FORM & FUNCTION FEMALE SALE

THURSDAY - DECEMBER 13 2018 - 1PM - LLOYDMINSTER EXHIBITION GROUNDS

Welcome

Welcome to the 2018 Form and Function, year one proved to be a great year for the first sale with a great set of cattle and even better set of people. I had a breeder call me the other day and the conversation moved towards cattle and who owns him, his comment was that he felt the people who owned them were more important than the cattle himself! I couldn't agree more! The cattle are like the people and you'd better make sure they are the right people. We have a great set of people gathered as consignors gather for this sale as well. Centered in Lloydminster as the hub of business on both sides of the border, this sale has been offered to any and everyone who would like to consign to it if they would allow the cattle to be selected from their herd and what a set we have gathered.

Join us Wednesday evening for a pre-sale viewing of the cattle with some hospitality and again at 1pm on Thursday the 13th for the sale. Whether it be a show heifer, brood cow prospect or a herdbull we have the animals that will move your program forward. There's no favorite type here it's all about the cattle and being recognized for their value. Should you have any questions feel free to contact any of the consignors, sales staff or Mark, Devin or myself regarding the offering, you will not be disappointed!

See you sale day!

Shane Castle

Cold Play is one of the elite bulls that our breeding program has produced. Sired by the 2016 Farmfair Gr Ch bull Northline Cool Cat who has done a fabulous job siring show winning bulls and females. Dam of Cold Play is Northline Rachel 903U, a big volume, easy doing, great uddered cow who never misses. Cold Play combines calving ease, optimum muscle shape, structural integrity, performance and an amazing look.

Northline Cool Cat 76B - Sire of Cold Play

Northline Rachel 903U - Dam of Cold Play

BLACK BRED HEIFERS

Nesset Lake

TYLER HARRIS

Driven progeny are very structurally correct, moderate in stature, with ample thickness. 68E's dam is a long-bodied, smooth-made cow purchased from the Touch of Class sale from Eastondale Angus. We AI'd the majority of our heifers Sitz Logic, and we were so pleased with his progeny the first go around.

Nesset Lake

TYLER HARRIS

extremely pleased with his offspring as they always have lots of depth and natural thickness. 168E has a very maternal pedigree with Tiger, Really Windy, and Net Worth. The coupon she is carrying will be an added bonus, with our Sitz Logic progeny being very popular.

Pedersen Livestock

TYLER HARRIS

AI'd April 1st to Wil-Dorr Prince 7014T W1Y Exposed to HF Espionage 24D April 13th - May 28 A big middle, soggy made, individual with all her future ahead of her. Her pedigree has two very influential sires; Happyvale Total 22N and Happyvale Bando 64T, have made a deep impact in our program leaving us with a wonderful set of females to build from. Add SAV International on the top side and it simply makes for a recipe for success. This female will go on and work in anyone's program.

A top end bred heifer from the Allandale Angus program that will be considered to enter into your front pasture pen of females at home. She is a very powerful, well made bred heifer that is setting down a perfect udder already. Wayne's International bred heifers at the Northern sale were very well accepted because of the volume of the females and their easy fleshing ability. Value added in the service to the Musgrvae Stunner 416 bull as well in this overall complete package.

AI'ed April 10 to Musgrave Stunner 416. Exposed to Bar-E-L Global 26E from June 1 to Aug 15. Safe to A.I. Date.

Country Lane Bride 42E is a tanky, easy-fleshing female from the heart of our replacement heifer pen. She's deep, angular with tremendous spring of rib in a very feminine package. She isn't one we were eager to part with but Devin was very persuasive. Her Mother has produced three females with a fourth on the way. Her service sire, 1E is a Boyd Authority calf that came in through the 2016 Brooking On-line Sale. We are very excited for our next calf crop as

we anticipate great things with the combined Beauty 6R and Boyd Authority genetic combination. This powerful, broody female is not one to miss! Pasture exposed to Country Lane Authority 1E from May 1 to June 25. Observed bred May 24 and preg checked due to calve March 2.

Service AI April 4/18 Musgrave 316 Stunner (Preg checked favourable to the AI) Pasture exposed April 18/18 - June 25/18 to Roy Mac Renown 9E. At first glance you can't help but be impressed by the capacity and overall mass this females possesses. 66E is the product of a focus on maternal traits and functionality. When you have a pedigree with the likes of SAV Final Answer, Wiwa Creek Monarch, & KCF Bennett Total combined with her physical attributes,

it's a recipe for success. Maybe the most intriguing aspect of this female is the fact that she is favourable to the AI service of Musgrave 316 Stunner who has become one of the most sought after young bulls in the angus breed.

