NEW GENERATION
female sale

DECEMBER 2, 2018
Red Angus - Black Angus - Simmental
BRANDON, MANITOBA

Welcome

to the Mar Mac Farms New Generation 2nd Female Sale. We are excited to offer you our entire bred heifer genetics from a family program that has been breeding purebred cattle for 6 decades. For those of you who don't know us we are a family run operation who make our living in agriculture. Our children Brett and Melissa are the 5th generation to be involved on this farm and the agriculture industry.

We held our first fall female sale in 2015, and at that time we committed to not having another for 3 years. It is our belief that to maintain the quality in our cowherd and to be able to offer the entire group of bred heifers that the interval between sales had to be 3 years.

Our cowherd has to work for us. They run on grass till December, then put onto corn and bale grazing till calving time. They are expected to calve and nurse on their own and get rebred or they are shipped. Our cowherd is culled annually on feet, structure, udders, performance, fertility and disposition.

As you look through this catalogue you will see that we believe strongly in cow families and I can say that there are females in this offering that will leave a void in our program. As I said earlier that is why there is a 3 year interval between sales. Our heifers are also bred to proven and calving ease sires; we want the heifers to calve out for the buyers the first year.

The bred heifers are very deep bodied correct individuals that will be an asset to any program. The heifer calves on offer are from the top end of our program. All of our 2018 show heifer calves are in this sale and are out of some of our top cow families. Juniors have a look, you may find your next show heifer here with the bonus of her going on to be a foundation cow in your cowherd. The heifer calves in this sale had no creep or grain till they were weaned the second week in September.

All of our females are on a full vaccination program which is explained by our veterinarian on page 3 in this catalogue.

Feel free to stop in anytime to view the sale offering and discuss them with us. You can view the catalog, pictures and videos online at www.marmacfarms.net.

If you can not attend the sale please contact any of our family or any of the Sale Staff and Consultants. We value each and every one of their opinions and appreciate what they do for the beef business each and every day.

Join us on Saturday night at hospitality room at the Keystone Centre for some refreshments and visiting.

Looking forward to visiting with you on this strong group of Angus, Red Angus and Simmental females.

T BAR C CATTLE CO.

CHRIS DOLEY: 306-220-5006

Welcome to Mar Mac's "New Generation" Female Sale. This family seed stock operation is steeped in history and tradition, producing and supplying herd improving breeding packages for the livestock industry over several generations. Both born and raised in purebred operations, Blair, Lois and now the kids, are dedicated to improving the beef cattle industry.

"New Generation" comes to you with outstanding opportunities to attain value-added breeding stock for your program. Whether you are in the market for Red or Black Angus or Simmental, this event is one you will not want to miss. The bred females are powerful and broody, out of top cow families and destined to become front pasture foundation females carrying early services... you'll be able to clip your first coupon in a month or so. The fancy 2018 heifer calves are exciting and futuristic. As many would know, Blair and Lois are very dedicated supporters of the Junior movement, as they were members in their own youth. (Lois' father and mother were catalysts in founding the Canadian Junior Hereford Association several decades ago.) The show prospects are features with Juniors and 4-H members in mind.

At this time of the year, we must take stock... eliminate the old, nonproductive females and replace them with fresh, new genetics to start your own "Mar Mac cow family" and as we near year-end, what a great opportunity to save some tax dollars while improving your program.

Dedication to the livestock industry by this family is wide based. In addition to operating a farming operation, a breeding operation with two breeds of cattle and hosting a highly successful bull sale, they still take a large amount of time volunteering their services to the livestock industry in many forms... to that we would like to say, "thank you!"

Plan to make the first weekend in December, a livestock weekend in Brandon. With the Keystone on Saturday and "New Generation" on Sunday, you will be treated to great hospitality and outstanding livestock... plan to be there!

If we, at T Bar C, may be of any assistance prior to or sale day, feel free to contact any of the T Bar Team for professional and confidential assistance.

BOHRSON MARKETING

DARRYL SNIDER: 780-385-5561

First of all thanks to Blair and Lois and family of Mar Mac Farms for giving us the opportunity to evaluate such a fine set of bred heifers and heifer calves. This year select yearlings that are right from the top of their breeding program. These heifers will make you a marketable calf that you can sell in your production sale or put back in your herd.. The group of heifer calves the day I was there were out in the pasture just south east of the farm. The heifer calves that were selected I feel confident and comfortable they are going to make tremendous cows everyone of them, or you can put a halter on and take them to town.

