Monday **FEBRUARY 17** 2014

*At the Farm, 10 miles Southwest of Athabasca, Alberta*

## *It's Our Turn*

Most of us in the cattle business have spent the past ten years wondering when it will be our turn. Even as recently as this past couple of months many producers have decided to liquidate their cowherds. Some of course, are simply ready to retire. Others however, feel they have waited long enough. The trend over the past decade on many farms has been to reduce or eliminate the cattle herd, and turn even marginal pasture land into grain production. Attractive grain prices have facilitated and accelerated this trend. However, it seems now that this pendulum has swung too far.

Unfortunately for many grain prices no longer have the lure they recently had. The drop in grain prices is not because of a world bumper crop, but rather, an average crop on a bigger acreage. It seems to me that it is high time to seed at least that marginal land back to pasture.

I've noticed that a lot of our young farmers today are primarily grain farmers. This generation has never known the sustainable benefits of animal agriculture. Given this scenario, it seems that it will be extremely positive for those who are in the cattle business, especially so for those young businessmen and women who have the vision to expand their herds.

Another observation I have made over the past few years that could easily have gone unnoticed is the cost of iron. The capital cost of machinery, repairs and fuel are seriously eating at our profits. To make matters worse, the reliability of new machinery has gone backwards. Obviously, we cannot eliminate all the profit reducing iron from our operations, but we can seriously reduce its need. We must strive to minimize mechanical intervention.

Cows must work for us, not us for them. At OLE FARMS we believe a cow must be of moderate frame, have depth of body and lots of capacity in order to be profitable. She must live long and wean a calf every year. Most importantly, she must be easy fleshing. If she needs a lot of mechanical intervention for survival, profitability will be lost. Our entire philosophy at OLE FARMS is to produce profitable cattle. By developing cattle that work in our operation we feel confident they will work in yours.

Our goal, then, at OLE FARMS is to produce cattle like this that will make all of us more money. After all, it's our turn. The future looks bountiful. What a great time to increase your herd, buying good genetics. Let's put on our boots and jeans and 'get her done'.

"Sharing in the excitement of Agriculture"

# Breeding Philosophy

At OLE FARMS our breeding philosophy is simple: breed cattle that give your customers the greatest chance to be profitable. In the North American Cow Calf operation, the largest factors that contribute to profit or loss are winter feeding costs and the % of live calves weaned per cow exposed. These two factors are the two items we spend the most time and effort selecting for. They are, however, antagonistic traits: the less that you feed your cows through the winter the more difficult it is to get them to rebreed the following spring or summer. In order to do our best to accommodate both antagonistic traits we have reduced the frame on our cows and focused on using bulls with exceptional EPDs for Fat which has increased the ability to flesh. This has allowed us to graze pastures into early winter, then move to swath grazing or silage diets, therefore significantly reducing winter feeding costs. The more moderate, easy fleshing cows are able to rebreed under these conditions.

As we all know, having a pregnant cow does not mean she will wean a calf that we can market. The culling of cows that do not wean calves is extremely important as well as culling females that cannot calve on their own or get their calf to suck. Culling cows with poor udders and being very selective when putting herd bulls together helps maintain a great uddered cow herd. Another trait that gets considerable focus is birth weight EPDs. Not only do light birth weights help your live calf percentage, but it also will shorten gestation, leaving just a bit more time for cows to rebreed. The bulls in this year's sale lead the industry in birth weight and calving ease EPDs.

We must always remember what we are selling: BEEF! We spend a great deal of time searching for AI and walking bulls that gain well and that have superior carcass quality. In breeding seed stock cattle we always have our customer in mind and make deliberate decisions related to your profitability. The genetics that we have on offer are sound, fertile, easy fleshing, and are not ruined by over feeding. Ole Farms' philosophy in genetics is not to breed cattle that just look good or that will sell well, but rather, cattle that give YOU, our customer, the building blocks to a very profitable cow herd.

