## BLACK ANGUS BULL SALE

EST 1963

FRIDAY, APRIL 15, 2016 - 1:00 PM -

COWTOWN LIVESTOCK  
MAPLE CREEK, SK

## Welcome to the 2016 Your Choice Black Angus Bull Sale

Welcome to our 2016 Bull and Female Sale. We are a family operation, consisting of four generations raising purebred Black Angus since 1963. We strive to breed trouble free cattle, that work in the harsh south west Saskatchewan environment.

Our goal is to breed exceptional maternal traits into our cattle. Structural integrity, disposition, longevity, calving ease and growth are all traits that are very important to us, as can be seen in the 10 heifers we have brought to town. We have dug deep into our replacement heifer pen, to bring you daughters out of our best cow families. The mothers to these little ladies have out produced themselves time after time, with many going back to Elite cows.

We are very proud of our bull pen, perhaps the best we've brought to town. An old cliché, but if you're progressing with your herd, the bull pen should get better every year. The bulls have a balance of growth and maternal strength. Our bulls are bred and managed to go out and work. It is very gratifying when we hear back from you, our customers, that your bull has worked hard breeding cows, but kept in good shape.

We would like to say a big thank you to all the bidders and buyers past and present. Your support and confidence in our program means the world to us.

As you turn the pages in this book you will find pedigrees carrying the family member's prefixes of SSA, DLD, KD, NPP and the foundation IJS. In 2009, the Jay En Dee (IJS) herd name was transferred to Darby and Sarah's daughters; Isabella and Mackayla and the Prairie Pride (NPP) herd name, which was Alfred and Jo's (Connie's parents) in the 60's & 70's, was registered to Kalee's children; Nevaeh, Aeverie and Oskar. As a family operation nothing could be more satisfying than when the grandkids tell you how "it" should be done. Gives one hope that we can welcome the next generation into the operation.

Friday, April 15, 2016 ~ 1:00 PM CST

Cowtown Livestock Exchange • 1.6 km East of Maple Creek, Sask.

**Sale Staff:**

Cowtown Livestock Exchange Office (306) 662-2648

Tyler Cronkhite, Cowtown Manager: (306) 661-8786

Brent Weiss, Auctioneer: (306) 558-4401

Gordie Cameron, Auctioneer: (306) 741-7077

We also welcome Order Buyers:

Wayne Bowyer: (306) 662-7371

Brian Bouchard: (403) 813-7999

They will competently and discretely handle your bidding instructions.

**Viewing the Bulls:**

The bulls are available for your appraisal at the ranch until **Monday, April 11<sup>th</sup>**. They will be moved to the Cowtown yards where they will be available for viewing from the time of their arrival on Thursday until sale time on April 15<sup>th</sup>. We encourage you to stop in and take a look at this year's offering, as well as the sires, dams and siblings.

**Terms:**

Please register for a buyer number at the office prior to purchasing. All bulls sell under the Terms & Conditions of Cowtown Livestock Exchange. Terms of sale are cash or cheque payable to Cowtown Livestock. No bulls will be released without satisfactory settlement. When making settlement for your purchases, **please leave specific instructions for transferring of registration certificates**. Any errors discovered in this catalog will be corrected from the auction stand at sale time and such corrections will take precedence over printed material contained in this catalog.

**Bull Evaluation & Health:**

All bulls will have a complete fertility exam and semen test done by the Maple Creek Vet clinic prior to sale. Bulls will **not** be sold on a 'deferred' result. Current weights and scrotal measurements will also be available prior to sale. Bulls have been vaccinated: Travax 8, IBR/P13/BVD (Inforce 3/SomnuStar PH and Pyramid FP 5/ Presponse) and pesticide poured. We guarantee to provide you with a sound, fertile bull capable of servicing a reasonable number of females. In the event that your bull is a non-satisfactory breeder, he will be replaced with a bull of equal value, or a credit will be given towards the purchase of another Delorme bull. We will not provide replacement or credit for physical injury or mismanagement. Each animal becomes the responsibility of the purchaser as soon as sold. If you have a problem with a bull please notify us immediately.

