WELCOME

Thank you for your interest in our breeding program. Many of you are repeat buyers and we sincerely thank-you for your continued support. Anyone who is familiar with our program is well aware that our cows are not spoiled. They are expected to be efficient forage conversion machines. They are bred to calve unassisted and nurse without human intervention. We normally attend to <1% of births on our ranch. There's no time (or patience) for bad udders, problem calvers or lack of vigour. On bulls we retain for breeding in our own herd, they absolutely must be born unassisted and vigorous enough to nurse without assistance. We believe nursing ability is heritable and selecting for it over several generations, it really builds itself into the herd. All feet and udders are scored on a subjective point system at the time of calving and that information is used for our breeding and selection purposes and is available to you on every bull in the offering.

Calving beginning at the end of April, our primary source of energy is the spring flush of green grass – the cheapest energy you can find. It's hard to explain just how much less labour and expense is involved with calving on grass until you try it. We are certainly sold on it and won't be going back to winter calving. This moves our breeding season to July and August where cattle are exposed for 60 days. It's a no second chances program, wean a calf and get bred or go down the trail. This year we have started only exposing replacement heifers for 42 days to further select for highly fertile cattle. We believe that having a short breeding season is of utmost importance for seedstock producers. We need to be putting pressure on fertility since it is so highly correlated to profitability in beef production. The good ones will breed on and our clients will prosper with these genetics.

Moving into the fall our cattle are grazed on standing stockpiled grass for as long as we can. This year we made it to about December 1st, and we are always aiming to graze later. Calves are weaned in October/November

depending on the weather and back-grounded on a least-cost forage based ration. Thankfully for the ample grass this year these sale bulls grazed standing grass until mid-October when they were brought home to be put on an alfalfa silage based total mixed ration.

The mature cows are wintered (all winter) in an extensive grazing system (a field) on the bald Manitoba prairie. The diet is strictly forage. Some years we have grazed corn or swaths, the last few years we have been doing bale grazing. Some cattle thrive in this system, others do not. Every year we remove the cattle that cannot sustain themselves in this system and continue breeding on the easy keeping hardy cattle. Wintering in the fields is one of the primary advantages of the cattle producer and mixed farming operations. The long term benefits in soil fertility and increased organic matter are a true asset to those of us who choose to take advantage of it. We are in a time of record setting beef prices, but much of that is lost to an ever increasing cost of production. Land is increasingly expensive, machinery is more expensive (and less reliable) than ever. Labour is expensive and hard to find. Summer isn't getting any longer and winter isn't getting any shorter. If you're ranching full time that means you need to cover more ground in the same time. If you're trying to get established that means you're working off farm and doing the farm work afterwards. What is the net result? Both parties need cattle that will work for you and return you a dollar. Our breeding program is focused on profit traits. We need cattle that are fertile, sound, moderate framed, well structured with growth and thrift. Cattle with volume, fleshing ability and hardiness. We need cattle that will work for us, because none of us can afford to be running errands for Princess, the special cow. Get it done on your own Princess or you're going down the road. Moral of the story, we need to continually breed for and seek out ways to decrease our direct costs, especially winter feeding costs. We also need to focus on increasing the number of live calves weaned per cow exposed. In short having a highly fertile, efficient cowherd. We are constantly moving towards these goals in our operation and the bulls on offer represent the best cattle that have come out of our system.

We're a 100% family-farm operation. All of the bulls in this sale are a result of breeding decisions, management, sorting and evaluation done by our family. They are genetics that we are willing to put our stamp on and we could use every bull on offer in our own commercial breeding program. Our bulls are certainly not overfed and as always their feet aren't trimmed (there's a place for that called the cull pen). All bulls in the sale have passed a semen test by Dr. Jeff Gervin of the Boissevain Animal Clinic.

Raising two-year old bulls is the focus of our purebred operation. These are virgin two year old bulls. None were sold as yearlings and none have been sold prior to the sale.

All bulls will sell by video. Prior to the sale, videos are available by visiting our website at www.vvvranch.com or by going on YouTube and searching the channel TripleVRanch. You are welcome to come view the bulls at the ranch before sale day too.

Once again thank you for your interest in our cattle. There are some really great bulls out in the pen that will help you position your herd for profitability even when prices are no longer record-breaking.

Hope to see you at the sale.