# Top 10 Reasons To Buy at Ole Farms

- 1. PROFITABILITY:** At Ole Farms we breed cattle so as to maximize long term profitability. By breeding cattle that are profitable for us, we know they will work for you as well.
- 2. PHENOTYPE:** We strive to produce thick, deep-bodied cattle with lots of capacity. The right kind.
- 3. HARSH ENVIRONMENT:** At Ole Farms we raise cattle in volume with a minimum of mechanical intervention. We swath graze and bale graze. We are in a high rainfall area. A lot of our pasture is on low land. Pasture and forage volume is good but quality is lower and northern Alberta is significantly colder than many areas in North America. Our cattle are developed under tough conditions. If they work here, they should work on your operation.
- 4. MODERATE FRAME:** Research has shown that pounds of calf weaned per acre can be maximized with moderate cows. On our way to optimizing frame size, we find our cows are shorter, but not lighter.
- 5. CALVING EASE:** We emphasize calving ease. We seldom pull a calf. All cows and heifers are calved in May and June with little supervision. Heifers are only checked once or twice per day.
- 6. FEET AND UDDERS:** We stringently cull cattle for feet and udder problems. If they have a problem they are gone. Udders on our cows are very strong. None of our sale bulls have had their feet trimmed.
- 7. MOTHER NATURE:** We believe Mother Nature is the best judge of cattle. We do not clip our sale cattle. They are in their natural state.
- 8. OVER FEEDING:** We do not hide our cattle behind heavy feed. The bulls in our sale will not be as fat as in other sales and will not melt away when you use them.
- 9. VOLUME:** We raise and sell cattle in volume. We run 1600 cows and don't have time for high maintenance. We understand what it takes to raise efficient cattle. We were pleased to learn that we are the largest Purebred Angus breeder in Alberta and have the second largest Purebred Angus herd in Canada, based on almost 600 registrations last year.
- 10. SHARING IN THE EXCITEMENT OF AGRICULTURE:** We encourage you to come and visit, exchange ideas, and share refreshments with us. We have started a PROFIT CENTERED PERFORMANCE GROUP of producers. The goal is to share production and expense data in order to help each other become more profitable. If you are interested, let us know.

*Best wishes to you all. If we can be of any help, please call.*

## *Did You Know?*

*We artificially inseminated over  
700 head in the summer of 2013?*

*This extra effort enables us to use some of  
the best Angus genetics on the planet.*

The high selling bull from Crowfoot's 2013 Dispersal Sale, for \$46,000; this powerhouse of a bull is a true curve bender. Moonshine is in the top 1% of the breed for both yearling weight EPD and weaning weight, yet is still in the top 15% of the breed for Birth Weight EPD. Moonshine calves are long and deep. They are very wide based with ample muscle shape and eye appeal. Moonshine has a unique pedigree and is outcross to almost every Red Angus herd in the industry. Never before have we been so impressed with a set of sons in our sale offering. We would like to thank, Genex Beef for partnering with us in purchasing this sire and allowing the industry the ability to use one of the worlds best.

The foundation of our Red Angus program is Ole's Oscar. No other bull has had a greater impact at Ole Farms than Oscar. Oscar is a breed legend in this country and around the world because of his offspring's light birth weights and heavy weaning weights. Oscar daughters are model cows with near perfect udder structure and outstanding mothering ability. Oscar is the one time leader for registrations in Canada and American Breeders Service (ABS) and #1 selling bull in 2009, 2010 and 2011. Now that he is deceased, take this opportunity to add a son, grandson or great-grandson from this elite industry-leading sire.

This is the first time offering of Gladiator sons at Ole Farms. Gladiator is an old time proven high maternal bull. This sire's calves are light at birth and leave daughters with more productive value than almost any other bull. His daughters will milk, raise big strong calves yet stay very easy fleshing. Come and buy a son and keep every daughter.

We first started using Alliance in 2001. Thirteen years and over 600 units of semen later we have assembled one of the finest sets of cows a rancher could want. Alliance has been a staple here adding depth of body and increased growth. One of Alliance's strongest attributes is his exceptionally high back fat measurements. This allows his daughters to be among the highest in milk production and total maternal traits, yet have enough energy saved to rebreed. This is the last large group of Alliance sons, as his semen is almost gone. We currently are walking seven of his sons as herd bulls on the purebred cows.

50H was our choice of the bulls on offer in the Deboo Production sale of 2009. 50H is one of the deepest bodied, smoothest moving bulls to have ever walked, here at Ole Farms. Use of him will improve feet quality, add fleshing ability, reduce frame score and birth weight. 50H will leave you some of the most attractive and functional females in the industry.

*DDA Pinebank 50H*

138T has a great maternal combination of Sitz Alliance and 3542N, and is our very best cow. During her life she has had 26 calves, 5 of them in our herd bull battery. 138T will moderate frame, increase muscle shape, and improve foot quality.