**Semen Collection:**

The Delorme Family consignments reserve the right to collect 200 straws of semen off any bull in the sale at their expense and the buyer's convenience.

**On Offer Registered Black Angus:**

**63 Yearling Bulls**

**10 Yearling Heifers**

**Sale Order: Bulls sell in catalogue order ~ Index page 8**

**Insurance:**

Insurance will be available sale day, on location from a Blythman Agency's representative. (306) 662-2604

**\$100 Off Your Purchase:**

If you take your bull home the day of the sale. If you are not ready for them we will gladly take your bull(s) back to the our ranch for you but they **have to be insured**. After May 1<sup>st</sup> we will charge \$3.00/day. We ask that you please pick up your bulls by May 31<sup>st</sup> or contact us to make delivery arrangements. On this same note, we would strongly suggest that the earlier you get your bulls home to acclimatize, the better they do. They get used to the surroundings, the feed and they get down to the job you bought them for quicker.

**Online Viewing and /or Bidding:**

This year's sale will once again offer streaming video from ringside. To **pre-register**, visit [www.agrimart.ca](http://www.agrimart.ca) then tune in to:

[www.agrimart.ca/cowtown/](http://www.agrimart.ca/cowtown/)

**Phone Bids and Sight Unseen Purchase Program:**

If you would like to place a bid on any lot but cannot attend the sale, please contact any of the sale staff as listed. Contact us prior to the sale to discuss your bull needs. We are here for the long haul and our relationship with our buyers is our number one priority. In the event that you don't like your bull, then you don't own him.

**Sale Accomodations:**

Cobble Creek Lodge: 306-662-5100

Commercial Hotel: 306-409-0018

Maple Creek Motor Inn: 306-662-4431

Cypress Park Resort Inn: 306-662-4477

Cypress Hills Motor Inn: 306-662-2639

*Join us on sale morning for pre-sale viewing with a Complimentary Beef Lunch beginning at 11:00. After the sale there will be refreshments, please stay as our guests and enjoy the visit with fellow cattle producers.*

*View the Catalog & Videos online at: [www.DelormeRanch.ca](http://www.DelormeRanch.ca)*

**SALE DAY PHONES**

Full brother to our lead-off bull last year. He was our top gaining bull that went to Terry & Tanya Stiggings at Riverside Angus. 165C is a docile, thick, muscular, hairy bull with that "herdsire" look. His dam 18R has produced many herd bulls. She's an Elite cow, and woah! Look at all the Elite breeding in his pedigree. This bull was at the Medicine Hat Pen Show, so he is halter broke. A paternal sister to 165C sold for \$10,000 to Wiwa View Farms Ltd in last year's sale. Two other sons to Bill Armstrong and Geoff McConnell with two sons retained for our own use.

EPDs in the top: 25% WW, 20% YW, 20% TM

## The Performance Information

As a further means to improve our herd we have submitted animal data to the Canadian Angus Performance, CAP program. The first data was submitted with the program's initiation and along with EPD data offers another tool for our customer's bull selection.

### BW: Actual Birthweight and Adjusted Weights

Adjusted 205 WT  
Weanling weights adjusted to 205 days of age-Dam's age considered in formula

Actual BW	ADJ. 205	ADJ. 365
88	666	1111

Adjusted 365 WT  
Yearling weights adjusted to 365 days of age

### 205/WW and 365/YW (GAIN) RATIO

Comparison of one calf to all other contemporaries in the group.

RATIO

## The Elite/Premier Program

Canadian Angus Elite Cow: has a minimum of five calves, four of which must be registered, to determine her regularity of calving and ability to consistently produce calves with a superior weaning weight year after year, display early puberty, breeding and early calving, followed by regularity of calving and high performance offspring. The Canadian Angus Elite Cow Report identifies superior cows in the Canadian Angus herdbook.

