RED & BLACK ANGUS BULL SALE

1:00pm | Silver Sage Community Corral | Brooks, Alberta

MARCH 21, 2015

LAZY MC ANGUS • NCJ CATTLE CO • BANDURA RANCHES

UNDERSTANDING ULTRASOUND

Ultrasound data was scanned by Jamie Jensen, a certified UGC and CUP technician, meeting standards set by many breed associations. The accuracy is high enough that bulls selected based upon ultrasound, result in positive genetic change in progeny carcass traits. Heritability for carcass traits are moderate to high which is slightly higher than birth weights, weaning weights and yearling weights.

MARBLING Marbling is the best indicator we have to tell us what kind of beef eating experience we will have! Research shows that average AAA and above marbling produces the most satisfied customers. As marbling increases, so does the juiciness, the flavour fullness, and the tenderness.

Below 2.30.....Single A.....Standard
2.30-3.99.....Double AA.....Select
4.00-9.89.....Triple AAA.....Choice

BACK FAT (MM) Fat depth decreases lean meat yield. Fat bulls have less lean meat/muscle in the carcass. The fat measurement also gives an indication of the bulls fleshing ability. Calves from a bull with very little fat may finish too slowly in the feedlot. Body condition score (fat depth) in females is related to their ability to reach puberty at an early

age, produce milk, and rebreed and maintain a short calving interval. On the other hand, bulls carrying excessive fat may suffer reduced fertility.

RIBEYE AREA (IN²) The ribeye is the largest muscle in the body at birth so REA gives an indication of overall carcass muscling.

CUTABILITY (%LMY) Cutability is the percentage lean meat yield in the carcass. Yield grade is an important factor in both Canada and the USA. Producing calves with a high genetic potential for this trait can be an important objective of a breeding program. Back fat will reduce yield by 7 to 8 times what REA will increase yield.

SUMMARY Like all traits, we should avoid the extremes. Moderation is the key. As producers we need to evaluate our own females and then decide what kind of progeny we want to produce. This should dictate what kind of sire we want to purchase.

Ultrasound by Jamie Jensen, Taber, AB 403.892.3486

www.jentechultrasound.com

RANCHERS GUIDE TO EPDS

The bull is merely a delivery system for the genetics he passes on. Performing this job requires them to be sound, fertile and athletic. However, it is the reliability of their genetic predictions that ultimately bear out their true value to producers' bottom line.

Know the markets you wish to hit – feeder calves, yearling, replacement females. Have a true appraisal of how close your cow herd is to that target, understanding your cows have to continue to live and reproduce in your environment. Identify bulls whose EPDs predict the ability to move your cowherd in the right direction for the traits required to hit your market end point.

	BW	WW	YW	MM	TM
Red Angus	-0.6	49	75	19	41
Black Angus	2.7	49	79	19	41

DNA TESTING Genomics (DNA testing) is cutting edge technology for identifying genetics that contribute to beef quality. Producers can use this information to add value to their herd and enable a positive impact to your bottom line.

By combining DNA tests with other information it is possible to make breeding decisions based on more precise information regarding each individual animal's genetics and to ultimately shorten the time and number of generations necessary to see practical results.

Igenity meat trait results report the scores obtained from analysis of multiple markers in genes related to carcass composition. This analysis associates the genotype result with the magnitude, or size of the trait identified. In general, animals with low scores for fat thickness and yield grade will have high scores for hot carcass weight and ribeye area.

Buy L-tt bulls to improve your herd's potential for marbling. Retain cows and select replacement heifers with desired leptin genotype, along with other genetic traits.

OTHER CATALOG TERMS

CALVING EASE SCORES

- ★★★ Recommended for use on moderate framed first calf heifers for minimal or no calving trouble
- ★★ Recommended for use on large framed first calf heifers for minimal or no calving trouble.
- ★ Recommended for use on cows for minimal or no calving trouble.

CATALOGUE

 Catalogue and videos available online.

www.lazymcangus.com • www.ncjcattle.com • www.banduraranches.com

PREVIEW THE BULLS Bulls can also be viewed prior to the sale at Lazy MC Angus and Bandura Ranches. Visitors always welcome!

INSURANCE If you plan to leave your bull with us we ask that you insure him. Insurance representative will be available sale day.

