Welcome to the 2nd Annual Pride of the Prairies Sale! After a hugely successful first sale both Kenray and Wraz are coming back with another offering that is loaded with value and great earning potential. The countless reviews and conversations that I was able to have with upon seeing and hearing of last years purchases working so well for their new consignors is so rewarding to see as this is what it's all about right? Positive results is what it's all about and when these programs set out their sale offering for the year it's about you the buyer! Building a breeding program is more than just sitting down and grabbing an AI book and breeding the cattle to what's easy and marketable. For these two operations their respective breeding programs is heavily researched through the pedigree, productivity and the lasting impact it'll have in the years to come. Short term success is in now way something that these two operations are interested in and if you spend anytime visiting with these guys you will soon realize their intent. That's what being a breeder is about and when it comes to presenting front end genetics every year while growing the genetic worth is something that is taken very seriously. So join us December 9th for a great continuation of a sales series and great Angus weekend with the Touch of Class Sale Friday night and the Mulberry Mayhem immediately following the Pride of the Prairies sale. The cattle will be available for viewing from Thursday on up to sale day as well both Phil and Sheldon, ourselves at Castlerock will be available at the same time to answer any questions you might have or to go through the cattle in a detailed manner at SLS.

See you sale day!

Shane Castle
Castlerock Marketing

Welcome

to pride of the prairies

Welcome to the 2nd Annual Pride of the Prairies female sale. How time flies! Winter has arrived with a vengeance which did not help shorten the to do list around here but the show must go on! We are once again very pleased to be working with our good friends at Kenray Ranch to host the Pride of the Prairies event and we welcome Bryan Mackenzie to join us in the pages of the same catalogue with the first in Canada Mulberry Mayhem event that will follow the Pride of the Prairies sale. We have selected a group of females right from the heart of our herd that represent our program and the various sire groups. The group of 26 bred heifers in our offering were selected from a group of just over 100 head that were bred this year. We bred them to new and interesting sires that we think will add value. I said it last year and I will say it again – we want the offering in this sale to be of the quality that you do not want to miss our annual event. We have culled them ruthlessly down to the point where we believe only your personal preference is the deciding factor. We are very confident in the offering and the WRAZ program will stand behind our cattle. We are talking about livestock here though and as livestock producers we all know the odd issue is possible no matter how diligent we are in our efforts – we encourage you to call anytime if you have any questions. Communication is the key to resolving any issue should one arise. You may notice mention of our good friend Gerry Walter/WCF Red Angus in my footnotes on a few of the bred heifers. We have a long term lease agreement on a group of cows with Gerry and annually bring in a group of heifer calves. All of the bred heifer tattoos that start with “6” are heifers that entered our program in the fall as a heifer calf. These heifers were developed here and are owned 100% by WRAZ - we stand behind them 100%. Now a little in general about the cattle – The cattle are on a year round mineral program and we work very closely with our local vet Dr. Henry McCarthy on a whole herd health and vaccination program. We Blackleg vaccinate and follow the BoviGold program protocol to ensure we have Fetal Protection and can maintain a BVD PI free herd. Ivermectin is applied to the whole herd annually. The bred heifers will have been scour vaccinated with their first shot prior to the sale. They will require a booster scour shot prior to calving to meet the label requirements. We preg checked these bred heifers at the most optimum possible time in our vets opinion for preg check accuracy and whether or not they were favourable to the AI matings so we could be as accurate as possible in our breeding information. I have done my best to be accurate but I cannot give you a sire guarantee. I like to breed for as short of calving interval as possible so some of the AI to pasture exposure dates will flag the progeny for a sire parentage test. WRAZ will cover the cost of the DNA kit if parentage verification is required for registration of any of the progeny from the bred females. It will be noted on the CAA transfer of ownership application that WRAZ will cover the cost. Please join us for supper Friday followed by the annual Touch of Class Sale with a great group of consigners followed by a little hospitality from our Castlerock sales group. Spend the night and join us Saturday for Pride of the Prairies followed by Mulberry Mayhem as well as more hospitality, food and fun!! Hope to see you there!!