### Canadian Elite Cow Criteria

1. The cow must be enrolled in the Canadian Angus Performance Program.
2. The cow must have a calf with a 205-day weight recorded within the past 18 months.
3. The cow must have her first calf within 1000 days of her date of birth
4. The cow must maintain a regular calving interval, calving within 395 days consecutively
5. The cow must have four consecutive natural born calves that are registered and have a weaning weight ratio that averages over 105
6. The cow's calf must be in a contemporary group with no less than 10 herd mates to determine the weaning weight ratio
7. Once a cow is designated an Elite Cow, she is always an Elite Cow, however she will not be published in a year where she does not meet the above criteria

### Premier Dam Criteria

As in 1 to 4 above

5. The cow must have four consecutive natural born calves that are registered
6. The cow's four calves must have Weaning Weight EPDs that are above breed average and have an accuracy of over 25%
7. The cow must have at least two registered grand calves
8. Once a cow is designated a Premier Cow, she is always an Premier Cow, however she will not be published in a year where she does not meet the above criteria.

## BOUNDARY TITLEST 3C

DLD 3C 1841375 04/01/2015

DAM: Akita 116A

MGD: Akita 25P

25P Son: 69B

*Recommended for heifers.* Balanced in his make-up, smooth shouldered, square hipped, this guy will be a heifer bull that also has some performance. He had the second highest actual weaning weight at 930 lbs. His dam is a moderate framed, easy fleshing, good uddered, Upward daughter. His grandam is non other than the great 25P herself, so if your looking for a heifer bull with the cow family, phenotype, and numbers to back him-up, 3C has all the bells and whistles. Dam is a half sister to our walking bull 8Z (pg 3) and the Dams to bulls 55C (pg 34), 122C (pg 37) and 138C (pg 16)

The Eileen family has been good to us! 97C is a docile, long bodied Thunder daughter that had a maternal sister sell through this sale last year to the Stokke family. The Thunder cows we have here are awesome mommas. Her dam 868U, also has a grand daughter in the sale Lot 139C directly below.

EPDs in the top: 15% BW, 8% MILK, 20% CE, 15% MCE.

DAM: Eileen 868U

97C's Maternal Sister: 47B

A smaller framed female with tons of style, femininity, hair and very good feet. Her dam is smaller framed, clean made with some neck extension. Lots of maternal here. We're really loving these Download females. He adds tons of rib and hair to his progeny. 140X son to Bit-ter Lake Ranching. GD 868U offers above heifer 97C.

EPDs in the top: 7% BW, 5% MILK, 15% TM, 7% CE, 4% MCE.

DAM: Eileen 140X

42P: Dam's Paternal GD

**How To Read EPDs and Performance Data**

EPD's are a measure of the expected differences in performance of a sire's/dam's progeny when compared to the average progeny of all sires/dams evaluated within the same breed. This prediction is based on actual performance, progeny performance and relatives' performance.

- ~ EPDs can be used to compare bulls/cows from different herds.
- ~ EPDs cannot be used to compare bulls/cows of different breeds.
- ~ EPDs allow breeders to estimate a young animal's breeding value and that animal's value as a parent
- ~ EPDs allow a fair comparison of breeding value by removing environmental bias such as climate, feed and special management
- ~ EPDs are the best tool available to compare animals between herds, countries and year of birth
- ~ EPDs help breeders make informed decisions regarding breeding stock selection by evaluating numerous traits, such as growth related traits (BW, WW, YW, Milk)

**Interim EPDs** - are indicated by an "I" preceding the EPD value. Interim EPDs are available for animals that were not included in the National Cattle Evaluation. The accuracy of Interim EPDs is generally indicated by a 5% percentile, as there is less data used to produce these estimates. A pedigree estimated EPD (PE) is the average of two parental EPD values (½ sire, ½ dam).

