GLOSSARY OF TERMS

Expected Progeny Difference (EPD):

Is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

Birth Weight EPD (BW):

Expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW):

Expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight EPD (YW):

Expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Maternal Milk EPD (Milk):

Is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Total Maternal EPD (TM):

The expected overall difference in weaning weight pounds of calves out of a bull's daughters compared to calves from daughters of a bull with a zero EPD for total maternal. The total maternal EPD is a measure of both growth and milking ability and is an indication of the size of calf a bull's daughter will wean. The maternal milk EPD is combined with half of the weaning growth EPD to produce the total maternal EPD. This is a prediction of the total genetic influence that a sire will have on his daughter's progeny.

Calving Ease Direct (CED):

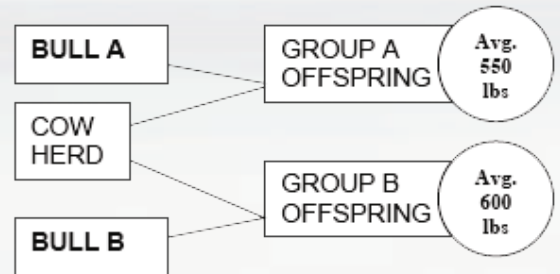

Is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Calving Ease Maternal (CEM):

Is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

How Do I Use EPD's?

Imagine you are interested in purchasing a couple of bulls for your herd. You are looking at the EPDs in a sale catalogue. Bull A has a weaning weight (WW) EPD of +10 and Bull B has a WW of +60. What does that mean? How can you use those EPDs to choose between the two bulls? If these animals were randomly mated with 10 similar cows, we would expect the group average weaning weight of Bull A's offspring to be 50 lbs lighter than that of Bull B's (60-10=50). So, if you were interested in producing heavier calves, Bull B would be the one to choose. Remember, EPDs evaluate group average and offspring's performance. They cannot predict individual performance or weights.

Average Black EPD's	BW	WW	YW	Milk	TM
	+2.9	+41	+72	+17	+37
Average Red EPD's	BW	WW	YW	Milk	TM
	+0.5	+25	+49	+15	+27

Angus Tags

One bag of Angus tags with every bull purchase.

CHERYL HAZENBERG of the Canadian Angus Association will be on hand to present each of our bull buyers with a bag of GREEN ANGUS TAGS!

POPLAR MEADOWS ANGUS

TANYA, MONTY AND TAYLOR BELSHAM

Welcome to our 4th annual bull sale. As I sit here waiting for calves to be born and thinking over the past year I must say its been a year that will be forever etched in my memory bank. In May of this year Dad was diagnosed with lung cancer. My dad is the reason I have the passion and love of Angus cattle. He believed in the breed 50 years ago and stuck with them when many thought he should have picked a different breed. Its been a long road this year with his health but Christmas Eve we learned his scan came back showing he is cancer free.

My biggest highlight of my show career was bestowed upon us this fall. Our bull HF Thunderbird 146Y was awarded Supreme Champion Bull at FarmFair in Edmonton. By winning this prestigious event we were awarded a DODGE truck. You still can't wipe the smile off my face. Thunderbird was also awarded show bull of the year in Canada by the Canadian Angus Association. Thunderbird has a very strong set of sons in this sale.

We have another great set of bulls on offer. We have many calving ease prospects and power bulls. The bulls have all been fed TMR ration to obtain a 3 lb a day gain The bulls have been vaccinated in May and September with Ultra Choice 8 and Cattlemaster 5. Bulls will also receive the Fusogard foot rot vaccine prior to sale The bulls have all passed semen testing and are ready to go to work. We stand behind our bulls 100%.

We are thrilled to welcome Scott and Orycia Anderson to our team. We would also like to thank Bianca Bernasconi for her dedication to our program over the last year. Another thanks goes to Morgan and Talon Volts for ensuring the Fort Fraser ranch is well taken care of and the bulls are fed properly.

We would be more than happy to help with trucking arrangements and feeding post sale. Please give us a call if you would like more information.

Here is the first of our Thunderbird show bulls. Thunderstruck has been one of my favorites from birth. His dam is a no miss cow who produced my \$10,400 high seller to Hamilton Farms a couple years ago. Thunderstruck is moderate in frame with extreme muscle shape. I'm very excited about his future and would like to retain a 1/3 ownership and no possession.

