"Sharing in the excitement of Agriculture"

“Sharing in the excitement of Agriculture”

Congratulations! If you are reading this, you have most likely weathered the storm. Unlike many of your neighbors you are still in the cattle business. Prices have starting moving up, and it is our opinion that prices will strengthen considerably over the next year. We are entering an era of historic profitability for the cow-calf sector. North American cow numbers are at 50 year lows. Even with improved prices we must continue to produce efficient cattle that can optimize production. That is efficient production while minimizing inputs. Our cows must work for us not for them. We must not pamper cows so that hard doing cows with low fertility are hidden behind high input costs.

At Ole Farms, we have had a good growing year and crops responded well. We expect to be able to graze oat swaths and corn well into March this year. Our genetic program is making winter grazing easier. Our cows are moderate, deep, and easy fleshing. Our bull customers are telling us that Ole Farms’ bulls hold condition well.

The bulls in this year’s sale are mostly born in May and June, in sync with nature. These calves are weaned onto a low energy ration and then grassed the following summer. These bulls have not been PUSHED, PICKED OVER, or PAMPERED. The offering is a result of stringent culling; only the best are offered. These virgin bulls are not FAT, but will be ready to go to work as 2 year olds when most of you are ready to breed.

We are also offering 50 Black and 10 Red bred commercial heifers. These bred commercial heifers will compliment any herd. Also on offer are 46 purebred cows with exciting pedigrees.

Thank you for your confidence in our program.

Ole Farms' Breeding Philosophy

Farming and ranching is a great way to raise a family and can also be a great business. Most farmers want to do two things:

- 1) they want to farm,
- 2) and they don't want to pay taxes.

The trouble is many producers succeed at both. We must remember we are in the cattle business to make money!

The most important factors in profit/loss are:

- 1) % of calf crop weaned per cow exposed and
- 2) the cost of winter feeding.

Get your cows pregnant and have them calve trouble free, then feed fewer days with extended grazing. Simple, right? Unfortunately it is not that straight forward. The obstacle of obtaining high pregnancy rates in conjunction with extended grazing is that they are antagonistic. The less we feed our cows, the more likely they will be open and fall out of the program.

If you were to ask the average cattleman, "Do you want your cows to be bigger or smaller?" most would state that they need to moderate their cows. Yet, when they buy their herd bulls they often find themselves picking the biggest bull. This often results in daughters being taller and harder fleshing, thus less likely to becoming pregnant the following summer after grazing the previous winter.

We at Ole Farms have been diligent at selecting bulls that produce daughters that can live on high forage diets through grazing, and still carry enough condition to rebreed the following summer, thus making us more profitable.

In our breeding program we strongly believe in the power of line breeding and large sire groups. Just like in any commercial program, consistency is important. By using similarly bred cattle, we are able to achieve consistent calf crops each year.

We have built our Black program with 3 pillars: Rito, Traveler, and Emulation. These three bulls are the building blocks from which a trouble free herd is made. If you look through our bull battery you will find that every bull, with the exception of Pinebank, has one of these three sires in their pedigree with most having all three. We are able to produce large numbers of consistent offspring through the use of AI bulls in concentrated amounts.

Our Red program has been built on Ole's Oscar and our ongoing use of black red carrier bulls. We have been using sons and grandsons of the Black Angus breed such as Rito 707, Ext, Sitz Alliance 6595 and Traveler. We have found an added benefit in both function and performance with these outcross bulls. Similar to our Black program, we try to keep the number of AI bulls to a minimum, resulting in larger and more consistent groups for our customers. Bulls such as 5L Travlin Ext 2334-6556, Red YY Norseman 791T, Red 5L Crossbow 1173-44V, Ole Alliance 144S, Basin Ext H695, MH Magua 27 and Red Ole Smash 115S are all bulls used in our program that are outcross black genetics. We think you will find our red bulls sound, light birth weight, heavily muscled and have refreshing pedigrees.

Needless to say, we are very proud of this set of bulls. They have the genetic makeup which allows their offspring to withstand extended grazing periods. Or for the conventional feeding program - to simply feed less. We believe that you will find our cattle to be consistent, functional and prepared to do their job. It is important to note that our non conventional program is very much intentional and has worked well for us. One of our goals is to provide you as customers, with the necessary tools to enable your operation to become more profitable as well.