If you are unable to make this event, please give myself or Matt Criddle a call or any one of the capable sale staff and we will be more than happy to assist you

MACKENZIE MARKETING

BRYAN MACKENZIE: 403-627-8266

Three short years ago, the McRae Family had a female Sale on their ranch, I remember thinking to myself "what a fantastic set of sale cattle!" That set would be hard to duplicate let alone take it up a notch. After touring the set of bred heifers this year, all 3 breeds, I believe firmly that they have done just that. The depth, the strength, the performance, and the femininity in these bred is remarkable...and memorable. Now... for the heifer calves... you have to come on this wonderful Manitoba Angus weekend of December 1st and 2nd to see these herd enhancing heifer calves at Mar Mac. Attend the Keystone Klassic Sale on Saturday in Brandon, at one of the best facilities in the entire country and greatest hotel Canad Inn. Then Sunday morning, take the short drive out, south of town to the sale site for this incredible set of Mar Mac females. If you cannot attend - I can be available to assist you in your selections @ 403-627-8266. The last time I was here and purchased several head on order for all over Western Canada. This sale offers a little bit of everything for everyone!

VIRDEN ANIMAL HOSPITAL

NADINE WOHLGEMUTH

Welcome to Mar Mac Farms New Generation Female sale. I have had the pleasure of working with the McRae's for the last several years as their herd health veterinarian. The cattle at Mar Mac Farms are on an extensive herd health program focusing on disease prevention.

Newborn calves are vaccinated at 7-10 days of age with Inforce IN(BRSV, IBR, PI3) and Once PMH IN (Mannhemia and Pasturella bacteria) to prevent both viral and bacterial pneumonia in these young calves. Early pneumonia prevention aids in allowing these calves to maximize their growth potential.

Cows and replacement heifers are vaccinated with Express 5 FP, a modified live 5 way viral vaccine (BVD I&II, IBR, BRSV AND PI3) prior to breeding to prevent losses from reproductive diseases. Replacement heifers also receive a third booster of Clostridial vaccine prior to breeding as well.

At grass turn out the calves receive a second booster dose of Inforce IN and an initial dose of Bovishield BVD One Shot (BVD and Mannhemia) and Ultrabac 7/Somubac (Blackleg and H.somnus protection).

In the fall at Mar Mac Farms weaning is done with the low stress quiet weaner method. Nose clips are inserted into the calves to prevent sucking. Calves are returned to pasture with their cows for 5-7 days. At the time of nose clip insertion, fall booster vaccines are administered. They receive Bovishield Gold 5 One Shot (BVD, BRSV, IBR, PI3 and Mannhemia) and an Ultrabac 7/Somubac booster. Calves also received an initial deworming with Safeguard. Pour on Ivermectin products are administered in mid October as a second deworming and for external parasite control.

The cows and bred heifers will also receive pour on Ivermectin in mid October. They are also vaccinated with Scour Bos 9 in mid November for scour prevention in the upcoming calf crop. Bred heifers will require a booster dose with Scour Bos 4 in early January to complete the scour prevention program.

Purebred Breeder of the Year MAR MAC FARMS

PRINTED WITH PERMISSION FROM
THE CANADIAN RED ANGUS
PROMOTIONAL SOCIETY 2018.

Growing up in the purebred cattle industry, Blair and Lois McRae along with their family Brett McRae and Melissa McRae operate a fourth generation family farm south of Brandon, Manitoba with 280 breeding females. The McRae family has been involved with the Angus breed since 1955 and in 2005 received the 50 year award from the Canadian Angus Association. Blair was involved in Black Angus and Simmental cattle. Lois Gordon's family raised Black Angus, Simmental, Shorthorn and Polled Hereford cattle under the name Kinnaber Cattle Co.

