## Welcome

to Ole Farms first ever Female Production Sale. We are offering every XY and Z female that had a heifer calf. Her heifer calf sells as well. In the summer of 2016 we bred over 1300 registered Angus females which is taking us close to our limits on the numbers of purebreds we are prepared to manage.

It's very seldom operations like ours allow top end females to leave their programs making this a real opportunity. Included in this group are some top end cows that would have entered our embryo donor pen. Most of our herd has been sourced from Crowfoot Cattle Company who has had a profound impact on many top herds across the country. As you will see by the pedigrees and the phenotype of the cows, we have been very focused on sound, functional cattle. We have built our program around older pedigrees that produce consistent results.

Over the past 20 years we have established a large following of commercial breeders who understand cattle economics and honor us as their source of genetic improvement.

We are very proud of the pairs we are offering in this year's sale. Whether you are starting a seed stock herd or adding to an existing one, We feel confident that these cows will get the job done.

Travis

Graham & Leslie, Carl & Ace Olson

Cheryl, Frazer & Angus 'Gus' Andrews

Warm wishes from our family to yours

*These four cows have a huge influence on our herd.  
These four matriarchs will have sons that over their life  
should sire over 1,000 offspring at Ole Farms.*

- 1. PROFITABILITY:** At Ole Farms we breed cattle so as to maximize long term profitability. By breeding cattle that are profitable for us, we know they will work for you as well.
- 2. PHENOTYPE:** We strive to produce thick, deep-bodied cattle with lots of capacity. The right kind.
- 3. HARSH ENVIRONMENT:** At Ole Farms we raise cattle in volume with minimal mechanical intervention. We swath graze and bale graze. We are in a high rainfall area. A lot of our pasture is on low land. Pasture and forage volume is good but quality is lower and northern Alberta is significantly colder than many areas in North America. Our cattle are developed under tough conditions. If they work here, they should work on your operation.
- 4. MODERATE FRAME:** Research has shown that pounds of calf weaned per acre can be maximized with moderate cows. On our way to optimizing frame size, we find our cows are shorter, but not lighter.
- 5. CALVING EASE:** We emphasize calving ease. We seldom pull a calf. All cows and heifers are calved in May and June with little supervision. Heifers are only checked once or twice per day.
- 6. FEET AND UDDERS:** We stringently cull cattle for feet and udder problems. If they have a problem they are gone. Udders on our cows are very strong. None of our sale bulls have had their feet trimmed.
- 7. MOTHER NATURE:** We believe Mother Nature is the best judge of cattle.
- 8. OVER FEEDING:** We do not hide our cattle behind heavy feed. These cows are in good working condition.
- 9. VOLUME:** We raise and sell cattle in volume. We run 1500 cows and don't have time for high maintenance. We calved 1000 purebred cows this spring, which is one of the largest Purebred Angus herds in Canada. These purebreds are raised under ranch conditions with no special attention given to them.
- 10. SHARING IN THE EXCITEMENT OF AGRICULTURE:** We encourage you to come and visit, exchange ideas, and share refreshments with us. We have started a PROFIT CENTERED PERFORMANCE GROUP of producers. The goal is to share production and expense data in order to help each other become more profitable. If you are interested, let us know.

*Best wishes to you all. If we can be of any help, please call.*

### Did You Know?

*We artificially inseminated 1195 head in the summer of 2016.  
This extra effort enables us to use some of the best Angus genetics.*

Can't state enough how much we love our Everlast daughters. They stay true to their name and just seem to be so productive and sound. 385Y is a maternal sister to Ole Alliance 685Z who is exceptionally popular at Ole Farms because of his impeccable phenotype and light birthweight. Very deep and attractive 395Y is a sale feature. Life time production index of 110 at weaning.

Four generations of calving ease sires on both sides of her pedigree. One thing we have learned over the past 12 years of selling bulls is there is always a strong demand for heifer bulls and 689Y should produce nothing but calving ease bulls. Life time producing index of 107 at weaning.

EPDs are an estimation of an animal's breeding value based on its pedigree and performance.

EPDs indicate the average performance expected from an animal's progeny in comparison to another animal or to the breed average.

They allow for fair comparison of animals' genetics across herds, regardless of environment and management differences.

### Growth EPDs

**BW = Birth Weight:** Expressed in lbs, predicts on average how much heavier or lighter than the breed average an animal's calves will be. If the breed average is 3 and an Angus animal has a BW EPD of 5 then on average this animal's calves will be 2 lbs heavier than the breed average.