*Ole Alliance 138T*

## Calving Ease

Star ratings are the subjective estimate of these young bulls' calving ease

- ★★★★ Likely to have a high level of calving ease based on dam and sire history, actual birth weight, and EPD of birth weight
- ★★★ Should be comfortable for use on heifers of the same breed
- ★★ Bull should be used on cows with limited assists expected
- ★ Bull should only be used on cows - expect high birth weights

**Bovi-Shield GOLD FP**  
 Protection without compromise.

## Herd Health Program

- Pfizer Gold Program – all cattle have been vaccinated, following the Pfizer Gold program.
- P.I. (Persistently Infected BVD) – all sale bulls are guaranteed BVD/P.I. free. P.I. animals extract huge losses to the cattle industry annually. A thorough vaccination program is essential to prevent P.I. infected animals.
- All sale bulls are virgins.
- All bulls sell with a certified semen test prior to delivery.

*R R Rito 707*

**Every black bull in the sale has 707 in their pedigrees.  
 70% of the Red cattle have him as well.**

Lot 1 - Red Ole Moonshine 392Z

Calving Ease ★★

The most powerful bull in this year's sale. This guy has tons of muscle, capacity and width of base. With EPDs showing he is a true curve bender that few bulls are able to do - he provides light birth weight and exhibits incredible performance. His dam, 152T, is a beautiful dark red Smash daughter that is indexing 107 on her first five calves. Note that 392Z has a weaning index of 112.

Calving Ease ★★

Possibly the best maternal pedigree in the sale. Moonshine by Timberlake, out of one of the best black red carrier cows in our program. 208Z is deep, wide based and very attractive. Here is a bull that will produce sons that will be very marketable. His daughters will be the foundation of a great cowherd.

127Z is one of the favourites of visitors to Ole Farms. Great calving ease numbers. The type of bull who can thrive in harsh environments and low quality forages. If you need a bull that should calve like a dream and that will leave daughters you will love to own, here is your bull.

124Z is our pick of Moonshine offspring, from a maternal standpoint. Not only is 124Z deep bodied and sound, his dam, 3177N is our best black red carrier and will be entering our donor program this summer. If you want to have sons that will gain, and daughters that you will love as cows, 124Z is the bull for you.

Longevity is often one of the most overlooked economic traits in beef herds. Here is a bull out of a 17 year old cow.

*We strive to produce thick, deep bodied cattle with loads of capacity - 'the right kind'*

243Z is deep bodied and has a wonderful pedigree, as the mating of Gladiator to Oscar really seems to work well.

Calving Ease ★★

One of our favourite bulls in this year's offering. 233Z is moderate, deep and thick. Hitch, his maternal grandsire, has left many productive daughters like 191X. Look for 233Z offspring to add muscle and reduce frame, without sacrificing growth.

### MYSTERY LOT

To be revealed on Sale Day!

After our AI breeding finishes,  
 we turn large groups of cows with multiple  
 bulls and then DNA their calves.  
 When many bulls are turned into a pasture  
 few do most of the work! Many of the bulls  
 in our sale are offspring of prolific breeders.

The average gestation on our females is  
 275 days, a full 8 days less than average.  
 This allows cows a third of a cycle more  
 to recover from calving and prepare  
 for breeding, which increases fertility  
 and reduces the number of open cows.

# Family Day Sale

*Thanks to buyers, family & friends*

*Just got married!*

## *A Tale of Three Cows*

*When Anna and I were married in 1973, Anna brought with her three bovines: a black white-faced cow and her two calves. The black baldie cow was a three-year-old Hereford/Angus cross, weighing about 1200 lbs. The first calf was a straight black yearling heifer from a Black Angus sire, and her second calf was a blue roan heifer calf that was the result of a Charolais sire. Perhaps the roan came from a shorthorn way back in her dad's herd. When Anna's dad, Louis brought them over, he was very proud of the Char Cross calf and apologized about the rather small yearling black heifer. All three were added to our cowherd.*

*At maturity the straight black cow was about 1000 lbs., 200 lbs. lighter than her mother, the black baldie. Her sister, the blue roan was a very impressive 1700 lbs. How did these cows perform? The small black cow calved every year, having a very small, 60 lb. calf and weaned a respectable 500 lb. calf. Her mother, the black baldie also regularly weaned a calf about the same size. The impressive blue roan cow weaned a larger calf perhaps 550 lbs., and she did it consistently every second year. As exotic cattle were the rage and she was so impressive to look at, we kept giving her a second chance.*

*I learned more from these three cows than any others we have owned, and they were instrumental in formulating the philosophy at OLE FARMS.*

*Kelly Olson*

*Other than our breeding program,  
 we run our purebreds no differently  
 than we run our commercial cattle.  
 Purebred cattle that need to be pampered  
 have little use to a commercial cattlemen.*

*Lot 211 - Alf*

*Lot 212 - Squirt*

**211**

**ALF**

8 Year Old Grade Palomino Gelding

Alf is a 8 year old, grade, palomino quarter horse gelding that stands 15.2 HH. Powerful ranch horse that is always ready to go to work. He has been used for the past two winters at Ole Farms.

