

MAR MAC FARMS

GUESTS BULL SALE

Mar Mac Farms - Downhill Simmentals - Perkins Land & Cattle Co.

1:30 PM - March 6, 2013 - Brandon, Manitoba

WELCOME

Mar Mac Farms is a 4th generation family farm, where we make our living from the cattle business. The whole family is involved in the feeding, breeding and marketing of our cattle and we all take pride in producing top quality genetics. We also understand the importance of customer service and honest relations with our valued customers and friends in the livestock industry.

Brett has come home full time to the farm and along with farming runs a custom A.I. business in the summer. Melissa has moved back to Manitoba and started her own graphic and web designs business, Prairie Pistol Designs. Both of the children are very involved and interested in the beef industry.

It is an exciting time to be in the livestock business. This past fall, we seen a lot of new younger faces becoming involved and prices are remaining high. Now is the time to trade in your old bull for top dollar and invest in some fresh new genetics. It has been proven that top quality genetics are worth 5 to 10 cents more at the auction mart.

This year, we have an exciting line up of bulls. In the Red Angus, we have Ribeye sons that pass extra length and thickness throughout. You will also see the sons of 71W who will be our calving ease specialist. Our Black Angus bulls are a very strong throughout. We are going through a growing stage in the Black Angus as we had a number of heifer calves. Our Simmental bulls are equally as strong with some outcross genetics, that have great hair coats and length of body. Every year we try to improve the offering for our customers and we work hard to achieve this goal. This year's bulls may be the best total group ever.

Our guest consignors are Downhill Simmentals (Everett Olson) and Perkin Land and Cattle (Darryl and Tanya Perkin and Family). Downhill Simmental's bulls have been fed with our bulls all winter.

As always our bulls have been raised with no creep feed, their weaning weights are produced by their mother's milk. These bulls have been developed on a home grown ration that will enhance longevity. You may find fatter bulls at other sales, but these bulls are fed to last. I spoke to a couple of customers at Ag Days who have our bulls working for them, these two individuals both had one of our bulls that was eight years old and still sound.

The mothers of these bulls are sound practical cows. Our cows have to maintain their condition on swath grazing and a roughage ration, they do not get any grain. They also have to calve and nurse with no assistance, and then rebreed or they do not stay here.

Please feel free to come and view the bulls at any time prior to the sale, we would be honored to have you inspect the bulls and their mothers. If you cannot attend the sale but are interested in our program, we would be happy to help you select a sire for your operation through our sight unseen purchase program or talk to any of the sale staff and they would be happy to assist you. This year we are again offering the opportunity to bid on the internet by going to Liveacutions.TV. Videos and more pictures will be posted on our website.

We look forward to meeting you on sale day. Although we can not visit with everyone on sale day we would like to say a heartfelt thanks for attending and let you know that your attendance is appreciated.

Sincerely, Blair, Lois, Brett and Melissa

p.s. Our sale barn is heated but the bulls is on display outside, so dress accordingly.

Online Viewing & Bidding

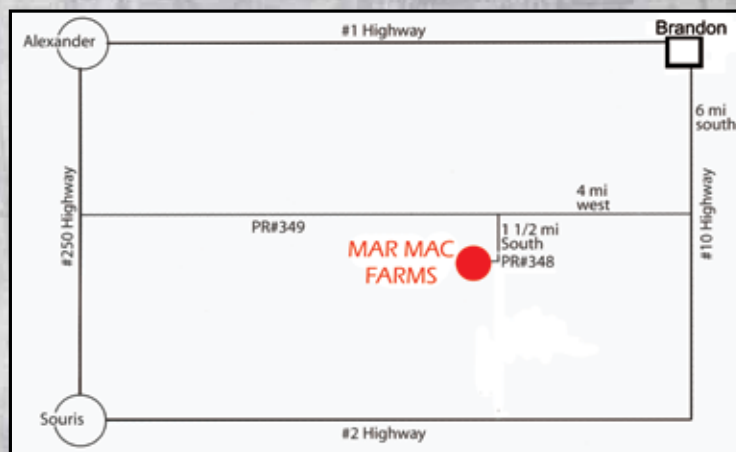

We invite those of you who are unable to attend the sale to be part of the action! We would never want to give someone an excuse not to attend this event, but if the situation arises, we have you covered. With the help of LiveAuctions.TV we are now able to give you a live connection to the auction. Real-time bidding will be available via the internet for this sale. Please go online a few days before to register. We encourage you to come to the farm ahead of time and check out which bull(s) you are interested in and then bid online if you desire.