- Travis Olson

History of Ole Farms

Alfred Olson took out a homestead on the NW-23-65-23-W4th in 1911. He built a house and barn and worked the land until 1915 when he drove his 3 oxen to Edmonton, sold them and joined the army. He spent the next 4 years serving in the war effort. He came back to the farm in 1919 and farmed here the rest of his life. During the war he met his future wife, Helen Low, and she joined him in 1921. Their second son Carl and his wife Mary took over the farm in the early 50's. They operated it until the mid 70's when their son Kelly and his wife Anna assumed the reins. Today Ole Farms is operated by Kelly and Anna and their sons; Graham and his wife Leslie, and Travis and his wife Vanessa.

Ole's Oscar is the foundation bull of our Red Angus program! No other bull has left a larger imprint at Ole farms than Oscar! Red YY Hitch 514R, Red Ole Oscar 104S, Red Ole Steele 333S, Red Crowfoot O.O. 4072P, Red Ole Malaki 89W are all direct sons of his that we have or are currently using as walking bulls. We are also using Red YY Norsemen 791T, Ole Rito Legacy 81U and Red Ole Steele 311W which are grandsons of this prolific sire. That's 8 sons and grandsons! Oscar is one of very few bulls in the breed where the calves are born light at birth, wean off heavy, and have above average muscle shape! Oscar daughters are extremely feminine cows with good feet and picture perfect udders! Ole's Oscar has been the #1 sire in Canada for registrations and is currently ABS's (largest semen company in the world!) #1 selling Red Angus bull! There is very little semen available in the Canadian marketplace so come and find a son, grandson or great grandson!

Hitch has been a fantastic bull for us at Ole farms. Hitch sons will add growth, great feet and overall muscle to his calves! In 2009 his sons were the high selling sire group and by the looks of things may well be again this year! Hitch is the most powerful son of Ole's Oscar and has maintained very sound EPDs.

"Authentic" as we call him, has an outstanding profile with incredible depth and width of base. Despite Authentic's tremendous phenotype, it is his mother's side of the pedigree that is his largest strength. The Karuba cow line has been a huge strength in our program with both his great and great granddams both being donor females in our embryo program. Look for sons of Authentic to add muscle and performance to your calves.

Super stout, deep ribbed and moderate framed. In doing our tours over the years through many programs I have always appreciated Data sons but it was a tour through Eastern Montana and Southern North Dakota where I decided that we needed to use this bull after seeing his mid-aged daughters. His daughters were deep broody cows totally built for our kind of program. Data produces heavy weaning calves while moderating mature frame size.

A great bull that comes out of our embryo program. His mother was the Karuba 22Z that was probably the best red cow we have ever owned! 333S is exceptionally well muscled and was used successfully on heifers. Unfortunately, we lost this great young bull after his first year of use and we did not have semen collected on him, a great mistake on our part. Take advantage of this year's calf crop as it is your only opportunity to get a son of this great bull!

This is 4X13's first group of sons offered for sale at Ole Farms. 4X13 offers a combination of light birth weight, high carcass merit and outstanding maternal traits. We are using 4X13 in place of his father, a breed legend N Bar Emulation EXT; a bull that could leave outstanding females like no other. We have yet to find a sire group that has daughters as impressive, not just on type (feminine, sound footed and correct udders) but are also very maternal. If you want to build a cowherd don't miss these 4X13 sons.

This is the first year we have calves on offer from 138T. His mother is our best cow. 3542N is the 2nd most productive cow in all of Canada. 3542N is a moderate broody cow whose weaning index is 119 on her first calves, which is really remarkable because she is one of our smallest framed cows! 138T himself is as thick and deep as you could want and sires sons just like himself. This year several lots sell through our sale and also the 3rd full brother to sell.

A bull that we use in our AI program that adds calving ease moderate frame and easy doing ability! A bull out of Pharo Cattle Company that will throw red calves but most importantly sires them sound, deep and right for the times!

MH Magua 27

Grampa Salé always said that if you had one great farm dog in your life you were blessed!

*Homer, you will be missed.
1995-2010*

Calving Ease

Star ratings are the subjective estimate of these young bulls' calving ease

- ★★★★ Likely to have a high level of calving ease based on dam and sire history, actual birth weight, and EPD of birth weight
- ★★★ Should be comfortable for use on heifers of the same breed
- ★★ Bull should be used on cows with limited assists expected
- ★ Bull should only be used on cows - expect high birth weights

Bovi-Shield GOLD FP
Protection without compromise.