**212**

**SQUIRT**

Registered AQHA Grey Gelding

Squirt is a grey, registered AQHA gelding, 15 HH. He has had extensive ranch work on the Black Bear Community Pasture & at Ole Farms, making lots of miles and has worked lots of cattle. He is quiet, gentle and the type of horse anyone can ride.

*For more information call Kyle Miller at 780-689-9373*

*Notes*

# EPD Definitions

## Expected Progeny Differences

An estimation of an animal's breeding value based on its pedigree and performance. EPDs indicate the average performance expected from an animal's progeny in comparison to another animal or to the breed average. They allow for fair comparison of animals' genetics across herds, regardless of environment and management differences.

**P = Parental Average EPDs:** These are the most basic and least accurate EPDs. They are the best guideline available when calves are first reported and there is no performance data on them yet. Parental Average EPDs are indicated by a P for accuracy and are simply an average of the dam and sire's EPDs. If a calf has only one parent with EPDs, its Parental Average EPDs will be only half of its one parent's EPDs.

**P+ = Interim EPDs:** These EPDs utilize the Parental Average EPD information on the calf plus any performance data on file and its ratio amongst its contemporary group. Interim EPDs are indicated by a P+ for accuracy and have a higher accuracy than a Parental Average EPD as they also include some performance data.

**% = National EPDs:** Calculated in the National Cattle Evaluations (NCEs), these EPDs are the most accurate prediction of breeding value or genetic merit that can be determined from pedigree and performance data submitted. National EPDs are published with numerical accuracies that reflect the quantity and quality of data used in its calculation.

### Growth EPDs

**BW = Birth Weight:** Expressed in lbs, predicts on average how much heavier or lighter than the breed average an animal's calves will be. If the breed average is 3 and an Angus animal has a BW EPD of 5 then on average this animal's calves will be 2 lbs heavier than the breed average.

**WW = Weaning Weight:** Expressed in lbs, predicts comparative progeny weight at 205 days of age. This EPD reflects pre-weaning growth potential that an animal is expected to contribute to its calves.

**YW = Yearling Weight:** Expressed in lbs, predicts the differences in progeny performance at 365 days. The YW EPD reflects the animal's calves' potential for post-weaning growth.

### Fertility Trait EPDs

**Milk = Milk:** Expressed in lbs. of calf weaned, this is a prediction of an animal's daughter's milking ability.

**TM = Total Maternal:** A measurement comprised of half of an animal's Milk EPD and half of its additive genetic contribution to its calves' weaning weights.

**Stay = Stayability:** The probability that a heifer will be retained in a herd past 6 years of age.

**HP = Heifer Pregnancy:** The probability, in percentage, that an animal's daughters will conceive at 2 years of age.

**SC = Scrotal Circumference:** This EPD predicts the average scrotal circumference for an animal's sons. Scrotal circumference is used to gauge a bull's fertility.

**CE = Calving Ease Direct:** Predicts the percentage of unassisted birthings expected from an animal's calves. This EPD reflects a combination of gestational growth and a calf's conformation. The higher the CED EPD, the more likely it is that the animal's calves will be born without assistance.

**MCE = Maternal Calving Ease:** Predicts the percentage of unassisted births an animal's daughters will have with their first calves. This is a reflection of daughters' pelvic shape and level of hormonal reactions and stamina during labour. The higher the MCE EPD, the more likely it is that the animal's daughters will give birth without assistance.

### Carcass Trait EPDs

**REA = Rib Eye Area:** Expressed in square inches, predicts the size of the rib eye muscle at the 12th rib in the average calf.

**Marb = Marbling:** A predictor of the level of intramuscular fat in the rib eye muscle, this EPD is calculated using both ultrasound and carcass data.

**Fat = Fat:** Expressed in inches, predicts the comparative depth of back fat over the 12th rib in the average calf.

**YG = Yield Grade:** expressed in USDA yield grade score, this EPD predicts differences in carcass yield grade score to be expected from progeny.

