**New
Generation**
Female Sale

**RED ANGUS - RED & BLACK SIMMENTALS
COMMERCIAL HEIFERS**

**MAR MAC
FARMS**

Welcome

to our first Fall Female Sale. We are excited to offer you some NEW GENERATION genetics from a family program that has been breeding Angus cattle for 60 years and 39 years in the Simmental business. We are proud of what we have accomplished and plan to share the top end genetics with you on December 13th.

For those of you, who do not know us, we are a family run operation who makes their living in Agriculture. Our children, Brett and Melissa are the 5th Generation to be involved on this farm, and the agricultural industry.

This sale offering may be the strongest, most consistent set of females that we have ever raised. They are all very deep bodied and structurally correct. We are offering every bred heifer for sale you are selecting from the entire bred heifer crop. We believe strongly in cow families and you will see that as you go through the catalog, these would not be offered for sale if not for this production sale.

Our cowherd is annually culled on feet and legs, performance and fertility, if they do not measure up they are not kept at the farm. You will note that we are selling Red Angus and Simmental females, due to the smaller number of Black Angus females we are retaining all of them this year.

Feel free to stop in anytime to view the heifers and discuss them with us, or view the videos online at marmacfarms.net.

If you are unable to attend the sale, please contact any member of our family or sale consultants, they would be happy to help you out. Cattle will be displayed outside, dress accordingly.

Please join us for lunch before the sale and Christmas cheer following the sale, in the heated sale barn.

SEE YOU ON DECEMBER 13TH.

Blair, Lois, Brett and Melissa McRae

Welcome from T BAR C

I have had the pleasure of being involved in marketing Mar Mac genetics for several years now. Blair and Lois have deep roots in the purebred beef cattle industry and have raised their children who are now both important players in the operation, solely off agriculture. The Mar Mac operation is diverse in that they raise both Red and Black Angus as well as Simmental cattle. All three groups of breeding females share one thing, they are all based on cow families that have proven themselves worthy to be a part of this program.

The females offered in this sale represent all of the top cow families, giving you, the buyer, a rare opportunity to select young females who are backed up by proven matrons giving you a higher degree of predictability. This program has used AI to access some of the most sought after genetics as well they have sourced and bred some of the top working sires in Canada. Make sure you are represented at this great event, if Shane or myself may be of any assistance feel free to call us anytime.

Chris Poley | T Bar C Cattle Co. | 306-220-5006

Welcome from MACKENZIE MARKETING

I am honored and delighted to be involved with Blair and Lois and their family in this fall female sale. I don't accept many offers to be a consultant anymore as Sherry and I have a young and often very energetic family...but I've always been impressed with the ranch just south of Brandon known by all as Mar Mac.

These folks and I are very similar in nature as far as cattle breeding and management philosophies go!

I truly do respect and admire their program and love for their family and cattle. They believe whole-heartedly in the value of an AI gun and they know how to cull an animal, instead of making excuses for her!!

When I was touring this summer we had the chance to go thru all of the sale cattle. I could go on and on about a few of the very top, select lots... but instead let me just say this... the whole group blew my hair back!! The consistency and uniformity of the whole sale offering is what is etched in my mind. Step back a moment and examine the degree of difficulty it involves to get a group of females to be so similar in type and kind. We are also talking 2 different breeds and 2 different colors as well! The Red and Black Simmie heifers both B's and C's are outstanding. The Red Angus Group are amazing and leave you wanting more. I especially like the calendar year calves.

Trust in me when I say when you get to Brandon on December 13th you will find something you will want to own.

If I can be of any assistance for your buying needs if you shouldn't be able to make the trip, please call me. We can discuss your options and I'll represent you on sale day with confidence and respect.

Always for the cattleman,

Bryan Mackenzie | Mackenzie Marketing | 403-627-8266

Welcome from BOHRSON MARKETING

Welcome to the highly anticipated Mar Mac bred and heifer sale.

If you go through this set of bred's you will find consistence, thick, soggy, broody, feminine fronted, future mama cows. With this set of bred's you will find females that will be bull makers. The way these bull sales have been going, you will need more cow power to make those front end bulls, so here they are.