Another one of our great Thunderbird show bulls. It was very exciting to have Thunderbird on display this fall with 5 of his calves. Reality Check was 2nd in the ranchers choice at BV Fair and was part of the reserve champion pen of three at Farm Fair in Edmonton. His dam is a very attractive and prolific young cow. Her first bull sold to Rene and Joyce Dielman.

Another super functional Thunderbird son. His dam produced the Xcelerate bull who was purchased by Gar and Margaret Garton in 2011. Dam is a no miss cow with perfect feet and udder. No guess work with this one. He is very good.

This bull is out of the \$10,000 Soo Line Lady 9039 cow I purchased in the 2012 Soo Line dispersal. I flushed her last year to my Musgrave Aviator and they topped the Angus Foundation sale at \$1750 a piece. The 9039 cow is phenotypically spectacular and once you see this guy you will see the reason we flushed her. This bull was Mark, Bianca and Grant's favorite picture day. This guy had a ribeye measurement in the top 4 of the bulls.

Big time performance bull with unique pedigree. His epd's put him in the top 2% of the breed for weaning and yearling weight. His mother is a gorgeous Bismark daughter. Her 2012 bull sold to Roger and Sue Taylor of RST Angus. Purebred guys take a look this guy is good.

MARBERLY ANGUS

KIM BEAUDETTE

Welcome to the 2014 Northern Alliance Bull Sale. I have 6 yearling bulls on offer this year. Every bull in this group is structurally correct, and they come backed by proven maternal genetics. One of the bulls, 20A, is sired by the bull Wise Guy 10W; a bull I raised. I was very impressed with the quality and uniformity of the calves he sired, and many of Wise Guy's heifers have made it into my replacement pen because they are proving to be very correct and easy fleshing. Three of bulls, 1A, 6A and 9A, are sired by leading AI sires. I selected these sires for their excellent calving ease, explosive growth characteristics and good carcass qualities. Two of the bulls, 8A and 24A, are sired by the bull I purchased from Cudlobe Angus last spring. He exhibits excellent muscle expression, is correct and sound on his feet and has a great disposition. The bulls and their dams have been fully vaccinated with the Express Vaccine Program, guaranteeing them to be BVD PI free. The bulls are being fed at Jim and Shirley Moon's alongside their bulls. I hope calving is going well for all who are calving and wish good calving to those who have yet to start. If you have any questions regarding the bulls please call, I would be happy to help. I look forward to discussing the bulls with you on sale day.

1A is a very correct and stout made bull. His dam, 50L, is 13 years old and she calved near the beginning of our calving season again this year. She is a correct cow with excellent feet who always gets the job with little fuss or worries on our part. 1A's sire is an AI bull I used for his excellent growth and calving ease numbers. This bull should work well on heifers.

Quality bulls brought to you by reputation breeders

Lot 553

sire of this bull is the AI sire Mytty in Focus. I used this sire for his incredible EPD spread from birth to weaning. His calves tend to be born easily and grow like crazy. This yearling has a little heavier birth weight because he was 6 days overdue. 6A should add some pounds to your calves at weaning time.

EPD's	BW	WW	YW	Milk	TM	CED	CEM	Perf.	Act BW	Adj 205	Adj 365
	+3.1	+42	+75	+26	+47	-1.0	+1.0		95 lbs	847 lbs	

Awestruck 24A has been a stand out since birth. He is deep, thick topped and smooth from front to back. I showed him as a calf at the 2013 fairs alongside his 3 year old dam; where the dam was named grand champion Angus female at the Nechako Valley Exhibition and reserve senior champion at the Bulkley Valley Exhibition. 24A's grandsire

CC& 7 is a noted AI sire, he tends to sire calves with excellent dispositions and above average growth. This fellow has continued to grow and develop well and should not be missed on sale day if you are looking for your next great herd sire.

Thank You!

POPLAR MEADOWS ANGUS

FRANK AND DIANNE STRIMBOLD

Fourty nine years ago we bought our first Angus cows and we are still trying for the perfect cow. It has been a great time to have met with so many great people. We have enjoyed taking roles in various cattle organization and breed associations. We are not ready to quit yet. We will cut back numbers and I have become more reliant on my wife and kids. It has been a wonderful ride and one that we will always enjoy.

All of our bulls have ultra sound data available.

