role throughout western Canada.

Thank you to the organizers, farmers and cattlemen for your involvement with the Bull Sale and your contribution to supporting economic growth within our Province.

John Rustad, MLA Nechako Lakes

MARBERLY ANGUS

MARBERLY
Angus

Welcome to the 2015 Northern Alliance Bull Sale. As I write this the snow continues to fall. This year I have brought 8 strong yearling bulls to Vanderhoof. All the bulls are from mature cows who are well established in my herd and consistent producers. They have all been trouble free. The cows are easy doing with good dispositions and have to be productive and raise a good calf to stay year after year. Seven of the bulls are sired by my herd bull UGA 55Y; a bull I purchased out of the Cudlobe Herd in southern Alberta. He is a moderate framed, smooth made bull with good breed character. He walks on a very correct foot and is very fluid when on the move. 55Y is quiet to handle and tends to pass this on to his calves. I calved his first heifers this year and they are moderate cows with tidy udders and small teats. They were all quiet to handle and mothered their calves well. 55Y's life time average birth weights on his calves are 85 lbs on his heifers and 87 lbs on his bull calves.

The bulls are being fed alongside Jim and Shirley Moon's bulls at Red Moon Angus. The bulls and their dams have been fully vaccinated and are guaranteed to be BVD PI free. I look forward to discussing the bulls with you on sale day, and please feel free to contact me if you have any questions prior to sale day.

Kim Beaudette

12B has always been an eye appealing bull. He is long and thick with a great disposition. His dam, 54T, is a productive cow I purchased out of Manitoba. She is easy fleshing with a nice balanced udder and small teats. 12B's sire is my current herd bull. He is a moderate framed bull with good breed character and a great set of feet and legs. 54T consistently produces an excellent calf.

16B is a really growthy calf and he posted my top unadjusted weaning weight this fall. He is a thick bull with good depth and muscle expression. 16B is the first bull calf 8504U has produced. She is a deep, thick easy doing cow with great feet. 8504U usually produces great heifer calves that find their way into my replacement pen. His sire, 55Y, is my walking herd bull. 55Y is a fluid mover who covers the ground well.

17B was a real stand out bull calf last summer on pasture. He is a moderate framed calf; who is really well balanced with good thickness over the top, and good muscle expression. 17B has a quiet disposition like his sire, 55Y. GAL 159P, 17B's dam, is an older cow I purchased out of Dennis Erikson's Get-A-Long herd as a calf. She has produced well over the years and she always gets the job done with no concerns. She has a nice udder and solid feet at 11 years of age and has another good bull calf at her side this year.

POPLAR MEADOWS ANGUS

8
BLACK ANGUS YEARLINGS

**POPLAR
MEADOWS**
ANGUS

We would like to welcome you to the 2015 Northern Alliance Bull Sale. 2015 is a special year for us as it was 50 years ago that we registered our first calf! Due to health reasons, we had to down size our herd this past fall. We would like to thank Quick Haven Angus and Hazelton Farms for selecting groups of females. Our cattle are predictable, hard working, low maintenance cattle that can go out and work in any environment.

These are our first bulls to sell out of Tafika Aberdeen 31Z who we selected from the Wayne & Jill Hughes herd. He was the high seller at the Angus Advantage Bull Sale. He is a calving ease bull with performance as well.

We would like to thank all previous buyers and supporters. The bulls are being fed at the Lazy B Feedlot in Fort Fraser. You are welcome to stop by and check them out.

Frank & Dianne Strimbold

Dam is a maternal sister to 6B. She is a Sitz Alliance daughter who is our grand daughter, Tori's pick of our cows! She is a very attractive cow. Daughters have sold to Nine Mile Angus and Harvest Angus and sons to Hatch Creek and Ties & Darlene Prins. This guy should give you some good replacement females.

Dam is a Cassie female which stems from a show heifer purchased by Lia from Leelane Angus in the 1980's. 14S was also selected by Quick Haven Angus this past fall. Daughters have sold to Remitall Farms and Hazelton Farms and a son to John Vala. TC Aberdeen, the sire of Tafika Aberdeen 31Z is a true calving ease bull with great numbers.

A November bull with a little more size on him. One of the last sons to sell out of the HF Kodiak 132W bull that worked so well for us. 132W daughters are thick, broody females with excellent udders. This bull is again out of a Cassie cow. Daughters have sold to Bradner Farms and Harvest Angus, son to Ties & Darlene Prins. Very productive cow family!

RED MOON ANGUS

Welcome to our 5th Northern Alliance Bull Sale. Where is time going! The Northern Alliance sale group is presenting a group of bulls that are second to none in Western Canada. We have continually received good feedback from buyers since inception of this sale. With the number of bulls in the sale and different sire groups represented we are confident you will find a breeding bull to meet your needs.