Take a look at the next generation. These fancy power houses can offer you a calf to hang a halter on or a bred in the making. This set of calves is right off the top of their keeper pen.

These are the females I walked through with Blair and Lois in August on grass. They were extremely proud to show them off and rightfully so, they are a group of females that anybody will be happy to have in their pasture. These folks are giving you a rare opportunity to pick a future cow from such a deep and rich genetic base.

This family makes a living in the beef industry, structure and soundness comes first, and numbers come second in their herd. Their Angus and Simmental foundation cows represent the best of both breeds.

If you are unable to make this great event, please give myself or one of the capable sales staff a call, and we will be more than happy to find you your future bull maker.

Thank you,

Darryl Snider | Bohrsen Marketing | 780-385-5561

SIMMENTAL

39 years in the Canadian Simmental Breed. In 1976, Mar Mac Farms began in the Simmental beef business by purchasing a package of cows from Bar 5 Simmental. We were extremely impressed with the performance and mothering ability that we then decided to pursue a cowherd of Simmental females.

One of the highlights of the Simmental breed has been Bar 5 Administrator, one of our senior herd sires who went on to become a trait leader for Weaning Weight and Yearling Weight in the Simmental breed for a number of years.

As long time members for 37 years in the Keystone Simmental Association, our females have been merchandised there in the past. The Simmental program was also built around cow families like Carli 14N, 765N, Macho Girl, Nike, Prissy, Patty, and Deb.

At our annual bull sale on the farm, Simmental bulls have been selected for performance, easy fleshing and marketability. We have focused our Simmental program on Red and Black Simmental cattle that work for the purebred and commercial industry.

McRae's have always been involved in the Simmental breed; Blair is currently the Canadian Simmental Director for Manitoba, he served on MSA board for 6 years and was a founding member of the National Young Canadian Simmental Board. Brett and Melissa participated in many Manitoba and National YCS events, was well as showing Simmental cattle and judging at some major shows like Agribition.

RED WHITE FACE | POLLED | PUREBRED

A growthy Johnny Cash female out of a Winchester female from Twin Brae who has brought in some heavy weight calves each year. Remember we sell our cattle by the pound.

TOMBSTONE'S MOTHER

SWAN LAKE TOMBSTONE 40Y

We purchased Tombstone admiring his hair coat, depth and width of quarter and powerful mother cow. Tombstone was used extensively in our herd and semen rights leased to Genex. I think this group of Tombstone females will take your breath away as they are just like peas in a pod.

MAR MAC CARLI 14N

This Nophalt Black female of Melissa's, has been the heart of our Simmental program for a number of years. If we did not have so many daughters in production, these females would be staying in the herd. Here is a cow family the Next Generations of Carli's that you can build a program around.

**REFERENCE
SIMMENTALS**

MAR MAC JOHNNY CASH 102A
Tombstone x Red Label son owned with Wayne Heinrichs.

IPU MARKSMAN
Selected out of the Labatte Sale in 2014.

RED ANGUS

Angus cattle have been a part of the McRae Family history for 60 years.

In 1983, the Red Angus division was started when Blair and Lois got married. We purchased 3 cows from Wayne Heape and then slowly built our program. One of the first females went on to be the dam of Red McRae's Blazer 336C. We were offered the opportunity to expand the Red Angus program and purchase the Buck Valley Red Angus cowherd. Their outcross genetics have been a strong addition to our cowherd base. Cow families like Frado, Reba, Siera, Lady Trooper, Kerry, Easter, Ruby and more have developed.

Since day one we have worked hard to create a program with calving ease, performance, fertility, new genetics and structural soundness. As we have an annual bull sale these females have to produce bulls that will work in the purebred and commercial sector of the beef industry.

We are proud of our accomplishments in the Angus program; 50 year members of the Canadian Angus Association in 2005 and hosted the 100th Anniversary barbeque at our farm, Lois is past Canadian and Manitoba Director for 12 years, Brett and Melissa were Canadian Angus Junior Board members representing Manitoba, participating in the World Angus Forum in 2009. Melissa was on the winning team at the Youth Competition in New Zealand. Along with many successes in the showing. Here are some photos of the highlights and we look forward to many more highlights in the years to come.