Visit www.LiveAuctions.TV to register and watch online
 Contact Jill Mader at 403-990-9187 for assistance.

The Mar Mac Farms & Guests reserve the right to draw semen on any bulls in the sale for their in herd use.

View catalogue, videos and additional sale bull photos online at www.marmacfarms.net

NOTE: You can not come north from HWY #2 on PR #348 as the bridge is out!

TERMS AND CONDITIONS

BUYER SELECTION PROGRAMS

Give Mar Mac or any other of the consignors a call anytime... Call us a few days in advance of the sale with your bull needs and we will compile a list of bulls that we feel will work for you. As we are with the bulls everyday, we know the qualities in each bull. If we buy a bull for you sight unseen and you do not like him, you don't own him - no problem!

.....

*At the Mar Mac and Guests Bull Sale our 50 plus years of experience as a family run operation means
CUSTOMER SERVICE is an important part of our business.*

*We guarantee our bulls 100%, sight unseen purchase satisfaction, wintering program, personal contact
after the sale of the bull and the coffee is always on for you to come and view our program.*

.....

WE CAN SUPPLY YOU WITH QUALITY BULLS AND CUSTOMER SERVICE

Bull Guarantee...

All bulls have complete a breeding soundness evaluation by Virden Animal Clinic. If your bull fails to be a satisfactory breeder, we will replace him with a bull of equal value or give you your money back. We guarantee you will have a sound bull to service your cows. We will not provide a replacement if your bull has been miss managed. At no time shall the liability exceed the purchase price of your bull. Bulls under one year of age on semen test day will be tested after their birthday, before you need them.

.....

Calving Ease Score...

We evaluate each bull for calving ease determined by bone size, birth weight, birth weight EPD and profile.

Scoring is as follows:

- *** Recommended for use on moderate framed first calf heifers. Should produce minimal or no calving trouble.**
 - ** Recommended for use on large framed first calf heifers & cows. Should produce minimal or no calving trouble.**
 - * Recommended for use on cows. Should produce minimal or no calving trouble.**
-

The Cost of Fuel...

is atrocious, so drive your car! We offer to board you bull free until April 15, after that cost until you need him. As well, we will deliver your bull free to central points in Western Canada or the US Border and cost will be shared to Eastern Canada. We will make every effort to get the bull to your farm. Delivery will be as close to the date you request your bull, but will be at our convenience. If you want to pick up your bull at the farm, you can save \$50 off the purchase price. If you can not take your bull when we are in your area, we would appreciate if you made arrangements to pick up your bull.

Peace of Mind...

Your new bull is a valuable asset and we recommend insuring your bull for infertility coverage and all risk mortality. If you are taking advantage of our wintering program, your new bull must be insured so we both have peace of mind. Insurance will be available from Keystone Livestock Services (a division of Livestock Insurance Managers).

Accidents...

Although every precaution will be taken to protect the safety and comfort of the buyers, neither the sales staff, auctioneer or consignors assume any responsibility in this matter and disclaim any liability, legal or otherwise, in the event of an accident or loss of property.

Terms...

The terms of the sale are cash or cheque payable in *Canadian Funds*. The right of property shall not pass until after settlement is made. All settlements must be made with the clerks before any cattle are released.

Some things are hard to replace and Ribeye 346U is just that. We are so impressed by the docility, free moving, structurally sound, thick topped and stout individual Ribeye is. No matter what cow he is bred to you are pleased with the results. His daughters are now in production and are not letting us down, weaning off calves with lots of performance. The hard part is going to be to find the complete bull to follow after Ribeye. What a set of sons he has for the 2013 Sale.