Thirty-three years ago, Blair and Lois ventured into Red Angus cattle. At that time, they researched the benefits of the Red Angus breed and were interested in the strong maternal traits, calving ease, doability, disposition and crossing well with other breeds. They also were encouraged to pursue the breed by Lois's dad, Bob Gordon, who had toured many Red Angus programs and saw the marketability of the breed. Blair and Lois decided it was an ideal time to expand their breeding program of Simmental and Angus with the addition of Red Angus genetics.

Three foundation females were purchased from Wayne Heape, which proved to be a wise investment as one of the females bred to Rambo 502 went on to produce Red McRae's Blazer 336C. Blazer was eventually leased to Alta Genetics and produced many herd building females.

Blair and Lois's venture into the Red Angus marketing also included testing bulls at the Red Power Bull Test and South West Bull Development Centre. In talking to the commercial producers, they learned the main reason many cattlemen were purchasing Red Angus was for calving ease. Thus, since the beginning, Mar Mac has focused on producing Red Angus cattle with length, natural thickness and adequate birth weights. As longtime cattle producers themselves, they know that cattlemen want a calf that comes out easy but weighs up in the fall to put dollars in the producer's pockets.

In their cowherd, Mar Mac makes culling decisions each year based on fertility, feet, and structure. They know the cows have to work for their operation if they are going to work in a customer's operation. Additionally, Mar Mac does not creep feed so they can see the job each female is doing in producing their calves. In the fall and winter, cattle graze on corn stalks or bale graze up until late January when they are put on a TMR until late May at pasture turnout. Throughout the year, they promote lots of space to encourage lots of exercise. The Mar Mac program utilizes visual selection along with tools available to manage their cowherd.

Over the past three decades, embryo transplant and A.I. has been used extensively in the Mar Mac program. This has allowed them to expand their Red Angus program using proven trusted genetics from their own females including Frado, Reba, Lady Trooper, Ruby and more. Mar Mac has many noted cow families that have been important in building the program. Mar Mac has exported cattle to the United States, and with the help of Davis Rairdan ET, they have marketed embryos around the world. In 2004, they were offered the opportunity to expand their Red Angus program and purchased the Buck Valley Red Angus herd. This has been a strong addition to the Mar Mac cowherd and has allowed for outcross genetics.

Additionally, the McRae's believe it is very important to be involved in the breed associations. Lois served from 1987-2007 on the Manitoba Angus Association and President in 1991, 1992, 2004, 2005 and 2007. During that time, the Board started the Keystone Klassic (Red and Black Angus) Sale of which Mar Mac Farms was an original member. The Association wanted to expand the Angus show at Ag Ex with both a Red Angus and Black Angus show. Lois was part of the board who were involved in discussions with the Agribition officials on how to get the Red Angus Champions in the Royal Bank Supreme Show, and they have been included since 2008. From 2008- 2014, Lois served as Manitoba director on the Canadian Angus board. One of the highlights was being on the board when the Angus Central building

was built for the Angus membership. Blair was the Canadian Angus field man in Manitoba from 2011-2013.

Both Blair and Lois were raised in the 4-H program and were leaders for 10 years. Blair was a founding member of the Canadian Young Simmental Association and Lois was a founding member of the Canadian Junior Hereford Association. With that background, it was important to them to have their own children participate in the 4-H and Junior programs. Brett was a Canadian Junior Angus director from 2005-2007 and Melissa was Canadian Junior Angus director from 2007-2010. Melissa was selected to represent Canada at the World Angus Forum Youth Team and the team she was on won the competition in New Zealand. The McRae family has continued their commitment to promoting the future of the beef industry, and in 2007 Lois, Blair and another fellow cattle breeder initiated the Manitoba Youth Beef Roundup weekend in Manitoba. This is an educational weekend with a cattle show for Juniors of All Breeds. In its 11th year, it is getting stronger each year.

Breed promotion is also very important to the Mar Mac program and some highlights include:

-2001 Mar Mac was one of the hosts of the Canadian Red Promotion Society Tour.

- 2005 Mar Mac hosted the Canadian Junior Angus Showdown cook-off barbecue and herd displays at the farm. This was the 100th Anniversary of Angus cattle in Canada and Manitoba Angus hosted the Canadian Angus Annual Meetings along with Showdown all in one location – making for a unique event.

-2007 Mar Mac was honored to be Manitoba Angus Purebred Breeder of the Year.