Quality bulls brought to you by reputation breeders

RED MOON ANGUS

JIM, SHIRLEY AND TOM MOON

Welcome to our 4th Northern Alliance Bull Sale. Where did last year go! The Northern Alliance sale group is presenting a group of bulls that are second to none in Western Canada. We have continually received good feedback from buyers since inception of this sale. With the number of bulls in the sale and different sire groups represented we are confident you will find a breeding bull to meet your needs.

The breeding program at Red Moon sticks to the fundamentals – calving ease, structure, maternal traits, moderate frame and good performance. We have a selection of bulls this year that will do that and protect the investment you've made in your females. This is what Red Angus Cattle should be bred for, Calving Ease!

Our herd sire, Red U-2 X Factor 387X has proven to give us calving ease and performance. The average birth weights on all of his 2012 and 2013 calves are 77 lbs with lots of vigor and length of body. The adjusted average yearling weight on his bull calves is 1145lbs. Going from moderate beginnings, to good growth and performance in our bull pen. The calving ease with this bull is exceptional without giving up performance. His first heifers are calving now, showing good maternal instincts and good udders. We own this bull in partnership with Heart of the Valley Ranch, Brad and Aleta Chappell of Courtney BC and U2 Ranch, Alberta. The bull has gone to Alberta to work for the next couple of years.

Another of our bulls, Red Brox Extreme 37Y is represented by some dark red, deep bodied calves. Average birth weights have been 95 lbs on bull calves and 87 lbs on heifers with adjusted weaning weights being 704 lbs and 670lbs. These bulls will put some extra muscle in your calves; we would recommend using on mature cows.

There are also two bulls from the great Canadian Red Angus Sire Red Fine Line Mulberry 26P. According to the Canadian Angus Association Mulberry has had an average birth weight on all bull calves of 87 lbs and 82 lbs on heifer calves; average on bull calf weaning weights of 684 lbs and 631 lbs on heifers. His progeny have become a base on which many purebred herds are building.

All of our bulls are fed at home, we feed a balanced ration and locally grown dry mixed forage. The bulls are fed to promote healthy growth and development. The pen is on a complete vaccination programing; including, express 5, and protection for foot-rot, by sale day all will have had their booster shots and ivermectin. We weight the bulls every 28 days and weights may be viewed on our web site www.redmoonangus.com. The pen is fed by hand and is familiar with people walking amongst them. They are not over conditioned and will be ready to work the day you turn them out.

Thank you to Al Smith and crew at the BC Livestock Yard in Vanderhoof. They have been a great group to work with. Thanks to Jeannie Chaisson for making a great beef stew for our lunch. Come out and join us for lunch at 11:30 am sale day.

To all that have supported our program over the years, thank you! We wish you all easy calving and profitable calf sales!

Jim, Shirley and Tom

We showed this calf last summer. He was the Bull Calf Champion at the Smithers Fair and also part of our winning breeders herd. His paternal sister was the Reserve Yearling Heifer and also Ranchers choice award winner in Vanderhoof and Smithers. This calf is from a good producing no nonsense female who has raised 7 calves to date. Average BW on her bull calves is 75 lbs and 72 lbs on her heifers. She has progeny working in the herds of Eldon Buck, John and Darlene Vala, Ryan Kusler, and Glen and Denise Stewart. Another calving ease bull Ranked in the top 1% of breed. Weaning weight Sept 9th 718 lbs, Jan 19th weight 1123 lbs average daily gain 2.94 lbs.

Dam has elite status with the Canadian Angus Association. Her daughters are on par to be the same. Bull calves have averaged 89 lbs and heifer calves averaging 81 lbs. Through her history she has produced 11 calves. Lots of milk in her pedigree. She has sons working for C4 Ranching and Gordon Parr. We have retained her females for our own herd. The bull calf weaned off at 739 lbs last fall, Jan 19th weight was 1198 lbs average daily gain of 3.31 lbs.

We are always looking to expand genetics, this is our first Lakima cow, we purchased this dam in calf, carrying this bull. The sire Red Fine Line Mulberry 26P is now known worldwide. This would be a good foundation bull for any herd. The dam has produced 5 calves with bulls averaging 78 lbs and heifers 69lbs. This is one of the youngest calves in our bull pen. Weaned on Sept 9 at 635 lbs. Bull is ranked top 3 % for calving ease, top 9 % for milk. Jan 19th average daily gain 3.49 lbs. We are definitely looking forward to getting some females from her.

