"Sharing in the excitement of Agriculture"

“Sharing in the excitement of Agriculture”

2011 has been an historic year for our family. We have been farming on the same land for 100 years. My grandfather, Alfred Olson must have had quite a vision when he arrived here with an axe and started clearing land. We very much appreciate what he did to establish this farm and what my parents, Carl and Mary did to carry it forward to us. I am sure that my grandfather would be proud of what our family has done with the land since his passing in 1958.

The past 100 years have had their ups and downs. There have been good times that were very profitable and times which tried our patience. From depression to drought, high interest rates and most recently, BSE, the past eight years have been hard on us and the cattle industry.

However, the good times and profitability are back. The North American cow herd is very low, spurred on this year by a major drought in Texas and Oklahoma. It likely will be at least 4 years before slaughter cattle volumes start to rise and if cowherd rebuilding begins, slaughter volumes will drop even more than now, driving prices to levels never experienced before.

Although prices are up substantially, and the future looks bright, costs have also increased. Of note are fuel, fertilizer, and the cost of equipment, but many other costs on the farm are rising as well. We must be vigilant in keeping costs to a minimum, applying the following rules:

- Realistically and accurately project income
- Spend less

How do we do this in the cattle business? In our opinion, it is done with easy fleshing, moderate framed cows. They must have depth and capacity. They must be able to utilize forage with a minimum of mechanical intervention. We have been developing this type of cow, knowing that she will produce bulls that will generate offspring that create profitability for us – and for YOU.

Other bull suppliers will tell you that this year's offering of bulls are the best ever, but we won't. We'll let YOU be the judge. Thanks to all you, our customers for your very strong support and remember: WE WANT TO EARN YOUR BUSINESS, ONE BULL AT A TIME.

Lessons of the Soil

100 Years of Farming

Last August long weekend, Ole Farms celebrated 100 years of farming. On the warm sunny Saturday evening of the celebrations, family, friends, neighbours and business partners gathered to witness the origins of Ole Farms brought to life in a play. *Lessons of the Soil*, co-written and performed by Kelly and Anna's daughter Cheryl Andrews, her husband Frazer Andrews and Braden Griffiths, with music by Adam Chaisson, details the first fifty years of the Olson family in Alberta. The show was performed on the original quarter homesteaded by Alfred Olson in 1911, with the family's 1929 home as its stunning weather-worn backdrop.

At rise, the character of Alfred, the family patriarch, invited the future generation (played by Graham and Leslie's son Ace Olson and Ken and Penny Olson's granddaughter Alyssa Olson) to revisit and share in the family history, he said: "This land was

shaped by the hands of the Olson family and we have been shaped by it. The two are forever linked, this is where you come from and where I rest. This land has taught me many things about life. I wish you to know them as well. So come, sit, and let me pass on the lessons of this soil."

Each of Alfred's lessons was brought to life by the company with funny and touching scene work and vibrant music. The seven lessons of the soil are: work hard, find your better half, love your family and nurture your friendships, a penny saved is a penny earned, never trust a banker, a mistake isn't a mistake if you learn from it and know yourself.

*"This land was shaped by the Olson Family
and we have been shaped by it"*

Some of the show's touching scenes included: Alfred's time in the First World War, meeting his wife Nellie in Scotland and their next generation's love stories. Lighter moments were: raising their young family, the adventures of the young boys on the farm, training attack turkeys and a banker being put in his place.

The show concluded with Alfred telling the next generation that he: "wanted to pass on the stories and lessons that make up (their) history, because over time this land had taught him so much. The history written in this soil belongs to you, and you are a part of it." He asked the children to follow tradition and, "carry on," he took them by the hand and led them toward the horizon.

We started using Sitz Alliance 6595 in 2001 and in the past 11 years have used 600 straws of semen. Sitz Alliance is one of the few bulls in the history of the breed that balances two antagonistic traits so well – productivity and fertility. There are so few bulls that combine the growth attributes of Alliance, have daughters that bring in the heaviest calves and yet rebreed. Take this opportunity to purchase a son as we have very little semen left on this pathfinder sire.