-2009 Mar Mac exhibited Red McRae's Vision 50T, a Mulberry son who was 2nd in class at the World Angus Forum at Spruce Meadows.

-2010 One of the family's proudest memories when Red McRae's Reba Lee 121W was selected as Reserve Grand Champion Red Angus female at Agribition. The McRae family has participated at Agribition every year since it began in 1971. Blair and Lois have had the honor of judging a number of breed shows at Agribition, Farm Fair and 4-H shows.

-2013-Red Mar Mac Lady Trooper 114Z was awarded the Canadian Red Angus Show Female of the year. She is now a foundation female in their herd.

The annual Mar Mac Bull Sale is held the first part of March since 1997, featuring Red Angus bulls along with the Simmental and Black Angus bulls. Mar Mac bulls are out working in purebred and

commercial herds across Canada and the United States. Mar Mac Red Angus herd sires include: Ribeye 346U, Mohican, Capacity, Neptune, Vision 50T, Ripzone and Riddler. Mar Mac females are marketed at our New Generation Female Sale December 2, 2018, Keystone Classic, Manitoba Magic and Red Roundup. In 2014 at Red Roundup, Mar Mac was pleased to exhibit the High selling bred heifer and in 2015 one of her daughters was one of the high selling bred heifers at Red Roundup.

Today, Blair and Lois run 100 Red Angus breeding females along with 100 Simmental and Black Angus females. Brett runs a separate herd of 80 Red and Black Angus females under McRae Land and Livestock. Melissa operates a graphic design, video and cattle photography business, Prairie Pistol Designs along with her own Simmental cattle.

Blair and Lois note that the Red Angus fellowship, strong traits of the Red Angus cattle and the marketability creates lots of enthusiasm for this great breed, and they are very proud to be part of this organization.

Red Angus

You will notice in our catalogue that we have not printed the EPD's for the Red Angus females. With the decision made by the Canadian Angus Association to change to the new "Angus One program" for their EPD calculations. We feel that they do not correctly reflect the true evaluation of the Red Angus breed. Our main focus is to breed Red Angus cattle with calving ease, performance, ease of fleshing and structural correctness, that will work in the beef industry. We will continue to focus on that.

The lead off female is no coincidence. I remember the day that Blair and I were fencing and Nate Marin called from the Brylor Sale and advised us on some of the females we were interested in. Ended up we bought Red Brylor Bonita 65X and what a legend she has become. This moderate framed, thick made, feminine female is sure an asset to our program. Sons of 65X working in the Klassen and Pedersen herds. Daughter 51B was the high selling female in the 2015 New Generation Sale for \$ 24,000 to Dale McKay and 51B has sons working in the Pedersen herd, was successfully flushed and flush sold to Triple L Angus and a May bull calf. Capacity seems to work extremely well with this cow as her first daughter sold ½ interest at Red Roundup for \$10,000, this is 104E's full sister and we then flushed 65X and implanted 5 embryos and got 5 calves. One is in the sale Lot 19 and one of our feature bull calves in 2018 is Red Mar Mac Marshall 21F a full brother. We sold embryos in the Legacy Sale and Nine Mile Ranch purchased the 65X x Capacity eggs. Bonita was purchased from our good friends and long time Red Angus enthusiasts, Bryan and Sherry MacKenzie at Brylor Ranch and every time Bryan comes out he has been impressed with the job this 65X female is doing, just ask him.

104E SELLS BRED MAY 12 TO 9 MILE FRANCHISE 6305 -3555188US- (NO EXPOSURE)

We purchased a semen package at the 2017 Canadian Red Angus Red Roundup Sale and serviced a number of heifers to this exciting new outcross calving ease sire.

Here is an easy fleshing, thick made female from the Bonita cow family that could be the foundation of a herd with the depth of maternal and paternal strength and bred in consistency.

Mar Mac Farms would like to retain a future flush in 104E.

The **Ruby cow family** is another one of the foundation families. Ruby 10T has been a very functional, moderate framed female who never missed. 10T's daughters were right at the top at the 2015 New Generation Female sale selling to Blair's, Ag, Wraz Red Angus and Fraser Farms. Her daughter 24Y is a Ribeye female who is like her mother never misses. 24Y was Heifer Calf Champion the last time the National Angus show was in Brandon and progeny working at T Bar K, Guild Farms, Rooke Farms and 6E's half brother is an exciting March son of our Ripzone bull. A cow family you can build a herd of cows around.