The Dam of this calf, Red Moon Tess 33 U was sold to Rebecca Read of Prince George as a 4H project. Rebecca successfully showed this cow winning Grand Champion in Prince George and as she has since gone off to school we purchased the cow and calf back from her. This is one of the deepest sided bulls in the pen. His birth weight is larger than normal for our herd, we believe he would add muscle and depth to your calves. Weaned off at 741 lbs, and weighed 1186 lbs Jan 19th, 3.64 average daily gain!

RED MOON SIMMENTALS

Sire line on these bulls is known for calving ease and maternal strength. He is ranked in the top 1% for calving ease , top 2% for birth weights, top 5% for maternal calving ease and top 3% for marbling. Canadian Simmental Association ranking on these two calves is in the top 10% for calving ease and top 30% for weaning and Yearling weight. The Cow is one of our first purchases of Black Simmental and is proving to be a good mother and a quiet female to work with, her birth weight was 96 lbs. We have retained all of the heifers sired by the J Anchor Odin 43Y bull. This is a twin set of Black Simmental Bulls. Moon 39A had a fall weight of 717 lbs and a Jan 19th weight of 1013, with average daily gain on feed 3.84 lbs. Moon 40A had a fall weight of 704 lbs and a Jan 19th weight of 1056, with average daily gain on feed of 4.57 lbs.

A solid red bull calf sired by Red Brox Y- Xtreme 37Y. From a young heifer we purchased from the Remington Cattle Co. dispersal. Birth weight of 86 lbs with a Nov 3rd weight of 962lbs and a Jan 19 weight of 1218lbs. Average daily gain on feed of 3.32 lbs. Great job done by this first calf heifer.

BLAST ANGUS

BRENT, LIA, SHEA AND TORI LONG

We are excited to be a part of the 4th annual Northern Alliance Bull Sale. It is a pleasure working with the other consignors.

We are bringing our strongest pen of bulls we have ever sold! Most of our bulls are sired by our BCAR Game Day 012 bull who we are extremely pleased with. He is everything we were looking for in a herd sire. He is deep sided, thick, big nutted, athletic, long and very stylish! His calves come light and really grow. His EPD's will match up to some of the top AI bulls! A real breeding gem in our eyes. His first daughters will calve this year. They are beautiful deep bodied heifers with nice tidy udders. Our high \$6200.00 high selling bull last year was a Game Day son.

We are also offering 2 sons of the Blast Kodiak 4Y that we sold to Alexis Creek Ranch last year and one son of our HF Comeback 264U bull who we lost to a stifle injury last year.

We strive to raise easy keeping, no fuss cattle. Our cow herd is moderate in frame with emphasis on good feet, leg structure, udders and maternal abilities.

We are feeding our bulls at the ranch this year. We invite you to stop by and view the bulls, sire and dams anytime. All the bulls will be semen tested and vet checked. If you can't make the sale, give us a call and we would be happy to help you select the bull that will best fit your needs.

BCAR GAME DAY 012, Senior herdsire at Blast Angus

We will arrange delivery on purchases over \$2500.00.

Thanks to all previous buyers and supporters!
We look forward to visiting with you on March 29th!

Twin to 1A. A light birth EPD. Very smooth, long bull and he has a really good hindquarter. These bulls would be good to use on heifers. 772L is a moderate framed cow with a good udder and feet. Maternal brothers sold to Ties & Darlene and Blue Goose Cattle Company. These bulls have awesome dispositions.

Another Game Day with loads of thickness and very stylish. Note the light birth weight and good weaning weight. The dam, 24W is a Peak Dot Hobson cow, moderate in size and very deep bodied. A maternal brother sold to Woodmere Cattle Company. The maternal granddam sold to Harvest Angus and produced a bull that placed very well at Agribition. This bull could be used on heifers.

A full brother to our \$6200.00 high selling bull from last year that sold to Codan Livestock in Grande Prairie, Alberta. This bull is every bit as good! A really complete bull. Thick topped & thick butted. Note the dams age- "15!" Longevity built in! We sold a heifer calf out of a maternal sister for \$2900.00 to Ellis Cattle Company at the Pacific Invitational Female Sale. We have sold 1J sons to John Vala and Scott Meyer, as well as a daughter to Tanya Belsham.