A top pick from our bred heifers here at the farm. Garnier Barbara 405E is a real power heifer, she shows off superb depth with substantial length of body. A great result from crossing an International daughter with a home raised Pioneer son. Bred to Garnier Big Sky 299D, set to calve middle of March.

Here is a heifer that is easy on the eyes! Garnier Miss Rose 465E is a very smooth put together heifer whose femininity shines through. A great addition to any herd. Miss Rose is out of a Density son bought from Southview Ranch. Bred to Garnier Big Sky 299D, set to calve middle of March.

This international Bred Heifer was never supposed to leave our herd, but some slick talking from Mr. Castle, convinced us to let her come. This bred has it all, she needs to be out on the show road, she really does have it all. Deep, soggy, showy and flashy. Excellent feet and udder and tons of hair. She is bred to our \$25,000 dollar SiFi bull from Northline who is a Daines Heavy Si son. Not only does this bred heifer have donor cow and herd changer all over her, the calf she is carrying should be pretty darn good too.

Exposed to Northline SIFI 776C April 1 to June 1. Due end of Jan

Here we have a heifer on offer from one of our top cow families. This one has a different twist being from the RNRF Blackman 78Z who is a straight Canadian sire that we purchased part of to add performance and to keep size in our genetic base. 153F is a long sided deep bodied heifer that will boast a beautiful udder one day as the females on both sides are known for. The Lass cow family is ever growing at Avelyn Angus as we have kept many through the years as they have stood the test of time. The Grand-dam is nearly 14 years old and still carries a youthful appearance.

From deep in the heart of our heifer pen we offer you a heifer we normally wouldn't. We let Shane pick some good ones & he took this one easily. We think a lot of this calf & her dam as they are part of the show string out this fall. They recently were crowned Champion 2 year old & Champion Senior Female at the Saskatchewan Jr. Angus show in Lloydminster. Big barreled, long, feminine & fancy are words that many of our peers used to describe this young female. The calf is sired by much talked about and widely used Musgrave Sky High 1535. People are excited about this young sire and there are many great calves on the ground from what we have seen and heard. Don't miss out on opportunity to take home one from the first calf crop here in Alberta!

Roy Mac Eline 86F is another beautiful daughter out of our senior herdsire, Johnston Angus Valley 802B. Year after year he throws us an impeccable set of females, this female is no different. Her dam consistently raises the longest calves in the pen. You have to appreciate the stoutness of leg and structural correctness when you examine this calf. Throw in a big hip, tons of hair and a gorgeous front end and you have a great combination. She's a female that will be a great addition to anyone herd.

Roy Mac Pride 10F is a great example of what we were expecting when we decided to introduce more AI genetics into our program. The last two years we have used SAV Renown 3439 in our synronization program and have been thrilled with the results. Pride 10F is most definitely one the most unique and powerful renown daughters we have produced to date. We were hesitant to give up a Renown female but we pride ourselves on bringing the best so here she is. Her dam is a first time mother who traces back to the Early Sunset program. Don't miss on this one!

52F is a long spined, big bodied ET daughter of our productive Erica cow. Purchased as one of the top selling cows at the KBJ dispersal, Erica 568W has absolutely amazed us with her production. She has two outstanding sons in our bull pen this year as well as a flush sister to 52F in the keeper pen. This well balanced, quiet heifer calf is one we believe that will become a great brood cow, carrying on in her dams footsteps raising top end herd bulls or or replacement heifers.

Act wwt 885lbs on October 6th.

A front pasture type of heifer calf with lots of style. She is sired by our new herdsire Remitall Deploy 38D, that put over 40 calves on the ground by natural service in his first year here. The late Doug Henderson sourced him out for us and we couldn't be more pleased with his selection. This heifer's dam is an Eastondale Laramie female which have proven to be very productive.

A female that is absolutely explosive & massive in her rib shape & depth of side. Wide topped & easy fleshing yet maintaining herself in an attractive package. We are very high on this female & reluctant to let her go. She will be a part of our show string this fall at Stockade Roundup & Farmfair where we feel she will find some friends. Her mother always clips a terrific coupon. Her maternal sister sold to Rio Grande Angus & went on to win the 4H division at the Peace Bull Congress. If you want one to drag around to the shows or be a herd building matron have a look at this sweetheart. The Source daughters have beautiful udders & maintain themselves as easy fleshing momma cows.