VACCINATION PROGRAM

All Triple V Ranch bulls are on a multi-component vaccination program to protect against BVD (types 1&2), IBR, PI3, BRSV, shipping fever, Haemophilus, and Clostridial diseases including Tetanus. All bulls have also had two doses of Footrot vaccine as yearlings. The dams of these bulls are annually vaccinated with a pre-breeding modified life vaccine against BVD (types 1&2), IBR, PI3, BRSV and Lepto.

Stand out bull out of a never-miss top cow. 3R has done a great job for us. Both of his grand-dams have had 12+ calves. Longevity & Fertility are number one when it comes to profitability. Best part is this guy comes with good individual performance as well. Should sire you a great set of calves and you'll want to keep all of his daughters for replacements.

Black Red factor caving ease bull. Cow is an extremely easy fleshing, thick cow. The Legacy 99T daughters aren't big cows, but they're thick and they stay thick all year. Daughters of this bull should be ideal for adding feed efficiency and wintering hardiness. Would work great on a set of heifers or cows that need a shot of fleshing ability and style.

THANK YOU'S FOR 2013

Jesse Van Steelandt
for all of his hard work on designing and building the polished conversion to the sale barn

Kelsey Van Steelandt
helping with spring processing and calving

Chris Van Steelandt
helping with fall processing and doing carpentry work around the farm and repairing machinery this fall and doing the website

Thank you for all those who helped on the farm the day of our shop & bale fire
 Melita & Area Fire Department
 Waskada & Area Fire Department
 Allen and Shirley Denys
 Gerry, Wendy & David Vanmackelbergh

All other friends and neighbours that gave a hand and support

Thank you to Sarah Buchanan and Melissa McRae for braving -40 windchills to video our bulls for the sale.

Structure, eye appeal and pedigree sums up this impressive herdsire. Legacy was purchased from Trevor Branvold at GBT Angus, Wawota, SK. His genetics come out of the Ohlde Cattle Co program in Kansas and combines bloodlines of OCC Echelon 857E and OCC Anchor 771A; two of their flag ship sires. Maternally, Legacy's dam is an ET donor for GBT that came out the Bowerman Brother's herd from Meadow Lake, Saskatchewan. A well bred, moderate framed thick bull, Legacy has had 96 calves born to date, averaging 82 lbs with no assists. His BW EPD is in the top 8% of the Angus Breed and his CE EPD in the top 4%.

Triple V Echelon 30U is a paternal grandson of the great OCC Echelon 857E. One of his paternal grandams, Dixie Erica of CH1019, is an ET donor at OCC. The other, Crowfoot G Eileen 9156 is an Elite Dam with the CAA, posting an average weaning index of 106 on nine calves. His dam is a perfect uddered Angus cow. She traces back to Prairielane Ideal 1418-0051 twice in her pedigree, who is in the top 1% of the breed for both WW and YW EPD's, with a shot of N Bar Emulation EXT. 30U is one of these all around bulls that has the genetics to be used anywhere, his calves come easy, are eye appealing and thick and have lots of growth as well.

A son of VVV Dusty Double Click 66N we are using in our herd. He is moderate in frame, growing from 92 pounds at birth to a 205 day weight of 701. His dam is sired by the New Zealand bull Pinebank Waigroup 41/97. She is a large volume, easy fleshing cow with a WI of 104 on four progeny. She is a member of the Pearl Cow family that produces exceptionally well. 46X's progeny have all come unassisted with an average BW of 84 lbs. They have extreme vigor at birth, with growth potential for profitable cattle.

A very complete son of VVV Dusty Double Click 66N. He is out of an outstanding Angus cow that has 13 calves with no misses. Fertility and longevity are bred in; she has an average WI of 104 on 13 progeny. Triple V Dusty 166X has the muscling, volume and capacity we look for when making use of forage to produce high quality beef.

OSF

Oscar 53U is a son of Red Crowfoot Ole's Oscar 2042M, one of the most popular Red Angus Bulls in Canada. Ole Oscar himself was phenotypically excellent and his numbers showed extreme calving ease followed by rapid growth to weaning though to yearling. 53U's dam is a big barreled power cow that came out of the Prairieline herd. Red Triple V Oscar's 53U's EPD's place him as follows: WW top 15%, YW top 4%, Milk top 4%, Total Maternal top 1%. If you want growth and performance the Oscar 53U sons will work for you.

