

TWENTY-FIRST *Annual*
MOOSE CREEK RED ANGUS BULL SALE

• 3PM • APRIL 13, 2015 •

welcome to MOOSE CREEK RED ANGUS

21ST ANNUAL YEARLING BULL SALE

Welcome to the 2015 edition of our yearling bull sale. Thank you for your time and interest in reading through our sale book. We are as excited as ever to be in the cattle business, and 2015 has done nothing but amp up our excitement.

A lot of work has gone into preparing the 2015 yearling bull sale. Countless hours of measuring and evaluating cattle, the tireless effort to calve, breed and wean a strong group of sale animals. The time and dedication to prepare the facilities and sale hospitality, and finally the miles and hours spent visiting and discussing stock, programs and philosophies with new and old customers alike. The long and short of it is – it's hard work. The joy we get is not from the prices we receive or the recognition that is given, but the enjoyment of seeing each and every person that attends the sale and those who are as excited as we are about the cattle business. For those of you that fit this description; this sale is dedicated to you.

The bulls are as uniform as any you will find in the nation. We have listened to our customer base and have worked diligently to lower birth weights, moderate frame scores on the cowherd, and develop these bulls with longevity in mind. The bull pen is fed to last and the cowherd is pushed to be efficient. They bale, swath and corn graze, calve unsupervised and rebreed quickly to our walking sires. This offering is designed to be rugged, hardworking and efficient. It's in their DNA.

Please accept this as your invitation to the sale. We would love to host you and show you our brand of hospitality. Come for a light lunch prior to the sale and stay for our famous steak fry after.

The Appetites

A large thank you goes out to the hundreds of cattlemen and women that we have supplied bulls to in our 40 year history. It has been an honour to call so many of you friends and to have your loyal support. Many have been with us for over 25 years while spanning three different generations of bull buyers.

We are certainly blessed to have supporters like you.

CONDITIONS & GUARANTEES: All entries sell with a responsible breeder's guarantee of satisfaction. In the unlikely event of any dispute whatever, regular TERMS & CONDITIONS shall apply in accordance with the Canadian Angus Association Code of Ethics.

ALL CATTLE ARE SOLD subject to tests as required for export under Regulations of the Health of Animals Branch, Department of Agriculture for Canada. Export health chart and brokerage charges are the responsibility of the purchaser.

TERMS OF PAYMENT: Cash or cheque payable to the Clerk of Sale on Sale Day. U.S. Funds will be accepted at the current Rate of Exchange on sale day.

INSURANCE: Ownership risk to Purchaser commences when Auctioneer's hammer falls. Full

Mortality Insurance is available sale day. Cattle returning to Moose Creek Red Angus after the sale must be insured.

HOLDING & SHIPPING: Approximately one week is required for export transfers and other documents to be processed. Export animals will be held at the Sale location at no charge and under excellent care. Joint export shipping arrangements to obtain minimal shipping cost will gladly be made if instructions to that effect are provided to Clerk of Sale at time of settlements.

TRUCKING: Free trucking will be available to the Prairie Provinces at the purchaser's convenience before May 1, 2015. Delivery after May 1, 2015 will be at a mutually agreed upon time for both parties. Most deliveries will be to your yard but

some may be to central locations due to load size and time. If the truck is headed past your yard, expect your bull to be on the load. Anyone taking advantage of the free trucking must insure their bulls. No exceptions.

HAUL YOUR OWN: Bring your trailer sale day and receive a \$100 discount per bull.

OWNERS: Reserve the right to withhold from export shipment animals for whom Buyer or Buyer's agent have not made arrangements for payment in full, or other satisfactory arrangements, prior to time of export departure.

ALL PERSONS who attend the Sale do so at their own risk, and the Owners and Sale Staff assume no liability, legal or otherwise, for property loss or for any accidents that may occur.

Another moderate BW calf out of 15X. CW Wiggins & Sons run a brother on their heifers.

MOOSE CREEK RED ANGUS TWENTY-FIRST ANNUAL BULL SALE

Take advantage of our subsidized insurance. It is the simplest and most straightforward policy in the business. Very affordable and you don't need a law degree to read it either.