The breeding program at Red Moon sticks to the fundamentals – calving ease, structure, maternal traits, moderate frame and performance. We have a selection of bulls this year that will do that and protect the investment you've made in your females. This is what Red Angus Cattle should be bred for, Calving Ease! 80 % of the bulls in our pen were born in January; they will be 16 to 17 months when you turn out.

One of our herd sires, Red MRLA Economy 810 has proven to give us calving ease, structural correctness and performance. The average birth weights on his Progeny are 79 lbs. on bull calves and 76 lbs. on heifer calves. The adjusted average yearling weight on his bull calves is 1084lbs. Females are 826 lbs. His calves are vigorous and have that Angus will to live, getting up and going with in minutes. The calving ease with this bull is exceptional without giving up performance. We own this bull in partnership with Brox Stock Farms of Wetaskiwin, Alberta. We are looking forward to seeing how his females work within our herd, confident they won't disappoint us. Economy was purchased as a mature bull and to date has 173 registered calves on the books of the Canadian Angus Association, more registrations equals better reliability of the bulls EPD's. His progeny have gone on to be herd sires in other pure bred herds. This bull is ranked in the top 1 percent for calving ease and top 10 percent for milk. Great pedigree backed with Pasquale, New Trend and Rambler 1000.

Another of our bulls, Red Brox Zander 11Z was used exclusively on heifers. Average birth weights have been 79 lbs on bull calves and 71 lbs on heifers with adjusted weaning weights being 711 lbs. and 1110 lbs. on yearling bulls. Ranked in the top 6% for calving ease with in the breed. Check his pedigree, the sire Red Anchor T Hitch is producing some great mother cows.

Red Moon also uses AI to inject new blood lines and keep our gene pool open. Sires that have calves in the catalogue include Red Giess Prime Rib 411, Red U-2 Illicit 423P, Red Basin Rainmaker and Red Perks Chateau 309R.

All of our bulls are fed at home, we feed a balanced ration and locally grown dry mixed forage. The bulls are fed to promote healthy growth and development. The pen is on a complete vaccination programing; including, express 5, and protection for foot-rot, by sale day all will have had their booster shots and ivermectin. We weight the bulls every 28 days and weights may be viewed on our web site www.redmoonangus.com. The pen is fed by hand and is familiar with people walking amongst them. They are not over conditioned and will be ready to work the day you turn them out.

Thank you to Al Smith and crew at the BC Livestock Yard in Vanderhoof. They have been a great group to work with. Thanks to Jeannie Chaisson for making a great beef stew for our lunch. Come out and join us for lunch at 11:00 am sale day. Lunch is sponsored by Integris Credit Union, thanks Audrey and Staff.

To all that have supported our program over the years, thank you! We wish you all easy calving and profitable calf sales!

Jim, Shirley & Tom Moon

From a good solid cow. This being her 6th calf, her heifers have averaged 69 lbs. and bulls 79 lbs. The sire is a bull we have A'd to in the past and has created not only class winners for us but also really good working females. Very tidy udder on this dam, quiet and easy to work around. This calf hit the ground at 81 lbs. and weighed 843 lbs. on November 1st, January 24th 2015 weight of 1159. 3.72 ADG on feed.

Above average milk EPD and calving ease in this calf. Third calf from a solid young female. The Barmaid cows are a staple here at Red Moon. Dams birth weight 74 lbs. she is averaging in that range on her progeny. Again above average calving ease. Calf weighed 811lbs on November 1st and 1162 lbs. January 24th, with an ADG of 4.13 on feed. Our Barmaid females have been sought after at both the purebred female and bull sales.

Really great pedigree behind the dam. This is her 8th calf, averaging 83 lbs. on bulls and 79 lbs. on heifers. Never misses a beat. This calf hit the ground at 87 lbs. weighing in on November 1st at 769 lbs. January 24th weight 1022 lbs. ADG on feed of 2.98%. Good Female producer with well above average calving ease and birth weight EPD. Calving ease EPD is in the top 2%. Definitely a bull that should be looked at for farms wanting to keep good breeding females. Very feminine looking Dam.

Hit the ground at 68 lbs., November 1st weight 768 lbs. Jan 24th weight 1042 lbs. average daily gain 3.22 lbs. The numbers speak for themselves. This is the 8th calf from the dam, Red Get-A-Long lady 114N who was a great purchase from Denis and Shelly Ericson of Wetaskawin Alberta. She has averaged birth weights of 81 lbs on her bull calves and 90 lbs on her heifer calves. Females have been retained in the herd and a daughter was won by Jennifer Dering, that daughter won top yearling angus heifer at both Vanderhoof and Smithers fairs. Really good udder on the Dam. The sire, Illicit 423P is known for calving ease and milk.