Mar Mac Farms would like to retain the right to purchase 1/2 of this female back & a future flush

Lois did not want to sell this heifer but we said we were offering all of our bred heifers so here she is. With the marketing potential and outcross depth of quality in the sires and dams, this female could hit a homerun. Look at the dark red color, natural thickness and eye appeal this is one to check out on sale day. Take a look at all the top sires in the pedigree, Driven, Ribeye, Vision 65T and the cow families that are foundation females at Mar Mac **Brandi 9T, Ruby 10T, Sierra 42H**. If you are looking for a female to start a new cow family line or as a donor female here is Brandi 90E and bred to the outcross sire Franchise.

RED MCRAE'S FRADO 53J

Frado was flushed extensively to a number of Red Angus sires. Probably one of her most noted flushes was to Red Fine Line Mulberry when we got 17 live calves out of 19 embryos and one of them was Red McRae's Vision 50T. 50T is used every year in the heifer pen as he calves great and yet you still have a stout calf in the fall. 50T was also the sire of Red McRae's Reba Lee 121W, the Reserve Grand Champion Red Angus female at Agribiton and a class winner at Denver.

The Reba cow family, a cow family that works. 66P was the dam of our Reba 12S that sold to Scott Graham in Ontario and she produced the Red McRae's Reba 121W who was the Reserve Grand Champion Red Angus Female at Agribition 2010. 66P is a Elite/Premier Dam in the Canadian Angus Association since 2010 with 5 calves average ratio of 107. Spartan daughters have excellent udders and add some frame. 23E sells bred to our calving ease sire, Riddler.

Cattle that work...

DARREN AND CAROL VANCURREN, SUNBERRY ANGUS, ALBERTA

The two bred heifers, Reba 48B and Katie 72B, that Bryan Mackenzie bought for me out of the 2015 Mar Mac bred heifer sale have exceeded my expectations with both producing sale bulls on their first try, Replacement quality heifers on their second and both have bulls again this year by Red Six Mile Durant 393D and Red Sunberry Signature 4D that look exceptional and will for sure be in next years sale offering. The heifers have great udders, feet, and temperament and always maintain themselves in top condition.

EMMATT CREEK, WHITEWOOD, SK

Purchased this Spartan daughter at the Keystone Klassic Sale in 2017 and look at her first bull calf.

SHILOH CATTLE CO., ALBERTA

Purchased Red Mar Mac Debut 70D at the 2016 Mar Mac Bull Sale. Watch for Debut on the show circuit this year. A number of females are bred to Debut in the sale.

We decided when hosting the female sale that we would offer a select group of halter broke heifer calves. Juniors check out the Junior incentive program on page 2!

We purchased a group of Black Red carrier females from Anderson Cattle Co. and they have all proven themselves at Mar Mac. Some outcross genetics with Creed in the pedigree. We love our Creed daughters excellent milkers, feminine and have made top producing individuals. Here is a heifer that will make a dark cherry red addition to anyone's program.

Black Angus

In 1950, the Winnipeg Flood caused the Angus herd developed by the University of Manitoba and their "Managra" prefix to be moved to the W.F. McRae Farm. These Angus cattle were then sold to W.F. McRae to form the foundation herd. In 1955, W.F. McRae of Hayfield became a member of the Canadian Angus Association with his sons, Howard and Allan. The McRae family hosted the Manitoba Angus field day in 1955 at their farm, drawing 650 people. When Allan McRae married in May 1956, he and Howard divided the cowherd. This was the formation of Mar Mac Farms.

Throughout the 70's, the McRae's won many championship pens of 5 Black Angus steers along with carcass championships with Angus steers. The highlight was in 1976 when their Champion Angus Carcass sold for \$7.00 per lb. In 1979, Mar Mac Farms sold their mature cowherd to Brookmore Angus, Brookdale. Allan's eldest son "Blair" kept the heifer calf crop and continued to develop his Angus herd. In the late 70's, Blair served as a director on the Manitoba Angus Board.