This is a video sale. No bulls will physically enter the sale barn. A video of each bull will be playing at the time of sale. Viewing of the bulls can take place anytime prior to sale day. Give yourself time sale morning to evaluate the offering prior to the sale time. The experience of choosing your bull in the ring changes drastically at a video sale.

Always like to leave an elite bull till the end. 60 lbs BW and over 800 lbs WW. I think he qualifies as elite.

*Always learn to appreciate what you have,
before time makes you appreciate what you had.*

BULL DEVELOPMENT

BUILT FOR THE LONG HAUL

We pride ourselves in providing a sound, well managed and durable sale offering. This group is the result of more than 40 years of Red Angus breeding and development decisions. Our role as a seedstock producer is not taken lightly; we spend countless hours researching, evaluating and measuring growth, gain and fertility in our herd. These decisions ultimately affect your bottom line. It's important that we get it right, for your operation and ours.

As the old saying goes – feeding cattle is half science, half art and half luck. We continue to work directly with our livestock nutritionist to develop our bulls on less grain and more forage. The benefits of a “cooler” ration have been documented hundreds of times but rarely acted on. We are not afraid to tell you what our bulls eat. A maximum of 8.3 lbs/day rolled corn, 2.15 lbs/day custom bull supplement, chopped alfalfa hay and the balance corn silage. This ration targets a 3.2 lbs/day gain; very similar to what the bulls were gaining prior to weaning. With all of the forage in their ration and the large paddock to run in, the bulls are athletic and ready for spring turn out.

A strong vaccination plan is very important to us as well. All of the calves born here receive SomnuStar pH at birth and then are vaccinated with SomnuStar pH, StarVac 4 and Blackleg at branding and again at weaning. The cowherd is vaccinated prior to breeding with a modified live strain to control IBR, BVD, PI3 and Iteme. To our knowledge, we are the first Red Angus herd to PI test our entire cowherd and keep that status current. We have been a PI BVD free herd since 2004, the year we started testing.

The cowherd is run just as our customers do – bale graze, corn graze, graze stockpile native range. We are currently in the WBDC cost of production study, ranking our operation against some of the top commercial cow/calf operations in the province. It is very important to us to be able to raise our herd in a low cost environment, the kind that our customers are moving towards. We certainly aren't the cheapest cost of production but I am proud to say we are holding our own, even with the added costs of maintaining a registered herd.

Finally, all of these bulls were bred, born and raised here. The guy opening the trailer door in your yard is the same guy that bred this bull to that cow, tagged the calf and ran the feedwagon to feed him. We are in the business of selling bulls – poundmakers, momma cow makers or non trouble makers – 365 days of the year. If you phone to ask about a certain bull, rest assured, we know all there is to know about him. Because it's important we get it right, for your operation and ours.

Reference

DESIGNER 1559039

Designer really stamps his calves. Moderate, wide based, deep bodied and that beautiful cherry red colour. His first daughters are just starting to calve and they exhibit square udders with ideal teat size, not to mention they are lying down to calve with ease. We are really high on Designer. Check out his pedigree online, it is outcross and unique.

BW -0.5 | WW 59 | YW 109 | M 16 | TM 46 | CE 1.7 | MCE 6.8

SRIRACHA 1709967

Sriracha's legacy will be his powerful growth numbers, definitely the poundmaker in our herd bull battery. He produces tanky females and high WDA sons consistently. If you need to add some real fall pay weight, mark these Sriracha calves.

BW 4.2 | WW 56 | YW 84 | M 15 | TM 43 | CE -9.9 | MCE -0.6

MALCOLM 1585534

We have calved heifers, 2nd calvers and mature cows to Malcolm and he never fails to have calving ease and add growth. His first daughters weaned some of our biggest calves as 2-year-olds and looked great doing it. This is the final group of sons as he was lost to a broken foot post breeding season. His sons have been very easy to sell. *Owned with Kevin Brigden*

BW 2.6 | WW 57 | YW 93 | M 20 | TM 48 | CE -3.6 | MCE 1.2

GANGSTER 1579035

The longer we use Gangster, the more we think he is our most valuable herdsire. His first daughters exceeded our highest expectations with their beautiful udders and broody design. Their calves were standouts at weaning and haven't slowed down since. He is more than a sleep easy heifer bull, his breeding strength will be displayed with the 90+ calves we will have in 2015.

