RED ANGUS BREED EPD AVERAGES

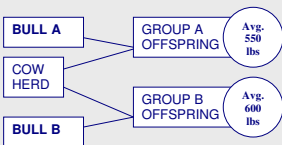

- allow breeders to estimate an animal's value as a parent
- allow a fair comparison of breeding value by removing environmental bias such as climate, feed and special management
- help breeders make informed decisions regarding breeding stock selection by evaluating numerous traits including growth-related traits (BW, WW, YW, Milk), carcass (REA, FAT, %IMF, etc.) and reproductive efficiency (CE, MCE, SC)
- estimate the average calf performance of one parent compared to the average calf performance of another parent, **assuming similar mates**

EPDs are an indication of how an animal's calves will perform on average compared to another animal's calves.

For example, if Bull A (weaning weight EPD of +10) and Bull B (WW of +60) were randomly mated with ten similar cows, we would expect the group average weaning weight of Bull A's offspring to be 50 lbs lighter than that of Bull B's (60-10=50).

Calf	A	B
1	500	400
2	510	450
3	520	500
4	530	550
5	540	600
6	560	600
7	570	650
8	580	700
9	590	750
10	600	800
Avg.	550	600

Note that not all calves from Bull B have a higher weaning weight, but the average is 50 lbs higher.

Accuracy – reflects the reliability of the EPD value. High accuracy values (>.70) mean the EPD value is closer to the true breeding value than an EPD value with a lower accuracy (<.20).

EPD Averages	
CE	+2.7
MCE	+4.6
BW	-0.6
WW	+49
YW	+75
MILK	+16
TM	+41

Tools for evaluating animals include EPDs, pedigree information, DNA test information, and visual assessment.

A NOTE FROM THE RODGERS...

Welcome to our 42nd annual yearling bull sale!! The year has been filled with many well deserved surprises from one end of the livestock sector to the other. Record setting cull cow & cull bull prices followed by record setting calf and bred markets. From everything that is being talked about this climate will be steady for some time yet!!

As usual the bulls offered in this sale were selected from 158 bull calves born in 2014 with 93 going on test. They were weighed off on February 13th with an ADG of 2.88 lbs/day. The semen test will take place in mid March. They are culled based on birth weight, performance, structure, temperament, scrotal development. Bulls can be viewed at South Slope Feeders (Rainier) until Monday, April 13. We DO NOT creep feed or trim feet. Our cattle are on the Pfizer Gold Program.

Our cow herd is run like commercial cattle, as unassisted as possible. Cows are brought in off grass just prior to calving and returned to grass as soon as possible, allowing them to develop on their own. We like cattle that can do it themselves with as little intervention as possible. Rigorous culling is done every year to maintain efficiencies in all facets and traits.

We offer a sight unseen program so for any reason you cannot make the sale please contact us or one of the sales staff and we will hold your bid in the strictest of confidence. The sale is not final until you approve of the bull. If you are unable to attend the sale and would like to participate, the sale will be broadcast on the internet on the Perlich Brother's Auction Market website www.perlich.com. **This is NOT an internet sale.** In order to bid you must contact one of the sales staff prior to the sale and they will contact you prior to the bull coming into the ring.

100% Satisfaction Guaranteed!

Thank you, we look forward to seeing you at the sale!