Sincerely,
Phil, Lana & Family

WRAZ RED ANGUS

Phil Birnie 306-577-7440
Gordon Murray 306-646-7980

Welcome to the second Annual Pride of the Prairies Female Sale. Time is one of the things that continually leaves us wishing for more, more time to visit with our customers & friends, more time to watch youngsters develop and grow, more time to enjoy!! Make the time to be our guests on December 9th in Saskatoon to enjoy our special brand of hospitality and enjoy the fellowship of other dedicated Red Angus enthusiasts. We appreciate that there are lots of sales to source your next genetic investment from. For this reason, we extend a very appreciative thank you to those that have put their faith in our breeding program and have entrusted us with their business and friendships over the years. Many of our customers have had remarkable success with their purchases and have ended up becoming lifelong friends in the process. 2017 marks the 30th anniversary of our 1st purebred Red Angus purchase at Kenray Ranch. We have seen many trends, fads, operations and breeders come and go during this time. What remains constant during the years is that good cattle, bring good returns. We aim to produce a product that fits where the commercial producers are headed. While show champions, and high sellers are nice to achieve every now and then, what gets us excited is seeing functional mama cows in excellent condition bringing in big fat calves off grass in the fall. We manage our cows to work for us, they graze for as many days as possible before being turned into bale grazing paddocks pre-calving and only see the corrals during calving season, then they are turned out into one large group post-calving up until breeding season. We are a family operated operation so the same guys that AI the heifers, feed the bulls, bed the barn, mend the fences, treat sick calves and also follows up with our customers. We understand your needs and if you feel that we don't we want to hear it from you. Our offering this year is SOLID, we firmly believe that this group of bred heifers will go out and work for their new owners. Many carry exciting AI services to bulls that are breed leaders and have proven their worth already. Some carry service to younger bulls that we feel will take our customers and our program to entirely new levels. The heifer calves are a cross section of sires from our breeding program and are a true snapshot of where we are headed. Join us and our good friends at WRAZ Red Angus on December 9th in Saskatoon at SLS as part of the greatest RED ANGUS weekend in Canada - Blair.Ag & Six Mile Genetic Focus 2017 in Regina on Thursday December 7th, Touch of Class in Saskatoon on December 8th and immediately following the 2nd Annual Pride of the Prairies take in the Canadian Mulberry Mayhem event. Good times, great cattle, even better people!! Make the time to be our guests,

Sincerely,
The Kyle Family

Ms Prince has been royally bred with breed changers such as Packer & Staunch in her genetic make-up. She is a poster girl for the type of females that the Staunch daughters are becoming. We wish we had more of them & unfortunately 2017 was his last breeding season. Her dam was acquired as a high seller from T-K at the Keystone Classic in 2013. Hillcrest Colony purchased her maternal sister last year from the Pride of the Prairies Female Sale.

Exposed to Red Rack Bucc 54C May 18 – Sept 12.

Well someone needs their head examined!! Selling two daughters out of the very impressive Kuruba 32Z in the same sale?? Kuruba 23D is a deep ribbed broody heifer, just like the rest of the Indicator 30Z daughters. We are very impressed with the maternal abilities of our young Indicator cows. They have been transmitting his abundant muscle pattern and growth traits. This heifer carries a pretty neat AI service as an added bonus.

AI'd to Red Six Mile Grand Slam 130Z on May 16, exposed to Red Rack Bucc 54C May 31 – Sept 12.

Dynamint is a larger framed individual that will add pounds to her future progeny. As breeders we need to remember that in our pursuit of breeding calving ease genetics we still need females with some size and scale to them to produce pounds of beef come weaning time.

AI'd to Red Six Mile Grand Slam 130Z on April 30, exposed to Red Rack Bucc 54C May 18 – Sept 12.

The Rosa cow family has quickly become a recognizable family of deep quality and maternal excellence since we added them from the Kuntz Farms dispersal sale. In fact, we are currently flushing a young Rosa cow at Bow Valley Genetics. You will certainly hear more from this highly productive cow line in the future.

AI'd to Red Six Mile Grand Slam 130Z on May 1, exposed to Red Rack Bucc 54C May 18 – Sept 12.

If we were to pick one cow family that has played the most influential role in the development of our herd since our first Red Angus purchases back in 1986 it would have to be the Lana's. They are all highly predictable, profitable and unassuming. Lana 148D is an absolute tank of a bred heifer. She hasn't missed a beat since her late March birthdate and is potentially the biggest heifer in our offering. Her AI service to the Staunch 61D bull will be as exciting as she is.