We went into the semen can for this bull, had one straw of an old favorite Red Geis Prime Rib 411 left. Prime Rib is a bull that produces some outstanding mother cows over the years. 896 purebred registrations in Canada from this bull, semen on him is hard to find. Dam 40U has produced five calves for us, daughters have been retained in the herd. Her birth weight was 88 lbs. Average on her bull calves has been 88lbs and heifers 79lbs., really solid pedigree behind this yearling bull. November 1st weight of 976 lbs. and a January 24th weight of 1314 lbs., ADG 3.98 lbs. In top 20% of breed average for Yearling weight and top 30% for weaning weight. Will produce some good solid females for your herd.

From a second calving female who goes back to one of our original purchases, this bull calf is in the top 10 % for birth weight and top 3 percent for calving ease. He weighed in at 72 lbs. at birth and weighed 743 on November 1. January 24th weight 953 lbs. Not going to be the biggest bull in our pen, if calving ease and correctness are important to you, don't overlook him. Should go on to produce easy calving females.

Dam is going to go on to be one solid breeding female. This is her first calf and she has done a very good job. Her birth weight was 75 lbs. and this calf is 68lbs. His weight November 1st was 722 lbs., good production from a good milking 1st calver. Calving ease throughout pedigree. January 24 weight 1004 lbs., 3.24 ADG on feed.

From a first calf heifer belonging to Jennifer Dering. Heifer was won by Jennifer at a fund raiser for our good friend Rod McLeod. Jennifer refers to this heifer as the "Diva". She was the Ranchers choice winner in Vanderhoof and Smithers when showed as a yearling bred and also the yearling heifer Champ in the open Angus divisions at both fairs. Her first calf has a little heavier birth weight; but has an impressive November 1st weight of 741 lbs. Not bad for first calf heifer. January 24th weight of 1004 lbs. with a 3.09 ADG on feed. Good calf, owned by a good friend.

This calf is owned by Tom. He is from a first calf heifer that is going to be a herd builder for Tom. Pretty impressive calf in our bull pen. Has an ADG of 4.16 on feed. Low birth weight of 74 lbs. Weighed in at 749 lbs. Nov 1 and 1103 lbs. January 24th. The Dam is from Tom's 4H cow, whom did him proud winning in Vanderhoof, Smithers and Prince George 4H shows. She was also his Junior Angus Champion in Smithers.

We have been very pleased with the production on our first calf heifers. Calf has 89 lb. birth weight, 711 lbs. on November 1 and 979 lbs. on January 24th. Average daily gain of 3.15 lbs. on feed. The grand dam has been around our farm for 9 calves, good solid production. Her progeny are turning into the same no muss no fuss cattle.

The dam of this calf produced our high seller in the sale of 2014. This is another solid bull from her. Birth weight of 88 lbs. November 1st weight of 764 lbs. January 24th weight of 1056 lbs. Average daily gain of 3.44 on feed. Don't overlook him. Deep and thick from a great Dam. Dam is from Northline Rev 341 R, Canadian National Red Angus Champion. We are looking forward to many years of progeny from this young cow. Dam's birth weight 90 lbs.

Two black Simmental bulls are on offer this year. Both bulls are ranked in the top 1 % for calving ease within the Simmental breed. Both are sired by J Anchor Odin, who was the first black Simmental bull purchased for our farm. His heifers are growing into solid females with tidy udders and good feet. Both dams of these two bulls were selected as seed stock for the start of a select Black Simmental Herd. We look forward to growing this side of our operation and providing you with selected calving ease Simmental bulls.

THANK-YOU ZOETIS!

Zoetis has donated Alveryn for our buyers draw. Thank you for the support!

TERMS & CONDITIONS

Terms

The terms of the sale are cash or cheque payable at par. Cheques to be made payable to sale clerks on sale day unless prior arrangements have been made. The right of property shall not pass until settlement is made. All settlement is made with the clerks of the sale before any cattle will be released. US funds will be accepted at current rate of exchange announced sale day.

Bids and Disputes

Every animal will be sold to the highest bidder. In case of disputes, bidding will re-open between the parties involved. If no further bid is made the buyer will be the persons from whom the auctioneer accepted the last bid. The auctioneer's decision in such a matter will be final.

Announcements

Any corrections or announcements made from the block on sale day will take precedence over the catalogue.

Purchasers Risk

Each animal becomes the risk of the purchaser as soon as it's sold or as soon as the auctioneers gavel falls.

Certificate of Registry

A certificate of Canadian registry duly transferred will be furnished to the buyer of each animal sold as a registered animal after settlement is made in a timely manner.

Breeders Guarantee

All cattle are sold sound and right with a responsible breeder guarantee of satisfaction. In the event of an unlikely dispute the terms and conditions standard with the Canadian Aberdeen Angus Association shall apply.

Liability

Although every precaution will be taken to protect the safety and comfort of the buyers, the auctioneer, sale management, sale staff, the auction mart and owners assume no responsibility in this matter and disclaim any liability, legal or otherwise in the event of an accident or loss of property.
