# Welcome

Welcome to our 5th Annual Fall Bull & Female Sale. We would like to Thank You, our past customers, for showing interest in our livestock and our program. And as well, any of you new to our program, thanks for taking the time to come and evaluate our livestock.

This fall on offer we will have 68 bulls from our April/May calving program. We held back 4 or 5 complete sire groups from our Spring Bull Sale to be able to bring a strong set of bulls to this sale. Once again, we use May 10th as a cut off for any bulls born after that are saved for our 2 year old program, which are offered at our Spring Sale.

The females that we have selected for this sale consist of 90 bred Purebred heifers selling as commercials. As well as 100 fancy 66 Ranch bred commercial heifers. The Purebred heifers were A.I.'ed or exposed to a walking bull on July 10th. The only reason we offer these heifers to you is strictly a way for us to manage our female Purebred numbers. The commercial heifers were exposed to walking bulls July 10th. All the heifers were bred for two breeding cycles (40 days). These heifers all originate from our 66 Ranch commercial herd. The commercial heifers are all NVB. And the Purebred heifers will carry our traditional 66 freeze brand. All these heifers on offer, just like the ones we have at home, are expected to be turned out just like a cow and calve on their own, unassisted.

Whether you need to purchase any bulls or females for replacements for your herd, or you are just interested in viewing our cattle for the first time. We would really appreciate it if you could join us after the sale for an evening of socializing and a little "country hospitality!"

Thanks

*Kelsey, Malissa, Brett and Carter*

We've seen Resource at Genex Stud in Billings. A very moderate bull, extra rib x2, and super heel under this bull. We saw them collecting "Resource" and the collection team at Genex said you do not have to worry about Libido; Resource is very easy to collect. We are really looking forward to more progeny off of Resource at the ranch. Females calving last spring were all super uddered.

An A.I sire we are still really excited about. We are impressed with the thick, deep females he has sired. Real Angus looking cattle. Udders are near perfect. The bull calves sired by Thunder definitely have that "extra rib." Super long, deep sided cattle. He sure puts the hip on his calves and yet maintains that calving ease we are all looking for. Appears to be that all around perfect bull!

A walking bull we purchased from Cole Creek Angus in 2015. Goes back on the sire side to some older genetics, Juanada 7 of PJM. On our tour of Cole creek Angus, Malissa and I were absolutely amazed by the quality of females sired by this Juanada bull. Absolutely impeccable udders on those females. The bull calves sired by 1394B at last spring's Bull Sale were very well received. One of the strongest sire groups from start to finish. And WOW! Do the females look great, very deep sided cattle.

## NEWELL VETERINARY CLINIC

*The bulls offered for sale by 66 Ranch have all passed a breeding soundness examination and are classified as satisfactory potential breeders.*

*The heifers have all been examined to confirm pregnancy. In my opinion the Angus seed stock offered for sale are in excellent health and in ideal body condition.*

*I consider this offering to be very good replacement stock for the commercial or purebred herd.*

*Sincerely,  
Kirby Finkbeiner, DVM*

A walking bull at the ranch purchased from Cole Creek Angus from Billings, Montana area. We have talked before about the incredible females at Cole Creek, but maybe hadn't mentioned their cows are expected to work for them in very tough semi-mountainous / hard brown grass country. Cole Creek cattle have ease of flesh bred into them and 1144B definitely is easy fleshing. And once again out of a near perfect dam.

Maternal, Maternal, Maternal! 46P was raised by Cole Creek Angus in Billings Montana. We toured their cow herd last year again. Possibly one of the best herds we have been in. Not a bad foot or udder to be found. We saw a large number of 46P sired cows that were 13 years old at the time, that being the reason we sourced 46P semen to use in our herd. Along with the super strong maternal side, 46P has sired some dandy bull calves. Real easy fleshing, deep sided cattle.

A new A.I. sire we found that we are really impressed with. Excellent set of calves, long bodied, great top and really good hind quarters and light birth weights. The heifer calves are really what we are looking for, easy keeping, and moderate frame, with extra volume. Super looking dam that produced Courage 25L. We had bred heifers calving this past spring, excellent udders on these Courage bred cattle.

A walking bull we purchased from Stuart Cattle Station, spring of 2014. 82A is as deep as you will find but yet the calving ease that all ranchers are looking for. 82A may be one of the most docile bulls we have found. The female side of things is even more exciting. We went to Stuart Ranch before purchasing 82A and seen both the dam and grandam. The grandam was 12 at that time and after seeing both of them we were determined to own the bull!

A walking bull we raised going back to Thunder on his sire side. Calving ease with great growth and the female side is very attractive. 296B is an incredibly long bull with great depth.

A new A.I. sire we are really excited about. The bull was recommended to us from our good friends at Universal Semen Sales in Great Falls. From a couple past references they gave us on bulls, explaining how we would absolutely love the females, we sure have! They had told us that the True Grit female side is absolutely outstanding, so we were sold quickly on giving him a try. A low birth weight sire with tremendous growth. After A.I.'ing 30+ heifers to True Grit we have confidence he can be used safely on heifers. Looking like another all around kind of bull.

An A.I. sire we used raised by Flesch Angus at Shelby Montana. The first calves registered in Canada. Very attractive cattle with great growth and super calving ease. 86 calves registered and bull calves average 79 lbs. and 73 lbs. on heifer calves out of mostly mature cows. We believe the extreme calving ease is real. Super excited about the female side of Black Gold backed by some super maternal genetics.

An A.I. heifer bull we used from Cole Creek bloodlines. Extreme docility with a very moderate birth weight and has excellent performance. We ourselves are very pleased with the growth of these cattle after they were weaned. Competing very well with all the other performance sires. Once again, going back to Cedar Ridge these cattle are displaying that natural ease of flesh. The real "cow mans" kind of cattle! Last spring we had numerous Cedar Wind heifers calving, every heifer that calved had a perfect udder. Not often you can say that with purchased semen from a catalogue.
