**BLACK ANGUS BULL SALE**

EST 1963

**FRIDAY, APRIL 17, 2015 - 1:00 PM -**

**COWTOWN LIVESTOCK  
MAPLE CREEK, SK**

# Welcome to the 2015 Your Choice Black Angus Bull Sale

Greetings from the bald-butt prairies of SW Saskatchewan ...

home to grass-hopper high grass, wind, beautiful sunrises and sunsets and our family's Angus herds! We are very grateful for the hard work of our family, the multi-generational passage of knowledge, integrity and work-ethic that has been the better part of our ranch life since the late 40's. The youthful enthusiasm of our granddaughters makes some of the harder days bearable ... and the support and help from our parents when extra hands are needed is sure appreciated!

Once again we have a number of bulls designed for calving ease but with the performance to ensure improved scale weights. These herd bull prospects display an abundance of eye appeal with specific traits that you may be looking to inject into your herd. Almost one-third of the offering are recommended for your first calf heifers while the performance end will flat-out add pounds and dollars to your calf check. They are sound structured, honest working bovines that keep us all in the business of rearing cattle without a lot of hassle.

As always, a great deal of emphasis is placed on our cow herd so you will find that we continue to picture and promote the females that make our operation viable. This year's sale offers a first ... check out pages 41 to 43. Don surprised the heck out of all of us this year when he decided to open the door of his Diva pen and let out six fancy females for your appraisal.

Now might be the appropriate time to say WOW! This cattle market will be etched in the minds of many for quite some time. It's about time that some of the finest, most trustworthy people in the world can enjoy a decent living from their years of hard work and dedication.

We welcome your company to look at the sale bulls, cows and walking sires that raised them. Time and distance putting limits on a road trip? Our web site as well as a Facebook presence will help you keep track of the cattle and horses. We hope you can be with us on April 17th. If you are unable to be with us in person, we have a competent support team to help you with absentee purchases as well as live stream video and bidding.

**Thank you** to the many customers who have become friends and repeat customers over the years. You have taken the time out of your busy schedule to look through our catalog which is very much appreciated. We look forward to hearing from you and welcome the opportunity to earn your business and truly offer "Your Choice" of Angus genetics.

**BULL SALE:** 3<sup>rd</sup> Friday in April

**HEIFERS:** Replacements in the Spring  
Breds in the Fall

**HORSES:** by Private Treaty

**www.DelormeRanch.ca**

Friday, April 17, 2015 ~ 1:00 pm CST

Cowtown Livestock Exchange • 1.6 km East of Maple Creek, Sask.

**Sale Staff:**

Cowtown Livestock Exchange Office (306) 662-2648

Tyler Cronkhite, Cowtown Manager: (306) 661-8786

Brent Weiss, Auctioneer: (306) 558-4401

Gordie Cameron, Auctioneer: (306) 741-7077

We also welcome On Order Purchaser:

Wayne Bowyer: (306) 662-7371

They will competently and discretely handle your bidding instructions.

**Viewing the Bulls:**

The bulls are available for your appraisal at the ranch until **Monday, April 13<sup>th</sup>**. They will be moved to the Cowtown yards where they will be available for viewing from the time of their arrival on Thursday until sale time on April 17<sup>th</sup>. We encourage you to stop in and take a look at this year's offering, as well as the sires, dams and siblings.

**Terms:**

Please register for a buyer number at the office prior to purchasing. All bulls sell under the Terms & Conditions of Cowtown Livestock Exchange. Terms of sale are cash or cheque payable to Cowtown Livestock. No bulls will be released without satisfactory settlement. When making settlement for your purchases, **please leave specific instructions for transferring of registration certificates**. Any errors discovered in this catalog will be corrected from the auction stand at sale time and such corrections will take precedence over printed material contained in this catalog.