EPDS: BW: -0.7 WW: 50 YW: 73 MM: 16

Two lead off bulls that you will have to drive many miles to see the depth of quality in a Red Angus sire. Lot 1 and Lot 2 are just that, big powerful bulls with lots of natural thickness, long bodied and thick topped individuals. Every top bull is produced from a strong powerful dam, 10T is a Mohican daughter that just keeps producing strong progeny. She is the dam of our calving ease herdsire, Mission 71W, her Ribeye son, Top Cut topped the 2011 Bull Sale to Lazy RC Ranch (sons of his in the sale). The full sister to these two bulls is Ruby 24Y, the calf champion at MLE 2011 and was in our show team 2012. She ended up being the 5th place overall for Red Angus Show Heifer of the year. Another full sister sold in the Power of Perfection Sale to L83 Ranch at Agribition 2012. 31Z was Senior Bull Calf Champion at Agribition 2012. So as you can see the depth of quality and performance to this cow family is second to none. If you are looking for a herd bull that comes out of a strong cow family and the meat sire Ribeye 346U, you need to look no further than Indicator and Initiative.

We would like to keep an interest in both of these bulls as we feel they have lots of potential in the future. Terms announced sale day.

Red McRae's Reba Lee 121W & Red McRae's Reba 12S - Sister & Dam of lots 11 & 12

The Reba cow family never lets us down. Here are two sons of Red McRae's Vision 50T and out of Reba 12S, so yes they are full brothers to the Reserve Champion Female at Agribition 2011. We sold a half interest in Reba 12S to Graham Red Angus in Ontario and we have retained her in our herd and are flushing her. We wanted to get some full sibs to Reba 121W and so far two bulls. They are just long bodied, stylish thick made bulls that every time you enter the pen they stick out. If you are using the tool of EPD's check these out. The 50T bull sold to Ken and Rebecca Mackenzie at Red Roundup but we collected some semen for our herd and now is for sale on the open market. 50T leaves tight, neat udders with lots of suspension, low birth weights and easy fleshing cattle. There are some proven genetics here. Mulberry, Blazer, Keystone and Prince, the whole Mar Mac Red Angus program wrapped up on one paper.
Owned with Graham Red Angus., Ontario

S: MAR MAC BLACKBERRY 155X

MCRAE'S BRIDGET 125T

D: ANGUS COW

Weights: BW: 84 WW: 729 YW: n/a JAN. 28: 1170

A thick solid red Blackberry son.

HOW MUCH MORE IS A GOOD BULL WORTH

The price spread between calves of equal weight can be 5 cents to 10 cents

A 550 lbs. calf at 5 cents that is a \$27.50 premium
If a bull produces 30 calves per year for 5 years that is equal to \$4125.00

$30 \text{ calves} \times \$27.50 \times 5 \text{ years} = \4125.00

Here is an exciting young herd sire you will hear lots more about. A black Mulberry grandson out of a McRae's Powerpoint dam, 125T. 125T was also the dam of the high selling Tiger son in the 2012 Mar Mac Sale and is now working at Gereli Angus. 125T has been flushed this year for a bank of eggs to bring into our Black Angus program. Blackberry's first daughter sold in the Keystone Classic Sale for \$3750.00 and I am sure you will see her on the show road this year for the Holipina junior members. Blackberry's progeny are thick, phenotypically correct.

Look what this two year old heifer has produced. 89X goes back to Brett's original Sarah cow family. Longevity, good hair and easy fleshing describes them. We liked the look of Old Post so he was used in our black program. Camaro is a Final Answer son who is leaving his mark and following close to his sire. This is a heifer bull that should leave some beautiful mother cows.

MAR MAC FEED PROGRAM

It was a pleasure to work with Mar Mac on their bull development program. We approached Mar Mac's unique business by forage testing and understanding what is on farm first and foremost. We then built them the right plan for the type, breed and genetic potential of the herd. Longevity is top of mind with a forage focused programs that highlights natural performance and potential. Strong emphasis is put on vitamins and minerals to ensure growth and maturity of your next herd sire. Years of sound genetics backed up with a strategic nutritional program is what you will find at this year's bull sale.

An Odin power bull also from Brett's Prissy cow family. It is amazing to see that every year those cow families just keep creeping out of the top bulls pedigrees. A top set of numbers on this bull and some performance to go with it.

