RED MOON *Angus*

RED MOON ANGUS

Red Angus Yearlings

Welcome to the 8th Northern Alliance Bull Sale. The Northern Alliance sale group is again presenting a group of bulls hard to beat anywhere in the country. We continue to receive good feedback from buyers since inception of the sale. With the number of bulls in the sale and different sire groups represented we are confident you will find a breeding bull to meet your needs. **Join us on sale day at the new facility in Ft. Fraser BC, Belsham Farm. Twenty minutes up the road from BCLC facility in Vanderhoof.**

Our Black Simmental bulls are available by private treaty off the Farm.

Red Moon continues to stay with the fundamentals –calving ease, structure, maternal traits, moderate frame with muscle and performance. We are offering a good selection of Red Angus bulls for use on heifers and some power bulls for your mature females. The bulls in our pen will be 16 to 17 months old when most of you turn out. We have recorded the actual weaning weights off the cow taken mid-September of 2017 along with the bulls' actual weight Feb 4th 2018. The dam's side of things plays a very important role in the production coming from her offspring. Hence, we give you as much information of the Dam side of things as we can fit into the short write-ups. More info is available if you wish to contact us. We also are careful to record where our bulls find new homes. We can easily tell you what breeding lines your past purchases came from.

We continue to use breed leading AI Sires and good walking bulls. To keep our gene pool open we are changing the sires every two years. Fresh genetics for our customers is a priority.

The Red Wilbar Over The Top 825Z has increased the muscle definition in our bulls and we are confident in his progeny's ability to do that for your herd. 825Z brings good length, excellent confirmation and solid feet to the table. He is also a very easy keeping bull. Combining him with the maternal traits we have in our cow herd, makes a pretty solid match. We purchased him as a mature bull from Wilbar Cattle Co, Saskatchewan. He comes with a proven record and Wilbar has good producing females in their herd from him, along with top bulls in their bull sale.

We used Red Nine Mile Cogan on our heifers. The goal was to get a little more performance from the heifers without giving us any calving problems; by all accounts he has done that. His calves came easily and we kept over only the bull calves that we thought would make great heifer bulls. They should perform well giving a little more performance to you for weaning.

All of the bulls are fed at home, we feed a balanced ration and locally grown dry mixed forage. Bulls are fed to promote healthy growth and development. The pen is on a complete vaccination program; including express 5 and protection for foot-rot, by sale day all will have had their booster shots and ivermectin. We weigh the bulls every 28 days, weather permitting, weights may be viewed on our web site www.redmoonangus.com. The pen is fed by hand and is familiar with people walking amongst them.

To all that have supported our program over the years, thank you! We wish you all easy calving and profitable calf sales!

Jim and Shirley, Tom and Charlotte

BRYAN WILLMS, WILBAR CATTLE CO.

“Over the Top 825Z daughters at Wilbar Cattle Co. are maturing into beautiful big ribbed brood cows. They have tidy udders that are built to last. We are very pleased with the production these females have shown, weaning numerous sale features in this years Tools of the Trade Bull Sale”.

LOT 500

Moderate BW and good grow on this easy doing bull. Weaning weight in September of 758lbs. Another non nonsense cow family combined with the solid pedigree of the Over the Top bull. Good muscle expression and very easy doing. Feb 4th weight of 1120 lbs ADG 3.02.

LOT 501

From a second calver, Red Moon Tess 70B. First calf is a heifer we have retained who also has a pretty impressive show career. The Tess cows have been exceptional mothers with nice tidy udders and good bone. The Dams BW was 90 lbs, she is a deep sided female and is thick across the op. Good spread on this bull between birth and yearling weights. Very good son of Red Soo Line Power eye 161X. September weaning of 820 lbs and Feb 4 weight of 1214 lbs. 3.02 ADG on Feed.

From one of the favorite cows here at Red Moon, Moon 21R. Twelve calves on the ground and she never misses a beat. Son's working for C4 Ranching and Doug McIntyre, females retained in our herd. A moderate BW of 88 lbs and a great weaning in September of 764 lbs. A good footed Dam with an exceptional udder and great longevity. Combined with power and muscle from the Over the Top bull. Feb 4th weight 1110 lbs ADG 3.16lbs.

