Belvin Angus First Annual BULL SALE 57 ANGUS BULLS SELL

MARCH 5, 2013 • AT THE FARM

Welcome to the 2013 Belvin Angus Bull Sale. Although this is our first on-farm bull sale, we are not strangers to the purebred Angus business. We have been raising Angus cattle for over 35 years. In 1982 we started taking bulls to the Calgary Bull Sale, and the 30 years we sold bulls there brought many successes and good customers. From the outset, the majority of our bulls have been sold privately off the farm. It has been very rewarding to develop long standing relationships with some of Canada's leading ranchers over the past decades. It is also very gratifying to have had some customers buy upwards of 150 – 200 bulls during the course of our time in the Angus business.

However, we decided it was time for a change, and thus, the decision to have a sale on the farm this year. We are offering a very uniform group of bulls, with many half and ¾ brothers. For years our bulls have worked in some of the most rugged terrain in Western Canada, and they are developed for those conditions. All of the bulls are guaranteed 100%, and all of the bulls will be semen tested and vet inspected before the sale.

Please feel free to stop by any time before the sale to view the bulls and their mothers.

Plan to join us at the farm for lunch before the sale, and stay to enjoy refreshments afterwards. If there is anything else we can do to assist with purchasing a bull please feel free to call.

We look forward to seeing you on sale day.

Best regards,

Gavin and Mabel, Colton, Quinn

EXPECTED PROGENY DIFFERENCES (EPDS) EPDs provide a means of comparing genetic merit of animals within a breed. For each trait evaluated, the EPD incorporates the animals individual and progeny performance information from other relatives. Each trait evaluated predicts expected progeny performance relative to the breed average. The EPD itself does not imply "good" or "bad" performance, only whether the performance of progeny is expected to be above or below

that of the progeny of the average parents. Cattlemen should on an individual basis, decide what is best for them by considering what traits are important to their program, their current herd performance and the degree of change desired. We encourage you to look at the EPDs, however they cannot be used as an exclusive evaluation system of cattle but rather be added to visual and structural appraisal, existing performance data and other considerations you normally use when making selection decisions.

Reference Sires

REFERENCE *Duralta 56S Yellowstone 136X*

Yellowstone 136X was purchased from the 2011 Duralta Farms Bull Sale. He offers calving ease, with extra size and growth. All of the 136X sons in the sale are out of 1st calf heifers.

REFERENCE *Ring Creek El Tigre 9X*

El Tigre 9X was purchased with Twin Rivers Livestock as one of the top bulls at the 2011 Ring Creek Sale. The 9X sons are all built just like him, moderate framed with lots of depth and impressive muscle and rib shape.

REFERENCE *Belvin Warrior 6'09*

Belvin Warrior 6'09 was the \$20,000 High Seller at the Calgary Bull Sale in 2010 to Pahl Livestock of Medicine Hat. Warrior has seen heavy service at our place and Pahl's since then, breeding over 80 cows naturally this year alone. Warrior sons are rugged, growthy bulls with excellent feet and legs. They were the top averaging sire group at Pahl's sale last fall, and were very popular at the 2012 Calgary Bull Sale as well.

REFERENCE *Belvin Tres Marias Patrón 205*

Although there are a limited number of sons on offer this year, the Patrón calves will be featured heavily in the coming years. Shape, stoutness, eye appeal and an outcross pedigree make Patrón one of the most exciting young bulls around.