When this heifer hit the picture pen she made more miles than a mall walker in February!! We finally managed to capture a picture that represents her extremely well. Sharp fronted, well muscled and dark cherry red. The Indicator daughters are some of our best young brood cows and will only get better with age. The old 906J cow in her maternal lineage was always a favorite of Doug Howes when he used to select for the Angus Pride sales in the past. Those were some great sales and a lot of fun!!

Ms Mark was an in-dam purchase from Howe Family Farms 2016 Fall Female Sale. Her young dam did an outstanding job raising this show stopper!! She is clean fronted, deep middled and fancy from nose to tail. Her sire Answer 505C was the high selling bull for Fraser Farms in the spring of 2016 for \$20,000.

This will be the 1st of the Solider 9B progeny that we have released to the public. He was a \$13,000 purchase from the fine folks at Twin Heritage Red Angus. His progeny are all super smooth fronted with some extra extension to ensure the calving ease is built in. This deep red heifer calf has been a pasture favorite all summer for most visitors to our ranch. Step in on a new genetic line that impresses us more and more each day.

This deep dark cherry red female is sure to catch your attention on sale day. Her dam was selected to go to Red Round-Up in 2016 but didn't make the trip to Red Deer very well and was pulled due to an injury. She has healed up 100% and has raised us a ripper in her 1st attempt at motherhood. We are certainly appreciating the curve bending genetics built into the Grand Slam progeny.

Stormy has made a lasting impression on everyone that has seen her this summer. Her mother is a moderately made mama cow with a beautiful udder. She was a Red Round-UP purchase from Y Coulee back in the fall of 2013. The Horizon sired heifer calves were very well received during this sale last year and Stormy 34E is cut from the same fabric.

Another Favorite!! Her dam 20A is the grand dam to the fancy Grand Slam heifer calf in our offering. If you are building cow families this may be a fantastic opportunity to invest in one of the up and coming families in our breeding herd. Sired by Soldier 9B only adds to her value, all indications point to these Soldier daughters being long lasting highly maternal cows down the road.

A bit younger calf sired by none other than the immortal Staunch 64Y. The Staunch progeny have been extremely well received and are continuing to breed on for their new owners. The Kuruba family is as solid as they come, not to overlook the strength of the Aster 663S cow that now resides at Allison Farms. If you are ever in their neck of the woods you need to stop in for a tour and enjoy their special brand of hospitality. You will be glad you did!!

Selling two Canadian – 20 dose semen packages. No more semen will be released until 2019 in Canada. Buyer of the 1st package has the option to sweep the ring and take both packages.

This is a bull that has been on our radar for a very long time. He was first spotted as a fresh bull calf during Canadian Western Agribition in 2015. The following spring, we elected to purchase a semen package when he sold for \$35,000 to Selte Cattle Co. After seeing the breeding power that he can transmit into his progeny we were wishing we had more semen in the tank. We proudly consigned a daughter to the Canadian Red Angus Promotion Society's Red-Round Up Sale where she was selected by judge Seth Leachman to be Champion of the innovative and highly successful Junior Heifer Calf Extravaganza. She later led of the mighty Red-Round up sale and traded to Ter-Ron Farms for \$8,000. The Endorse 20C calves in our pens at home continued to impress us and we jumped at the opportunity to acquire 50% possession and semen interest when we found out that it was potentially available. Sometimes it is true what they say.... Good things come to those who wait!! Endorse 20C has a pedigree with no holes, his dam Bayberry 704T has a flawless production record and has become a prolific donor cow. His sire Endorse 639X has proven himself as a female building extraordinaire. Endorse 20C himself is a bull with presence, deep blood red hair coat and moves like a cat on the prowl. Endorse looks great whether it be in the show ring or breeding pasture. Good things are just beginning to happen for this future breed powerhouse. Join the excitement and invest in his future.

