

Wranglers Bull Sale

POLLED HEREFORDS

BLACK ANGUS

**Sunday, April 15, 2012 at 3:00 pm
at AW Angus, Gainsborough, SK**

welcome

Welcome to the 11th annual Wranglers Bull Sale. When the kids were little and we had to watch their movies constantly, after watching the Shrek movie for the 300th time I picked up on one of my favourite quotes from Shrek when he said "change is good Donkey." Well, has this donkey got some changes for you.

First off the sale will be held at the farm this year. The sale barn can be heated if necessary and the bulls will be displayed in pens just outside the barn. The sale will be a video sale and the bulls will not enter the sale barn. This will be a lot easier on them and us. Our sale offering this year will consist of Black Angus Bulls consigned by ourselves, AW Angus, and the Eastons, 2J Angus. The Easton's have had bulls in several past Wrangler sales and their bulls were fed and managed in the same pen all winter as our own bulls.

Consigned to this year's sale are Polled Hereford bulls from two of Southwest Manitoba's long time breeders: Til-Toba and Mil-Wray Polled Herefords. We are honoured to be working with the Wray families.

Please note the 3:00 p.m. Saskatchewan time start. Come early to view the bulls and stay after the sale for supper and some Hereford and Angus hospitality!

CA Shaw Insurance, Gainsborough, SK

*Please join us after the sale for beef on a bun. served
by the Winlaw Ladies Club and some hospitality.*

- Wide based, big middled, beef bull. Class winner at the 2011 National Junior Angus Show.

- Full brother, AWH 20T sold to Dave Stewart in 2008, maternal brother, AWH 36U sold to Brad Loppe in 2009, full brother, AWH 30W to Kim Henderson in 2010.

- Mom was designated Elite Dam in 2011 as she ratioed 111 on 5 calves.

- 38R is definitely the kind to produce herd bull and looks like a front pasture female.

- AAA marbling.
- Mom is a designated Elite Dam in 2012. She just had a full brother to 73Y this year.

From the 2J Angus

We appreciate the opportunity to again contribute some Angus bulls to the Wrangler Bull Sale. These bulls have been fed with Allen and Wanda's offering, giving them a chance to develop as a uniform group.

The cattle market is hot and should stay that way for a few years. This is the time to own the best bull you can afford.

Thank you to our past customers and hope to see you at the sale.

Jim & Josephine Easton

2J Bruno 9M

After seeing the uniform calves the 9M bull left at Terry Henry's herd at Kennedy, we were pleased to get him back at 8 years of age.

In 2011 we had 51 calves all unassisted with the bull calves averaging 98 lbs and the heifers averaging 90 lbs.

Excellent full sister working in our herd.

ULTRASOUND CARCASS MEASUREMENTS

Rib Fat/Backfat: An external fat measurement taken between the 12th and 13th Reported in inches. Rib fat is the main trait that affects percent lean meat yield ie; A1, A2, A3, & A4. Percent lean meat yield is the calculation that estimates the percent of lean muscle on the carcass. For example, a lean meat yield of 60% on a 1000lb carcass would have 600lbs of lean muscle and 400lbs of bone and fat.

Ribeye Area (REA): An area measurement of the loin or ribeye muscle. Reported in square inches. While an increase in backfat will lower the percent lean meat yield an increase in REA will raise the percent lean meat yield.

Rump Fat: An external fat measurement taken from an image collected between the hooks and the pins of the animal. Reported in inches. The rump fat measurement, coupled with the rib fat measurement will increase the accuracy of percent lean meat yield.

Intramuscular Fat (%IMF)/ Marbling: This measurement determines the amount of fat within the muscle. Reported in "%". This measurement is used to determine the quality grade of the carcass.