DOWNHILL SIMMENTAL

Everett Olson
Rapid City, Manitoba
204-826-2643 - 204-867-0076

Welcome to the sale. First of all I would like to thank Blair and Lois for continuing to make me a part of their sale. I continue to crop just over 1100 acres of grain and have grown my purebred herd to breeding just over 50 cows and a handful of purebred Salers that are now used as embryo recipis or crossbred Simmental. The bulls have been kept at Mar Mac since weaning and are there for your viewing. Thank you in advance for attending and your interest in my program. If you have any questions don't hesitate to call.

Something a little different here. I have had some producers ask me to bring out a Simmental X Salers half blood so here is one for your appraisal. Stout, wide topped, excellent hair coat with very good performance.

EPDS - EXPECTED PROGENY DIFFERENCE

The expected difference in performance of a bulls progeny when compared to the average progeny performance of all bulls evaluated. EPD's cannot be compared cross bred. Breed Averaged are at the start of each breed section.

CE	Calving Ease - percentage of unassisted births with the more positive number indicating greater calving ease.
BW	Birth Weight - the birth weight of a bulls progeny when compared to the breed average, in pounds.
WW	Weaning Weight - the adjusted weaning weight of a bulls progeny when compared to the breed average, in pounds.
YW	Yearling Weight - the adjusted weaning weight of a bulls progeny when compared to the breed average, in pounds.
MM	Milk - a measure of amount of pre weaning performance gained by calves which can be attributed to the milking ability of a bull's daughters. The EPD is expressed in pounds of calf.
TM	Total Maternal - each of these terms measures a sire's ability to transmit milk production and growth rate through his daughters. It predicts the weaning weight of a sire's daughter's calves. If is equal to the milk EPD plus 1/2 of this weaning weight EPD.

Darryl, Tanya, Liam & Ivy Perkin
Box 138 Elgin, MB R0K 0T0

204-769-2159 • dperkin@wcgwave.ca • www.perkinlandandcattle.com

At PLCC, we really enjoy the people we meet in the cattle business, whether commercial or purebred breeders. We strive to produce functional cattle for the beef business that possess high maternal qualities along with exceptional muscle and pounds that set Simmental apart. We have 126 breeding females, sell all of our bulls here with McRae's and have a female sale in Killarney the first Saturday in December. We invite everyone to visit our farm to come and see our herd of cows and the bulls that are fed here all winter. We always enjoy a chat about your business and how we can help move it forward. We are located 7 miles west of Minto or 4 miles east of Elgin on Highway 23, then 2 1/4 miles south on Croll Rd. Give us a call or drop in!

WFL Doll 20P has truly been a special cow for us...not only has she flushed tremendously – giving us an average of 21 embryos in her last 3 flushes – but she has produced very attractive, functional females and some of the top bulls in our pen each year. With her high maternal numbers, it's hard to find another one like her.

It is not very often we get to sit down and write comments on a bull as awe inspiring as this guy - he has the "stuff" that great bulls are made of. To start with, his pedigree can't be beat with the great Wheatland 680S and our Power Drive flush cow WFL Doll 20P. The rib shape, volume, hip and top on him are truly massive. A wide based bull with above average testicles, he was a class winner at the 2012 Manitoba Livestock Expo and has easily done over 4 lbs./day on test. When you see him stride out, he is a true masculine spectacle. Serious cattlemen take note...he could be the next one.

You may have seen Kid Rock at the MB Livestock Expo last fall as many admirers commented on how much mass he has on a small frame. This bull has as much rib shape as any in the pen and a huge hip that carries down into a deep quarter, straight top and a nice tidy head and shoulders. This bull is a smaller framed bull but so was Stubby and look at the job he's done. An On Target mother that we purchased at Agribition, she is a good milking little tank of a cow. With an 86 lbs. birth weight, put this guy on your heifers and wait for those lively calves to thicken up right before your eyes. A little bull with a big future.