Powerful female here with numbers that match! Her dam 44B is a Ghost rider daughter that was the cream of the crop heifer calf selected for the Brandon Keystone Klassic Sale. She sold to Rick Rohrich's Cutting Edge Ranch near Steele, ND. Rick leased her back to me and here is the result of her first try as a mother. She has done it again this year with a top end bull by Red Bar E-L Confirmed 102C destined for our April 15 Cornerstone Bull Sale. These Ghost rider females get it done and the Ms Prince cow family is one of the most consistent at producing good ones!

Pasture exposed to Black Red Carrier RRAR 5D May 11 to Aug 1. Preg checked Aug 1 to be 2 months along.

Top Star was a sire that could do no wrong especially on the female side of the equation. He has left behind a very useful set of top shelf females very similar to his beautiful mother. The Lass cow family consistently produces progeny with extra eye appeal. Dam 23X is a very dark red daughter of Big Rock 85T that no one misses on a pasture tour. If you do not have a Big Rock female you need one – the udders are fabulous. We have successfully flushed Grand dam Lass 206T and put her back into production again. At 10 years of age she still remains one of the top picks on a pasture tour. You cannot have too much eye appeal!

AI April 29 to Assassin then pasture exposed to Monopoly 32D May 16 to July 29. Preg checks more likely to the Monopoly exposure (no observed breeding but early preg check suggests she was likely bred on her next cycle).

The Tibbie cow family needs no introduction and Tibbie 657D will not disappoint. Look at the udder development/teat placement already in October when Grant took these pictures. She has been admired by many a keen eyed breeder. Her sire is a Soldier grandson that had many breeders gunning to own him at the Twin Heritage Bull Sale. A partnership of Kenray/WCF had the winning bid that day. Tibbie 657D is a product of our long term lease with Gerry Walter of WCF.

AI bred May 11 to the \$77500 ASSASSIN. Preg checked July 29 favourable to the Assassin AI breeding. Pasture exposed to Red WRAZ Monopoly 32D May 16 to July 29. Preg checks favourable to AI date.

Not everyone likes picture day including this young lady. Do not overlook her because of it! Her dam Annie Irene 10U always has a good one. We retained her first daughter 120X in our herd. A son 56A by Makn'Waves originally sold to Vikse's and now is doing a great job for Murray Crawford. I just toured his herd and what a set of females Waves has sired for Murray. Another son

120C sold to Tom Howe for his great producing commercial herd. There is some power behind this female. She may well be the kind that will lay down and have a herd bull for you.

Check out this one by XO Crowfoot 0102X. If you are watching your carcass EPD's don't miss this one! This is another one with a fairly interesting pedigree. The bottom side has some old school sires that we know can make a female and the top side is from the dark side. I think she is bred interesting as well with Waves back in the pedigree of the service sire. I am pretty sure Shane has her marked high up on his list.

Pasture exposed to Red Vikse Tidal Wave 130D April 18 to Aug 1. Preg checked August 1 to be at least 2 months along.

Boundry 49B is a Neptune son from MarMac that WRAZ and WCF own in partnership. I had also found Neptune at Flying K but Blair & Lois won the bid and bought him so buying a son was the next best thing. Blair and Lois are very happy with the Neptune females and I can see why. Blockana 11D is dark red and just look at the udder development. I am amazed at the bone she carries from a sire we used in our heifer pen with great success.

Pasture exposed to Red Fraser Packer 678D May 3 to July 29. Preg checks minimum 2 months on Aug 1.

We did not have time to fuss on picture day so we did not get a pic of Redcap 121D but she is worth a look. We have retained a maternal sister 21C in the herd. Her dam 228Z is very dark red powerful female that has done a good job. Millenium will only add to the maternal strength.

AI to Assassin May 14 then pasture exposed to Monopoly 32D May 16 to July 29. Preg checks to be favourable to Monopoly at 2 months along on July 29.

This is just one more example of what Millenium is doing for us. Marta 61D is definitely one of the feature Millenium daughters in the offering. I will take a liner load of females like this. Her dam 3X is just flat good! Females like this are rare and generally retained but I wanted to share with you just how good these Millenium daughters are. The mating to Assassin might just be your ticket to the next great one!!

AI to Assassin May 6. Pasture exposed to Monopoly 32D from May 16 to July 29. Preg checks favourable to the AI date.

