Welcome to Our Complete Herd Dispersal!

Dear Friends,

On behalf of my family, I wish to extend an invitation at attend Highwood Auction on December 10, 2011 for the complete dispersal of the Willabar Ranch herd of Aberdeen Angus Cattle.

It seems there are many catch phrases that get used in these situations, I personally prefer "Opportunity Knocks". In this case it knocks loudly and I believe it will echo for years to come. For established breeders or new breeders setting out on the purebred trail we are making available the brood cows and replacement heifers that are only available in a dispersal sale of this kind.

Breeding and nurturing Aberdeen Angus has been a passion for our family for seventy years (1941 - 2011). Through good times and some not so good times these cows and their ancestors have carried us through. Twelve years of annual bull sales and decades of private treaty have distributed literally thousands of bulls to breeding pastures all over North America and Willabar genetics have circled the globe.

We have converted the cows from September calving season to February/March in anticipation of this dispersal. We have brought together breeding services from some of the most proven bulls in the breed combined with some exciting young sires and backed them up with our own solid herd bulls. We bred for 50 days and the open cows were culled. Carriers of known genetic defects have been eliminated. The cows weaned their calves in April and have experienced an extraordinary grazing season with abundant rainfall in our area. Needless to say they are in very good condition.

It is with mixed emotions that Ramona and I have come to this decision. However, my knees are just not up to the test that winter chores and preparing bulls for annual sales put on them anymore. Therefore, we have decided to follow a different path and we look forward with great anticipation to our own challenges and opportunities that lay ahead.

To our loyal bull customers, and there are just too many to name, thank you for the honour of doing business with you. Don't forget that we are selling our last crop of September Long Yearling Bulls on December 20th (likely right around 3:00 p.m.) right after the cows sell. They have been culled hard and they are getting a TMR. They will be semen tested and fully insurable. We are definitely putting our best foot forward with this set of outstanding bulls. Remember, we are not having a sale in February.

If I can be of any assistance, please feel free to call, I always like to talk "cows". In the meantime, accept this as your invitation to be with us on December 20, 2011, at Noon for the Willabar Ranch Complete Aberdeen Angus Dispersal Sale, Highwood Auction, High River.

Sincerely
Andy Hart

WILLABAR BLACK ANGUS 1941 - 2011 - 70 YEARS!!

WELCOME FROM THE SALE MANAGEMENT, BOUCHARD LIVESTOCK...

Brian Bouchard
403-813-7999

Welcome to the Willabar Ranch complete dispersal. I am sure Andy and Ramona have some mixed feelings about dispersing this program that has been ongoing for some 70 years. Angus cattle have been a life passion for this family and because of that this prefix has been propagated around other parts of the world.

There are numerous reasons to participate at a dispersal sale - the main one being to take advantage of someone else's hard work and diligence to produce the best product possible. These are very uncharted times in the livestock industry. We are about to head into the highest commercial prices ever and now is certainly an opportune time to invest and expand. In recent years this program has focused on the commercial bull business, with very limited purebred females being offered to the purebred industry. Here is an opportunity to purchase genetics that may be an out-cross to many established Angus herds. Here is a chance to invest in a cowherd that is anchored in the business of producing and merchandising commercial bulls. Every purebred breeder in the entire livestock industry needs to be concerned and pay attention to the needs and expectations of the commercial cattle man.

It is our pleasure to assist Andy and Ramona with this event. I urge you to call Andy and Ramona for information on this great offering. Andy will be eager to visit with you about these proven cow families. This of course will be Willabars' final bull sale and as many of you have come to appreciate they have offered bulls that work. On behalf of Bouchard Livestock we invite you to be with us in High River. If you require information or assistance give any of us a call, I had the pleasure of touring the cowherd a number of times this summer. Good luck Andy and Ramona in the opportunities that lie ahead for you.