**Bull Evaluation & Health:**

All bulls will have a complete fertility exam and semen test done by the Maple Creek Vet clinic prior to sale. Bulls will **not** be sold on a 'deferred' result. Current weights and scrotal measurements will also be available prior to sale. Bulls have been vaccinated: Travax 8, IBR/P13/BVD (Inforce 3/SomnuStar PH and Pyramid FP 5/ Presponse) and pesticide poured. We guarantee to provide you with a sound, fertile bull capable of servicing a reasonable number of females. In the event that your bull is a non-satisfactory breeder, he will be replaced with a bull of equal value, or a credit will be given towards the purchase of another Delorme bull. We will not provide replacement or credit for physical injury or mismanagement. Each animal becomes the responsibility of the purchaser as soon as sold. If you have a problem with a bull please notify us immediately.

**Semen Collection:**

The Delorme Family consignments reserve the right to collect 200 straws of semen off any bull in the sale at their expense and the buyer's convenience.

**On Offer Registered Black Angus:**

**70 Yearling Bulls**

**6 Yearling Heifers**

**Sale Order:** Bulls will sell in catalogue order ~ Index page 48

**Insurance:**

Insurance will be available sale day, on location from a Blythman Agency's representative. (306) 662-2604

**\$100 Off Your Purchase:**

If you take your bull home the day of the sale. If you are not ready for them we will gladly take your bull(s) back to the our ranch for you but they **have to be insured**. After May 1<sup>st</sup> we will charge \$3.00/day. We ask that you please pick up your bulls by May 31<sup>st</sup> or contact us to make delivery arrangements. On this same note, we would strongly suggest that the earlier you get your bulls home to acclimatize, the better they do. They get used to the surroundings, the feed and they get down to the job you bought them for quicker.

**Online Viewing and /or Bidding:**

This year's sale will once again offer streaming video from ringside. To **pre-register**, visit [www.agrimart.ca](http://www.agrimart.ca) then tune in to:

[www.agrimart.ca/cowtown/](http://www.agrimart.ca/cowtown/)

**Phone Bids and Sight Unseen Purchase Program:**

If you would like to place a bid on any lot but cannot attend the sale, please contact any of the sale staff as listed. Contact us prior to the sale to discuss your bull needs. We are here for the long haul and our relationship with our buyers is our Number One priority. In the event that you don't like your bull, then you don't own him.

**Sale Accomodations:**

Commercial Hotel: 306-409-0018

Maple Creek Motor Inn: 306-662-4431

Cypress Park Resort Inn: 306-662-4477

Cypress Hills Motor Inn: 306-662-2639

*Join us on sale morning for pre-sale viewing with a Complimentary Beef Lunch beginning at 11:00. After the sale there will be refreshments, please stay as our guests and enjoy the visit with fellow cattle producers.*

*View the Catalog & Videos online at: [www.DelormeRanch.ca](http://www.DelormeRanch.ca)*

*Recommended for heifers.* A real chunk of a bull, out of a specialist calving ease bull, Shipwheel Chinook. His Dam 4T is a deep sided, easy fleshing cow, bred for calving ease, going back to New Elixir 4R and Rain Man 2M, our own, proven, calving ease sires. Nicol Ranch liked 4T's first son and took him home.

## SOUTH SHADOW 92U FREEDOM 201B

SSA 201B 1823113 23/02/2014

DAM: Ruby 972W

972 Sister 20S (Elite)

972 Sister 846 (Elite)

201B has to be admired for his presence, masculinity, and muscle expression. He is thick, deep, wide based, and very correct in his structure. He has a stout hip that carries down to his hock. He is clean fronted, with great neck extension, and hair coat. Dam 972 is from our great Ruby cow family. She is a big, soggy, feminine cow with an udder that is to die for. Dam has two maternal sisters designated Elite producers, another sister brings her son, 86B (pg 35) to the sale.

Out of our 134X bull that expresses a lot of muscle. He really stamps his calves with that thick, sogginess, and great hip structure. His dam is a sound, feminine Fortune 2000 daughter with an excellent udder. She's had sons go through the sale to Rex Moorhead and Gavin Greenwald and has 2 milking daughters in our herd. 204B has a clean made front-end, squareness of hip, and a strong foot angle. Top 20% BW EPD.