Five Full Brothers

FOXY ROCKSTAR
S: R PLUS HARD ROCK 145X
 MISS R PLUS 8014U
 TWIN CHIEF MIDAS 248M
D: CONRAY RACHEL 935R
 TFED RACHEL 835G

We have always touted the great females that Twin Chief Midas has left us. We decided that we should flush one of our most productive daughters to Hard Rock with the results being 5 full brothers, 3 red and 2 black. As a group, they are like peas in a pod as they have all been at the top of the pen for ADG. These brothers are all deep sided, sound structured and as long spined as they come and will be able to go out and work for cattlemen who want to put pounds on their calves as well as make replacement females. The Midas cow is a moderate framed, big volume cow that has a well attached square udder and who has been a consistent producer of top progeny. *Homo Polled by parentage*

When you step out on a limb and buy a bull as interesting and outcross as Hard Rock, you have to have a little faith that this guy is going to work with your cows and lots of others...and he has. The testicle development of his sons has been truly remarkable, and their growth curve birth to weaning has been impressive. These calves were born small, lively and easy and quickly grew into the bulls you see today. These first Hard Rock's are something special to us and we think you will find one or two you can use on your farm.

Suggested Heifer Bull. At PLCC, we have long admired the progeny of Mader's Black Gold 110S cow, so we were lucky enough to purchase a flush on her and decided to breed her Hard Rock. We felt the combination of Dynamite Black and Hard Rock would be exciting and the five females and this bull we got would definitely be that. 510Z is long spined with a big foot under him, deep flanked and full hearted, with a big tool box. All of the sibs were born with quite a short gestation, which is the most economical way to get calving ease. This fella is ready to go out and do some serious work. *Homo Polled by parentage.*

This bull will put the identity back in your calves with his blaze face. His Nugget mother is one of our favorite cows - a real tank of a cow that milks really well as all Nuggets do, she is also the grand dam of Lot 82. Her first bull calf, he is a long, black freight train with a little more frame. Add the blaze face and pounds to your calves this spring with this guy, his performance and milk EDPs don't lie.

Another 680S son that has really come on this winter, with a milk EPD of 9.6! You've heard us say it before, "We wish we had more Red Heat daughters" - they milk so hard and seem to consistently put bulls at the top of the pen. This will be 378M's fifth bull to go through this sale. A good set of numbers, that electric hair and an outstanding bull, could be an easy pick for someone needing a top black herd bull.

Suggested Heifer Bull. A Phil x Nugget home run. Put this guy in the heifer pen, his growth curve is wicked good - he indexed 111 for BW, then 110 for WW and YW. These Phil son's really are eye catcher's - they have terrific hair, a big hip, long top and good testicles. The Phil daughters we have calved have perfect udders with lots of milk, are moderate framed and seem to be very fertile. Phil has met our expectations and with Nugget on the mother's side, this guy is a beauty.

Wow! A deep red bull that has performed at the top of the pen all year and a full brother to the bull Stan Rampton bought last year through this sale. A sure bet to add pounds to your calf crop without giving up calving ease. The Nugget x Phil breeding truly is a great combination, we had 3 high sellers with this breeding in last year's sale and have 2 bulls this year. There is "no Led in this Zeplin", the sky is the limit for this guy. A bull that really should have been pictured for the catalogue, but we can't fit them all!

With that deep red color, thick hair and square top this bull is real beef machine that will add eye appeal to your calf crop. His mother is a favorite cow around here, selling her only other bull calf to Ron Wytinck in 2011. She was also the grandmother of our second high seller in last year's sale to Richard Unrau. 112Z will make a great addition to anyone's bull battery.

Suggested Heifer Bull. I only got around to breeding the hot KOP Crosby cow to one cow last year - must have been the concussions! But this old Red Doc cow has already put 4 other bulls through the sale and this one fits with all the others. She is a very low birth weight, proven short gestation cow who knows how it's supposed to be done. A big sided, hairy bull with a strong genetic package and a good milk EPD.

THE PAST YEAR

Mar Mac is a family ran operation and during the year we require some additional help while we are at shows and events. We could not achieve our goals without the help of our families, friends and neighbors in the Roseland community. A special thanks to everyone who took time out of their busy schedules to support our farm and the Mar Mac Farms & Guests Bull Sale Volume 9! Your support is greatly appreciated.