- **BIRTH WEIGHT (BW)** — The birth weights of a bull's/cow's progeny when compared to the breed average, in pounds. Negative values indicate lighter BW while positive numbers indicate heavier.
- **WEANING WEIGHT (WW)** — The adjusted weaning weights of a bull's/cow's progeny when compared to the breed average, in pounds.
- **YEARLING WEIGHT (YW)** — The adjusted yearling weights of a bull's/cow's progeny when compared to the breed average, in pounds.
- **MILK** — A measure of the amount of pre-weaning performance gained by calves which can be attributed to the milking ability of a bull's/cow's daughters. The EPD is expressed in pounds of calf.
- **TOTAL MATERNAL [TM]** — Indicates the performance based on the calf's inherent genes for growth (WW EPD) and the influence of his mother's milk EPD. It is an indication of the weight of calf a bull's daughter will wean.
- **CALVING EASE DIRECT (CE) EPD** — the average difference in ease with which a sire's calves will be born when he is bred to first calf heifers.
- **MATERNAL CALVING EASE (MCE)** — is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.
- **ACCURACY (%)** — the reliability that can be placed on the EPDs.

An accuracy of close to 100 indicates higher reliability. Accuracy is impacted by the number of progeny and ancestral records included in the analysis.

- Low accuracy = less than 40
- Low to medium accuracy = 40 - 60
- Medium to High accuracy = 60 - 80
- High accuracy = greater than 80

EPDs							AOD
BW	WW	YW	MILK	TM	CE	MCE	
+2.7 61%	+43 48%	+75 45%	+19 21%	+41	+2.9 39%	+5.7 15%	10

Generally ... accuracies above 50% are available (earned) by having progeny in large numbers (ex: semen sales) or a consistency of pedigree/related matings (ex: line bred programs). Females producing well into their teens will also earn a higher accuracy value.

Attention should be paid to the heritability:

Trait	Heritability Range	Level
reproductive	less than 0.20	low
growth	0.20 – 0.40	moderate
carcass	greater than 0.40	high

Also, many traits are correlated meaning that the expression of one trait is related to the expression of another trait. The correlation between traits can be either positive or negative and close attention should be paid to these relationships, when developing selection criteria in a breeding program.

Understanding the heritability and the effects of correlation between traits will aid in developing a genetic selection program that will optimize improvement on desired traits while minimizing undesirable side effects.

**HOW TO USE EPDS**

EPDs can be useful tools when planning breeding programs, however, remember that they are not perfect or absolute. EPD's are a measure of the expected differences in performance of a sire's/dam's progeny when compared to the average progeny of all sires/dams evaluated within the same breed. This prediction is based on actual performance, progeny performance and relatives' performance.

... and correlations of the traits a breeder wants to improve upon within the herd. Some traits are more heritable than others, resulting in swift progress being made in comparison to other less heritable traits.

**HOW TO USE EPDS IN SIRE SELECTION**

Each individual breeder must set his own selection goals, based on the needs of his operation, the situation for that trait in his herd, and his production environment. It would be easier if we could assume that the highest EPDs are the best. Unfortunately, it isn't that simple. Like most decisions, using EPDs for sire selection involves tradeoffs.. For example, bulls with high growth EPDs may sire calves with a higher birth weight as well. And there may be other impacts on your operation to consider.

For example, when breeding heifers it is desirable to produce calves with lower birth weights, so a breeder may want to pay special attention to birth weight EPDs of prospective bulls. If all calves were sold as feeders, the milk EPD would generally not rate much attention. Yearling weight will be important if you want to ensure finished steers in the appropriate weight range.

It should also be kept in mind that reaction to selection can differ from trait to trait. This is because some traits have higher heritability than others, and are more easily passed to offspring. For instance growth traits such as weaning weight respond faster to selection, than reproductive traits such as age at first calving.

A balance of traits is required, and the perfect balance for you will depend on your climatic, nutritional and economic environment, as well as the management goals you have set for your herd.

One way to select for several traits are to set minimum and maximum acceptable levels for each trait, and then choose sires that meet criteria. Another method would be rank all sires, on each trait, then develop a weighted index which ranks each bull from one (most desirable) to five for each trait. The bull with the lowest total score would be your first choice.