The Foundation of our Mares*

For more than 25 years we have been shaping up an APHA breeding herd and raising all-a-round, versatile, performance horses for the ranch and for the arena. The ranch-raised weanlings, yearlings and riding horses are valued by their new owners and excel in all areas of the equine industry.

*Inquire today about the horses we currently have for sale  
[www. PaintHorses.ca](http://www.PaintHorses.ca)*

**COMMERCIAL REPLACEMENT HEIFERS**

From the Delorme and Wardberg commercial herds is the 29<sup>th</sup> Annual offering of 80 Black yearling heifers. *Straight Bred Black Angus & Black Simmental/Angus*  
**PRIVATE TREATY ~ Contact us for the details**

The Black Cow 'is' our commercial herd and has been since 1948, when Grandpa (Ole) Wardberg brought the first to this area. Yes, a few colored ones have come and gone through the second and third generations of the family, but we seem to get along best with the Blacks ~ the type of cattle that are sympathetic to our environmental and industry challenges. You'll have the opportunity to purchase from 80 home-grown Black replacement heifers. This will be our 29<sup>th</sup> annual offering of *straight-bred Angus* females, all sired by home-raised bulls. 2015 marks the 5<sup>th</sup> annual offering of the *F1 crossbred Black Simmental/Angus Heifers*. These are also sired by home-raised bulls from Darby and Sarah's purebred Simmental herd. Half of the commercial herd are bred to Black Angus sires, the other half, Black Simmental sires. *Can be packaged in groups of 10 or more per breed sire.* Photos of the Sires, Dams and Heifers are available on our ranch web site.

***These fancy heifers will equally represent the two breed sire groups.***

**BRED HEIFERS FOR SALE**

***Our Fall Offering of 10 to 20 Bred Heifers ~ by Private Treaty***

Relatively new to our program are the *F1 crossbred Black Simmental/Angus Heifers*. In the fall of 2012 we offered our first set of bred Black F1 Heifers. These heifers were the top-cut from our home-raised group. The remaining crossbreds sell as open yearlings in the spring with the straightbred Black Angus replacement heifers. Depending on the 2015 grass conditions, a group of purebred Black Angus bred females may also be offered in the fall. The Bred group sold and went to repeat customers last year before we had them pictured.

***These are a fantastic set of females, definitely the front pasture type!***

**DAM: Eileen 2N**

**21B's Mat Sister: 992W**

**21B's Mat Brother: 134X**

A member of our pen of Show Bulls with an actual WW of 850 lbs. A good power bull with a moderate birth weight of 84 lbs. He has been one of our favourites since birth. 21B is super long, very complete and excellent footed. His dam 2N is also the dam to our Walking Herd Sire Riteway 134X. She is a tank but very moderate framed and sound. She has a habit of raising the great ones. Todd & Rosanne Farnsworth at Far View Angus selected her first son. A couple of her maternal sisters carry on the Eileen tradition with 206B (pg 38) and 73B (pg 11).

SSA 85B 1823062 20/01/2014

**DAM: Ruby 12N**

**MGD: Ruby 63L**

**12N Son: 88A**

A very smooth, clean made bull with a good foot, length of body, and very good overall structure. Foresight is a power and maternal carcass sire who packs muscle and volume. Dam 12N is a front pasture cow that at 11 years old, still looks 5. She is deep, feminine, and good uddered with sons working for Bitterlake Ranching, Bear Creek Angus and Kurtis Sehn. 85B's maternal sisters offer bull 201B (pg 14) and 86B (pg 35) for those looking to spread the Ruby traits through their herd.