You really have to admire the look and angular design to these Sky High daughters. They are very nice in their shoulder angle and refined through the front end yet follow through to have enough to them as well. This female potential to do great things for anyone that likes to show cattle. We feel she could have a huge future as a bred heifer. Her dam is a beautifully uddered, young, Grid Topper daughter and her Grandam had her last calf here this spring at 15 years old. Longevity and production bred into this one.

This is one of the first heifers to sell from HF Espionage 24D the \$30,000 member of Hamilton's Denver pen of three. The Espionage daughters are nice, moderate, super haired females. The Undiscovered cow family, which, stems from our old 58S donor have been a landmark in our program and I think this young lady fits that bill. They have produced high selling females and bulls in many sales. Consistency can be the hardest thing to breed in and it is locked in here. Grab hold of her!

We at Matlock, would like to Thank Shane for letting us join in the sale. This is our first time selling an Angus in a sale. We purchased our first Red Angus 9 yrs ago. We have since switched to Blacks. We are slowly building a herd. We enjoyed showing Shane the Cow Herd, end of July. Docility is at the top of the list. We also strive for length, depth, thickness, structural soundness & good udders. We feel Fizz 41F fits into that very well. She would make an ideal Jr

project as She is Very Quiet & loves to be worked with. She also has length & natural thickness. Her Dam & Grand Dam are 2 very hardworking females. She will also be DNA'd by sale time.

A daughter of Earthington Ice Cap 305C, Cajun IC Fancy 18F pops big square hip, flat top, loads of capacity, smooth feminine front end and a world of hair. The first calf out of a RB Tour of Duty daughter, 18F posted a 205 day weight of 701 pounds. Her EPD's place her in the top 3% of the breed

for growth traits. We employed Ice Cap on our yearling heifers and a number of select cows in 2017 and one year later, we are definitely happy that we did. Tremendous performance with light birth weights, great eye appeal and loads of hair.....Ice Cap will be utilized again. With a tremendous disposition and eye appeal, Fancy 18F should garner a second look.

Cajun MI Ellen 8F is the daughter & granddaughter of females designated Elite by the Canadian Angus Association. We purchased her granddam sired by EXT from Lyall Edgerton's dispersal of Botany Angus with the intent of establishing a new cow family...it worked as Botany Ellen 24G (designated Elite in 2010) left two daughters in the herd who have been designated as Elite. Their progeny just flat out generate revenue as they sell first & sell high. Sired by Genex's MAR Innovation 251, 8F is a moderate framed female with loads of body length. If you are searching for maternal performance, 8F's background & genetics indicate that she will produce calves sought after.

The word that comes to mind when you first assess Cajun CU Countess 27F is elegance. Extremely well balanced, she is as smooth as glass from her butt end to her nose, a March heifer, she has that Angus character that people seek out. We purchased her dam from Andy Hart in 2010 at his dispersal due to the Bando 5175 and Right Time influence and it worked out. As 50T has been a strong productive female and then combined with the influence of EXAR Upshot on the top side, 27F will develop into a strong maternal female.

Family Ties Queen 28F. Looky look what we have here, a Johnny Cash daughter that goes back to Barstow Cash grand dad. Talk about flashy to look at and friendly to handle. She is built with power and perfection, tons of hair with good fundamentals from feet to udder development and all kinds of muscle. Take her home and make her yours.

Here is a Final Answer daughter from an Allendale Cow we purchased at the Lloyd sale last year. She is flashy and pretty, well put together with lots of muscle and middle to compliment her. She can be either your next donor cow or your next show project. Not many final Answer Daughters for sale anymore so have a good look at her on sale day and don't pass her up.

Here is a female that has cow written all over her. She is a typical Breakout female. Moderate, wedge shaped and easy fleshing. Breakout is proving to be an udder improver on his first round of females. The Rose cow family is a pillar of our operation. She carries AI service to Red Lauron Cassanova 69C, with a due date for late February. Help yourself to a female that will be a mainstay in any operation for years to come.

Pepi 53E is the first Cassanova daughter to be offered for sale. When we purchased him, we felt we got a herdsire out of Laurons top cow. His first set of daughters are proving just that. Stylish in her makeup, she looks to be dropping a great udder with that typical length of spine that her sire offers. Her dam is the type you build a herd around. She is carrying service to a unique proven sire. She is due for a mid February calf to Red Beckton Hustler T615 C2, a bull fully proven at McArthur Livestock in Hanna.