The dam is a very honest producer. This is her eleventh calf and she has never missed a stride. Longevity and maternal. She has averaged 75lb birth weights on bull calves and 80 lb birthweights on her heifer calves. Bulls from her have worked for the Adams of Fort Fraser, Holmquist family of Vanderhoof and Bamberger Family of Fraser Lake. We have retained some great females and have also sold some to other purebred breeders. Sept actual weaning weight of 704 lbs. Feb 4th weight of 1022. ADG on feed of 2.86. Great sire behind this calf being Red Ringstead Kargo 215U.

A thick topped calf from a Red Northline Crush 59R daughter, Dam Moon 11X is now considered an elite cow with the Canadian Angus Association. The dam has averaged 90 lbs on bull calves and 82 on heifer calves. Always comes in with one of the biggest calves off pasture. Really good performance, good footed and nice udder on the female. The Over the Top bull has really added muscle definition to his progeny. Bulls have worked for Paul Dotton and Allan Joiner. We are keeping females from Moon 11X and they are becoming a great asset to the farm. No nonsense kind of females. September weaning weight of 902 lbs. Feb 4th weight of 1345 lbs ADG 3.72 on feed.

This is the only bull offered this year from Red Northline Rev 341R, a Canadian National Red Angus Champion. The Dam is making her mark for Tom and Charlotte. Bull calves are averaging 83 lbs and heifers 70 lbs. Progeny have worked for Doug Brophy and Stanislaw Kojac. Females are retained. Proven genetics in this yearling bull. September weaning weight of 729 lbs. Feb 4th weight of 1124 lbs ADG 3.34 on Feed. Our Northline Rev females are herd builders! Talk to us about semen on the sire.

Fourth calf from a great young cow, Red Moon Dyna Queen 34Z. She is turning into a herd builder. Her progeny 3 bull calves and one heifer calf are exceptional. Moderate BW on this bull with more than just adequate muscle. A heifer from Moon 34Z is working for Glenn and Denise Stewart of Burns Lake in their purebred herd, bulls are working for

Double Box Ranch and also Brian Adams. Average on the bull calf birthweights 86 lbs. We are definitely hoping for more females to retain from her. This bull calf weaned off in September at 755 lbs. Feb 4th weight of 1181 lbs ADG of 3.90 on feed.

Red Bieber Roosevelt W384 is an AI sire we selected the last couple of years. We absolutely love his calves. In 2017 C4 Ranching purchased a son from our sale, we picked up the bull from their pasture early September and took him to Farm Fair for show in November 2017. We were ecstatic to win Senior Yearling Champion Red Angus Bull with him. We are also fortunate enough to have 3 daughters from him to breed this spring. The Dam of Moon 48E is a Red Northline Rev 341R daughter from a Dynastorm Cow. This cow family is a mainstay at Red Moon. Weaning weight in September 777 lbs, Feb 4th weigh of 1138 lbs ADG on feed 3.63.

A well-muscled bull from a six year old cow. Moon 41Z is proving to be another great Barmaid cow. We have retained daughters for our herd and bulls are being used in local commercial herds. The dam has a birthweight of 78 lbs and has averaged 93lbs on bull calves and 83 lbs on heifer calves. Weaned in at 778lbs Sept 2017. Feb 4th weight 1170lbs ADG on feed 3.40.

Great weaning weight on this calf at 742 lbs considering he started at 72lbs. From a first calf heifer whose birth weight was a moderate 84 lbs. This is total new genetics on the female side to our herd. We purchased the dam from Brox Stock Farms in Wetaskiwin Alberta. Always trying to keep the genetic pool open here at Red Moon. The Monopoly Sire is known for calving ease and has become a popular AI sire. Feb 4th weight of 1069 lbs with ADG on Feed of 3.13.

This is the 4th calf from our Red Moon Lady 20Z. The Lady females are full of maternal traits and have some of the nicest udders going. Females are retained for our herd and she has a bull working for Tabor View Ranch. The dam has a birthweight of 84 lbs. Again longevity is so important. Grand Dam produced 10 calves for us and she has left her

mark on bulls and females throughout BC. Super nice uddered females! Sept weaning on this bull of 775lbs and Feb 4th weight of 1165lbs. ADG of feed 3.3 lbs

Red Moon Dragon Slayer 23D, purchased in the 2017 sale by C4 Ranching. 2017 Farmfair International Sr Yearling champion bull.

A heifer bull. Both sides of the pedigree are full of calving ease. This is a first calf from a Dynastorm female who is sired by our MRLA Economy. The Economy bull has given many easy calving and easy fleshing females. Dynastorm females have been excellent mothers for Red Moon Angus. The Dams BW was 72 lbs and is ranked in the top 1 percent of breed for calving ease. A Sept weaning on this bull of 625 lbs and Feb 4th weight of 971 lbs. ADG of 3.19 lbs.