100% BVD PI-FREE GUARANTEED

OUR BVD PI-FREE GUARANTEE
If you vaccinate the dams according to label directions with Bovi-Shield GOLD FP purchased from a Canadian Veterinarian, Pfizer will cover the cost of any BVD PI calf born to the vaccinated cows.

Herd Health Program

- Pfizer Gold Program – all cattle have been vaccinated, following the Pfizer Gold program.
- Johne's Disease – in 2007 all of our purebred cows over 3 years old were tested for Johne's. All cows were negative. Johne's is a production limiting disease that producers should be aware of.
- P.I. (Persistently Infected BVD) – all sale bulls are guaranteed BVD/P.I. free. P.I. animals extract huge losses to the cattle industry annually. A thorough vaccination program is essential to prevent P.I. infected animals.
- All sale bulls are virgins.
- All bulls sell with a certified semen test prior to delivery.

Calving Ease ★★★★★

Total package here! 89W indexed 121 for weaning has low birth weight numbers strong performance and has the type (deep and thick with added muscle)! This pedigree of Alliance mated to Joker daughters has really worked wonders (Ref Sire 138T Page 7 and Lot 2 -185W). Breeder bull here people!

Calving Ease ★★

If you are trying to build a cowherd just buy this bull! 3542N is the best cow in our program; her last 4 calves have indexed 119! 3542N has indexed 119 but is one of our smallest cows and has caught to her AI service every year. This year we left this cow open to flush all year! Look for many other full and half brothers from this great cow in the future. 185W's full brother 138T has 6 sons in this year's sale (lots 48-53) and another full brother that sold in 2008 to the McCutcheon family was the high seller of that year's sale!

Calving Ease ★★★★★

We at Ole Farms have really begun to appreciate the mother of 238W. 238W had one of last year's best bulls but was not in the sale because of an injury! She has done it again; 238W looks the part, indexed 105 at weaning and has only a 74 lb birth weight!

At Ole Farms, we try to have a little fun every day. It is a pleasure working with family. Ace and Carl are growing fast and are very much enjoyed by all. They spend lots of time checking cows and delivering bulls. When Graham and Leslie were delivering bulls last spring at Tomahawk Ranches, Ace piped up at 3 years old, after the bulls were unloaded and said, "Those sure are great bulls." I guess we trained him well.

Calving Ease ★★★

Out of one of our top Black Angus cows. 4787P was our favorite cow out of the great Crowfoot Dispersal and that was out of over 1200 head! A full brother sold in last year's sale to The Erbs in Ontario and may well have been the best bull in last year's offering!

Calving Ease ★★

As deep and thick as you could want! This bull is definitely an outlier as he is very moderate frame. His dam 18P is an elite dam according to the Angus Association with her last 4 calves ratioing 107 which is really something considering her moderate frame. Very positive carcass numbers on this little chunk as well!

Exceptionally deep ribbed and thick topped! 192S, the dam not only produced this great calf but also one of the best sons in the development pen for next year's sale! 107 has a weaning weight ratio of 127 and has been a standout since he was a calf! Breeders take a look at the type, the numbers, and the pedigree, bulls like this a very hard to come by!

Selling 1/2 interest and full possession!

At Ole Farms we believe in the power of population genetics. We try to avoid making breeding decisions like "breeding this bull to that cow to fix this" rather we will "breed this group of sisters to this bull because the kind is right"! You will notice that the last 3 bulls are all ¾ siblings! This is how we breed constancy into our cowherd and it's also how you can really see genetic progress through larger populations of tightly bred individuals!

 Probably the best 333S son in this year's sale! Steele is moderate thick with a 61 lb birth weight! His mother is a great young cow out of a maternal gem 3511N. Great cow family, great numbers, great bull!

I cannot remember if we have ever sold a son with this much of a spread between weaning and yearling, a zero birth weight EPDs and over 100 for yearling weight! Bred with performance in mind. Look for 61W more than any other bull in the sale to add pounds to your calf crop!