Larry Toner, Kelfield, SK
306.932.4866 or 306.834.7652
Email: larrytoner@xplornet.com
Web: stockmens.xbar9.ca

VIDEO SALE All bulls will be video'd ahead of the sale. Videos will be available on-line. Please call us for a DVD if your internet connection does not allow for adequate viewing. All of the bulls will be penned in the Silver Sage for viewing prior to the sale. Rather than stressing the bulls and the crew, the auction will be conducted using large screen video of each bull. This will also give bidders the opportunity to view reference animals at the same time.

TERMS Payment due at time of purchase. All cattle sell under the standard terms and conditions of the Canadian Angus Association. EPD's in this catalog are the most recent available at press time. Any announcements made sale day supersede information printed in this catalog. The bulls will be semen tested, kept after the sale, delivered and fully guaranteed. Scrotal circumferences and current weights available sale day. The sellers reserve the right to collect semen on any bull for in-herd use only at the seller's expense and buyers convenience.

ONLINE PURCHASING We invite those of you who are unable to attend the sale to be part of the action! With the help of Direct Livestock Marketing Services, we are able to give you a live connection to the event. Real-time bidding will be available via the internet for this sale. Live audio and video will allow buyers to bid on animals as if they were present at the sale. Instructions for viewing and bidding are as follows:

1. Visit www.dlms.ca
2. Fill out the registration form located under 'registration'.
3. Click on 'downloads' and follow the the four step instruction on the screen.
4. Click test your computer. You will see the 'Test Video' and 'Bid Control' box. To be approved as a bidder or any other questions please email Mark at mshologan@dlms.ca or 780.699.5082

Welcome to our 19th annual 'Signature Series'

Bull sale. Our family along with the Jensen's and Bandura's are looking forward to hosting this event on March 20th and 21st.

Our focus here at Lazy MC has always been on herd improvement for the commercial cattleman. We use a moderate, trait balanced approach; using all of the technologies within the industry to evaluate the genetic merit of our cattle. We have, once again, utilized genetically enhanced EPD's powered by HD50K from Zoetis. The herd sires in our program offer calving ease, structure and muscle shape, all in moderate frame. They have been used around the world and we are very thankful for the purebred and commercial acceptance of Lazy MC genetics.

The sons of our 2014 Fort Worth National Champion bull, Red Lazy MC Trooper 21Y, are an impressive group. They offer tremendous phenotype, structure and maternal strength. 5 full brothers are on offer out of 'Cowboy Cut's' dam. Once again our 2012 Denver National Champion bull, Red Lazy MC Eye Spy 64Y, has a very complete set of sons - highlighted by 'Legend'; a full brother to our exciting herd sire WPRA Legacy A-314. The NCJ Lazy MC Venom sons are the top performing group with excellent muscle shape and hair coats. The Forum, Hustle, Xcaliber and RoughRider sons offer appealing pedigrees and a consistent type.

We invite you to be our guest on the evening of Friday, March 20, to view the bulls and enjoy an Angus steak. We are very pleased to once again have The Canadian Angus Association on board. We will

have the Angus CCIA tags available to purchase. Cheryl Hazenberg will be available to discuss the advantages of the Rancher Endorsed programs. With every bull purchased you will receive a free bag of tags from the 'Signature Series' bull sale group. We will also have our staff from Bow Valley Genetics Ltd. as well as Zoetis representatives on hand to discuss new information.

Once again we are having a video sale. All the bulls will be housed inside for viewing. Please join us at the 'Silver Sage' for some lunch and hospitality. For any questions about the sale offering or to view the bulls and cowherds, please give us a call. If you are unable to make the sale, we will have internet viewing and bidding. Visit www.dlms.ca or call Mark Shologan at (780)699-5082.

Please remember to take advantage of the many options our sale offers, including Angus tags and a purchase deduction of \$100 per bull when taken home sale day. Bulls coming back home will be wintered free of charge, but we ask that you have them insured. Insurance will be available sale day.

All sale bulls have had foot rot vaccine and have been BVD tested free. Examinations were performed by Bow Valley Vet Clinic, Dr. Rob Stables and Dr. Matt Kumlin. All sale bulls are fully guaranteed.

Kind regards,

Clint, Angela, Layne & Laurie Morasch

Forum has proven to be an excellent calving ease sire. Both sons and daughters look to offer extra muscling and fleshing ability. He is a full brother to Red Lazy MC CC Detour 2W. Forum ranks in the top 20% of the breed for calving ease and top 10% for BW, YG, REA and FAT. Owned with McMillen Ranches, Ltd.