BLAST ANGUS

Black Angus Yearlings

Welcome to the 2018 Northern Alliance Bull Sale!

We are very excited to present this year's offering! They are a very uniform group of bulls with very good numbers and phenotypically correct.

Most of these bulls are sired by Border Butter Fundamental 105B. 105B was the \$21,000.00 high seller at the 2015 Border Butte bull sale. He has turned out to be everything we were hoping for and more! He is easy fleshing, easy calving, and has breed leading EPDs. His first daughters are calving now and have beautiful udders. We sold 105B last fall to Eastondale Angus in Saskatchewan.

The bulls were weaned at the end of September and have been on a grain ration and free choice hay. They will be semen tested prior to the sale. We welcome you to stop by the farm anytime to view them and their dams.

We, once again, had a successful year within the 4-H show ring! Sophie Stephens had the reserve grand champion market steer with a Border Butte Fundamental 105B son and Grady Stephens showed the top heavy weight steer. We sold six 4-H prospects in the fall of 2017 and look forward to seeing how the kids do with them this year!

Thanks to all the bidders and buyers at the 2017 Northern Alliance Bull Sale, the Shades of Autumn Sale as well as off the farm purchasers! Your continued support is appreciated! We look forward to visiting with you on sale day!

A really exciting bull! Long and thick! Maternal brother to the \$11,000 heifer calf we sold Six Mile Angus in Saskatchewan in the 2016 Pacific Invitational Sale. Dam is a deep bodied, easy fleshing, good footed Kodiak daughter. 7E is sired by the Border Butte Fundamental 105B bull. What a job he has done for us! We sold him last fall to Eastondale Angus in Saskatchewan. A very well balanced set of EPDs.

This bull is a real show off! Also, out of a young Game Day cow. Grand dam was out of our Peak Dot Rito 35L bull, the first herd sire we purchased. The Mayflowers originated from my parents, Frank & Dianne Strimbold. Probably 1/3 of our cows are Mayflowers! It's a cow family that works!

A standout individual with lots of muscle and balance! Dam is a bit larger framed Game Day 2 year old. He is also quiet as a kitten! Grandam is a Kodiak cow. The Kodiak bull left us with some tremendous daughters that cross well with everything.

Just a March bull. A heifer safe option with just a 72lb birthweight and a -2.4 birth EPD which puts him in the top 1% of the breed. Also in the top 1% for calving ease. Dam is a Kodiak daughter. This bull is a bit smaller framed. Lots of muscle shape, volume and natural fleshing ability.

MARBERLEY ANGUS

Black Angus Yearlings

Welcome to the 2018 Northern Alliance Sale. As I write this, the snow is continuing to fall to even greater depths. The top wire of the fence and the tops of the fence posts only just visible in the pasture. This year I have 9 good yearling bulls in the sale. All of the bulls have been Zoetis tested and sire verified. The dams of these bulls are good functional cows with quiet dispositions; they are sound footed and correct. This year I have 4 bulls sired by my senior walking bull, Crescent Creek 12Z Chisum, purchased out of Saskatchewan from the Crescent Creek herd for his calving ease, breed character, easy fleshing ability and feed efficiency. The heifers bred to him calved without assistance and the calves grew well. Chisum is a moderate framed bull who is correct on his feet and legs and moves well. Chisum's life time average birth weights on his calves are 82 lbs on his heifers and 86 lb on his bull calves. I have 4 bulls sired by leading AI sires chosen for their calving ease, maternal genetics and higher than average weaning weights. I have a single bull sired by my junior herd sire, Marberly Chuck 5C. 5C is sired by Cudlobe CC&7 55Y, a bull that produced calves with increased capacity, growth and muscle expression.

The bulls are being fed with Jim and Shirley Moon's bulls at Red Moon Angus. They have been vaccinated and boosted with Pyramid 5 Presponce and Ultrabac 7. The cows have been vaccinated with Express 5 guaranteeing the bulls to be BVD free. I look forward to discussing the bulls with you on sale day, and please feel free to contact me if you have any questions prior to sale day.

2E has been a real stand out on pasture last summer and this winter on feed. I really like this bull for his overall thickness and muscle expression. He is growing well and posting top gains on feed. His dam, 15X, is a model cow with solid feet and a great udder. Image Maker is an older AI bull that is known for lighter birth weight and excellent growth. Actual weaning weight was 801 lb. February 4 weight 1232 lb.