In 1983, Blair married Lois (Gordon) of Souris and they developed their Black Angus program from Blair's Angus and a group of females Lois had brought from Kinnaber Cattle Co.

In 1987, McRae's Brittany 74 U was raised at Mar Mac and Grand Champion Female at Ag Ex in Brandon. At Agribition that year, we were made an offer for a good price to sell Brittany. As young beef producers just getting started we wanted to build out herd around this bloodline. In 2017, we have 7 generations of Brittany and Bridget females in our Black Program and two currently our donor females: McRae's Bridget 125T and McRae's Brandi 9T.

One big highlight was in 1990 as we raised the Grand Champion Black Angus Female at Ag Ex and she went on to be Reserve Grand Champion Angus Female at Canadian Western Agribition. She sold in the Agribition Sale for \$9750 to Randy Remington. Her first calf was a bull called Black Reign who went on to be the 1991 First Black Sweepstakes winner in Edmonton.

Black Angus bulls have been a major part of our bull sale and have gone on and worked in many herds, like Mar Mac Tiger 159Y sold for \$9500 to Ger-Lei Angus, SK in 2012 (he is the sire of the Tiger 170A who most of our females are out of) and Blair's Ag purchased Mar Mac Blueprint 56B for \$21,000. Just ask Kevin Blair what he thinks of the Blueprint females. Blueprint's other brothers are working in the Kembar Angus herd and the McPhail herd.

We have exported Black Angus cattle to United States and Davis Rairdan have exported Angus embryos around the world for Mar Mac Farms. This is the first time we have offered this large of group of Black Angus females as we have been building our numbers. These females are functional and will work in the purebred or commercial industry.

Brett expanded his Angus herd in 2013 with a select group of Black Angus Females from Fertile Valley Angus. In 2016, Brett acquired the use of 50 Black Angus Females from the Sandy Bar Herd to expand his Black Angus numbers. Brett operates under McRae Land and Livestock, and has a good selection of bred heifers in the sale.

Just a March 11 heifer that is full of maternal strength with Tiger and LT Driven. The Driven females are moderate framed good milking females. Her grand dam is Tiger Lily 25Y our donor female and goes back to the **Bridget cow family.**

MCRAE'S BRIDGET 81C

The Bridget Cow family all go back to Brittany a female who produced Brandi 81C, a New Trend 315 female. Mar Mac Tiger 170A, pictured on page 17, was a son of the Tiger 159Y who was the top selling bull in our 2012 Mar Mac Bull Sale and was purchased by Doug Howe for Gerlei Angus. A few years later Gerlei Farms had a production sale and we purchased 170A's dam in the sale bred to 159Y and that was how Mar Mac Tiger 170A was produced. 170A has left a real mark at Mar Mac with thick meaty bulls with great calving ease and broody females. Check out these 6 Tiger 170A females they will make great mother cows.

MCRAE LAND & LIVESTOCK

BRETT MCRAE 204-729-1018

I am pleased to offer 5 very good bred heifers in this years sale. All five of these heifers are out of cows that I am renting from Sandy Bar Angus, and came in-dam in 2016. After having the Sandy Bar cows here for a couple years now, I can say that I am impressed by their calving ease, and udder quality. McRae Land & Livestock cattle are selected for fertility, soundness, and low maintenance requirements. I put my cows to the test. I believe that in order to provide quality seed-stock, I need to make my cows work as hard or harder than the producers that I am selling animals to. I am very confident that these heifers will go out and work for you!

Simmental

In 1976, Mar Mac Farms started in the Simmental business by purchasing a package of females from Bar 5 Simmental which were the foundation of our herd. We were extremely impressed with the performance and mothering ability that we then decided to pursue a cowherd of Simmental females.

We have marketed our cattle through the Keystone Simmental Association since 1979 and Lois and Blair managed the Keystone Simmental Sale from 1990-2016.

We have built our program around cow families like Carli 14N, 765N, Macho Girl, Nike, Prissy, Patty and Deb. We specialize in performance, easy fleshing and marketable Red and Black Simmental cattle. We want them to go out and work in the commercial and purebred industry.