Brian Bouchard

TERMS & CONDITIONS OF SALE

The terms of the sale are cash, cheque, and wire transfers, payable at par at the sale location. The right of property shall not pass until after settlement has been made; no invoicing on buyers attendance, unless previous arrangements have been made. Payment must be made before cattle can be shipped. Every animal sells to the highest bidder and in cases of disputes, the auctioneer's decision will be final. Current exchange rates will be announced sale day. All monies are in Canadian funds.

Bidding: Each animal will sell to the highest bidder

Disputes: Bidding will be reopened between the parties involved in dispute. If no further bidding is made, the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision on all disputes will be final.

Announcements: All announcements made from the auction block will take precedence's over the printed matter in the catalogue. Buyers are therefore cautioned to pay close attention to such disclosures.

Liabilities: All persons attend the sale at the their own risk.

Pregnancy Information: All serviceable age females have been pregnancy examined by an accredited veterinarian, giving an estimated length of gestation. This estimated gestation period shall be used only as a guideline to calving and is not a guarantee of actual service. Supplement sheets will be available with breeding services for the purchaser.

Certificate of Registration: Each animal will carry papers issued by the Canadian Angus Association.

Health: All animals in the sale have met all necessary health requirements and are under strict herd health protocol.

Phone, Mail, or Wire Bids: Bidders unable to attend the sale may phone, wire, or mail their bids and instructions to the sale manager, auctioneer or special representatives. Bids must be received in sufficient time prior to the sale.

Errors: All announcements at sale time, written or oral, supersedes any written material in the catalogue.

TO ALL SERIOUS ANGUS BREEDERS...

Mark your calendars, on December 20, one of the eldest and most storied cowherds in Canadian Angus history will be dispersed at the Highwood Auction Market. For over seventy years the Hart family have built one of the most revered cow herds in the nation. Their motto over the years has been "Our Show Ring is Our Pasture", and within that statement lays the key to the success of the Willabar program. The good people at Willabar never followed the crowd with popular fads or glamour. Most of the great herd bulls used in this program were home raised, and out of their strongest cow families, if one was chosen from another program, or off of a popular AI sire, the proof had to be documented.

The Willabar program was one of the very first herds in Canada to use performance testing in their breeding program, and to this date performance plays an integral role within the program. The cattle that will be offered in this historic event will make a strong contribution to the Angus business in any program, the cattle like their owners, are as honest as they come.

As I write this note we are experiencing record levels in grain and cattle prices in North America, and never in history has it been so important to have your inventory in good order. The Angus cattle offered to you in this historic dispersal will make a tremendous impact on the future of your profitability.

As always with a dispersal it saddens us to see a great family exit the cattle industry, but as one door closes, another always opens. With that being said I wish Andy, Ramona, and their family all the successes possible in the future, and a sincere thank you for all your family has contributed to the Canadian Angus industry.

If I may be of any help in making selections from this great offering, please do not hesitate to call.

Sincerely - Col. Brent W. Carey

Our roots run deep in the Claresholm district. In 1905 my great-grandfather and his family pulled up stakes in Walla Walla, Washington, swam their cow herd across the swollen Kootenai River at Bonners Ferry, Idaho, boarded a train at Creston, BC, and settled in the Meadow Creek District west of Claresholm, all for a fresh start. We have been here ever since.

My father, Orrin E. Hart, got the itch for Aberdeen Angus Cattle in 1941 and purchased his first set of heifers from Roy Buchanan's "Glenburn" herd at Pincher Creek. He also purchased females from the CPR supply farm and other prominent herds of the day.

It really came together for my dad when he was awarded a Nuffield Scholarship to study agriculture in Britain in 1951. While there, he accomplished two critical things that would affect the future of the Willabar herd. First, at a Scottish Young Farmers Dance, he met and took a shine to a young Scottish Lass by the name of Margaret Miller. Second, he negotiated the purchase of the heifer, "Baronda of Haymount", bred to the Haymount Sire, "Jungle Eric of Candacraig". Dad claims he hired mom to accompany the heifer over on the boat. When they both arrived at the ranch, he couldn't afford to pay her, so mom stayed around to collect. Apparently, he still can't pay up as mom is still here some sixty years later.