A long-spined, free moving bull with a long stride, should cover a lot of ground. He has a little more frame coming from a very moderate framed cow. Dam 1R produces top end females that are very productive. Two 1R daughters have bulls offered in 150B (pg 31) & 162B (pg 17). EPDs in the top: 25% BW, 25% YW, 4% CE, 8% MCE

DAM: Errolline 1R

1R Daughter: 921

This heifer is sweet fronted, nice ribbed, and great haired. Her dam 909 is a Net Worth daughter, which you can count on for beautiful udder's, and big time production. 909's maternal sister brings bull 124B (pg 11). 909 son to R Bar E Ranch. EPDs in the top: 20% CE, 10% MCE

**DAM: Diamond 909**

**Mat Sister: 126Y**

**Herd Management .... the feeding**

'Ranch-raised' is a relative term - Normally the papered herd is running with the grade cattle from July 1 to mid-November. The timing of the two different production cycles, in relation to the seasonal conditions (temperature and wind!) dictate the rations. If we calved-out our commercial herd, in the same, less than elaborate conditions (the calving barn is a wee bit drafty) we'd likely manage those grade cattle the same way as the papered herd. Both herds get the same vaccinations and mineral, neither see creep and the rations, when not grazing, come from the same piles of home-grown feed.

**The feed program for this year's Angus sale bulls:**

OCT/NOV: 10#s Hay, 3#s Green Feed, 15#s Silage, 3#s Rolled Barley  
 DEC: 10#s Hay, 3#s Green Feed, 16#s Silage, 4#s Rolled Barley  
 JAN: 11#s Hay, 3#s Green Feed, 16#s Silage, 5#s Rolled Barley  
 FEB: 11#s Hay, 3#s Green Feed, 18#s Silage, 5.5#s Rolled Barley  
 MAR: 11#s Hay, 3#s Green Feed, 19#s Silage, 5.5#s Rolled Barley  
 APR: 11#s Hay, 3#s Green Feed, 20#s Silage, 5.5#s Rolled Barley  
 ..... and mineral lick tubs

**Hay:** baled dryland grass/hay is 55% crested wheatgrass/45% alfalfa.

**SILAGE:** The cereal silage (59% moisture) is an oat/barley mix chopped between the milk and soft dough stages.

Wintered in a 10 acre lot with a hike into the barnyard for water.

**The Performance Information**

As a further means to improve our herd we have submitted animal data to the Canadian Angus Performance, CAP program. The first data was submitted with the program's initiation and along with EPD data offers another tool for our customer's bull selection.

**BW: Actual Birthweight and Adjusted Weights**

<b>Adjusted 205 WT</b> Weaning weights adjusted to 205 days of age-Dam's age considered in formula	<table border="1"> <tr> <th>Actual BW</th> <th>ADJ. 205</th> <th>ADJ. 365</th> </tr> <tr> <td align="center">88</td> <td align="center">666</td> <td align="center">1111</td> </tr> </table>	Actual BW	ADJ. 205	ADJ. 365	88	666	1111	<b>Adjusted 365 WT</b> Yearling weights adjusted to 365 days of age

**Age of Dam at Calf's birth**

AOD
5

**The Elite/Premier Program**

Canadian Angus Elite Cow: has a minimum of five calves, four of which must be registered, to determine her regularity of calving and ability to consistently produce calves with a superior weaning weight year after year, display early puberty, breeding and early calving, followed by regularity of calving and high performance offspring. The Canadian Angus Elite Cow Report identifies superior cows in the Canadian Angus herdbook.

**Canadian Elite/Premier Cow Criteria**

- The cow must be enrolled in the Canadian Angus Performance Program.
- The cow must have a calf with a 205-day weight recorded within the past 18 months.
- The cow's first calf must be born and weaned within 1,000 days.
- The cow must maintain a regular calving interval. (regular is considered to be 365 + 30 days/number of calving intervals)
- The cow must have at least 5 progeny, of which at least 4 must be registered.
- The cow must have an above average weaning weight EPD with an accuracy of at least 25.
- The cow's progeny must all have an above average weaning weight EPD with an accuracy of over 25.