We host our annual bull sale on the farm on March 6, 2019 and our female sale is held every three years in December. The McRae's have been involved in the Simmental breed organizations both provincially and nationally. Blair is the current 1st Vice President of the Canadian Simmental Association. Our children grew up in the Young Canadian Simmental program and Blair was one of the founding directors of the Canadian Young Simmentals.

In 2018, Mar Mac Farms celebrates 42 years in the Simmental breed.

RED | HETRO POLLED | PUREBRED

We purchased the Deb at the D Bar C Cow herd dispersal as we were very impressed with the Deb cow family. This moderate framed female has amazed us with the quality of calves she brings in each fall. Her daughter sold in the 2015 New Generation Sale to Circle 7 Farms in SK. Strong maternal strength and bred to the outcross, calving ease, homo polled Limitless.

RED | HOMO POLLED | PUREBRED

A daughter of one of the females we purchased in the Twin Brae dispersal. Marksmen has left a strong set of females for this sale, he was one of Blair's picks at the Barry Labatte Bull Sale. She sells bred to our new homo polled Harvie Red Summit son and out of a Red Label granddaughter; EGC Everest.

CE 2.8 | BW 6.4 | WW 82.1 | YW 118.5 | MILK 21.7

EXPOSED MAY 23- JUNE 18 TO EGC EVEREST 145E -1224612-

Simmental

A Red Whiskey female out of Melissa's Red Iron Donor female. 76Z is a 1/2 sister to Mar Mac Carli 14N. The Red Iron females have made excellent broody cows just like the one Workman Brothers purchased from us at the Keystone Konnection Sale that went on to be one of the top females in their dispersal. This female would make a great show female for many Juniors, look at her length of body.

Thick, moderate framed, red white face daughter of the Macho cow family. Outcross genetics to make a great mother cow.
Homo polled test pending

Choice Lot

Here are two daughters of Double Bar D Royal. We had the misfortune of losing Royal after the first set of calves and boy were we disappointed. He has left us a strong set of females and bulls for the sales and we would like to retain some so here is another choice lot.

Homo test was inconclusive.

This is our 2018 Simmental show heifer and look at the length of body in this female. Length weighs and you can tell by her weaning weight. The Johnny Cash's calves have an excellent disposition and Swan 22F is no exception. We purchased her dam from Greg Goudy and she brings in a heavy weight calf each year. Juniors don't miss out on this Simmental show heifer and our Junior incentive program.

Cattle that work...

1- NORTH HILL SIMMENTALS, ALBERTA

purchased Mar Mac Gypsy Soul 126C has been a standout female for our operation since she arrived as a heifer. She has an excellent disposition, great udder and is extremely maternal. 126C has given us two tremendous bull calves, her first calf being our newest herd sire. She's an extremely long bodied female and it is her combination of power and being so smooth made that not only turns heads in the pasture, but the show ring as well.

2- NORTHERN LIGHT SIMMENTALS, MANITOBA

Carly Jo Carson purchased Mar Mac Cover Girl 115D.

Terms & Conditions

PIECE OF MIND - Livestock insurance will be available sale day from Keystone Livestock Services.

ACCIDENTS - Although every precaution will be taken to protect the safety and comfort of the buyers, neither the sale staff, auctioneer or Mar Mac assume any responsibility in this matter and disclaim any liability, legal or otherwise, in the event of an accident or loss of property.

TERMS - The terms of the sale are cash or cheque payable in Canadian Funds. The right of the property shall not pass until after settlement is made. The settlements must be made with the clerks before the cattle are released.

BREEDERS GUARANTEE - Cows represented as being pregnancy tested safe in calf have been examined and declared safe by a licensed veterinarian and will be accompanied by a vet certificate to this effect. They are considered breeders without further guarantee. For heifers under 12 months of age and purchased as single lots and who fail to conceive to the service of a bull known to be a breeder, the matter must be reported in writing to the seller before the heifer reaches 18 months of age. The seller shall have 6 additional months in which to prove that the said female is a breeder and may use any registered bull of the breed available to him. Any female returned will be at the purchaser's risk. No guarantee is given that a pregnant female will deliver live calves or that she will carry calves full term or that the calf carried will not be mummified. The seller is not responsible for damage caused by foreign bodied after the animal has been sold or for sickness not apparent at sale time. At no time shall the liability exceed the sale price.