3E was shown last summer at his dam's side. He is deep, thick over the top, and very quiet to work with. 93S is a very productive cow, who has excellent feet and a good udder. I showed her last year at 11 years of age, and she placed well in her classes. Bennett Total is an AI bull known for lighter birth weights and excellent females. Heifers from this bull will be the herd builder kind. Actual weaning weight was 813 lb. February 4 weight 1312 lb.

I showed this bull as a calf last year in Burns Lake. He has an easy going disposition. This bull is long and thick with a smooth shoulder and clean front end. His dam, 8504U, is a bigger framed tank of a cow with great feet. She always milks heavily and brings home a big calf in the fall; this bull is no exception. If you are looking for a bull to breed cows and produce calves that pound the scale down, 12E will work for you. Actual weaning weight was 856 lb. February 4 weight 1229 lb.

26E is a heifer's first calf. She did an exceptional job, and he grew very well. He has a lighter birth weight and a great weaning weight. 25C, is a moderate cow with excellent feet and a tidy udder. 26E's sire, Long Distance, is a highly accurate calving ease sire with a maternally oriented pedigree. He is clean fronted, smooth shouldered and sound footed. 26E should work well on heifers. Actual weaning weight was 711 lb. February 4 weight 1122 lb.

POPLAR MEADOWS ANGUS

Black Angus Yearlings

Welcome to the 8th annual Northern Alliance Bull sale.

2018 will be the 53rd year Poplar Meadows Angus has been in business. We are proud to both be 3rd and 4th generation Ranchers.

At Poplar Meadows we strive to have deep-bodied, moderate framed, easy-fleshing females with longevity and the ability to function with minimal inputs. When one cow is in excellent condition and another is in poor condition in the same environment, the difference is the genetic superiority of one animal compared to another. Some cattle can get by on less feed because they need less feed for maintenance. Cattle that require less feed for maintenance are able to gain more efficiently, allowing a better feed conversion and more profitability for you the rancher.

Our bulls have been fed a Total Mixed Ration to gain 3 lbs a day. They are run in large groups in big pens for lots of exercise. We vaccinate the bulls in May and then again in September with Pyramid FP 5 + Presponse and Ultrabac 7 Somubac. Bulls will also have a Fusoguard vaccine for foot rot prior to sale. Bulls will have all passed a semen test and be ready to go for work. We 100% stand behind our bulls and have a large pen of bulls always available if something was to arise.

I always hear from people that they don't want a show bull but rest assured I never breed for a show bull I breed with the commercial cow/calf guy in mind. I've been successful in the show ring by bringing sound, correct functional cattle to town the same kind any commercial cattleman would be happy to own.

We would like to thank John & Tammy Dolliver, Kelly Wall, Olaf & Gloria Halvorson, Joe & Denise Smith, Mike Lombardi and Robert Carlson for all your help over the past year. We also appreciate Charly and Lucillie Belsham for coming up every year to help wherever they can.

Videos will be available on DLMS.ca in March and you can bid online as well. We understand our location can at times detour prospective buyers but we make every effort to work with you to get the bulls delivered. Post sale feeding is available please discuss with Tanya.

Taylor and his fiancée Alaina along with her daughter Saphira are currently living in Squamish. We miss him greatly but it's time for him to start a new chapter in his life. Hopefully somewhere in the future he comes back home. (no pressure Taylor)

As many of you have heard by now Monty was diagnosed with throat/tonsil cancer and is undergoing treatment in Phoenix. We caught it early and are very confident that he will beat it. We appreciate all the care and support we have received.

What this does is really put life into perspective. My Mom always shared this quote "This is your life not a dress rehearsal" So get out there and live life to the fullest.

Please come join us at our Fort Fraser Ranch sale facility for lunch and to peruse the bulls. We know you have lots of options where to buy your next bull but I believe you would be hard pressed to find a group of breeders who will go the extra mile to provide top notch customer service as the Northern Alliance group.

Powerful Natural Law son out of a Thunderbird daughter. 3/4 brother to the 5E bull. This guy has tons of presence, muscle, hair and bone. He will be easy to spot on sale day. I would suggest he be used on cows. Dam is attractive made with small tidy udder and great feet and legs.