Calving Ease ★★★

One of the youngest bulls in the pen but one of the most popular! 346W is very stout and correct! His dam Oakleaf 195R sired a great bull in last year's sale to the Meunier family of Barrhead. Chad swears he got the best bull that day and he might be right! 346W is well bred and looks the part!

Calving Ease ★★★

A great Red carrier son of Everlast, an outstanding herd bull here at Ole Farms! 4486P is one of our finest black red carrier cows and she did a great job on this black son. Lots of guts and ease of fleshing to go with a great pedigree. Attention, registered breeders that want outcross genetics that will improve muscle shape udder structure and improve feet, don't let this herd bull pass you by!

Calving Ease ★★
 In the cattle industry the most important factor in profit or loss for the cow calf man is: the % calf weaned per cow exposed! That being said; right now you can buy yourself a son of a cow who is celebrating her 17 birthday and has raised a calf each and every year!

Family Day Sale

In the winter of 2009 we purchased a small group of Fleckvieh cows from Murray Farms Inc., MB. They are cattle herd descendants of Anchor T, the Rimmers of Weststock, AB. We bought these cows to establish a terminal cross for our customers. The Fleckvieh bulls on offer were purchased at the dispersal. We will have Fleckvieh bulls available in the years to come.

Calving Ease ★

Again this year we offer some F1 bulls in the sale!
These bulls are all half Angus, half Fleckvieh.

Expect to see more performance
and yield from these high growth,
high yielding bulls.

Ole's Oscar is the foundation bull of our Red Angus program! No other bull has left a larger imprint at Ole farms than Oscar! Red YY Hitch 514R, Red Ole Oscar 104S, Red Ole Steele 333S, Red Crowfoot O.O. 4072P, Red Ole Malaki 89W are all direct sons of his that we have or are currently using as walking bulls. We are also using Red YY Norsemen 791T, Ole Rito Legacy 81U and Red Ole Steele 311W which are grandsons of this prolific sire. That's 8 sons and grandsons! Oscar is one of very few bulls in the breed where the calves are born light at birth wean off heavy and have above average muscle shape! Oscar daughters are extremely feminine cows with good feet and picture perfect udders! Ole's Oscar has been the #1 sire in Canada for registrations and is currently ABS's (largest semen company in the world!) #1 selling Red Angus bull! There is very little semen available in the Canadian marketplace so come and find a son, grandson or great grandson!

Hitch has been a fantastic bull for us at Ole farms. Hitch sons will add growth, great feet and overall muscle to his calves! In 2009 and his sons were the high selling sire group and by the looks of things may well be again this year! Hitch is the most powerful son of Ole's Oscar and has maintained very sound EPDs.

Pedigree & EPD Definitions

Expected Progeny Difference (EPD)

An estimation of an animal's breeding value based on its pedigree and performance. EPDs indicate the average performance expected from an animal's progeny in comparison to another animal or to the breed average. They allow for fair comparison of animals' genetics across herds, regardless of environment and management differences.

P = Parental Average EPDs: These are the most basic and least accurate EPDs. They are the best guideline available when calves are first reported and there is no performance data on them yet. Parental Average EPDs are indicated by a P for accuracy and are simply an average of the dam and sire's EPDs. If a calf has only one parent with EPDs, its Parental Average EPDs will be only half of its one parent's EPDs.

P+ = Interim EPDs: These EPDs utilize the Parental Average EPD information on the calf plus any performance data on file and its ratio amongst its contemporary group. Interim EPDs are indicated by a P+ for accuracy and have a higher accuracy than a Parental Average EPD as they also include some performance data.

% = National EPDs: Calculated in the National Cattle Evaluations (NCEs), these EPDs are the most accurate prediction of breeding value or genetic merit that can be determined from pedigree and performance data submitted. National EPDs are published with numerical accuracies that reflect the quantity and quality of data used in its calculation.

Growth EPDs

BW = Birth Weight: Expressed in lbs, predicts on average how much heavier or lighter than the breed average an animal's calves will be. If the breed average is 3 and an Angus animal has a BW EPD of 5 then on average this animal's calves will be 2 lbs heavier than the breed average.

WW = Weaning Weight: Expressed in lbs, predicts comparative progeny weight at 205 days of age. This EPD reflects pre-weaning growth potential that an animal is expected to contribute to its calves.