**Average Black EPDs for all Calves born in 2014**

BW	WW	YW	MILK	TM	CE	MCE
+2.7	+45	+79	+19	+41	+2.3	+6.3

**How To Read EPDs and Performance Data**

EPD's are a measure of the expected differences in performance of a sire's/dam's progeny when compared to the average progeny of all sires/dams evaluated within the same breed. This prediction is based on actual performance, progeny performance and relatives' performance.

- ~ EPDs can be used to compare bulls/cows from different herds.
- ~ EPDs cannot be used to compare bulls/cows of different breeds.
- ~ EPDs allow breeders to estimate a young animal's breeding value and that animal's value as a parent
- ~ EPDs allow a fair comparison of breeding value by removing environmental bias such as climate, feed and special management
- ~ EPDs are the best tool available to compare animals between herds, countries and year of birth
- ~ EPDs help breeders make informed decisions regarding breeding stock selection by evaluating numerous traits, such as growth related traits (BW, WW, YW, Milk)

Interim EPDs - are indicated by an "I" preceding the EPD value. Interim EPDs are available for animals that were not included in the National Cattle Evaluation. The accuracy of Interim EPDs is generally indicated by a 5% percentile, as there is less data used to produce these estimates. A pedigree estimated EPD (PE) is the average of two parental EPD values (½ sire, ½ dam).

- BIRTH WEIGHT (BW): The birth weights of a bull's/cow's progeny when compared to the breed average, in pounds. Negative values indicate lighter BW while positive numbers indicate heavier.
- WEANING WEIGHT (WW): The adjusted weaning weights of a bull's/cow's progeny when compared to the breed average, in pounds.
- YEARLING WEIGHT (YW): The adjusted yearling weights of a bull's/cow's progeny when compared to the breed average, in pounds.

*continued...*

## EPD INFORMATION

- **MILK:** A measure of the amount of pre-weaning performance gained by calves which can be attributed to the milking ability of a bull's/cow's daughters. The EPD is expressed in pounds of calf.
- **TOTAL MATERNAL [TM]:** Indicates the performance based on the calf's inherent genes for growth (WW EPD) and the influence of his mother's milk EPD. It is an indication of the weight of calf a bull's daughter will wean.
- **CALVING EASE DIRECT (CE) EPD** – the average difference in ease with which a sire's calves will be born when he is bred to first calf heifers.
- **MATERNAL CALVING EASE (MCE)** – is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.
- **ACCURACY (%):** the reliability that can be placed on the EPDs.

An accuracy of close to 100 indicates higher reliability. Accuracy is impacted by the number of progeny and ancestral records included in the analysis.

Low accuracy = less than 40

Low to medium accuracy = 40 – 60

Medium to High accuracy = 60 – 80

High accuracy = greater than 80

EPDs							AOD
BW	WW	YW	MILK	TM	CE	MCE	
+2.7 61%	+43 48%	+75 45%	+19 21%	+41	+2.9 39%	+5.7 15%	10

Accuracy is the measure of reliability of an EPD. Higher percentiles, indicate larger amounts of available information and greater certainty that a bull's EPD will not change significantly as more progeny information becomes available.

The Possible Change table, can help a producer determine the involved risk associated with an EPD by considering the possible change value for each trait at various accuracy levels.

For example, an animal with an accuracy of 10% can expect its BW EPD to change  $\pm 2.4$  pounds, whereas an animal with an accuracy of 80% can expect its BW EPD to change  $\pm 0.5$  pounds.

Accuracy values should be printed in sale catalogues. Without an accuracy level, you have no way to gauge how much that EPD is likely to change as that animal gets older and more information is available on it.

BLACK ANGUS — POSSIBLE CHANGE TABLE

Accuracy %	BW	WW	YW	Milk
100	0	0	0	0
90	0.26	1.16	1.70	0.97
80	0.53	2.32	3.40	1.94
70	0.79	3.48	5.11	2.91
60	1.05	4.64	6.81	3.88
50	1.31	5.80	8.51	4.85
40	1.58	6.96	10.21	5.82
30	1.84	8.12	11.92	6.79
20	2.10	9.27	13.62	7.76
10	2.36	10.43	15.32	8.73

Generally ... accuracies above 50% are available (earned) by having progeny in large numbers (ex: semen sales) or a consistency of pedigree/related matings (ex: line bred programs). Females producing well into their teens will also earn a higher accuracy value.