Mistress 131D is a typical Y236 daughter. She is moderate framed and very complete in her overall make up. You can count on her dam Mistress 91W to have a good one no matter what sire you choose. There are maternal brothers working in two very well managed commercial operations and a maternal sister working in Murray Crawford's gem of a purebred herd. Maternal sister Mistress 15E was selected for Red Round Up 2017 and recently sold to Jarin Carter of J Lazy A Angus. The homework is already done on this one!

AI to Assassin May 8. Pasture exposed to Monopoly 32D from May 16 to July 29. Preg check is favourable to the AI date.

Red MRLA Millenium 75B has been quietly working the pastures here and proving his value as a calving ease sire. I have always maintained that his females will be his legacy if they turn out anything like his awesome dam. Here is is one of his daughters from our Serebl cow family for your evaluation. The Serebl cow family has been very strong on production and served us very well. Take 55D home and you won't be sorry you started your own Serebl cow family!

AI May 6 to Assassin then pasture exposed to Monopoly 32D May 16 to July 29. Preg checks favourable to the AI date.

If you believe in the power of a cow family like I do then this one should be on your list. Not only one of the first on offer out of our New Trend son but her dam Serebl 760T will be the next Serebl in our donor pen. She has been a prolific producer and made the CAA Premier Dam list back in 2013 based on her grande production. This Serebl cow family really gets it done. Serebl 40D is a maternal sister to Serebl 57W the feature donor prospect in the WRAZ offering. To make it even more unique Serebl 40D was hand bred May 3 to one of my favorite Ghost rider sons WRAZ 95C.

Observed bred to Red WRAZ Ghost rider 95C May 3. Preg checked July 29 favourable to this mating. Also pasture exposed to Monopoly 32D May 16 to July 28.

Descendants of the
Serebl
cow family

Choice Lot

Grand dam Serebl 95N has been successfully flushed in our donor program and has 16 registered progeny. 95N is still in the herd and going strong. Dam 760T is a CAA Premier dam since 2013 based on her production of Grand Calves. I believe Red WRAZ Serebl 57W to be of donor quality. Her highest achievement is her beautiful daughter by Ghost rider – Red WRAZ Serebl 84B. She was selected for Red Round Up not once but twice! Serebl 84B has a great home at Y Coulee and the summer tour reports are that she is doing a great job and is looking good doing it. 57W will sell as a choice lot. If the winning bidder selects 57W we will include 2 straws of Ghost rider semen and you will own her outright with no strings attached!!

Copper Classic 8E is dark red and as stout as a female needs to be. Her dam 20A was one of the high sellers for Shane Blake of Blakes Red Angus in their Moosejaw sale a few years back. 20A is correct and moderate in stature but big on performance. Grand dam Copper Classic 109 has 13 progeny.

Rosa 23E is another Red Compass 41B daughter - he really puts his stamp on his progeny. Shane picked her out of a group of 48 pairs on pasture this summer in about 3 seconds, pointed to her and said "you are going to put that one in the sale right". Her dam Rosa 26Z, is one of the strong producing females we have had the opportunity to acquire from Cameron & Carla of Double C Red Angus.

Red WRAZ Witzel 55E is sired by Millenium. Since we are offering a number of Millenium bred heifers I wanted you to evaluate one as a heifer calf as well. Her dam 34B is a very complete moderate framed Swayze daughter that is doing a very nice job. A sire like Approval back on the bottom side of her pedigree will only add to the maternal strength in her pedigree. There is solid proven calving ease in the Millenium progeny as well.

The Rider Pride females are looking good at WRAZ and at Baker's. The daughters in production now have lots of hair, they are tanky, big ribbed females that remain moderate in frame for the most part. They have nice udders and milk well. Dam 137Y produces well, has lots of eye appeal and a very sound udder.

Millenium came to Wraz as our choice out of MacMillan's Bull Sale in 2015. We really admire the length and the performance of the Millenium calves, you can't help but notice the length of spine on his calves. They come with his style that he stamps into each and every calf and his first set of calves were well appreciated with his bulls being highlights last spring our the Cornerstone Bull Sale. If you're into EPD's it's pretty hard to refute his EPD profile as he is in the Top 8% for weaning weight and milk and top 4% for his yearling weight with his birthweight EPD putting him in the top third of the breed. Selling two packages of 5 straws on this up and coming sire!

- A - 5 straws
- B - 5 straws