Everlast was purchased in 2007 to address our need for more moderate cattle. Everlast is used both as a walking bull and now through AI and he delivers a very consistently heavy muscled and moderate package! Rito 707, Everlast's sire was born in 1967 and is in the lineage of almost every black bull in this year's sale.

Ole's Oscar is the foundation bull of our Red Angus program! No other bull has left a larger imprint at Ole farms than Oscar! Oscar is one of very few bulls in the breed where the calves are born light at birth, wean off heavy, and have above average muscle shape! Oscar daughters are extremely feminine cows with good feet and picture perfect udders! Ole's Oscar has been the #1 sire in Canada for registrations and is currently ABS's (largest semen company in the world!) #1 selling Red Angus bull in both 2009 and 2010! There is very little semen available in the Canadian marketplace so come and find a son, grandson or great grandson!

Red Ole Smash 115S

Bovi-Shield[®] GOLD FP[®]
Protection without compromise.

OUR BVD PI-FREE GUARANTEE
If you vaccinate the dams according to label directions with Bovi-Shield[®] GOLD FP[®] purchased from a Canadian veterinarian, Pfizer will cover the cost of any BVD PI test done to the vaccinated cows.

Calving Ease

Star ratings are the subjective estimate of these young bulls' calving ease

- ★★★★ Likely to have a high level of calving ease based on dam and sire history, actual birth weight, and EPD of birth weight
- ★★★ Should be comfortable for use on heifers of the same breed
- ★★ Bull should be used on cows with limited assists expected
- ★ Bull should only be used on cows - expect high birth weights

Herd Health Program

- Pfizer Gold Program – all cattle have been vaccinated, following the Pfizer Gold program.
- Johne's Disease – in 2007 all of our purebred cows over 3 years old were tested for Johne's. All cows were negative. Johne's is a production limiting disease that producers should be aware of.
- P.I. (Persistently Infected BVD) – all sale bulls are guaranteed BVD/P.I. free. P.I. animals extract huge losses to the cattle industry annually. A thorough vaccination program is essential to prevent P.I. infected animals.
- All sale bulls are virgins.
- All bulls sell with a certified semen test prior to delivery.

"Tex" is a 12 year old Registered APHA Gelding. He has been used on community pasture and at rodeos as a pick up horse and a flag horse. Tex knows his job and does them well with a lot of heart.

230

MELVIN

Grade Gelding

Melvin is a 7 year old grade, Sorrel gelding. He was used on the community pasture last summer. He is currently being used at OLE Farms this winter for cattle work. Melvin is a nice quiet horse that is easy to be around.

*For more information on Lots 229 & 230
call Kyle Miller at 780-689-9373*

231

Paint Gelding

9 year old Paint gelding. Used in PF pastures and at the Yorkton Rodeo.

*For more information on Lot 231
call Gordie Squair at 780-213-0143*

Pedigree & EPD Definitions

Expected Progeny Differences (EPD)

An estimation of an animal's breeding value based on its pedigree and performance. EPDs indicate the average performance expected from an animal's progeny in comparison to another animal or to the breed average. They allow for fair comparison of animals' genetics across herds, regardless of environment and management differences.

P = Parental Average EPDs: These are the most basic and least accurate EPDs. They are the best guideline available when calves are first reported and there is no performance data on them yet. Parental Average EPDs are indicated by a P for accuracy and are simply an average of the dam and sire's EPDs. If a calf has only one parent with EPDs, its Parental Average EPDs will be only half of its one parent's EPDs.

P+ = Interim EPDs: These EPDs utilize the Parental Average EPD information on the calf plus any performance data on file and its ratio amongst its contemporary group. Interim EPDs are indicated by a P+ for accuracy and have a higher accuracy than a Parental Average EPD as they also include some performance data.

% = National EPDs: Calculated in the National Cattle Evaluations (NCEs), these EPDs are the most accurate prediction of breeding value or genetic merit that can be determined from pedigree and performance data submitted. National EPDs are published with numerical accuracies that reflect the quantity and quality of data used in its calculation.

Growth EPDs

BW = Birth Weight: Expressed in lbs, predicts on average how much heavier or lighter than the breed average an animal's calves will be. If the breed average is 3 and an Angus animal has a BW EPD of 5 then on average this animal's calves will be 2 lbs heavier than the breed average.