### HOW TO USE EPDS

EPDs can be useful tools when planning breeding programs, however, remember that they are not perfect or absolute. EPD's are a measure of the expected differences in performance of a sire's/dam's progeny when compared to the average progeny of all sires/dams evaluated within the same breed. This prediction is based on actual performance, progeny performance and relatives' performance.

... and correlations of the traits a breeder wants to improve upon within the herd. Some traits are more heritable than others, resulting in swift progress being made in comparison to other less heritable traits.

Attention should be paid to the heritability:

Trait	Heritability Range	Level
reproductive	less than 0.20	low
growth	0.20 – 0.40	moderate
carcass	greater than 0.40	high

Also, many traits are correlated meaning that the expression of one trait is related to the expression of another trait. The correlation between traits can be either positive or negative and close attention should be paid to these relationships, when developing selection criteria in a breeding program.

Understanding the heritability and the effects of correlation between traits will aid in developing a genetic selection program that will optimize improvement on desired traits while minimizing undesirable side effects.

**HOW TO USE EPDS IN SIRE SELECTION**

Each individual breeder must set his own selection goals, based on the needs of his operation, the situation for that trait in his herd, and his production environment.

It would be easier if we could assume that the highest EPDs are the best. Unfortunately, it isn't that simple. Like most decisions, using EPDs for sire selection involves tradeoffs.. For example, bulls with high growth EPDs may sire calves with a higher birth weight as well. And there may be other impacts on your operation to consider.

For example, when breeding heifers it is desirable to produce calves with lower birth weights, so a breeder may want to pay special attention to birth weight EPDs of prospective bulls. If all calves were sold as feeders, the milk EPD would generally not rate much attention. Yearling weight will be important if you want to ensure finished steers in the appropriate weight range.

It should also be kept in mind that reaction to selection can differ from trait to trait. This is because some traits have higher heritability than others, and are more easily passed to offspring. For instance growth traits such as weaning weight respond faster to selection, than reproductive traits such as age at first calving.

A balance of traits is required, and the perfect balance for you will depend on your climatic, nutritional and economic environment, as well as the management goals you have set for your herd.

One way to select for several traits are to set minimum and maximum acceptable levels for each trait, and then choose sires that meet criteria. Another method would be rank all sires, on each trait, then develop a weighted index which ranks each bull from one (most desirable) to five for each trait. The bull with the lowest total score would be your first choice.

**A SAMPLE SIRE SUMMARY EVALUATION**

Bull	BW		WW		YW		Milk	
	EPD	Acc.	EPD	Acc.	EPD	Acc.	EPD	Acc.
A	6.6	0.75	31.3	0.75	39.5	0.68	-5.6	0.58
B	0.1	0.82	14.6	0.83	24.6	0.80	6.0	0.73
C	0.0	0.89	0.3	0.89	11.1	0.88	18.9	0.87
D	-5.9	0.87	-3.8	0.87	-14.4	0.86	10.3	0.85

**Producer 1** is looking for a sire that can be used on heifers; he wants a bull that will produce low birth weights and he wants to keep some heifer calves as replacements. Growth performance is not his first priority. The sire that fits his needs is sire D. He has a low birth weight EPD and above-average milk EPD.

**Producer 2** has a sound-breeding program; he is looking for a sire that will maintain performance and milking ability. He will select a bull that will increase growth performance and milk while maintaining calving ease. Sire B is his choice.

**Producer 3** has a herd of above-average-frame cows and is not planning on keeping heifers as replacements. She is looking for a bull that will give her the most profit at weaning. Sire A will give her the best result in weaning weight. If heifers are kept as replacements, they will, on average, be inferior for maternal milk.

**Producer 4** wants to maintain his calving performance and growth performance but would like to increase the milking ability in his females. Sire C is his choice.