We are very excited to add this maternal brother to Jackhammer to our program. Only improving with age, Venom offers a tremendous EPD package, and is backed by a great dam and sire. His first calves topped several sales across the nation including our 2014 Select Heifer Sale in Texas. Venom will add muscle, body shape and bone along with that dark red color. Venom is in the top 10% for WW, YW and CW. Owned with NCJ Cattle Co and BCR Ventures.

This fabulous female speaks for herself in her impressive show and production record! One of our top donor cows, she has produced Detour 2W and Forum 223Y, both serving as herdsires in our lineup, and her daughters have also become backbones of the Lazy MC Program, including Red Lazy MC Sparkle 2U. Named RBC Supreme Female in 2008, her progeny have had a major influence in herds worldwide.

BETTER BULL BUYING

Through GE-EPDs powered by HD 50K from Zoetis

AUTHOR: Melodie Chan, DVM, Senior Manager Veterinary Services, Zoetis

The more cow-calf producers know about the bulls they buy, the more they can take advantage of the genetic forces — selection and mating — that drive the productivity and value of each calf-crop. With genomically enhanced expected progeny differences (GE-EPDs) powered by High-Density (HD) 50K from Zoetis, commercial users can unlock the power of these forces like never before.

Lazy MC Angus is leading the way by being one of the first in Canada to invest in genomics for the benefit of their customers at their upcoming bull sale. The value of including the HD50K information into the existing CAA genetic evaluation is that it provides valuable insight into the genetic potential of non-parent bulls for 15 economically relevant traits. The resulting increase in EPD accuracy for Red Angus is generally equivalent to tested bulls having an initial progeny proof of more than a dozen calves/carcasses/daughters with performance data contributing to their EPDs (ranges from eight to 26 progeny), depending upon the trait.

In simple rancher terms, GE-EPDs provide you with the most accurate EPD information available for young bulls with limited to no progeny. This means that you'll know what you'll get before you get it – AND before you buy it!

Now that's a significant investment made by Lazy MC Angus to make sure their customers are buying the right bulls that fit their needs.

Come out and learn more about genomically enhanced EPDs (GE-EPDs) at the Lazy MC Steak Supper on March 20th at the Silver Sage Arena in Brooks. Supper will be served at 7pm with presentations to follow.

Phone 403.378.3043
Cell 403.363.8774
Email bandura@eidnet.org
www.banduraranches.com

We at Bandura Ranches would like to welcome you all to this year's 19th Signature Series bull sale.

We are very excited about the offering that we have to offer you this year. I feel it is a very uniform set of bulls. The bulls have being bred to add thickness, muscle, and most of all, pounds to your calf crop.

I really wanted to have a good offering of 2 year olds for the sale , so we kept back 30 yearling bulls last year – and wound up selling 22 bulls off the farm. So I phoned my good friends Steve and Priscilla Harvey

from Chute Creek Angus in Penticton, BC to see if they could help me out and did they ever! They pulled out their top 16 bull calves and sent them to me. The Harveys have made our 2 year old offering one that any breeder would be proud of.

Please feel free to call or stop in and have a look at the cow herd. Don't forget to join us Friday night for our annual steak dinner.

Sincerely,

*Joe & Sandy Bandura and family

This moderate framed, outcross bull has warranted the attention of some top cattlemen. He is phenotypically outstanding. We are very excited about his progeny. He stamps them all the same, with deep soggy long bodies and a great hip. We are calving out our second group of Campbell daughters this year.

XX BULL SALE

March 19, 2016 | Bassano, AB

hosted by Lazy MC, Bandura Ranches, NCJ Cattle

SOUTHLAND FREE STYLE 163U

EPDS	BW	WW	YW	MM	TM	REA	MARB
	6.6	52	80	23	49	-0.2	0.03

Have a look at this herd sire if you are looking for length, eye appeal and a big, stout quarter. This bull is a power house red-meat bull. He was a very successful show bull for Southland and Bandura and roams the pastures here as one of our leading herd bulls. His daughters look terrific and have mothered several sale lots.

Swagger was bought out of the Masterpiece sale by Chute Creek Angus for \$37,500 for a half interest. He has done an awesome job of breeding, with his progeny very similar to himself...plenty of thickness without losing that unique character and presence. He has sired numerous champions and high sellers.

NO BULL.

No bull? No breeding program. When you've got lame bulls due to footrot, it's like having no bulls at all. Fusogard® vaccine is the simple and straightforward way to decrease the severity of footrot and keep your breeding program on track.

FUSOGARD® | POWERFUL | ECONOMICAL | PROACTIVE

FUSOGARD®

LAME BULL = NO BULL

Getting cows bred on time is pivotal to the success of every cow-calf operation. And the most vital animal on the breeding field often gets the least consideration ... the bull.