From the day this guy was born we knew he was destined for stardom. All spring he was that calf everyone noticed and that I took cell phone pictures of almost daily. This fall we were trilled to receive Champion Angus Bull and then Reserve Champion overall in the Semex Presidents Classic at Agribition. He is backed by the Bar-E-L Natural Law bull who has become a highly sought after bull with the tremendous success this past year of his great daughters PM Rosebud 77'15 (Morasch) who was Synergy Supreme and Top Ten at Agribition , PM Echo 8'16 (Blair's Ag/ Carlos OjeaRullan) who was senior yearling winner and Reserve Champion female at Agribition, PM Emblynette 252'16 (Belsham) was reserve Junior yearling, Brooking Countess 7077 (Dusty Rose Cattle) senior heifer calf champion. Executive Decision is also backed by a great young cow. Picture perfect udder and great feet. She had a son sell to the Huxley Colony last year. The grand dam 5X is a donor cow and past show cow. The Blossom cow family has lots of performance and low maintenance. This bull definitely is worth the trip to come see how he has matured.

Terms to be Announced.

Aviator bull out of a powerhouse Hemi cow. Past sons have sold to KFC Farms and Blue Goose Cattle. He is an Aviator but being crossed with Hemi I would be hesitant to use on your heifers. Bigger framed impressive bull.

Bismarck calf out of an Aviator 2 year old. Dam stems from my extremely prolific MVF Princess 72X. The 72X was dam of the Princess 61'16 who was Supreme at Dawson Creek last year and one of our high sellers to Royce and Joanne Cook in the Shades of Autumn sale. This bull is stout and sound. Would be one of my favorites and a welcome addition to any level of breeder's heifer pen.

Sired by a young bull who was born in Oklahoma and came to Canada alongside his dam. His sire 10X is well known as a calving ease sire with performance. I'm pleased with how he produced but we unfortunately lost him 1/2 way through breeding last spring. His dam is a gorgeous 2 year old Natural Law daughter.

The first of my SAV Cutting Edge bulls. We toured SAV in the spring of 2016 and the Cutting Edge calves were my pick of what we saw that day. They have a little more birthweight but no calving issues at all. This bull was a twin with a heifer. I would be all over these Cutting Edge bulls to throw out with my commercial cows. Maternal brothers have sold to DMS Ranch, Wineglass Cattle and Jim Haughton.

This is a full brother to the 137E bull. This bull is long sided smooth made and has a unique pedigree that you could almost use in any cow herd in Canada. His dam has done a remarkable in produced top end progeny with many different sires. It's not often you find a cow who is that prolific. Unfortunately we lost her. **Terms to be announced.**

A full brother to the 160E bull. We strive hard to produce deep-bodied, moderate framed, easy fleshing females with longevity and the ability to function with minimal inputs. The 2S cow is now 12 years old and has never had her feet touched and still has a perfect udder. Isn't that the kind of cows you want to produce.

Big birthweight bull with a big weaning weight and will have a big 365 day weight. He was 1265 lbs first week of February. I don't usual keep anything over a 100 lbs a bull but when you know he will have the performance to back it up. For people selling calves in the fall don't overlook this guy. We actually weigh all our calves within 24 hours or less of birth. Weaning index of 110.

Complete bull out of an Aviator daughter. This bull had a weaning index of 102. The dam's 2016 heifer sold last fall to my sister Lia of Blast Angus. I would expect amazing scan data on this bull. The Soo Line grand dam is one of my top producing cows with a daughter selling to Jace Cattle Company this past fall. She will be one to watch this fall.

The C&C Denver bull came up from Oklahoma with a group of cows. We have been very impressed with him. He has impeccable feet, lots of hair and superb phenotype. He looks to be a bull you can use in the heifer or cow pen. Dam is a Sitz Dash daughter who has adapted well to Canada and will become a top end cow.

Powerful Complete son out of the hairiest cow we own. She actually is now an Elite dam with the CAA. Sold a bull out of her to Dan Foley and a bred heifer last fall to Canyon Tree Farms. He indexed at 106 for weaning. He was 1240 lbs the first week of February and is a mid March calf.

Four full brothers out of the power bull SAV Cutting Edge and my MVF Rosebud 313U cow. Touring SAV in the spring of 2016 I was most impressed with Cutting Edge calves. These mid-March bulls have an exceptional muscle pattern, clean fronted, strong feet and legs, and hair to burn. Don't let the birthweights scare you. Recip cows I believe added a few pounds on these guys. **Terms to be announced.**

Natural Law bull from the same cow family as the previous bull. This is the youngest bull who will be just a year of age on sale day. The Natural Law bull is currently in Billings Montana as we try collect sexed semen on him. He has become extremely popular with a 100 straws of semen selling for \$225 per straw at our fall Shades of Autumn Sale.