**HOW TO USE EPDS IN SIRE SELECTION**

A SAMPLE SIRE SUMMARY EVALUATION

Bull	BW		WW		YW		Milk	
	EPD	Acc.	EPD	Acc.	EPD	Acc.	EPD	Acc.
A	6.6	0.75	31.3	0.75	39.5	0.68	-5.6	0.58
B	0.1	0.82	14.6	0.83	24.6	0.80	6.0	0.73
C	0.0	0.89	0.3	0.89	11.1	0.88	18.9	0.87
D	-5.9	0.87	-3.8	0.87	-14.4	0.86	10.3	0.85

**Producer 1** is looking for a sire that can be used on heifers; he wants a bull that will produce low birth weights and he wants to keep some heifer calves as replacements. Growth performance is not his first priority. The sire that fits his needs is sire D. He has a low birth weight EPD and above-average milk EPD.

**Producer 2** has a sound-breeding program; he is looking for a sire that will maintain performance and milking ability. He will select a bull that will increase growth performance and milk while maintaining calving ease. Sire B is his choice.

**Producer 3** has a herd of above-average-frame cows and is not planning on keeping heifers as replacements. She is looking for a bull that will give her the most profit at weaning. Sire A will give her the best result in weaning weight. If heifers are kept as replacements, they will, on average, be inferior for maternal milk.

**Producer 4** wants to maintain his calving performance and growth performance but would like to increase the milking ability in his females. Sire C is his choice.

**FRECKLE FACE**  
*Smoke*

Two time NRCHA Futurity Champion  
Son of APHA / NRCHA Hall of Famer, Bonnie Smoke

For more than 25 years we have been shaping up an APHA breeding herd and raising all-a-round, versatile, performance horses for the ranch and for the arena. The ranch raised weanlings, yearlings & riding horses are valued by their new owners and excel in all areas of the equine industry. Standing four stallions; Freckle Face Smoke, Smooth Sir, SSAP Cowboyizm and Page Mr Star Bucks.

**COMMERCIAL REPLACEMENT HEIFERS**

From the Delorme and Wardberg commercial herds is the 30<sup>th</sup> Annual offering of Black yearling heifers. *Straight Bred Black Angus & Black Simmental/Angus PRIVATE TREATY ~ Contact us for the details*

The Black Cow 'is' our commercial herd and has been since 1948, when Grandpa (Ole) Wardberg brought the first to this area. Yes, a few colored ones have come and gone through the second and third generations of the family, but we seem to get along best with the Blacks ~ the type of cattle that are sympathetic to our environmental and industry challenges. You'll have the opportunity to purchase from 80 home-grown Black replacement heifers. This will be our 30<sup>th</sup> annual offering of *straight-bred Angus* females, all sired by home-raised bulls. 2016 marks the 6<sup>th</sup> annual offering of the *F1 crossbred Black Simmental/Angus Heifers*. These are also sired by home-raised bulls from Darby and Sarah's purebred Simmental herd. Half of the commercial herd are bred to Black Angus sires, the other half, Black Simmental sires. *Can be packaged in groups of 10 or more per breed sire.* Photos of the Sires, Dams and Heifers are available on our ranch web site.

***These fancy heifers will equally represent the two breed sire groups.***

**BRED HEIFERS FOR SALE**

***Our Fall Offering of 10 to 20 Bred Heifers ~ by Private Treaty***

*Relatively new to our program are the F1 crossbred Black Simmental/Angus Heifers.* In the fall of 2012 we offered our first set of Bred Black F1 Heifers. These heifers were the top-cut from our home-raised group as we work off a straightbred angus cow herd to be able to offer these FI crosses to you. The remaining crossbreds sell as open yearlings in the spring with the straightbred Black Angus replacement heifers. These broody females have been popular and and working great, as they were bred to do.

***A fantastic set of females, definitely the front pasture type!***