A full brother to the bull Breed Creek Angus in Saskatchewan selected at last years sale. Deep sided, thick and easy fleshing with style to boot! Quiet as a kitten too! Note the excellent scrotals on the all the Game Day bulls. The sire is a +1.48 for the scrotal EPD. The dam, 20U, is a front pasture cow sired by the Hobson bull. This bull was our heaviest calf at weaning coming off bush pasture at 820lbs.

One of my favourites! A stout, deep, long bodied meat machine with tremendous muscle expression. Out of a never miss cow. Dam is sired by our first Peak Dot bull, Peak Dot Rito 35L who left us some very productive, deep bodied perfect footed cows with fantastic dispositions. Maternal brothers have sold to Gumbo Gulch Cattle Company, Mountain Ash Farms, Ties & Darlene Prins and Bill Klop and her first son was our high seller at the Williams Lake Bull Sale. Two daughters working in our herd. This guy will add some pounds and give you some excellent replacements.

A long bodied, big hipped performance bull with some style. Weaning index of 110. Out of a Battlecry granddaughter who has raised females that have sold to Symens Land & Cattle, Bill Vernon and Tanya Belsham. Grand dam 1K(13 years old) weaned a 772 pound Game Day heifer calf! Definitely longevity and performance in the Lady Heather cow family.

A really smooth made , deep bull sired by Blast Kodiak 4Y who sold through this sale to Alexis Creek Cattle Company. We used 4Y on our commercial cows and a few registered. I wished we had used him more! The steer calves averaged 748lbs at weaning! The dam, 11U, is a maternal sister to 1A & 2A. She is again a Hobson, moderate in frame and very feminine.

The best way to describe this bull is a real "chunk!" Another Game Day out of a very feminine, smaller framed, first calf Kodiak 264U heifer. He has a light birth weight and would be good to use on heifers. This bull is very well balanced and has a great hair coat. Dam is from the Mayflower cow family. Our original "Mayflower 12B" lived to the ripe old age of 19! Excellent disposition on this bull too.

The only HF Comeback son we have on offer this year. The 264U sons have been well received at previous sales. What a job he did for us. This bull is just a March 21 calf. He is a very complete bull with a great hair coat and lots of natural muscle. Dam is a big volume, deep bodied Rito cow. Maternal brothers have sold to Bill Klop and Ross Davidson. Another bull with a gentle disposition.

Check out this bull!!! He is full of red meat! Sired by the Blast Kodiak 4Y bull that sold to Alexis Creek Cattle Company at last years sale. Tori's old 21N cow has produced a real whopper here!! Tori has sold 5 bulls out of her Red Deep Creek Soapy 21N cow who was kindly given to Tori as a calf from Gar & Marg Garton of Deep Creek Angus. A daughter was selected by Tanya Belsham. 21N is a deep, large volume functional cow. She has been supporting Tori's "horse habits" for years!!

TERMS & CONDITIONS

Terms

The terms of the sale are cash or cheque payable at par. Cheques to be made payable to sale clerks on sale day unless prior arrangements have been made. The right of property shall not pass until settlement is made. All settlement is made with the clerks of the sale before any cattle will be released. US funds will be accepted at current rate of exchange announced sale day.

Bids and Disputes

Every animal will be sold to the highest bidder. In case of disputes, bidding will re-open between the parties involved. If no further bid is made the buyer will be the persons from whom the auctioneer accepted the last bid. The auctioneer's decision in such a matter will be final.

Announcements

Any corrections or announcements made from the block on sale day will take precedence over the catalogue.

Purchasers Risk

Each animal becomes the risk of the purchaser as soon as it's sold or as soon as the auctioneers gavel falls.

Certificate of Registry

A certificate of Canadian registry duly transferred will be furnished to the buyer of each animal sold as a registered animal after settlement is made in a timely manner.

Breeders Guarantee

All cattle are sold sound and right with a responsible breeder guarantee of satisfaction. In the event of an unlikely dispute the terms and conditions standard with the Canadian Aberdeen Angus Association shall apply.

Liability

Although every precaution will be taken to protect the safety and comfort of the buyers, the auctioneer, sale management, sale staff, the auction mart and owners assume no responsibility in this matter and disclaim any liability, legal or otherwise in the event of an accident or loss of property.