TERMS AND CONDITIONS

Terms The terms of the sale are cash or cheque payable at par. Cheques to be made payable to sale clerks on sale day unless prior arrangements have been made. The right of property shall not pass until settlement is made. All settlement is made with the clerks of the sale before any cattle will be released. US funds will be accepted at current rate of exchange announced sale day.

Bids and Disputes Every animal will be sold to the highest bidder. In case of disputes, bidding will re-open between the parties involved. If no further bid is made the buyer will be the persons from whom the auctioneer accepted the last bid. The auctioneer's decision in such a matter will be final.

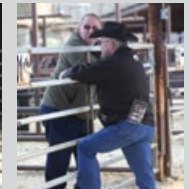

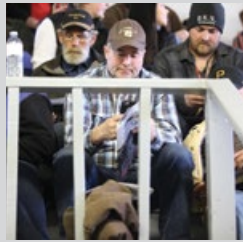

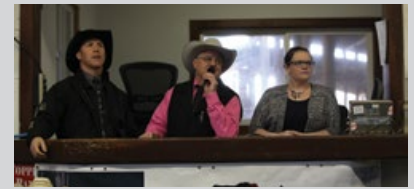

Announcements Any corrections or announcements made from the block on sale day will take precedence over the catalogue.

Purchasers Risk Each animal becomes the risk of the purchaser as soon as it's sold or as soon as the auctioneers gavel falls.

Certificate of Registry A certificate of Canadian registry duly transferred will be furnished to the buyer of each animal sold as a registered animal after settlement is made in a timely manner.

Breeders Guarantee All cattle are sold sound and right with a responsible breeder guarantee of satisfaction. In the event of an unlikely dispute the terms and conditions standard with the Canadian Aberdeen Angus Association shall apply.

Liability Although every precaution will be taken to protect the safety and comfort of the buyers, the auctioneer, sale management, sale staff, the auction mart and owners assume no responsibility in this matter and disclaim any liability, legal or otherwise in the event of an accident or loss of property.

GLOSSARY OF TERMS

Expected Progeny Difference (EPD):

Is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

Birth Weight EPD (BW):

Expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW):

Expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight EPD (YW):

Expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Maternal Milk EPD (Milk):

Is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Total Maternal EPD (TM):

The expected overall difference in weaning weight pounds of calves out of a bull's daughters compared to calves from daughters of a bull with a zero EPD for total maternal. The total maternal EPD is a measure of both growth and milking ability and is an indication of the size of calf a bull's daughter will wean. The maternal milk EPD is combined with half of the weaning growth EPD to produce the total maternal EPD. This is a prediction of the total genetic influence that a sire will have on his daughter's progeny.

Calving Ease Direct (CED):

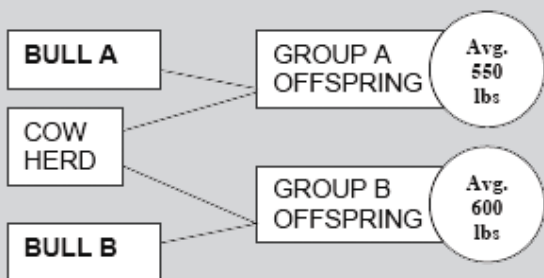

Is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Calving Ease Maternal (CEM):

Is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

How Do I Use EPDs?

Imagine you are interested in purchasing a couple of bulls for your herd. You are looking at the EPDs in a sale catalogue. Bull A has a weaning weight (WW) EPD of +10 and Bull B has a WW of +60. What does that mean? How can you use those EPDs to choose between the two bulls? If these animals were randomly mated with 10 similar cows, we would expect the group average weaning weight of Bull A's offspring to be 50 lbs lighter than that of Bull B's (60-10=50). So, if you were interested in producing heavier calves, Bull B would be the one to choose. Remember, EPDs evaluate group average and offspring's performance. They cannot predict individual performance or weights.

Average Black EPDs	BW	WW	YW	Milk	TM	CE	MCE
	+2.1	+45	+80	+21	+43	+3.5	+6.6
Average Red EPDs	BW	WW	YW	Milk	TM	CE	MCE
	-0.4	+53	+78	+17	+44	+3.4	+4.0