YW = Yearling Weight: Expressed in lbs, predicts the differences in progeny performance at 365 days. The YW EPD reflects the animal's calves' potential for post-weaning growth. Fertility Trait EPDs

Milk = Milk: Expressed in lbs. of calf weaned, this is a prediction of an animal's daughter's milking ability.

TM = Total Maternal: A measurement comprised of half of an animal's Milk EPD and half of its additive genetic contribution to its calves' weaning weights.

Stay = Stayability: The probability that a heifer will be retained in a herd past 6 years of age.

HP = Heifer Pregnancy: The probability, in percentage, that an animal's daughters will conceive at 2 years of age.

SC = Scrotal Circumference: This EPD predicts the average scrotal circumference for an animal's sons. Scrotal circumference is used to gauge a bull's fertility.

CE = Calving Ease Direct: Predicts the percentage of unassisted birthings expected from an animal's calves. This EPD reflects a combination of gestational growth and a calf's conformation. The higher the CED EPD, the more likely it is that the animal's calves will be born without assistance.

CEM = Calving Ease Maternal: Predicts the percentage of unassisted births an animal's daughters will have with their first calves. This is a reflection of daughters' pelvic shape and level of hormonal reactions and stamina during labour. The higher the CEM EPD, the more likely it is that the animal's daughters will give birth without assistance.

Carcass Trait EPDs

REA = Rib Eye Area: Expressed in square inches, predicts the size of the rib eye muscle at the 12th rib in the average calf.

Marb = Marbling: A predictor of the level of intramuscular fat in the rib eye muscle, this EPD is calculated using both ultrasound and carcass data.

Fat = Fat: Expressed in inches, predicts the comparative depth of back fat over the 12th rib in the average calf.

YG = Yield Grade: expressed in USDA yield grade score, this EPD predicts differences in carcass yield grade score to be expected from progeny.

CW = Carcass Weight: Expressed in lbs., this EPD predicts differences in the average hot carcass weight in progeny.

Colour Indicators

RC = Red Carrier: a black-hided animal that has inherited the allele that codes for red coat colour but does not display the phenotype as the allele is recessive to the allele that codes for black hide colour

EE – homozygous for black coat color gene

Ee – black hided animal that is a carrier of the red coat color gene

ee – red hided animal

Terms & Conditions

CATTLE INSPECTION: All carry permanent identity tags, corresponding to Sale Lot Numbers. All shall be available for inspection prior to sale.

BREEDING GUARANTEE: All cattle are sound and sold with a responsible breeder guarantee of satisfaction. In the event of any unlikely dispute, the regular terms and conditions, standard with the Canadian Aberdeen Angus Association shall apply.