BW -3.0 | WW 37 | YW 57 | M 18 | TM 37 | CE 11.4 | MCE 5.0

CREEP FEEDING

OR TRANSITION FEEDING, AS WE LIKE TO USE IT

It seems like every year there is a hot-button topic that people like to ask about. The past couple of years, the question “do you creep your calves?” has come up. The short answer is yes. After we answer yes, the next question is always, “So you do it for the weight gain, right?” Well, unfortunately no. That is where it gets complicated!

After not creeping or “transition” feeding for many years, I made a decision to start again. It was based on four main principles, and believe me, the weight gain isn’t one of them.

To explain why we creep I must first explain our situation... In about early August, the herd bulls are pulled and all of the cows are assembled into one group. At this time, the males and their dams are separated from the females/steers and their dams. The groups then go to larger ungrazed pastures. Imagine 80 pair moving into 320-640 acres of banked native range. At this time the creep feeders go out. The bull calves have full access to the feeder which holds 3650lbs of pelleted feed. It normally takes one month for the calves to empty it. The next time it is filled it takes about 3 weeks. So if you are calculating, the 80 calves have consumed 7300lbs of pellets in about 50 days: about 1.8 lbs per head/day. Not very much. So you can see, weight gain is not our goal of creep feeding.

However, the calves are now started on a ration that contains mineral, Rumensin and protein. These are all ingredients that are needed in growing calves on banked native grass. So we have our calves trained to eat and started on a better plane of nutrition prior to weaning – points 1 and 2.

The 3rd point is when we start to wean these calves, stress is reduced. We vaccinate on pasture and put in those quiet wean nose “thingys”. The calves are weaned after five days and placed directly in the paddock that they winter in. In the paddock is more grass, alfalfa hay and... you guessed it, the blue feeder.

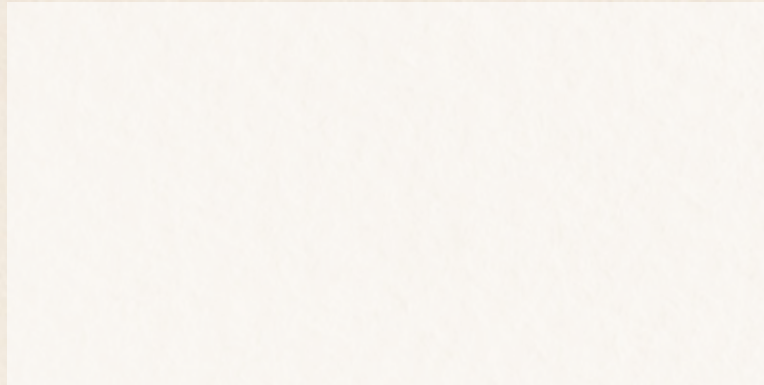

The final and most important point of “transition” feeding is that when we wean these bulls, they are the only cattle on feed at the yard. And this is October, so starting two tractors to make a TMR ration for these guys makes no sense. Not to mention, we are baling straw, hauling hay, chopping silage, and the last few years, cleaning pens. The other important part of the blue feeder is the massive saving on yardage. We can develop the bulls accordingly by knowing the weight of the pellets and the days it should take the group to finish them.

So as you can see, *creep feeding isn't about the weight gain*, it's about the financial gain. **And “transition” feeding really works for us.**

WELCOME TO MOOSE CREEK RED ANGUS

Welcome to Moose Creek Red Angus. Established in 1972, we are one of Canada's pioneer breeders. Situated in the south east corner of Saskatchewan, our cattle are raised on the native range south of the Moose Mountains.

Our program is committed to producing sound, fertile, easy keeping cattle designed for the commercial cowman.

Annually, we host an on farm weaning bull sale mid-April, a private treaty open house 2-year-old bull sale early February, and sell replacement quality females from our large commercial herd each fall.