The resulting bull calf born from "Baronda of Haymount" was named "Willabar Jumbo Eric". He was to serve as a prominent sire here for the next 13 years and established the "Jumbo" line of cattle, one of the dominant strains in North America through the 1960's and 70's. "Jumbo" offered an increase in frame size and growth performance and it was the right bull at the right time.

During this period, we got involved with Jack Stevens and traded bulls with his famous "Camilla" herd. Jack got "Willabar Jumbo 55W"; we got "Camilla Chance 46W". This launched a new era and line of bulls named "Willabar Gay Gordon's" and established "46W" as one, of if not the most, renowned son of "Camilla Chance 37T" - "Canadian Colossal". The Gay Gordon bulls were prolific. "Willabar Gay Gordon 10Z" & "88Z" were named Grand & Reserved Grand Champion Bulls at the 1969 CNE. "Willabar Gay Gordon 56Z" became Junior and Reserve Grand Champion at the 1969 Chicago International and his brother "Willabar Gay Gordon 155Z" was Reserve Junior Champion. "46W" saw active breeding service to the age of 14 years. This resulted in Willabar genetics traveling all over the world - Mexico, Russia, UK, Argentina, USA, Australia & Japan. In 1973, Willabar Ranch had the honour of sending the first shipment of Canadian Angus Bulls back to the home of the breed, Scotland.

Trouble!

Bill, Andy & John

Over the years, the Willabar herd was an active participant in the Midland Bull Test and Treasure State Bull Tests in Montana. We were charter consignors in the "Alberta Superstar Sales" and the legendary "Cross Country Sales" put on by the famous Lloyd Pickard. Through these sales Willabar genetics spread literally all over North America. It was an interesting time; coming off the school bus each day it seemed there were always visitors in the yard and mom was always "putting extra potatoes in the pot". The guest book shows names and addresses from virtually all the cattle producing states and provinces.

Dad served several terms as a Canadian Director and I myself was honoured to serve a term as Director. A highlight for Dad was serving as Canadian President at the 1977 WAF in Scotland and meeting the Queen Mother. Willabar genetics have literally travelled around the world and yet our base has always been firmly grounded in a broad and loyal commercial bull market.

We have always embraced innovation. We were one of the early herds to enroll in performance testing and records have been maintained for over forty years. A.I. was adopted in the late 1960's and expanded as the technology improved and I became qualified in 1980. Since then, we have tested outside genetics against our own home raised sires, always with a view of building on solid foundations of fertility, structural soundness, good feet and tidy udders in the cows, depth of ribs, and good muscle mass in the bulls.

In 1997, John (my brother) and I made the decision to switch the herd to fall calving. Subsequently, our focus has turned to our very successful annual bull sales, selling Long Yearling bulls. In 2004, John took a new direction which left Ramona and I the opportunity to continue improving the Angus herd. In recent years, we were quick to adopt the now growing trend to run our bull sales video style which met with a positive response from both our customers and just as importantly the bulls.

We have now come full circle and reverted these cows back to spring calving to allow them to fit in to the new homes and programs they will travel to. The labour of love which has gone into the building of this cowherd over the past seventy years and three generations is now available to established breeders looking to add a few or new breeders embarking on the first steps of a new journey.

It is our sincere hope that these genetics we offer on December 20th will give you a positive step forward and continues to advance this great breed which is Aberdeen Angus.

"Cookie" has been admired and praised by many astute cattlemen. We went to Cooke Livestock bull sale in 2006 to purchase him because we knew the cows in his background. The three cows on the maternal side of his pedigree totalled 39 years of age. The udder quality, dispositions and fertility had always been evident. When the opportunity to purchase him arose we seized it.