TRIPLE V RANCH
IS A REGISTERED
VERIFIED
BEEF PRODUCER

MORE INFORMATION

Triple V Ranch is located 1 mile West of Medora on Hwy 3, then 2 1/2 miles South on Road 144W.

The animal becomes the responsibility of the purchaser as soon as it is sold. Insurance will be available sale day. All bulls in the sale offering will be vet inspected and have passed a semen test prior to the sale.

Explanation of Terms

We scored the cows' udders and feet at the time of calving with 1 being the poor end of the scale and 5 being the best

Calving Ease

The calving ease of the bulls is done with a number system: the higher the number that better the calving ease. 4 and 5 bulls are considered to be suitable for heifers; 3 for well grown heifers or cows; below 3 should only be used on cows.

TERMS

BREEDING GUARANTEE: All cattle are sound and right, and sell with a responsible breeder guarantee of satisfaction. In the event of an unlikely dispute, the regular terms and conditions of the Canadian Angus Association shall apply.

TRIPLE V RANCH BULL WARRANTY: Triple V Ranch guarantees to sell you a bull that is structurally sound and has passed a breeding soundness evaluation by a licensed veterinarian. Should any Triple V bull fail to be a satisfactory breeder – unable to physically service a cow or heifer – he will be replaced with a bull of equal value. Should this not be possible, an adjustment will be made to reflect the value of the bull in question, or a credit will be given towards the purchase of another bull.

WE GUARANTEE TO PROVIDE YOU A SOUND, BREEDING BULL.

We, however, will not provide replacement or adjustment for physical injury or mismanagement. With this in mind, we stress the importance of insurance on your bull. Should you have a problem with your bull, notify us right away and we will make sure you are satisfied with your bull.

TERMS: The terms of the sale are cash or cheque payable in Canadian funds; U.S. Funds will be accepted at current rate of exchange at sale location. The right of property shall not pass until after settlement is made. All settlement must be made with the clerks of the sale before any cattle will be released.

RISK: All animals are at the purchaser's risk as soon as the Auctioneer's hammer falls. Insurance will be available on sale day. We encourage you to insure your purchase prior to the animal returning to your farm. All persons who attend the sale do so at their own risk. The owners and sale staff assume no liability, legal or otherwise for property loss or any accidents that may occur.

DISPUTES: In case of disputes, the bidding will be reopened between the parties involved. If no further bid is made the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision will be final.

INTEREST: Triple V Ranch reserve the right to retain an interest in any of the animals selling. The consignors reserve the right to collect 100 doses of semen on any bull in this sale at their expense and the buyer's convenience. The semen is for in herd use only.

PHONE OR MAIL BIDS: If you are unable to attend sale day, you can entrust your bid in confidence with the Sale Staff or the Consignors.

ANNOUNCEMENTS: Changes of information of any kind in this catalogue will be announced from the auction block and such announcements will take precedence.

CATTLE INSPECTION: All bulls carry permanent Canadian Cattle Identification Tags as well as tags corresponding to Sale Lot Numbers.

DELIVERY OPTIONS: We will deduct \$50 off the purchase price of your bull if you take him home sale day. Free delivery up to 300 miles will be provided immediately following the sale and occurs over about a month. We try to organize trips for multiple deliveries each day. If you cannot take your bull when we are in your area, you will be responsible for picking him up at the ranch. Bulls may stay for one month after the sale, at which time they must be picked up. If you cannot pick your bull up at this time feed costs will be \$3/head per day (after 30 days). Insurance is necessary for using this option. Keystone Livestock Services will be available to help with your insurance needs – Lois McRae - 204-728-3058.

SIGHT UNSEEN PURCHASE PLAN

We would like to have you as our guests at our Bull Sale, however if you are unable to attend, we have a program designed to help you out. A number of our customers buy their bulls sight unseen. We will discuss your bull needs with you and select a bull that fits your criteria. We will deliver the bull to your yard. Your satisfaction is 100% guaranteed. If you don't like the bull, you don't own him. Simple as that! Call Dan (204) 665-2448 home, (204) 522-0092 cell; Matt (204) 264-0706 or any of the sale staff and entrust your bids in confidence. They'll be happy to personally look after you. 100% Satisfaction guarantee.