**CW = Carcass Weight:** Expressed in lbs., this EPD predicts differences in the average hot carcass weight in progeny.

### Colour Indicators

**RC = Red Carrier:** a black-hided animal that has inherited the allele that codes for red coat colour but does not display the phenotype as the allele is recessive to the allele that codes for black hide colour

**EE** – homozygous for black coat color gene

**Ee** – black hided animal that is a carrier of the red coat color gene

**ee** – red hided animal

### Genetic Evaluation Angus Breed Averages

To evaluate an animal using EPDs it should be compared to the breed average.

This is not zero (0) for any trait, rather, it is an average of all the values for animals of that category in the breed, and changes every evaluation. EPD breed averages are calculated for three categories: non parents under 2 years of age, active dams, and active sires. Below are the current breed averages.

Average Black Angus EPDs for all Calves born in 2013  
Average Red Angus EPDs for all Calves born in 2013

	Birth Weight	Weaning Weight	Yearling Weight	Milk	Total Maternal	Scrotal Circ.	Calving Ease Direct	Calving Ease Mat.	Stay	HPG	Marbling	REA	Fat	Yield Grade	Carcass Wt
EPD	+2.8 -0.5	+41 +40	+74 +71	+19 +16	+39 +39	+0.56 n/a	+2.4 +2.6	+5.6 +4.0	n/a +10	n/a +9	+0.26 +0.26	+0.19 +0.03	+0.012 -0.012	n/a -0.03	+21 +12

Average Black Angus EPDs for all Dams active in 2013  
Average Red Angus EPDs for all Dams active in 2013

	Birth Weight	Weaning Weight	Yearling Weight	Milk	Total Maternal	Scrotal Circ.	Calving Ease Direct	Calving Ease Mat.	Stay	HPG	Marbling	REA	Fat	Yield Grade	Carcass Wt
EPD	+3.0 -0.6	+36 +43	+65 +65	+16 +15	+34 +36	+0.37 n/a	+1.2 +2.7	+4.7 +4.1	n/a +9	n/a +9	+0.19 +0.26	+0.04 -0.02	+0.003 -0.013	n/a -0.02	+13 +8

Average Black Angus EPDs for all Sires active in 2013  
Average Red Angus EPDs for all Sires active in 2013

	Birth Weight	Weaning Weight	Yearling Weight	Milk	Total Maternal	Scrotal Circ.	Calving Ease Direct	Calving Ease Mat.	Stay	HPG	Marbling	REA	Fat	Yield Grade	Carcass Wt
EPD	+2.7 -0.6	+42 +48	+76 +76	+19 +16	+40 +40	+0.54 n/a	+2.7 +2.7	+5.9 +4.2	n/a +9	n/a +9	+0.27 +0.26	+0.17 +0.02	+0.009 -0.009	n/a 0.00	+20 +14

*Please join us for lunch prior to the sale*

## Terms & Conditions

**CATTLE INSPECTION:** All carry permanent identity tags, corresponding to Sale Lot Numbers. All shall be available for inspection prior to sale.

**BREEDING GUARANTEE:** All cattle are sound and sold with a responsible breeder guarantee of satisfaction. In the event of any unlikely dispute, the regular terms and conditions, standard with the Canadian Aberdeen Angus Association shall apply.

**MAIL BIDS:** May be entrusted in complete confidence to any of the Sale Staff listed or to Douglas J. Henderson & Associates Ltd.

**INSURANCE:** Ownership risk to purchaser commences when the Auctioneer's hammer falls. Livestock coverage will be available at the clerk's desk from the appointed representatives on sale day, also from the sale management at any time.

**TERMS OF SALE:** Are cash or cheque at par, payable to Clerks of the Sale on Sale Day. No release will be given until satisfactory settlement has been made. We reserve the right to withhold animals from shipment for whom payments have not been received prior to departure times.

**ALL PERSONS** who attend the Sale do so at their own risk, and the Owners, Sale Management and Sale Staff assume no liability, legal or otherwise, for property loss or for any accidents that may occur.

# Introducing

## XO Crowfoot 0102X

We are proud to introduce  
Crowfoot 0102X, a black son of  
Red Crowfoot Moonshine 8081U.

0102X will receive heavy AI use and will  
walk the pastures here at Ole Farms.

0102X was the high selling son of  
Moonshine at the Crowfoot Dispersal  
in 2013 for \$42,000.