Dateline is a massive bull but phenotypically flawless - solid upstanding feet, full hip, tremendous rib and fluid in movement. Following the WAF 2009, Rawburn Angus of Scotland secured the European rights to Dateline and has ET calves on the ground. Dateline's sons have averaged \$4000 in our annual bull sales. His daughters are truly an impressive group.

Every once in awhile, a breeder gets to bring a certain synergy together with outstanding cows and unique genetics that really get you excited - 50U is such a bull. He would have been the next building block for our herd moving forward. With virtually a straight Canadian Pedigree, and generations of exceptional cows in his pedigree, I believe he would not only carry the mail but lick and stamp it too. Study his good structure, his length of spine and natural muscle expression.

One regret I have about this dispersal is I won't get to calve out the first service from 50U.

87S was originally selected for use on our heifers in 2007. His progeny proved so favourable that he has since been one of our primary service sires.

His sons have been consistently thick, long bodied, easy fleshing bulls with generally moderate birth weights. They have done more to help our bull sale average than hurt it. His daughters can be evaluated at the sale but we are sure you will agree they are proving to be very productive, sound, young cows.

In searching for a highly proven calving ease sire with good performance values and wide spread acceptance in the industry, the choice of Final Answer was a slam dunk. At eleven years of age and with thousands of progeny on the ground, he remains the most popular angus sire in the world.

His daughters have proven to be his greatest strength, being moderate framed, easy fleshing with excellent udders.

He is in the top 3% for CED, the top 10% for BW, the top 5% for WW, and still ranks in the top 10% for YW with very positive carcass numbers.

Service Sire on First Calf Heifers.

Pendleton continues to lead the industry with his unprecedented siring capabilities. His low birth and high growth EPD spread is not a fluke. The calves are born very easily and then they get up and grow. You will see bulls that may not be what you expect from first calf heifers. They display outstanding growth, depth and thickness.

Pendleton currently ranks in the top 5% of the breed for eight different EPD traits.

A.I. Service Sire J - HARB Pendleton 765 J H

Legacy was selected from our 2007 calf crop. His 81 pound birth weight and above average growth performance made him a good candidate to replace his sire, BBAR Legacy 528.

We were very fond of his mother, Willabar Rosebud 37R, a very good daughter of LT 598 Bando 9074.

Last winter 44T was lost to a leg injury.

Total sired a number of the yearling bulls and open yearling heifers. He is also a service sire to a handful of selected females.

He ranks in the top 10% for every value index; he ranks the top 1% for both WW and YW, top 5% to docility, top 10% for milk, top 4% for RE and IMF

WILLABAR BLACK ANGUS LONG YEARLING BULLS

This being our last sale, I have to say that I am very proud of these bulls. We have culled them ruthlessly so they do represent the top 60% of the bull calves born last year. As every year, they were weaned in early April and turned out to grass in mid May; at no time were they creep fed, hoof trimmed or otherwise pampered.

The bulls were brought in off grass in mid August to allow our family a long overdue camping trip before the kids went back school. They are at Claresholm Beef Producers receiving a Total Mix Ration of corn silage, chopped hay and a limited amount of grain. Feel free to stop and view them if you are in the area.

Once the sale is complete and ownership transfers, at the fall of the gavel, *buyers have the option to return the bull(s) back to Claresholm Beef Producers to be fed using a shared pen at the new owners expense and risk.*

Otherwise, you may take your bull(s) home with you December 20th at the completion of the sale.

We strongly recommend the purchase Livestock Mortality Insurance; agents will be available on sale day. The bulls will be fertility tested by Claresholm Veterinary Services and sold with a satisfactory test and are fully insurable.

Press deadlines did not allow us to include photographs of the bulls. Check our web site from time to time as we will endeavour to post photos of the bulls between now and sale day.

If you have any questions or require help making your selections, please call Andy. See you sale day - December 20th at Highwood Auction.

The sale starts at NOON and we invite you to join us at the auction yard prior to that for pre-sale viewing and complementary lunch starting at 11:00 a.m.