WW = Weaning Weight: Expressed in lbs, predicts comparative progeny weight at 205 days of age. This EPD reflects pre-weaning growth potential that an animal is expected to contribute to its calves.

YW = Yearling Weight: Expressed in lbs, predicts the differences in progeny performance at 365 days. The YW EPD reflects the animal's calves' potential for post-weaning growth. Fertility Trait EPDs

Milk = Milk: Expressed in lbs. of calf weaned, this is a prediction of an animal's daughter's milking ability.

TM = Total Maternal: A measurement comprised of half of an animal's Milk EPD and half of its additive genetic contribution to its calves' weaning weights.

Stay = Stayability: The probability that a heifer will be retained in a herd past 6 years of age.

HP = Heifer Pregnancy: The probability, in percentage, that an animal's daughters will conceive at 2 years of age.

SC = Scrotal Circumference: This EPD predicts the average scrotal circumference for an animal's sons. Scrotal circumference is used to gauge a bull's fertility.

CE = Calving Ease Direct: Predicts the percentage of unassisted birthings expected from an animal's calves. This EPD reflects a combination of gestational growth and a calf's conformation. The higher the CED EPD, the more likely it is that the animal's calves will be born without assistance.

MCE = Maternal Calving Ease: Predicts the percentage of unassisted births an animal's daughters will have with their first calves. This is a reflection of daughters' pelvic shape and level of hormonal reactions and stamina during labour. The higher the CEM EPD, the more likely it is that the animal's daughters will give birth without assistance.

Carcass Trait EPDs

REA = Rib Eye Area: Expressed in square inches, predicts the size of the rib eye muscle at the 12th rib in the average calf.

Marb = Marbling: A predictor of the level of intramuscular fat in the rib eye muscle, this EPD is calculated using both ultrasound and carcass data.

Fat = Fat: Expressed in inches, predicts the comparative depth of back fat over the 12th rib in the average calf.

YG = Yield Grade: expressed in USDA yield grade score, this EPD predicts differences in carcass yield grade score to be expected from progeny.

CW = Carcass Weight: Expressed in lbs., this EPD predicts differences in the average hot carcass weight in progeny.

Colour Indicators

RC = Red Carrier: a black-hided animal that has inherited the allele that codes for red coat colour but does not display the phenotype as the allele is recessive to the allele that codes for black hide colour

EE – homozygous for black coat color gene

Ee – black hided animal that is a carrier of the red coat color gene

ee – red hided animal

Spring 2012 Genetic Evaluation Angus Breed Averages

To evaluate an animal using EPDs it should be compared to the breed average. This is not zero (0) for any trait, rather, it is an average of all the values for animals of that category in the breed, and changes every evaluation. EPD breed averages are calculated for three categories: non parents under 2 years of age, active dams, and active sires. Below are the breed averages for Spring 2012.

Average Black Angus EPDs for all Calves born in 2011

Terms & Conditions

CATTLE INSPECTION: All carry permanent identity tags, corresponding to Sale Lot Numbers. All shall be available for inspection prior to sale.

BREEDING GUARANTEE: All cattle are sound and sold with a responsible breeder guarantee of satisfaction. In the event of any unlikely dispute, the regular terms and conditions, standard with the Canadian Aberdeen Angus Association shall apply.

MAIL BIDS: May be entrusted in complete confidence to any of the Sale Staff listed or to Douglas J. Henderson & Associates Ltd.

INSURANCE: Ownership risk to purchaser commences when the Auctioneer's hammer falls. Livestock coverage will be available at the clerk's desk from the appointed representatives on sale day, also from the sale management at any time.

TERMS OF SALE: Are cash or cheque at par, payable to Clerks of the Sale on Sale Day. No release will be given until satisfactory settlement has been made. We reserve the right to withhold animals from shipment for whom payments have not been received prior to departure times.

ALL PERSONS who attend the Sale do so at their own risk, and the Owners, Sale Management and Sale Staff assume no liability, legal or otherwise, for property loss or for any accidents that may occur.