**WW = Weaning Weight:** Expressed in lbs, predicts comparative progeny weight at 205 days of age. This EPD reflects pre-weaning growth potential that an animal is expected to contribute to its calves.

**YW = Yearling Weight:** Expressed in lbs, predicts the differences in progeny performance at 365 days. The YW EPD reflects the animal's calves' potential for post-weaning growth.

#### Fertility Trait EPDs

**Milk = Milk:** Expressed in lbs. of calf weaned, this is a prediction of an animal's daughter's milking ability.

**TM = Total Maternal:** A measurement comprised of half of an animal's Milk EPD and half of its additive genetic contribution to its calves' weaning weights.

**CED = Calving Ease Direct:** Predicts the percentage of unassisted birthings expected from an animal's calves. This EPD reflects a combination of gestational growth and a calf's conformation. The higher the CED EPD, the more likely it is that the animal's calves will be born without assistance.

**MCE = Maternal Calving Ease:** Predicts the percentage of unassisted births an animal's daughters will have with their first calves. This is a reflection of daughters' pelvic shape and level of hormonal reactions and stamina during labour. The higher the MCE EPD, the more likely it is that the animal's daughters will give birth without assistance.

**SC = Scrotal Circumference:** This EPD predicts the average scrotal circumference for an animal's sons. Scrotal circumference is used to gauge a bull's fertility.

**Stay = Stayability:** The probability that a heifer will be retained in a herd past 6 years of age.

**HP = Heifer Pregnancy:** The probability, in percentage, that an animal's daughters will conceive at 2 years of age.

### Carcass Trait EPDs

**YG = Yield Grade:** expressed in USDA yield grade score, this EPD predicts differences in carcass yield grade score to be expected from progeny.

**REA = Rib Eye Area:** Expressed in square inches, predicts the size of the rib eye muscle at the 12th rib in the average calf.

**CW = Carcass Weight:** Expressed in lbs., this EPD predicts differences in the average hot carcass weight in progeny.

**Marb = Marbling:** A predictor of the level of intramuscular fat in the rib eye muscle, this EPD is calculated using both ultrasound and carcass data.

**Fat = Fat:** Expressed in inches, predicts the comparative depth of back fat over the 12th rib in the average calf.

### Colour Indicators

**RC = Red Carrier:** a black-hided animal that has inherited the allele that codes for red coat colour but does not display the phenotype as the allele is recessive to the allele that codes for black hide colour

**EE** – homozygous for black coat color gene

**Ee** – black hided animal that is a carrier of the red coat color gene

**ee** – red hided animal

### Genetic Evaluation Angus Breed Averages

To evaluate an animal using EPDs it should be compared to the breed average.

This is not zero (0) for any trait, rather, it is an average of all the values for animals of that category in the breed, and changes every evaluation.

EPD breed averages are calculated for three categories:

non parents under 2 years of age, active dams, and active sires.

PLEASE NOTE: Red Angus EPDs CANNOT be compared to Black Angus EPDs.

The numbers are calculated in separate and unrelated genetic evaluations.

Below are the current breed averages.

#### Average BLACK ANGUS EPDS / RED ANGUS EPDS for all CALVES born in 2015

*Thanks to All Buyers & Bidders - Season's Greetings*

### Terms & Conditions

**CATTLE INSPECTION:** All carry permanent identity tags, corresponding to Sale Lot Numbers. All shall be available for inspection prior to sale.

**BREEDING GUARANTEE:** All cattle are sound and sold with a responsible breeder guarantee of satisfaction. In the event of any unlikely dispute, the regular terms and conditions, standard with the Canadian Aberdeen Angus Association shall apply.

**MAIL BIDS:** May be entrusted in complete confidence to any of the Sale Staff listed or to Douglas J. Henderson & Associates Ltd.

**INSURANCE:** Ownership risk to purchaser commences when the Auctioneer's hammer falls. Livestock coverage will be available at the clerk's desk from the appointed representatives on sale day, also from the sale management at any time.

**TERMS OF SALE:** Cash or cheque at par, payable to Clerks of the Sale on Sale Day. No release will be given until satisfactory settlement has been made. We reserve the right to withhold animals from shipment for whom payments have not been received prior to departure times.

**ALL PERSONS** who attend the Sale do so at their own risk, and the Owners, Sale Management and Sale Staff assume no liability, legal or otherwise, for property loss or for any accidents that may occur.