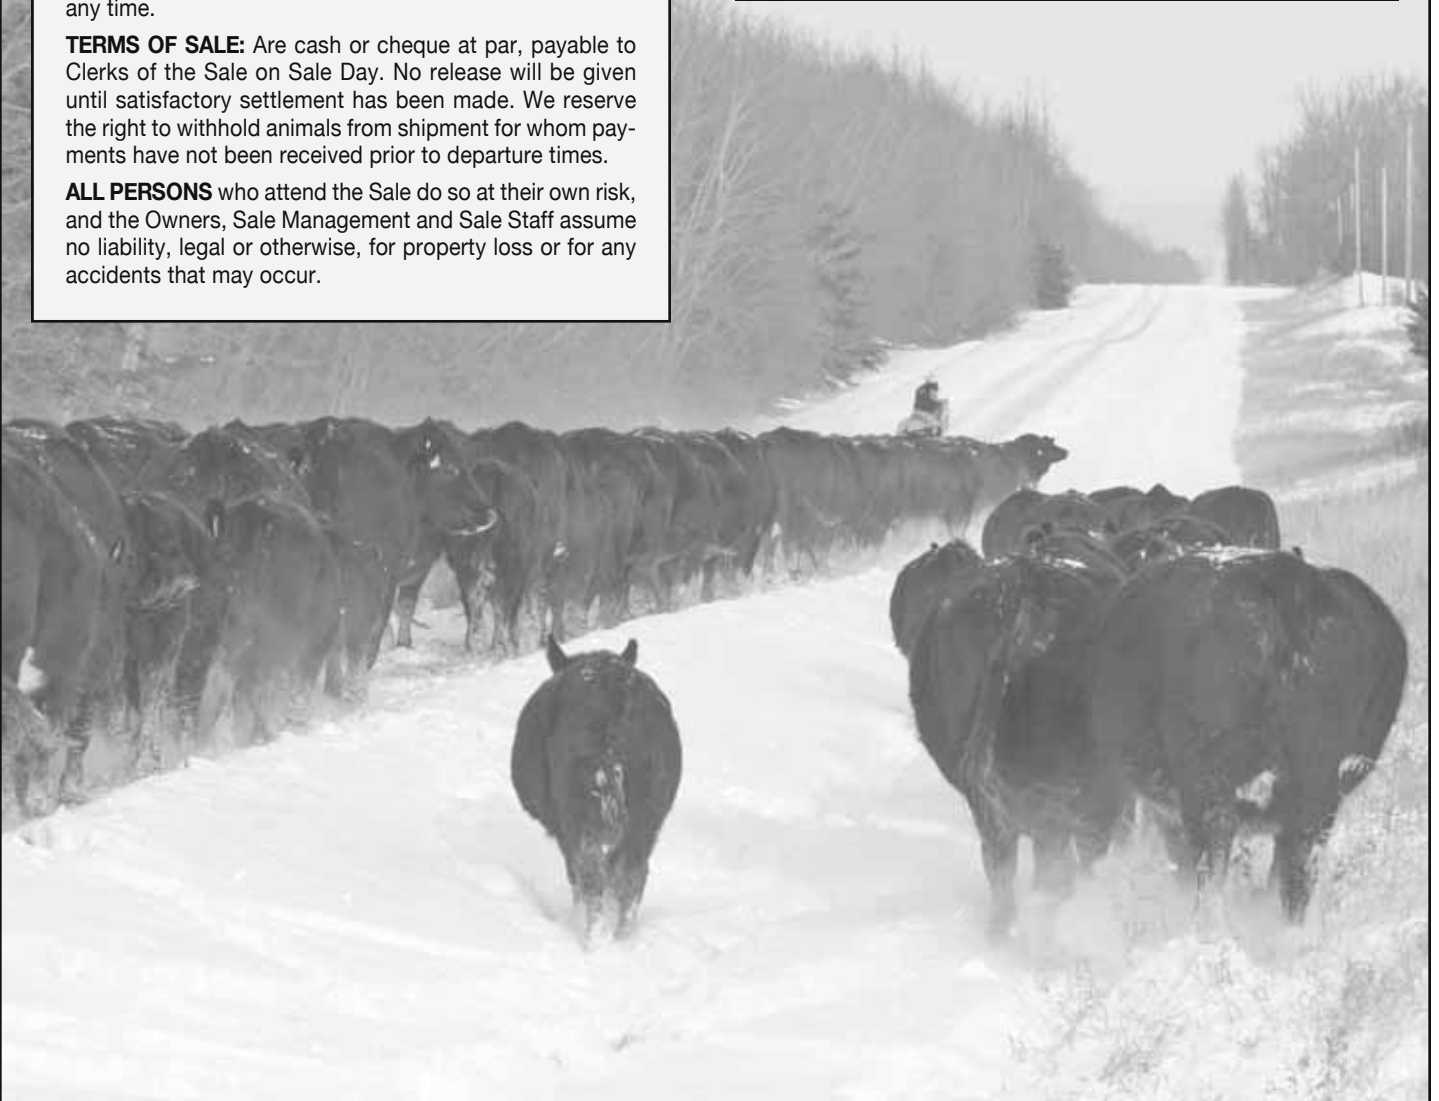

MAIL BIDS: May be entrusted in complete confidence to any of the Sale Staff listed or to Douglas J. Henderson & Associates Ltd.

INSURANCE: Ownership risk to purchaser commences when the Auctioneer's hammer falls. Livestock coverage will be available at the clerk's desk from the appointed representatives on sale day, also from the sale management at any time.

TERMS OF SALE: Are cash or cheque at par, payable to Clerks of the Sale on Sale Day. No release will be given until satisfactory settlement has been made. We reserve the right to withhold animals from shipment for whom payments have not been received prior to departure times.

ALL PERSONS who attend the Sale do so at their own risk, and the Owners, Sale Management and Sale Staff assume no liability, legal or otherwise, for property loss or for any accidents that may occur.

Happy Family Day!