Producers spend a great deal of time and money ensuring that the bulls they purchase have the right genetics for their cow herd. Many producers also recognize the value of an annual breeding soundness examination before the breeding season. But far less attention is paid to protecting these reproductive assets from a common infection that can undermine a successful breeding season.

Footrot is caused by the bacterium *Fusobacterium necrophorum*, an organism commonly found in the digestive tract of cattle. Any surface contaminated with manure may contain this organism. *F. necrophorum* can also escape from the rumen and circulate internally. An animal's environment plays a role in the development of footrot. Wet, muddy conditions or rough, abrasive terrain can cut or bruise the skin between the toes, creating the right conditions for the bacteria to multiply and cause disease.

The first signs of footrot are swelling just above the hoof and lameness in the affected foot. As the swelling increases, the toes spread apart and the animal becomes increasingly lame. Ultimately,

FUSOGARD®

the skin between the toes dies and breaks open, releasing infected debris and the foul odour associated with footrot. Decreased appetite and weight loss are secondary effects. Although rarely fatal, the condition can result in tendon sheath infections and arthritis if not treated promptly. Furthermore, footrot is contagious because the infective material released from the feet of affected animals increases the likelihood that other animals will be exposed.

The cost of footrot is much higher than the price of treatment. A lame bull, especially one that is lame on a hind foot, is unlikely to breed many cows. If he quits working, even for part of the breeding season, you may be faced with late and open cows in the fall. That means more culled animals, more late-born calves and shorter calving to breeding intervals for your cows next spring. The good news for producers is that a footrot vaccination is available that can decrease the incidence and severity of this disease in your herd.

Combined with a sound nutrition program and good health management practices, footrot vaccination can help keep the upcoming breeding season on track. Talk to your herd veterinarian about prevention strategies for your herd.

BOW VALLEY GENETICS

COMPLETE REPRODUCTIVE SERVICES CENTRE

Embryo Transfer Services ** Export Qualified Semen Collection and Bull Stud ** Certified for Export Production
Owner's Use Semen ** Embryo & Semen Storage & Distribution

Bow Valley Genetics Ltd. is a complete bovine reproductive centre. We opened in 2009 with the construction of the export embryo collection and transfer division and owner's use semen collection. In January of 2014, the larger semen collection facility opened it's doors to accommodate bulls being drawn for export to countries around the world. We offer complete distribution and storage services along with our collections. Rob & Candy Stables, owners and veterinarians at Bow Valley Vet Clinic, and Clint and Angela Morasch of Lazy MC Angus have partnered in Bow Valley Genetics Ltd. with the vision to supply cattle breeders with industry leading service and quality care of livestock to maximize their genetic potential and marketing efforts.

Dear Signature Series Sale Team,

Over the past four years, you have given away almost 6000 Angus tags and through your sale and we have sold an additional 10,800 RFID tags at the sale. More Angus influenced calves are branded with the Angus tag than ever before thanks to you. I have also noticed a number of commercial customers from your sale now purchasing Angus tags and branding their calves as Angus influenced animals.

I look forward to attending your sale again this year and distributing the RFID tags you will be giving away and answering any questions about the program that any attendee may have. We would once again like to thank you for your continued support.

As always, if there is anything additional that we can do to help producers be successful we will gladly help in any capacity we can. Thank you from the entire team at the Canadian Angus Association.

Sincerely,

Cheryl Hazenberg

FlaxLic: The Block

Everyone's Talking About

FlaxLic now has
a U.S. Product and
Process Patent for elevating
Lipid Blood Levels in Livestock.

Item	Control	Alpha-linolenic Acid
5-10 mm follicles on day 5	1.4	1.4
5-10 mm follicles on day 15	1.8	3.4
Max diameter of 1" dominant follicle, mm	13.2	15.6
Max diameter of preovulatory follicle, mm	17.0	18.3

Larger follicles >>> greater estrogen

Here's What They're Saying

FlaxLic® is an all-natural supplement containing a high level of Alpha-linolenic acid, an omega-3 fatty acid. Fatty acids are used by cattle for energy, cell membrane structure and integrity and regulating hormones. This unique supplement is the first low-moisture block to contain a high level of ALA beneficial for optimal performance.

In addition, **FlaxLic** is highly fortified with essential vitamins and minerals. This block is produced using a state-of-the-art, patented process that provides a unique 24-hour feeding system.

Get your herd ready for breeding season!