Stop the truck, here are two top end individuals that you would put a lot of miles on to get this depth of quality, maternal and paternal in the Red Angus business. We decided not to take any bred on the show team this year but these two were right on the list if we did. We were very impressed with the calving ease and stout offspring of Peacemaker so used him heavily in the heifer pen this year.

109B is a grand daughter of the *Frado 53J cow family*, one of our foundation females, length, fertility and great mother cow. 109B's dam is a young Roughrider female who will be one of our foundation cows in the future; she is just getting started in her motherhood. Our Prowler females have picture perfect udders.

51B - When Nate Marin called us one September day about purchasing a female at the Brylor sale, our selections were given to him and we ended up with *Bonita 65X*. She is a picture perfect profile female with lots of milk and has produced sons that are working in herds in Manitoba. This is her first female so that is why we are only offering choice in these two amazing bred heifers. This female as a correct as they come and will benefit any program. Ribeye, Arson and Mulberry, wow what a pedigree.

RED MCRAE'S REBA 12S

At Red Roundup, Bryan Mackenzie talked us into taking 3 Rebas out and offering pick of two of them and we bring the other one home. Well Reba 12S sold a half interest to Graham Red Angus. Reba Lee sold to Wild Cat Creek and went on to be the Reserve Grand Champion Female at Agribition. We in turn brought 92X home and she is the dam of Lot 32. Scott has kept 12S here at Mar Mac and here are some of their progeny. Sons of 12S have sold to Horner Cattle Co and Bill, Audrey and Jason Bird. Another cow family at Mar Mac that has made a difference to our maternal strength.

Lady Trooper was the 2014 Red Angus Show female of the Year and high selling female at Red Roundup 2013. Since that time, Trooper has produced a Beiber Roughrider female that was the high selling bred heifer at Red Roundup 2015, selling to Bullis Creek Ranch, Nebraska. Trooper has since sold to Dale McKay and Mar Mac and is in our Donor Female Program.

Trooper is now out at Davis Rairdan being flushed and we are going to sell a package of eggs in the New Generation Sale.

Watch for details on our web site. This is an opportunity you will not want to miss on this phenomenal young Red Angus female.

Roger Davis (Davis Rairdan ET) long time friend has been flushing cows each year for the past 24 years at Mar Mac Farms.

Manitoba Ag Ex 2015

We had an amazing Ag Ex 2015. Simmental Premier Breeder, Premier Exhibitor, Champion Breeders Herd and All Breeds Jackpot Champion Bull.

Thank you to our crew for all your help and hard work!

MAR MAC FARMS
& GUESTS BULL SALE
 RED ANGUS, BLACK ANGUS & SIMMENTAL
MARCH 9, 2016 - ON THE FARM

TERMS

Piece of Mind - Livestock insurance will be available sale day from Keystone Livestock Services.

Accidents - Although every precaution will be taken to protect the safety and comfort of the buyers, neither the sale staff, auctioneer or Mar Mac assume any responsibility in this matter and disclaim any liability, legal or otherwise, in the event of an accident or loss of property.

Terms - The terms of the sale are cash or cheque payable in Canadian Funds. The right of the property shall not pass until after settlement is made. The settlements must be made with the clerks before the cattle are released.

Breeders Guarantee - Cows represented as being pregnancy tested safe in calf have been examined and declared safe by a licensed veterinarian and will be accompanied by a vet certificate to this effect. They are considered breeders without further guarantee. For heifers under 12 months of age and purchased as single lots and who fail to conceive to the service of a bull known to be a breeder, the matter must be reported in writing to the seller before the heifer reaches 18 months of age. The seller shall have 6 additional months in which to prove that the said female is a breeder and may use any registered bull of the breed available to him. Any female returned will be at the purchaser's risk. No guarantee is given that a pregnant female will deliver live calves or that she will carry calves full term or that the calf carried will not be mummified. The seller is not responsible for damage caused by foreign bodies after the animal has been sold or for sickness not apparent at sale time. At no time shall the liability exceed the sale price.

The image features a sunset landscape. The lower half shows a dark silhouette of a field with a line of cows grazing. The sky is a mix of orange, yellow, and grey, with some clouds. The upper half of the image is overlaid with a light grey geometric pattern of overlapping triangles.

see you down the road