Express 753E is an easy doing, power packed, moderate framed heifer. A standout from birth, so much volume and thickness. First daughter of Red Wilbar Double Take 701C to sell. Double Take was \$22,000 high seller at Wilbar Bull Sale, selected for his balanced volume and his exceptional mother, Red Wilbar Brndina 638S. On top of that genetically this heifer is stacked: Gloria cow family and Bessie 259T from Bar-E-L along with Redman 1T and produces top calves every time. Express 753E is way along in calf for 1Y and

Mulberry (Ushas 836U). Her mother Arrow 373A is as sound and right as possible and produces top calves every time. Express 753E is way along in calf for 1Y and February calving to Red Allison Komodo 50E, a dark red, long sided son of WPRR Right Turn. Expect an easy born calf with excellent growth and an exceptional mother cow.

Element 771E is a foundation herd building heifer. A feminine, eye catching, standout heifer, with great dark feet and leg structure coming from her sire New Callahan 562C and a top of the herd young dam who stems from the very same cow Yoshee 137Y as our other heifer; bringing top end form and function to this sale. Strong genetic pedigree here with Pasquale 213P on the top side, U2 Magnum, Redman 1T and Mulberry (Ushas 836U) on the bottom side.

Element 771E is carrying early service in February to our very dark red, super calving ease Bar-E-L Cadet 1C, a Crowfoot 4 Aces son. He stamps his calves with the colour, muscle shape and structure that are always top picks from our sale pen.

Lemay 100'18 is the first daughter of Shocker that we are offering. The Shocker females are proving to be the type of cattle that we really like. 100F will be one of two shocker females that we are selling this fall, all other daughters will be staying in the replacement pen. Shocker himself was alongside his dam when they won supreme Champion at Lloyd Stockade and Farmfair. When we seen Shocker as a Yearling bull on the show road, we knew

he was a bull that we had to introduce into our program because of his sheer capacity and super dam. Maternal Sister sold through this sale last year to J Lazy A Angus. The Lemay cow family has been very consistent for us and always brings in a top calf.

Miss Lass was a hard female to part with as she is a maternal sib to our Pioneer bull that has been siring easy calving and high performance calves for us. Miss Lass 5A was a bred heifer that we added to the herd when Clint Kuntz dispersed the remainder of his herd in 2014, being the dam to our Pioneer bull

and also a daughter retained in herd. 168F is also the first Reality female that we will be selling from this great young sire. We added Reality from Bar-E-L and he's a grandson of the outcross 4 Aces bull. We have been extremely happy with his calves on his rookie calf crop. They are born easy and continue to grow and excel all year long. We are really looking forward to seeing these female develop.

This female is by our herdsire we purchased from the KBJ Dispersal Sale. We are very impressed with all his calves this year as they stood out from the rest. She is a very smooth female that will make a great female one day going back to the great Lemay cow family. You can't go wrong with adding her to your herd. Would make a great Junior project.

Wright's Angus

MB from Wraz, as a bred heifer; she is one we are building a cow family around. 18F is an opportunity that will fit in the most discriminating cow herd.

Countess 18F is a female that possesses tremendous look, performance, and structure. 18F is as powerful as you can make a female, from the head to the tail, while keeping balance and eye appeal intact. 18F has a feminine, angular look that grabs your attention with the added hair and mass of body. 18F is the type of female that has the potential to be highly profitable for years to come. 18F's Dam was a high selling lot out of the Keystone sale in Brandon,

9F is a big bodied, dark red heifer, that has a tremendous amount of quality about her. 9F was the pick of the heifer calves by Shane this summer in the group of cows we acquired from Scott and Kimberly Ecklund. 9F was mothered by a tremendous black Six-Mile bred cow that is destined to be in our donor pen. 9F is a heifer with a tremendous future and the opportunity is yours.

Bank Note 4040 took the Angus scene by storm in the fall of 2014 as a calf at the side of his awesome dam, Rose 918 who captured the attention of all. A model Angus female with the parts all in the right place definitely the dam to a herdbull. Since his first set of calves have hit the ground Bank Note has impressed all with his calving ease, growth and best of all his style to boot. Now with his first females calved, people are really pumped. Semen is limited so grab it while you can! FOB Allandale Angus - *Selling 20 Straws*
